SEEDS

Ev. r.

BOUNTIFUL

1901

We have Northern Seeds.
 We have Eastern Seeds.
 We have Western Seeds.
 We have Southern Seeds.

ENGRAVED BY J. A. EVERITT

CHICAGO is situated in the center of the richest and most extensive agricultural region on the face of the globe. Every county is a busy population. Every acre capable of producing a bountiful harvest. The hub of the seed business should be, and is, here. Here are gathered seeds grown in the North, East, West and South, and you can obtain them with a saving of time, and a saving of freight or express equaling the value of the seeds, if shipped from one side of the country to the other.

PERSONAL TO ALL WHO BUY SEEDS

Indianapolis, Ind.,
January 1, 1901.

Dear Sir or Madam:

We are glad of the opportunity to place before you again our catalogue of seeds, etc., for 1901.

This catalogue is small as compared with some others you may receive, but we offer no apology. You will find by an examination that it contains what you want, and by comparing it with others that what we give in the cost of the catalogue we have taken off of the price of seeds. Therefore the interest of the seed buyer has always been kept in mind. All the money spent in issuing a seed catalogue must be paid by the seed buyer.

We wish to ask your particular attention to the Manufactured Articles in the back of the book, all of our own invention and each one made with the object of reducing labor and increasing crops. Some of these machines should be on every farm in the land. Where time, money and ease of doing your work are objects, labor-saving machines are appreciated. Where labor-saving machines are used we find the greatest progress and lightening. We commend our manufactured specialties to your careful consideration.

We will thank you very much to show this catalogue to your friends. Tell them we will mail them one free, or, better, get their order for O.K. Seeds and send it to yours. See terms on page 21.

Give one of the boys or girls permission to canvass the neighborhood on this offer if you can not. You will be surprised how easily orders can be taken for O.K. Seeds. Additional order blanks furnished free.

If you have been a customer of our house before and ordered the O.K. Seeds you know they are sure to grow, true to name, and certain to produce the maximum crops at the season will permit. If you have not been a customer before we earnestly invite you to begin this year. No difference where you have dealt before we will try to make it to your interest to buy of us in the future.

To those who may not be acquainted with us we refer them to any bank or business house in this city--or any bank in the country where our rating can be found in the commercial directories.

We recommend to every up-to-date farmer and gardener and those who would be up-to-date this year, the month-perusal of Up-To-Date Farming and Gardening. See cover page.

Sending most sincere thanks for past liberal patronage and soliciting a continuance of your favors, which we will always have our best attention. Yours very truly,

J. A. EVERITT, Seedsman.

Instructions to Customers.

OUR PRICES as well as our seeds are O.K.

They are based on A No. 1 First Quality Seeds. Nothing else ever enters our house. You may pay double our price elsewhere, but we defy

you to get better seeds anywhere at any price. With this condition prevailing, why risk your crops (your only hope for success) on

doubtful store seeds; a mistake made in the start of a crop can never be wholly remedied in the future.

TO REMIT: A Registered Letter. This is one of the best and most convenient ways to remit, and the sender gets a receipt

HOW

for the letter as soon as it reaches its destination. Every postmaster must register letters; or by Postoffice Money Orders, Express Money Orders or Bank Draft. Postage stamps taken same as money in small amounts—2-cent stamps preferred. Don't send revenue stamps. Canadian customers can send any form of their currency or postage stamps; as we can use them at their face value.

TERMS: Our terms are cash with order. We will occasionally send goods C. O. D. if enough is remitted to guarantee charges. Or go to your Express or Freight Agent and deposit the money with him and take his receipt for the money to be paid to us on arrival, if the goods are as represented. Or send us a letter from your freight or express agent to the effect that you will pay the money on arrival of the goods if found as represented. We want to make it possible, safe and easy for you to order your seeds, machines, etc.; of us, and you need not hesitate, no difference in what part of the country you reside.

BRINGS OUR SEED STORE RIGHT TO YOUR DOOR.

FREE BY MAIL.

We deliver all seed free by mail at prices quoted, in packet, oz., ¼ lb., 1 lb., 4 lb., pint and quart. If sent by freight or express postage may be deducted at rate of 8c. per lb., 8c. per pints, 15c. per quarts. Keep this in mind when comparing prices. When goods are sent by freight or express the purchaser invariably pays the transportation charges, except where stated to the contrary.

THE MAILS are very reliable, and the development of the mail order business is one of the wonders of the present day. Many families have learned that they can obtain their supplies hundreds of miles away to better advantage than at their home stores. In no other line of goods is this more emphatically true than with their seeds, and in no other line does there exist such peculiarly important reasons for doing so. You buy clothing, groceries, harness, nails, etc., away from your home store on account of price, while with seeds you have the additional reason of vitality. It may be all right to purchase nails, etc., at your store, but all wrong to risk it for living, vital, vigorous seeds. Every Postoffice is a branch store where you can get O.K. Seeds, and many times Uncle Sam will bring them right to your door.

No other class of planters appreciates the reliability of seeds more than market gardeners, and they have taken out the best insurance policy for a successful crop when they send an order for O. K. Seeds.

WARRANTY

We warrant all our seeds to be O.K.

or all right, and that they will grow with proper treatment, and be as represented, in so far that if they prove otherwise, we will refill the order or return the money. We exercise the greatest care to have all seeds pure, true and reliable, yet so many contingencies arise over which we have no control that we can not warrant the crop. If not accepted on these terms they must be returned at once.

REDUCED FREIGHT and EXPRESS

About two years ago through our efforts the railroad companies made a lower rate on Seed Corn, Oats, Wheat, etc., going to farmers. We ship such seeds from Indianapolis for about one-half the former rate. This is an item for you to consider in placing your order. Our Express rates are 20 percent less than regular merchandise express rates. See second cover page for central location of Indianapolis.

PREPAY STATIONS. If there is no agent at your station, remit extra for the freight or we can not ship. **GIVE FULL ADDRESS** ever time you write. If you change your P. O. give old as well as new when you write.

SEND ALL ORDERS FOR EVERYTHING IN THIS CATALOGUE TO

J.A. Everitt. Seedsman

THE O.K. SEEDSMAN OF AMERICA
225-227 WEST WASHINGTON ST.
INDIANAPOLIS, IND.

We ask for your trade purely on the merits of our goods, and our ability and facilities to execute your orders to your satisfaction.

In the Catalogue of O.K. Seeds you don't find great exaggerations and misrepresentations. We tell you what our seeds will do, and you can depend on them. They won't grow **Beets** larger than a 7-year-old girl. **Tomatoes** that require a ladder to climb to the top of, **Sunflowers** big enough for a skating rink, **Carrots** 3 times as large as a horse, **Broom Corn** that raises the brooms ready made, **Beets** that 2 horses and a man with a whip can not pull, or such as Barnum, the great showman, might use in his high and lofty tumbling act; **Pumpkins** that make a load for Jumbo, the king of elephants; **Cabbages** that make sport for the Brownies to balance on the beam, **Melons** that "Jones, of Binghamton," would not pay the freight on; **Onions** that single bulbs make a wheelbarrow load and tower high above a man's head, the darkies' only hope to move the **Melon** is to eat it, then perhaps they can walk away with it. **Man-faced Cauliflower**, **Walking Potatoes**, **Ferris Wheels**, **Tomatoes**, and **10-Story Cabbage Heads** are some of the things we don't recommend O. K. Seeds to produce. You must place your order elsewhere if these are the crops you want to raise.

Without any extravagant claims, but with a neat Catalogue, no premiums, reasonable illustrations, seeds grown where they find a suitable soil and climate, **backed by facilities for handling our trade in the center of the country,** we offer **O. K. SEEDS, and sufficient experience as Seedsmen** to intelligently execute the orders entrusted to us.

We send thanks in advance to each and every person who sends us an order this year.

Yours truly, J. A. EVERITT, Seedsman.

MAMMOTH WHITE FRENCH ARTICHOKE

THE GREATEST HOG FOOD AND A SURE CHOLERA PREVENTATIVE.

ARTICHOKEs,

The losses to farmers from hog cholera alone every year amount to millions of dollars. The most certain preventive, and at the same time the least expensive, while it furnishes a wholesome and valuable food, is a crop of our Mammoth White French Artichokes.

No farmer who raises hogs should let another year pass without providing a patch. They surely prevent cholera, and in this way are worth millions of dollars. A couple of dollars invested in Artichoke tubers may save many farmers from bankruptcy.

E. F. Brockway, of Iowa, says: "Since I have been raising artichokes my hogs have been repeatedly exposed to cholera and they have kept healthy, and I feel that I can defy cholera."

J. D. Washington, of Missouri, says: "Artichokes are the cheapest hog food I ever saw, and a sure preventive of cholera."

Every evidence is in favor of this crop as a cholera preventive. **The wonderful productiveness and ease with which these Artichokes can be produced is always a surprise to those who cultivate them for the first time.** They are an excellent food for cattle, sheep and horses, and the cheapest

COLUMBIAN MAMMOTH WHITE ASPARAGUS

and healthiest hog food known, **1 acre being equal to 2 acres of corn** for building up large, healthy frames with plenty of bone and muscle. They not only grow rapidly, but **fatten on them**, only requiring corn for a short time in the finishing process. The hogs harvest them themselves, thus saving all expense, even that of feeding. Rooting is natural and healthy for hogs, but they won't root unless there is something for them to root for. Freezing and thawing does not injure them, and hogs will feed themselves until late in the spring, when grass has come, except when the ground is frozen solid. **We have never known hogs fed on Artichokes to die with cholera, while herds around them died by the score.** No farmer can do better than to plant a piece of ground to Artichokes without delay. On good corn land they produce 600 to 1,000 bush. per acre, and do not fail in dry seasons. They delight in a moist, rich soil. Ground too wet for general farm crops will produce immense crops. To destroy them plow under when they have attained a foot in height. Plant in the fall or early in the spring, cut small like potatoes, 18 inches apart in rows 3 feet apart, 6 bus. on an acre. They make a full crop the first year. Each following year the field should be plowed in the spring, after the hogs have had all they can find. The plants will come up all over the surface, and must be cultivated out and left stand in hills or the crop will be too thick.

PRICE—The crop was enormous this year and we will sell them very low, so every farmer can devote a patch or field to this inexpensive, never failing, valuable crop. By mail, postpaid, 1 lb. 25c, 4 lbs. 60c. Freight or express, 1/4 bu. 35c, 1 bu. \$1.00, per bbl. of 3 bus. \$2.50.

GREEN GLOBE ARTICHOKE—The flower head is the part used. Pkt. 5c, oz. 30c, 1/4 lb. 75c, 1 lb. \$2.25.

ASPARAGUS.

1 oz. of Seed sows 60 feet of Drill.

COLUMBIAN MAMMOTH WHITE—This new Asparagus is a sport from Conover's Colossal, and is one of those rare instances where the new variety comes uniformly true to its distinctive type. Its principal departure from the old varieties lies in the fact that the shoots are pure white, and they remain so as long as fit for use. **It is among Asparagus what the self-blanching varieties are among celery.** Extremely robust and vigorous habit, excelling any other sort in the size of its shoots. Pkt. 5c, oz. 10c, 1/4 lb. 25c, 1 lb. 65c.

CONOVER'S COLOSSAL—A splendid variety. Pkt. 5c, oz. 10c, 1/4 lb. 25c, 1 lb. 65c.

PALETTES—Stalks frequently measure 2 inches in diameter. A leading market sort. Pkt. 5c, oz. 10c, 1/4 lb. 20c, 1 lb. 65c.

ASPARAGUS ROOTS—Any variety, at the lowest prices ever made. Two years old. By mail, doz. 25c, 50 40c, 100 75c. By freight or express, 100 60c, 1,000 \$5.00.

THE GREATEST NOVELTY OF THE SEASON!

ENJOY GREEN BEANS ANY DAY IN THE YEAR.

This great novelty and Bean of extraordinary merit we introduced in 1899. The following season our seed crop failed and we could not sell them in 1900. This year we have a splendid crop and offer them at a price that will enable every gardener to procure a variety of beans they will prize more than any other variety they ever grew.

The EVERGREEN BEAN—Is unsurpassed in its green state by any other variety in existence, for it allowed to ripen on the stalk, then pulled and cooked in the winter, pods and all, equals the best green beans, fresh from the vines. This Bean is worthy the attention of all gardeners, whether

EVERITT'S

EVERGREEN

BEANS

JULY

**MATURED READY
FOR WINTER.**

DECEMBER

for home use or market. It has long round, green pod, entirely stringless. Medium size pure white beans, that if not used in the pods are equal to the best White Beans when dry and shelled. The beans in the pods are most delicious, whether cooked when green or after ripe and dry. On account of their evergreen quality they remain green longer than any other bean. In fact, they never get tough; even when left to mature and dry on the stalk they can be pulled, and will cook into a tender, delicious dish of

green beans at any stage. The illustration is intended to impress upon our readers the fact that they can now enjoy a delicious dish of green beans as well on Christmas as on the 4th of July. In fact, this new bean makes it possible to have green beans every day in the year. Any garden without this new bean for 1901 will be lacking of the chief novelty and chief attraction that it might possess.

PRICE—Pkt. 10c, pint 30c, quart 50c, by mail post paid. By freight or express, per quart 35c, ½ peck \$1.50, peck \$2.50, bu. \$10.00.

BEANS. The crop was short. Prices are consequently high, and liable to change without notice. 1 quart to 100 feet of row, 1½ bushel per acre. We pay postage on beans offered by packet, pint and quart. Half-bushels at bushel rates.

PRICE OF ALL BY MAIL, UNLESS STATED TO THE CONTRARY, Pkt. 5c, Pt. 25c, Qt. 40c.

Davis Kidney Wax.

A Wax Podded Bush Bean with Clear White Seed. Every Seedsman, every Canner, every Gardener, in short, every person who has tested this Bean, concedes that it is a great way in advance of any other Bean of the kind ever offered. It is **absolutely rust-proof**, and so productive that a field viewed from a distance shows more yellow from the pods than green from the leaves. The plants are a complete mass of pods, yet they hold up well from the ground. Pods are always full of large, plump, white Beans; never a blank. Pods are larger and handsomer, flavor finer and yield greater than any other Kidney Wax Beans in Cultivation. *Early as Golden Wax.* For canners this Bean fills a long felt want. Its *pearl white Beans*, combined with other qualities mentioned, make it entirely without a peer. In a test of all the principal Wax Beans, **Davis Kidney yielded ¾ more than any other.** Pkt. 6c, pt. 25c, qt. 40c.

Dwarf Wax Podded.

VALENTINE WAX—The Earliest Wax Bean. A perfect round pod Valentine Bean, with wax pods, and the earliest Wax Bean in cultivation. The pods are very thick and meaty, with so little string that they may properly be called stringless. Free from rust, a vigorous grower, and will surely become a great favorite with all gardeners for home or market. To show its extreme earliness, we need only to relate the fact that beans planted June 18 produced pods 4 inches long by July 25, and on August 1 half a crop could be picked. Pkt. 6c, pt. 25c, qt. 40c.

KEENEY'S RUSTLESS GOLDEN WAX—This new Bean is the result of many years' efforts on the part of one of the most experienced and largest Bean growers in the country. It combines hardness, productiveness and fine quality. Strong grower and rust-proof. **Produces, under favorable conditions, 100 to 150 fold.** Peck \$1.00, bu. \$4.00.

RUST-PROOF GOLDEN WAX—This is the handsomest and hardest of all Wax Beans. Pods long, thick and rust-proof. Much excels Golden Wax in yield and is of better quality. Should be grown in every garden. Peck \$1.00, bu. \$3.75.

WARDWELL'S KIDNEY WAX—Week earlier and yield ½ more than Golden Wax. Stalk erect. Pods long, broad, flat, brittle, stringless. Delicate waxy color. Seed white, with a reddish-purple spot. Peck \$1.00, bu. \$4.00.

CHALLENGE BLACK WAX—The first to produce a full crop of pods. This habit is of inestimable value to market gardeners. Plants are more upright than the old Golden Wax. Pods large, good color, stringless and of superior quality. Peck \$1.50, bu. \$6.00.

NEW BLACK EYE WAX—Extra early. The seed is white, with black markings around the eye. The pods are about an inch longer than the Golden Wax, and plants are vigorous in growth. It is very productive. ¼ bu. \$1.00, bu. \$4.00.

DWARF GREEN PODDED.

LIGHTNING EARLY VALENTINE—The earliest snap short in the country. The most profitable variety for market. This variety is well named, as it is lightning quick in ripening in comparison with any other stock of this popular Bean. The pods are large, it is very productive, and, when young, entirely stringless. It can not be recommended too highly to the market gardener, as he derives his greatest profit from the earliest crop. With the **Lightning Early Valentine** you beat your competitor one to two weeks, which means many dollars in profits. Sure to give satisfaction. **By freight or express, peck \$1.00, bu. \$4.00.**

LIMP, EARLY RED VALENTINE—So well and favorably known as to not need description. More extensively grown than any other tender green pod Bush Bean. Peck \$1.00, bu. \$3.75.

LIMP, EARLY YELLOW SIX WEEKS—Well known old sort. Very early. Peck \$1.00, bu. \$3.75. **EARLY MOHAWK—An old sort. The hardest variety.** Esteemed for first planting, as it will stand a slight frost. Peck \$1.00, bu. \$4.00.

BEST OF ALL—Pods long, fleshy and entirely stringless. Very productive. Very early and bears a long time. Peck \$1.00, bu. \$4.00.

NEW EXTRA EARLY REFUGEE—A selection from the well-known Refugee, and is ready for market about the time the ordinary Refugee is in flower. An immense yielder and sure to produce a crop in either wet or dry season. Best for pickling. Peck \$1.00, bu. \$4.00.

3 LEADING DWARF OR BUSH LIMA BEANS.

One Packet of each, 15 cents.

BURPEE'S—This is the true large Lima in bush form, and comes true from seed. The plant grows 18 to 20 inches high, branching so much that each bush is circular and 2 to 3 feet in diameter. Pkt. 6c, pt. 25c, qt. 40c, peck \$2.00.

DEER'S—We recommend them highly. Very delicious flavor, medium size. Pkt. 6c, pt. 25c, qt. 40c, peck \$2.00.

HENDERSON'S—This was the first Bush Lima Bean offered. It is a very early variety and enormously productive. It is largely grown as a field crop for dry beans, being a reliable and heavy yielder. A light soil, inclining to sand, suits them best. Pkt. 6c, pt. 25c, qt. 40c, peck \$1.75, bu. \$6.50.

We want to employ the readers of this catalogue to assist us in advertising and extending our business.

DAVIS KIDNEY WAX.

Field Beans

Plant $1\frac{1}{2}$ bus. per acre.

The cultivation of Beans as a field crop is increasing, and in many sections of the country it is now an important and profitable industry. The varieties we offer are the very best that can be grown.

GREAT WESTERN—

Usually early, productive and the handsomest Bean of all, being large, round, ivory white. When other kinds fall down and spoil in a wet season, these stand up on a strong stalk. Resists rust and mildew. Will stand in the field after maturity longer than any other and not waste. The Great Western grows the heaviest top of all, with a root in proportion, thus enabling it to withstand drought, and fits this variety particularly well for our Western country. The pods hang in clusters all over the top (see illustration). This stalk was photographed suspended by the root. Also, notice the pods contain from 7 to 9 Beans each, denoting a remarkable productive sort. This Bean yielded in a test at the rate of 450 bushels per acre. They are the grandest Bean of all, and surprise and please every grower. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.50.

WISCONSIN TREE—Quite distinct from the Mexican or California Tree Bean, the Bean being twice as large, more productive and very early. The Beans are very white, of finest flavor, and cook in less time than the Navies. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.50.

WHITE WONDER—A very early Field Bean that can be planted on ground where other crops have been removed. It greatly outyields the Navy on the same ground and under same conditions. Seed is about the size of Navies. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.50.

WHITE MARROWFAT—A standard field variety. Largely grown. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.50.

**GREAT WESTERN
FIELD BEAN**
INTRODUCED BY
JAEVERITT SEEDSMAN
INDIANAPOLIS, IND.

rich golden color. Pods average about 8 inches in length, tender and entirely stringless, retaining their plumpness and tenderness long after they have attained a large size, and continue to bear, if the pods are picked, until frost. Pkt. 6c, pt. 25c, qt. 45c.

WHITE CREASE BACK

For String Beans—It is simply perfection. Its handsome green pods grow from 5 to 6 inches long, perfectly round, with a crease in the back. They ripen early and bear continuously all summer, the vines being loaded from one end to the other. Pkt. 6c, pt. 25c, qt. 40c, $\frac{1}{4}$ bu. \$1.75.

KENTUCKY WONDER—

A very prolific sort, grows vigorously and climbs well; pods grow in large clusters, green, 9 to 10 inches long, nearly round; crisp and tender. Sure to give satisfaction; excellent to grow in corn. Seed long, oval, brown color. We sell more of this variety of Pole Beans than of any other to our city gardeners. This hint may be of advantage to parties undecided what to purchase. Pkt. 6c, pt. 25c, qt. 40c, peck \$1.85.

HORTICULTURAL—

A round speckled bean, used both in pods and shelled. Pkt. 6c, pt. 25c, qt. 40c, peck \$1.75.

EARLY WHITE

BUTCH CASEKNIFE—One of the earliest of all. Suitable for corn or for poles, flat pods, well filled with fine, large beans. Excellent for winter use. Pkt. 6c, pt. 25c, qt. 40c, peck \$1.50.

RED SPECKLED GUT

SHORT—An excellent variety and particularly valuable for planting among corn. Vines medium, pods short, round, tender and succulent. Good green or dry. A wonderful yielder. Pkt. 5c, pt. 25c, qt. 40c, peck \$1.75.

Pole Lima Beans.

Price of Each:
Pkt. 6c, pt. 25c, qt. 45c, $\frac{1}{4}$ bu. \$1.75.

DREER'S IMPROVED—An improvement in quality on the large Lima. They are plumper and richer; remain green longer.

LARGE WHITE—This well-known and delicious Bean is everywhere esteemed. Very large.

KING OF THE GARDEN—A magnificent variety in growth of vine and number and size of pods. Specimens have been grown over 9 inches in length and containing 7 great large beans.

CHALLENGER—Have been constantly improved by saving Beans from the strongest vines and best filled pods. They yield an amazing quantity of shelled Beans.

SEIBERT'S EARLY—This variety was developed by a market gardener, who selected the largest green Beans from the thinnest and most easily opened pods. Practical value to the market gardener has been the object aimed at, and we believe it to be the very best sort for their use. The vine is very productive and exceptionally hardy and vigorous. It produces pods very early and the Beans are of fine quality. The green shelled Beans are of immense size, but so tender and succulent that they shrink in drying to about the size of the Large White Lima.

Pole or Running Beans.

LAZY WIVES—No good wife would like to be called a "lazy wife," yet she will be excused for exhibiting a lazy spell when "Bean picking" time comes, if she has the foresight to plant this variety. They are called Lazy Wives because they hang so full and the pods are so long and broad that a mess is soon picked. The pods are green, wonderfully broad, thick, fleshy and entirely stringless, retaining all their good qualities until nearly ripe. The peculiar taste and agreeable flavor of this Bean are so captivating that other varieties are not desired while the Lazy Wives can be obtained. Pkt. 6c, pt. 25c, qt. 45c.

EARLY GOLDEN CLUSTER WAX—It grows rapidly, bearing very early, clusters of 3 to 6 pods of

2 of our SPECIALTIES.

EVERY GARDEN SHOULD HAVE THEM.

Everitt's Alpha Pole Bean.

The Earliest Pole Bean in Existence. Can be grown as far North as Bush Beans. Green Pods.

It was with no small degree of satisfaction that we offered this new Bean to our customers. Each seedsman aspires to be the first in offering new things, and the great competition to secure really valuable vegetables oftentimes runs the price up to high altitudes. We never let price prevent us from securing a really good article, and we paid for the stock of this bean, about 2 bushels, \$75. Our experience with it in the past proves that our investment was a wise one. There are several splendid varieties of green pod Pole Beans, but none of them approach Everitt's Alpha in earliness by more than two weeks. This Bean is so early that it can be grown in the far North wherever Bush Beans succeed, while for any section they are unsurpassed in productiveness by any Pole Bean, whether grown on poles or with corn. The vines produce nearly all pods and very few leaves. On this account they may be planted close together, about 2x3 feet. Also are better suited to grow in corn, not pulling the stalks down like the Beans with heavy foliage. The vines keep in bearing a long time. Quality is in all respects equal to the well-known Kentucky Wonder. The color of the seed is bright yellow, which is different from any any other Pole Bean, thus proclaiming them a distinct sort. They have never been known to rust or blight. Pods long, round, thick, stringless.

The Beans that are enjoyed the most are usually the ones that come first. This is the Bean to grow. Also, the Bean that brings the most money, is the earliest bean. Here we have it again.

As soon as the merits of this Bean are known it will be grown as generally as the now famous Kentucky Wonder. Pkt. 10c, pt. 20c, qt. 40c, by mail, postpaid; by express, 4 qts. 80c, peck \$1.50.

New Stringless Green Pod Bean,

Unquestionably the best Stringless Green Pod Bean in cultivation; in fact, the only strictly Stringless Green Pod Bean there is.

The pods are full, fleshy, crisp, tender and remain long in same green condition, even until the beans are large in them. It is very early, being two weeks earlier than the well-known and popular Valentine. This Bean is very prolific in number of pods, besides the pods are very large, $5\frac{1}{2}$ to $6\frac{1}{2}$ inches long, light green in color.

We can not recommend this Bean too highly, and our customers can not grow them too largely.

Pkt. 10c, pt. 25c, qt. 40c postpaid. $\frac{1}{2}$ bu. \$1.50.

CROSBY'S IMPROVED EGYPTIAN BEET

A superior strain of the well known **EARLY EGYPTIAN**. The result of years of careful selection by a noted Eastern market gardener. Retains the earliness of the parent stock and is the best Beet for forcing or for first sowing outside. Desirable for small Beets for forcing or for early market, as it assumes its turnip shape in the early stages of growth, and on this account is preferable to other varieties requiring a longer time to attain a marketable shape and size. Is of handsome form, not so flat as the ordinary Egyptian nor as round as the Early Eclipse; of good size, fine

quality, dark blood red color, with very small tap root and few small tops. Of very rapid growth, and may be sown outside as late as July. Per pkt. 5c, oz. 8c, $\frac{1}{4}$ lb. 20c, 1b. 55c.

EARLY...

OTHELLO.

Dark Blood Turnip Beet.

This very desirable variety will become very popular with the market gardeners, who require a variety of the darkest color for their main crop. It is the result of a very careful selection of the finest formed and very darkest roots, having been annually selected for years for seed stock, and we venture to say that there is no Beet in this country superior to it for its dark, rich color, perfection of form or sweetness of flavor; foliage dark crimson. Pkt. 10c, oz. 20c, $\frac{1}{4}$ lb. 50c.

1 Pkt.
of
each
10c.

Crosby's Improved Egyptian.

**EVERITT'S
FIRST & LAST
BEET.**

First and Last Beet

This very fine and decidedly improved variety of Beets was discovered several years ago. While it then showed superior qualities, it has been still further improved by careful growing and selecting for the ideal shape, size and color, until now, we believe, we have the **perfect Beet**. The roots are of the very best form, with smooth skin and deep, blood red flesh. Quality sweet and tender. It comes for use as early as Egyptian, of better quality. If left in the ground they will continue to grow and attain large size for fall and winter, retaining all their good qualities, hence the name, **First and Last**. Top small and neat. All customers should plant a package or more of this superior Beet. Pkt. 10c, oz. 20c, $\frac{1}{4}$ lb. 50c, 1b. \$1.25.

THIS BEETS ALL—One pkt. each of these three unsurpassed Beets for only 15 cents.

BEETS.

CONTINUED.

1 oz. will sow 50 feet of row.

Price of all varieties in this list except where given: Pkt. 3c, oz. 7c, $\frac{1}{4}$ lb. 15c, lb. 40c, post-paid. By freight or express, 6 lbs. or more of a kind, 30c per lb.

IMPROVED BLOOD TURNIP—The best strain of this popular sort. The result of years of careful selection, which has increased its size and made it earlier. Color, rich, deep red; fine grain, solid. Excellent for all purposes.

DETROIT DARK RED TURNIP BEET—One of the very best sorts for the market and home garden. Its small, upright top, early maturity and splendid shape make it popular everywhere. Flesh, bright red, crisp, tender and sweet, and remains in prime condition a long time. Pkt. 5c, oz. 8c, $\frac{1}{4}$ lb. 20c, lb. 60c.

ECLIPSE—A great acquisition to our list of Turnip Beets. Always gives the greatest satisfaction among market gardeners. It is as early as the Egyptian, and much more desirable, owing to its globe shape, great smoothness and regularity, having a small top, very sweet, flesh fine and dark blood color.

EDMUND'S TURNIP—A selected strain, very uniform and even in type; flesh, deep blood red, exceedingly sweet and tender; of good market size. It is very early, and for marketmen's use is justly popular and much called for wherever it has been sold.

EXTRA EARLY EGYPTIAN—Ten days to two weeks earlier than the Blood Turnip. Of fair quality, medium size; fine for forcing.

IMPROVED LONG BLOOD RED—One of the finest Beets for winter and spring use, also on account of its great productiveness; very valuable to grow for cattle. Sweet, crisp and tender; color, rich red; withstands drought.

DEWING'S IMPROVED BLOOD TURNIP—Very symmetrical in shape and free from fibrous roots; flesh, deep blood red.

HALE-LONG BLOOD—An excellent second early. Good, also, for winter and spring.

LENTZ'S EXTRA EARLY BLOOD TURNIP—As early as Egyptian; larger and of unsurpassed quality, being tender and sweet at all times, old or young. Will produce a crop six weeks from planting. A great favorite with Eastern gardeners, and popular wherever known.

HASTIAN'S EXTRA EARLY—Very early, of quick, large growth; fine turnip form and bright, red color.

EARLY YELLOW TURNIP—Similar to Blood Turnip in form, but yellow flesh.

SWISS CHARD—A distinct vegetable, and makes superior greens. The ribs are used as asparagus, the leaves as spinach. We recommend all our customers to grow it.

Mangel Wurzel and Sugar Beets.

For Stock Feed and Manufacture of Sugar. Price of all varieties: Pkt. 3c, oz. 5c, $\frac{1}{4}$ lb. 15c, lb. 40c, by mail. By freight or express, 5 lbs. or more, at 25c per lb.

MAMMOTH GOLDEN GIANT—Color, yellow; broad at top and bottom, making very heavy roots. A favorite with leading farmers.

MAMMOTH LONG RED—Grows to an immense size, single roots weighing 30 to 50 lbs. Under high culture 2,000 bus. per acre have been grown. Quality excellent.

GOLDEN TANKARD—The flesh is deep yellow to the center. One of the best and richest for food for sheep and cattle. Highly prized by stockmen.

CHAMPION YELLOW GLOBE—The short root makes it particularly valuable for light soils; of fine quality and a heavy cropper.

Sugar Beets.

Price same as Mangels.

KLEIN WANZLEBEN—This is the variety of Sugar Beet which the analytical chemists, both of Germany and this country, have united in recommending as

THE GREAT SECRET

THE GREAT SECRET

If you want the best Seeds at the lowest cost, that will produce the best crops and realize the most money, plant Everitt's

Celebrated O. K. Seeds.

possessing the highest sugar-producing qualities, which scientific investigations have been fully sustained by the practical results of sugar making in the factories, as much as 18 tons of sugar having been made from 100 tons of roots of this variety. It is endorsed and recommended by the Department of Agriculture at Washington.

LANE'S SUGAR BEET—Long, symmetrical roots, fine grained and very sweet; a heavy cropper; splendid for table use or cattle feeding.

FRENCH YELLOW SUGAR—Grows very large; much above ground. Very rich in sugar.

VILMORIN'S SUGAR BEET—Color, white; medium size. Greatly esteemed by sugar manufacturers. This is recommended as being next to the Klein Wanzleben in the percentage of sugar it will produce.

IF IN DOUBT Plant for first, Early First and Last, Crosbys Imp. Egyptian, Eclipse and Lentz. They may be repeated for later marketings. For late, Early Othello, Imp. Blood Turnip, Detroit, Imp. Long Blood. Klein Wanzlebens is the best Sugar Beet, and Mammoth Long Red the best Mangel for good, deep soil.

BROCOLI.

Early Purple Cape. Produces large heads of a brownish purple color; very close and compact and of excellent flavor. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 75c.

BRUSSELS SPROUTS.

Improved Dwarf. They grow about 2 feet high, and produce from the side of the stalk numerous little sprouts, 1 or 2 inches in diameter, resembling cabbage. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c.

CHICORY.

Large Rooted or Coffee. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. \$1.00.

COLLARDS.

Georgia Southern. A variety of cabbage. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 35c, lb. \$1.00.

CORN SALAD.

Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 75c.

CRESS OR PEPPER GRASS.

Sow early in the spring, very thickly in shallow drills. The sowing should be repeated every week, as it soon runs to seed. Use as a small salad. **Extra curled**. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 70c.

WATER CRESS—True. Pkt. 10c, oz. 25c, $\frac{1}{4}$ lb. 75c.

Vegetable Peach or Mango Melon.

They are the most beautiful of vegetables growing on vines same as melons; and resembling oranges in color, shape, and size.

The flesh is snow-white, makes handsome and delicious preserves and sweet pickles; excellent fried, and for mangoes they have no equal. Extremely early, of the easiest culture, and a wonderful yielder, covering the ground with its golden fruit calling forth words of astonishment and admiration. Directions for growing, use of fruit, etc., on each packet. Pkt. 10c, 3 for 25c, 7 for 50c.

We believe the best money we can spend for advertising is amongst our patrons

EVERITT'S EARLIEST CABBAGE, ALWAYS HEADS AND ALWAYS SOLID HEADS.

THE GREATEST & MOST PROFITABLE FOR MARKET GARDENERS.

EARLY CABBAGE.

Others make claims and pretensions of offering the earliest Cabbage, but when extreme earliness is attained you get but little more than a bunch of leaves, while with

EVERITT'S EARLIEST Cabbage

you get a fine solid head. Everitt's Earliest is the earliest and best extra early.

IT'S THE FIRST TO HEAD.

IT MAKES GOOD SIZED SOLID HEADS LIKE THE ILLUSTRATION,

Not a bunch of leaves like some other early varieties. 70 days from sowing the seed you have Cabbage on the table or sell it in market and get the big price if you plant Everitt's Earliest. The heads are very solid, while the edible part is sweet and tender. The illustration shows a half section of a head, which can not be surpassed by any variety, early or late, in fine texture, small ribs and solidity. By reason of this Cabbage coming so early, a second crop of late Cabbage or some other crop can be grown on the same ground. Set the plants 15 inches apart in the rows and rows 2½ feet apart.

If you are an Up-to-Date Gardener, and if you want to be ahead of your neighbors, you will certainly want some of this Earliest Cabbage. It is one of the best things we offer, and we again express the hope that every person who receives this Catalogue will obtain a package or more of it, even though they omit something else. **Pkt. 10c, 3 for 25c, oz. 25c, ¼ lb. 75c, 1b. \$2.50.**

Half a Head of Everitt's Earliest Cabbage.

CWT. Cabbage. Every body knows that

CWT. means hundred weight, and this is the largest and heaviest of all varieties of Cabbage, single specimens weighing nearly a hundred pounds. It is the grandest type of mammoth Cabbage, and certainly whoever raises for exhibition purposes should not fail to include the CWT. Cabbage. A late fall and winter sort. Splendid keeper and of good quality. For kraut it is simply immense, a few heads filling a barrel. If you want the largest Cabbage ever seen in your neighborhood, and, besides, one of splendid quality, plant some of CWT. **Pkt. 10c, oz. 25c, ¼ lb. 75c.**

CWT. (Hundred weight) CABBAGE.

We will therefore employ anyone who receives this catalogue and who desires to assist us. See page 21.

A GRAND NEW CABBAGE EVERITT'S LATE WHITE DUTCH.

THIS IS THE CABBAGE TO GROW FOR PROFIT.

**LARGE, LATE,
ROUND, SOLID
HEADS.**

**The
Newest
and Best
Late Cabbage.**

The numerous varieties of Cabbages being introduced are liable to cause confusion to growers, but it is our aim to test and sift the varieties, so we offer not one sort but what meets a real need in some part of the country, or is needed to round out the rotations of the seasons properly.

We don't pretend to offer any excuse for bringing this new, valuable and distinct sort to the attention of growers, as its merits warrant high praise. In compactness, solidity, hardness, weight, size of head, uniformity of shape and excellent keeping qualities it is unsurpassed by any sort heretofore on the market, and possesses the best qualities to give it the greatest commercial value.

The average weight of the heads is from 18 to 24 lbs. This is the greatest winter and spring Cabbage, not rotting like many other kinds do. For table there probably never will be a better, the head being as white as snow, solid,

crisp and fine grained, while for market and shipping it will lead wherever offered.

\$250.00 WORTH FROM 1 LB. OF SEED, AND OTHER REPORTS.

"We have raised the White Dutch Cabbage this year for the first time with **very good results**. We sowed **one pound** of your seed on two and one-half acres and the crop will bring about \$250.00. We set our plants two to three feet apart; we think we obtain better results than would be obtained by setting the plants closer together. We fertilized the land with 500 pounds per acre, using Ludlam's Dragon's Tooth Brand. One load of **White Dutch Cabbage**, 500 heads, weighed 4,500 pounds, an average of nine pounds per head, which is the best average we have ever seen, when all the plants were cut through the patch. I would say in conclusion that **White Dutch Cabbage Seed grows the largest, hardest and most matured heads of any Seed** I have yet seen, some of our heads weighing **21 pounds** after being trimmed for market. Wishing you success, Yours truly, H. N. BLAIR, Skaneateles, N.Y."

"In regard to the White Dutch Cabbage, **they were the best I ever raised**, and I have been raising Cabbage for 20 years. The average weight was from 12 to 18 pounds, and they **often weighed 25 pounds**. They are good keepers and do not rot, as other kinds often do. The quality was of the best, and the color could not be better. I set 8,000 to try them, and will raise no other this year. The Cabbage, after heading, did not crack, but stayed solid and firm until fall. Yours truly, JACOB WRIDE, Auburn, N.Y."

"The best I ever had. **Grows Quick, sure to head, large size, and of very fine flavor**. ANTHONY PERRY, Pawtucket, R.I."

"We have placed considerable of large, late, White Dutch Cabbage Seed in the hands of the market-gardeners, and they all report that it has given entire satisfaction. I will say personally that our trade has increased very much, and feel confident that we can dispose of a large amount this coming season. **The people now demand it. I feel confident that it will fill a long desired want in this market.** THOMAS J. GREY & CO., Mass."

"The sample of **White Dutch Cabbage** sent for trial in my grounds the past season proved it a fine strain of this popular Cabbage. **As a shipping variety it is very valuable. The solidity of its round heads, whether large or small, and its snowy whiteness, make it particularly attractive as a market variety.** C. L. ALLEN, Floral Park, Long Island."

"I consider your **White Dutch Cabbage** the best and most remunerative variety to grow, as it is a **sure header**, of good size, firm, and of **excellent flavor**, making it a very valuable market variety. HENRY A. GALDE, Marlborough, N.Y."

"Dear Sir: Find enclosed \$1.25 for one-half pound of large, late, **White Dutch Cabbage Seed**. I had some of that seed last year, and it **did excellent**. I have the cabbage now, and they are **bringing a good price. They are fine keepers.** GEO. E. GOWEN, Stratham, N.H."

PRICE. This Cabbage Seed, in fact, all our varieties of Cabbage Seed, are cheap at the prices we ask. Every ounce of our Cabbage Seed is grown under the constant watchfulness and care of the best Growers in the world, insuring purity and fidelity to their particular kinds. Farmers and Gardeners must not judge quality entirely by price, but by the reputation of the seller. O. K. Seeds are always right, regardless of price. **1 Pkt. 15c, 2 for 25c, oz. 30c, 1/4 lb. \$1.00, per lb. \$3.00, and is cheap at the price.**

Everitt's Short Stem Drumhead Cabbage.

This famous variety is a grand variety for truckers to raise for distant markets, while it is also a magnificent and reliable variety for all purposes. **Very reliable to head in the South.** Grows a compact head. Withstands drought well. Seldom bursts or rots. **Heads frequently weigh 30 lbs. each.** Keeps until late spring. Stem very short. It is almost all head and very sure to head. **Pkt. 5c (worth 5 times the price), oz. 15c, 1/4 lb. 60c, lb. \$2.00.**

GEORGE BLUE'S "TREASURE" CABBAGE.

This variety of Cabbage has been grown by Mr. Geo. Blue, trucker, near Indianapolis, for a number of years, and, as is well known by other gardeners, the seed has been guarded as the most valuable treasure by Mr. Blue, and all efforts to obtain the seed in its purity have heretofore failed. About 6 years ago some seed was sold by another seed house in this city under the name of "Acme," which purported to be the Blue Cabbage, but it was not, and the crop showed it to be a bad mixture and worse than worthless. We guarantee our seed to be strictly the true genuine Blue Cabbage, and we name it **Geo. Blue's Treasure Cabbage**, as we know that it will be a valued treasure to other growers as it has been to Mr. Blue. Our seed was grown by Mr. J. M. Lupton on Long Island, who is the most extensive grower of Cabbage seed in the country, and a person eminently qualified to judge a variety of Cabbage on account of his personal contact with all the known varieties and consequently the opportunities he has to make comparisons. He says:

"In regard to Blue's Treasure Cabbage, there is no question as to its being distinct. There is no other variety like it catalogued. * * * As to its superiority, it depends a good deal on the locality. I understand that in your section the gardeners like this particular Cabbage better than anything else they can get and that it is suited to your market. I have no doubt it will be liked all through the West. It is an excellent keeper and some gardeners think a great deal of that. I think this Cabbage is well worth introducing. With me the Cabbage grows with comparatively few outer leaves, a medium size, round, deep head, short stem, with a wavy edge to the leaf. Is dark bluish-green color. True to color and type and a first-class keeper."

The description of this Cabbage given by Mr. Lupton is correct, and we will add that it is a very sure grower, and reliable header. Every stalk will produce a solid head. We know gardeners who would have paid \$2.00 an ounce for this Cabbage seed, also we know that bribery offered Mr. Blue's farm hands failed to get the seed, and we have no doubt attempts have been made to steal the seed or plants from the field, but all attempts of this kind failed. **Price, Pkt. 10c, oz. 25c, 1-4 lb. 75c, lb. \$2.50.**

George Blue's Treasure Cabbage.

HOLLANDER CABBAGE.

This is a variety of cabbage that has been exported to this country from Holland, arriving late in the season, and on account of its well preserved condition, great solidity and depth of head, sells at higher prices than American sorts. **It is one of the hardest varieties in cultivation, enduring drought and frost that would destroy other varieties.** Head of medium size, round and **very solid**; matures late and keeps **best of all** for late spring use. *Every head coming out in the spring as solid as a dollar and of healthy, bright color.* We offer the genuine, every seed strictly true. *Don't take chances, as there is much spurious seed on the market.* **Pkt. 5c, oz. 20c, 1-4 lb. 60c, lb. \$2.00.**

3 BEST THINGS ON EARTH.

GOOD SEEDS. LARGE CROPS BIG PROFITS.

And O. K. SEEDS are the source of all these.

Out of the eleven Eureka watermelon seed you sent, there were five stalks; some insects having destroyed the others. Out of eight acres which we had in, the Eureka Watermelons were the earliest, and everyone who ate them pronounced them the very best melon they had ever eaten. **Mrs. JANE KNAPP, New Boston, Ill.**

The seeds that you sent me last spring have proved a success. I have grown the largest tomatoes and cabbage of anybody in this neighborhood. I shall buy all my seeds hereafter from you. Am very well pleased with Up-To-Date Farming and Gardening. **AMANDA F. SIRON, McDowell, Va.**

We found the seeds we bought of you of such great value that we desire to try some of your fine wheat. The two potatoes you sent me made nearly two gallons, and the corn is extra fine. **Mrs. JOSIE HANCOCK, Peryear, Tenn.**

We planted your garden seed and gave them all necessary attention, with good success. I think they were as good as recommended. Planted the White Dent and Mortgage Lifter corn, gave good attention, and are so well pleased we don't think they can be excelled. **Cwt.**

cabbage and tree tomatoes nicest and best we have ever raised. Will say that we will have to give your garden and field seeds the praise of any we have ever planted. **S. E. HINTON, Rogers Gap, Ky.**

I got some seed of you before and found them all O. K. The pre-historic corn I got of you two years ago is a bouncer. It is a little late, but it makes a pile of seed. Last year it did not get ripe, but I had more fodder on one acre of that than on two acres of any other corn. The lawn grass was fine, and so was all the seeds I ever bought of you. **JONATHAN ELY.**

The watermelon seeds you sent me I think are superior to anything I ever saw in the melon line. I planted them in the garden, and the cut worms cut off all but one vine, and I got ten nice melons from that one vine. Mr. Rogers joins with me in thanks to you. The other seeds that we received from you gave entire satisfaction. **SUSIE ROGERS, Big Foot, Ind.**

I have found all seed that I have got from you more and better than you represented them. **F. M. LEE, Litchfield, Ky.**

**EXTRA EARLY
AND EARLY****CABBAGE.**

1 oz. of seed produces about 3,000 Plants.

EARLY YORK—A well known extra early sort. **Pkt. 3c, oz. 10c, ¼ lb. 40c, lb. \$1.20.**

EARLY ETAMPES—Quickly forms fine, solid, pointed heads. Of extra quality. **Pkt. 3c, oz. 12c, ¼ lb. 40c, lb. \$1.20.**

EVERITT'S EARLY GIANT—No other variety grows as rapidly as this, and early in the summer you have cabbage heads equaling the fall and winter sorts. Heads very solid. If planted late is a fine fall and winter sort. **Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. \$2.00.**

IMP. EARLY WINNIGSTADT—One of the best Extra Earlys, being a sure header and will grow a head under circumstances where many others would fail. The heads are so solid that cabbage worms can not penetrate them. Valuable for summer, fall and winter. **Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50.**

SELECTED EARLY JERSEY WAKEFIELD—A favorite sort. Heads very compact, solid, of conical shape. Few outside leaves. **Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. \$2.50.**

ALL HEAD EARLY—A new variety and one of the largest earlys in cultivation. Being a very thoroughbred variety the heads are very uniform and it is certain to head; growth compact, admitting close planting. If planted late, it is a splendid winter cabbage. **Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. \$2.50.**

IMP. EARLY SUMMER—A popular sort. *Our strain of this peerless cabbage is not excelled.* Fine, large, solid heads will form in 90 days from sowing the seed, with proper care and cultivation. **Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. \$2.00.**

EARLY FLAT DUTCH—Popular wherever grown. A good second early, of excellent quality. **Pkt. 3c, oz. 15c, ¼ lb. 50c, lb. \$1.75.**

LOUISVILLE EARLY DRUMHEAD—A very choice variety, largely grown in this section and following immediately after the Early Summer. When planted late makes an excellent winter cabbage. **Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. \$2.00.**

LATE VARIETIES.

AUTUMN KING—A grand autumn and winter cabbage. Heads of enormous size and very solid. This variety is scarcely excelled by any other in weight of crop per acre. **Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. \$2.50.**

ALL SEASONS—We have sold this reliable variety for over 9 years with the greatest satisfaction to our customers. If sown early will produce large heads early, and if sown late is a superior winter sort. We sell this cabbage in large quantities to many large growers, who prefer it to all others. **Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. \$2.00.**

EVERITT'S SUPERIOR LARGE, LATE, FLAT DUTCH—So well known as to scarcely need description. Our "superior" strain is unexcelled. **Pkt. 3c, oz. 15c, ¼ lb. 50c, lb. \$1.75.**

SUCCESION—A fine fall and winter cabbage. This variety is one of the surest to head, scarcely a plant failing. **Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. \$2.00.**

SURE HEAD—Takes its name from its quality of always heading up, even under unfavorable conditions. In all cases gives great satisfaction for general crop. **Pkt. 3c, oz. 20c, ¼ lb. 60c, lb. \$2.00.**

FOTTLER'S IMPROVED BRUNSWICK—Produces a large, firm, solid head, often weighing from 20 to 30 pounds. **Pkt. 3c, oz. 15c, ¼ lb. 50c, lb. \$1.75.**

DRUMHEAD SAVOY—A very large-headed variety, partaking of the size of the Drumhead Cabbage; flavor of the Savoy. **Pkt. 3c, oz. 15c, ¼ lb. 50c, lb. \$1.75.**

THE LUPTON.

A Fine New Main Crop Cabbage.

Originated by Mr. J. M. Lupton, the largest individual Cabbage-grower on Long Island, who says of it: "I originated the Lupton from a single early plant of a late variety. It is between the two in point of size and season of maturity, coming in after the second earlys and before the late—more thoroughbred and holding color better than any late sort. It combines the health and vigor of late sorts with the uniformity and sure heading qualities of the best second earlys. I believe it will become the leading main crop Cabbage." Prices of seed grown by originator: **Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. \$2.50.**

BRILL'S NONE-SUCH.

This new, distinct and valuable variety of Cabbage is really an "All Seasons" variety. Sown in the fall or in early hot-beds, it will head immediately after the Wakefield. The originator, who is the pioneer grower of Cabbage Seed on L. I. says: "The None-Such is unquestionably the best Cabbage for general purposes ever introduced. Succeeds admirably as second early, summer, fall or winter variety in every section of the U. S. and Canada. L. I. gardeners and others, who saw this Cabbage growing, willingly paid \$10 per pound for seed." **Pkt. 10c, oz. 25c, ¼ lb. 75c, lb. \$2.50.**

CAULIFLOWER.

1 oz. of seed produces about 2,000 Plants.

EARLY SNOWBALL—*Gilt Edge Strain.* Probably grown more than all other varieties together for forcing or wintering over for early crop. We spare no pains or expense to produce the best seed possible, and confidently recommend it as equal to that offered by any one. **Pkt. 15c, ½ oz. 75c, oz. \$1.50, ¼ lb. \$5.50.**

EXTRA EARLY DWARF ERFURT—*Gilt Edge Strain.* Our stock is almost as early as Early Snowball and is very desirable for forcing or for planting outdoors. Plants compact, with a few narrow, upright leaves; making it the best for close planting. *Our stock of this is unsurpassed.* **Pkt. 10c, ½ oz. 65c, oz. \$1.25, ¼ lb. \$4.00.**

EARLY PARIS—An excellent early sort. Short stocks, white head. **Pkt. 10c, ½ oz. 35c, oz. 60c, ¼ lb. \$2.00.**

GARDENER'S FAVORITE CAULIFLOWER—The earliest and finest Cauliflower in the country. Resembling Snowball in habit, and sure heading under adverse conditions to the most marked degree. It will head when all others fail. Dwarf erect habit, with few surplus leaves, allowing to be planted closely. Heads are very solid, pure white and of finest table quality. **Pkt. 10c, ½ oz. 50c, oz. \$1.00, ¼ lb. \$3.50.**

CARROTS.

Sow 1 oz. to 200 feet of Drill, 2 lbs. to the Acre.

Price of all Carrots, unless otherwise quoted: Pkt. 3c, oz. 10c, ¼ lb. 20c, lb. 60c. By freight or express, not less than 5 lbs. of a kind, 50c. per lb.

EARLY FRENCH FORCING—The earliest variety, largely grown for forcing purposes; globe-shaped root of an orange-red color.

EARLY SCARLET HORN—Best for early planting out of doors. Tops small; roots top-shaped; surface dented, skin orange red.

OX-HEART—Intermediate in length, between the half-long varieties, and the Short Horn, but much thicker than the latter, attaining at the top 3 or 4 inches in diameter. It is of fine quality for table use, and deserves general cultivation.

HALF-LONG SCARLET NANTES—Tops medium; roots cylindrical, smooth, bright, orange; flesh orange, becoming yellow in center; of the finest quality.

NEW CHANTENAY—This new, half-long, stump-rooted Carrot is one of the most productive varieties known; has an extra large shoulder, is easily dug, and is in every way desirable. It is very smooth, fine in texture, and of a beautiful rich orange color. Well worthy of cultivation.

DANVERS HALF-LONG ORANGE—A most excellent variety for all soils. It will yield the greatest bulk with smallest length of roots of any variety. 20 to 30 tons being no unusual crop per acre.

RED SAINT VALLEY—A large, beautiful Carrot, of a rich, deep orange-red color. The roots grow very straight and smooth, from 10 to 12 inches long. Very fine quality for table use, and very productive.

LARGE WHITE BELGIAN—Grows one-third out of the ground; immense yield; large size; easily gathered; very suitable for stock.

IMPROVED LONG ORANGE—Long roots, good yield. Good for table or stock. We offer the best strain of this fine variety.

Plant O. K. SEEDS. It is the best kind of crop insurance.

Giant Victoria

The Largest Yellow Carrot

MOST PRODUCTIVE OF ALL.

This is the **largest** and unquestionably the **heaviest cropping** and **most nutritious** Yellow variety in cultivation. It is the largest and best form of Orange or Yellow Carrot known. The roots are remarkably **fine, very symmetrical** and of **excellent quality**, possessing **high feeding** properties. It is a **heavy cropper** on all soils, but especially adapted for strong or rich land. It grows fully twice as much weight per acre as the ordinary varieties, and as the roots grow more above the ground it is much easier to gather the crop. The roots frequently measure **12 to 18 inches** in circumference and yields **20 tons per acre**. Nothing excels this Carrot in quantity and quality of stock feed that can be grown on a limited area of ground. This grand variety is sure to suit every one who grows it.

N. P. CLARK, St. Cloud, Minn., Importer and Breeder of Clydesdale Horses, Short-horn and Guernsey Cattle, says: "In expressing my opinion as to the value of Carrots for stock, will say that no one who feeds stock can afford to be without them. I feed each year Mangel Wurzel and Ruta Bagas and esteem them very highly, but Carrots I regard as **indispensable**. I increase my acreage of Carrots each year and believe I secure better results from them than anything else I feed, and no variety can be better in quality and great productiveness than the Victoria."

10c, ¼ lb.
25c, lb. 75c,
4 lbs. \$2.50
by mail post-paid.

JUST THINK

Every Post-Office, Freight or Express Office in the country is a branch store for O. K. SEEDS. What could be more convenient? Hand the Postmaster a letter and in a couple days you will receive the best seeds that are planted under the sun. All charges paid. Why risk your crops on store seeds of uncertain age and quality? **O. K. SEEDS** planted means success. Store seeds planted means—WHAT? ? ? ? ? ? ? ? ? ? ? ? ? ? ? ?

The last obstacle to the universal growing of Celery removed. Choice Blanched Celery can be raised as easily as a head of cabbage or lettuce. We have sold many thousands of packets of our Eureka Self-Blanching, and we have not had one customer to complain, but, on the contrary, we sell to many of our customers of previous years by the oz., ¼ lb. and lb. They say they **never raised any crop that met with as much favor among customers as the Eureka Celery**. The only trouble we have with it is to grow enough seed to supply the demand. One great advantage of the Eureka is the fact that it **will keep all winter**, while any other self-blanching variety will not keep much beyond Christmas. Stalks beautiful in appearance, compact in growth and solid. Dwarf habit. Color of outer leaves, cream, tinted with green; stalks and inner leaves creamy white; ribs very crisp, tender and of the **most superior flavor**. All who have not heretofore grown this Celery should do so without further delay. It is bound to give satisfaction. Pkt. 10c, 3 pkts, 25c, oz. 50c, ¼ lb. \$1.50.

Celery

One Oz. will pro-
duce about 7,500
Plants, and plant
about $\frac{1}{4}$ Acre.

GOLDEN SELF-BLANCHING—Gilt Edge Strain. A remarkable stocky and strong growing variety, solid and delicious flavor, self-blanching and a good keeper. One of the very best for early market. **Pkt. 10c, oz. 40c, $\frac{1}{4}$ lb. \$1.00.**

GOLDEN SELF-BLANCHING—As usually sold. **Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 75c.**

WHITE PLUME—Gilt Edge Strain. Each year adds to the popularity of this variety. Many market gardeners now plant their entire crop of it. The heart and stock are naturally white, and consequently requires very little earthing. Eating qualities are the very best; will not keep late in the winter. **Pkt. 10c, oz. 25c, $\frac{1}{4}$ lb. 75c.**

WHITE PLUME—As usually sold. **Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c.**

KALAMAZOO BROAD RIBBED—A distinct variety; its broad ribs, thick and closely set, are solid, crisp and of fine flavor. Grows rapidly, and by reason of its neat and compact growth and showy appearance, makes a grand market variety. Pkt. 4c, oz. 15c, $\frac{1}{4}$ lb. 50c, lb. \$1.50.

NEW ROSE—The red or rose Celeries are better in many respects than the white. They are more solid, hence keep better, and have to a greater degree that nutty flavor so desirable in celery. Red Rose is the best colored celery. Pkt. 4c, oz. 15c, $\frac{1}{4}$ lb. 50c.

GOLDEN HEART—In quality, appearance and size, this variety leaves little to be desired. Pkt. 4c, oz. 15c, $\frac{1}{4}$ lb. 50c, lb. \$1.50.

GIANT GOLDEN HEART—A careful selection from the Dwarf Golden Heart by a gardener, who made the need of a critical market his study for years. The quality is fully equal to the original stock, and in habit of growth is taller than its parent; the stalks are very thick, perfectly solid. Unexcelled as a long keeper. Pkt. 4c, oz. 15c, $\frac{1}{4}$ lb. 50c.

PERFECTION HARTWELL—One of the best flavored, most crisp and tender of the white varieties; the stalks are medium size, round, very solid, crisp and tender, fine nutty flavor. Pkt. 4c, oz. 15c, $\frac{1}{4}$ lb. 45c, lb. \$1.50.

CRAWFORD'S HALF DWARF—Early, solid; of vigorous growth and nutty flavored; very ornamental. Pkt. 4c, oz. 15c, $\frac{1}{4}$ lb. 50c, lb. \$1.50.

GIANT PASCAL—It excels in flavor, and is free from any bitter taste. The ribs are the largest of all, thick, hard, solid, stringless, and of a beautiful waxy appearance. Pkt. 4c, oz. 15c, $\frac{1}{4}$ lb. 50c.

CELERIAC—Turnip rooted Celery. Pkt. 4c, oz. 15c.

GRAND SURPRISE.

THE BEST LATE CELERY.

If you want a Celery that will keep until the following May, after all other celeries are done, and sell at a high price, plant the **Grand Surprise**. It is certainly the grandest winter and spring Celery ever offered. Grows a very strong and vigorous plant, and is not excelled for **solidity, crispness and fine nutty flavor**; every particle can be eaten. Plant is beautiful in appearance, blanching to a cream white. No celery grower should fail to plant part of his crop of this, and there awaits him a **grand surprise**. Pkt. 15c, oz. 45c, $\frac{1}{4}$ lb. \$1.25.

If in Doubt, —If every private garden contains these three Varieties of Celery, **Grand Surprise, Eureka Self-Blanching** and our choice strain of **Giant Golden Heart**, nothing further can be desired.

MAMMOTH WHITE CORY.

THE LARGEST AND BEST EXTRA EARLY SWEET CORN.

The stalks are no larger than those of the White Cob Cory, but each stalk furnishes two or more large, fine-shaped ears, which are fit for use BEFORE THOSE OF ANY OTHER SORT.

The ears are twelve rowed, very symmetrical and handsome, with no opening between the rows at the base.

The grain is large, broad, very white and of remarkably good quality for such an early sort. The beauty and quality of this variety give it ready sale even when the market is overstocked. Pkt. 10c, Ft. 25c, Qt. 40c, Peck 75c, Bu. \$2.50

ENGRAVED BY J. A. EVERITT, SEASIDE, N.Y.

SWEET CORN.

All Eastern grown and free from flint and glaze. One quart will plant about 500 hills; one bushel, 6 acres.

Our Famous, Superior PEDIGREE STOWELL'S EVERGREEN.

This grand variety is more largely grown for main crop than any other. If you are assured that you are getting the best seed of this variety that can be produced, you may be sure you are right, and you can go ahead with confidence of satisfactory results. Our seed is the result of many years of scientific growth and selection, and is grown in a locality perfectly adapted to grow this variety to the greatest perfection.

There are other sections where this variety is largely grown for seed for other seedsmen, where climate and soil have the effect of making a glaze or hard shell on the grain, which is reproduced in the crops grown from this seed. For table purposes and canning this is a serious defect, deplored by all lovers of tender, juicy sweet corn. The careful attention given to the growth of our corn and the adaptability of soil and climate preserve and improve the good qualities until at the present time we have Stowell's Evergreen Corn, superior to the original stock as sent out by Mr. Stowell many years ago.

We have endeavored to portray, in our illustration, the appearance of this corn as we grow it. When in the green state the grains are large, plump, juicy, and of exquisite sweetness of flavor. When dried for seed, they assume a much shriveled appearance. The grains are very deep, the cob small. This variety, grown in less favorable localities, and with less care, will have shorter and less shriveled grains, and be glazed and flinty.

For home use and market, also for canning, our Pedigree strain of Stowell's Evergreen Sweet Corn is unsurpassed. As it comes at a time when it competes with the main crops, the grower can depend on its superior qualities, large ear and great productiveness to insure him profitable returns, and he will seldom be disappointed. Its large ear and long, plump grain make it a profitable and very salable variety.

As we furnish choice seed of this improved variety to compete in price with poorer grades on the market, there can not be any excuse for taking chances on your crop.

PRICE OF EVERITT'S SUPERIOR STRAIN OF STOWELL'S EVERGREEN SWEET CORN—By mail, pkt. 5c, pt. 20c, qt. 35c. By freight or express, peck 50c, bu. \$2.00, 2 bu. or more at \$1.75 per bu.

MATURED AND DRY

OF GRAIN.

WE PAY POSTAGE

On all seeds quoted by pkt., oz., $\frac{1}{4}$ lb., 1 lb., 4 lbs., pt. and qt. unless stated to contrary. You can get our choice, fresh seeds at your postoffice as conveniently as doubtful seeds at the grocery store. Every P. O. is a branch store for O. K. Seeds. Pay your money in for a money order, and in a day or two take out your seeds, fresh from the farm and warehouse. Nothing can be more convenient. If by freight or express, on account of our central location, we can save the majority of farmers transportation compared with the cost from any other seed house.

We pay many thousands of dollars every year for advertising. We are willing to spend part of this in your neighborhood.

IN THE GREEN STATE
READY FOR
MARKET.

Sweet Corn.

ALL PATERN GROWN AND FREE FROM FLINT AND GLAZE.

Place your Sweet Corn in hills or drills with Everitt's Manure Drill.

1 bu. will plant about 6 acres, 1 qt. about 300 hills.

We quote yards and quarts of Sweet Corn by mail, prepaid. If to be sent by freight or express, add 5c per qt. 10c per qt.

PRICE—We sell all kinds of Sweet Corn, unless otherwise quoted, as follows: My mail, post paid, pkts. 5c, pt. 20c, qt. 30c; by freight or express, per 50c, bu. \$1.75.

Extra Early Adams—The Earliest White Corn grown; ready for use in 60 days; used extensively wherever introduced. Can be planted earlier than the sugar varieties. Also called Imitation Sugar.

Early Adams—Similar to above, but larger and not quite so early.

Maumoth White Cory—See page 17.

Crosby's Early Sugar—Early and a great favorite. Ears small, but is productive and of excellent quality.

Perry Hybrid—An extra early variety with fine ears; about the size of Minnesota, twelve rowed and fine quality.

Early Minnesota—A well-known, early dwarf variety; ears fine size and excellent quality.

Country Gentleman—Is the sweetest and most tender of all. Ears medium, cob small, kernels of extraordinary depth, pearly whiteness, and irregularly crowded together on the cob. It is very productive, bearing 2 to 4 ears to the stalk; matures medium to late.

Egyptian—One of the best and the handsomest of all the late sorts. Ears large, none more uniform, and excels all in filling out perfectly at the tip end. Cob and grain pure white. Very productive and used extensively for canning purposes.

New Champion—The finest, large, extra early in cultivation, grows nearly as large as Stowell's Evergreen, and is extremely early.

Shaker Early Sweet Corn—A splendid market sort, ready about the same time as Early Minnesota, but the ears are much larger. The stalks in good soil attain a height of 6 feet, bearing usually 2 large ears, well filled out to the tips of the cob. The kernels are of pearly whiteness and most deliciously sweet flavor.

Pedigree Stowell's Evergreen—Grown more extensively than any other variety, being a great favorite with canners and market gardeners for table use. The ears are of large size, kernels are very deep, tender and sugary; very productive, and remains a long time in its condition for table use. See page 18.

Everitt's Excelsior—Ripens early; has large 12 to 18 rowed ears and deep grains. One of the largest varieties grown, and one of the very sweetest. For home use and choice market trade it is unsurpassed.

Maumoth—This variety produces the largest ears of any sort, a single ear sometimes weighing 2 or three pounds. It is of excellent quality, sweet, tender, and delicious, and its only fault (if this can be considered one) is the immense size of the ears.

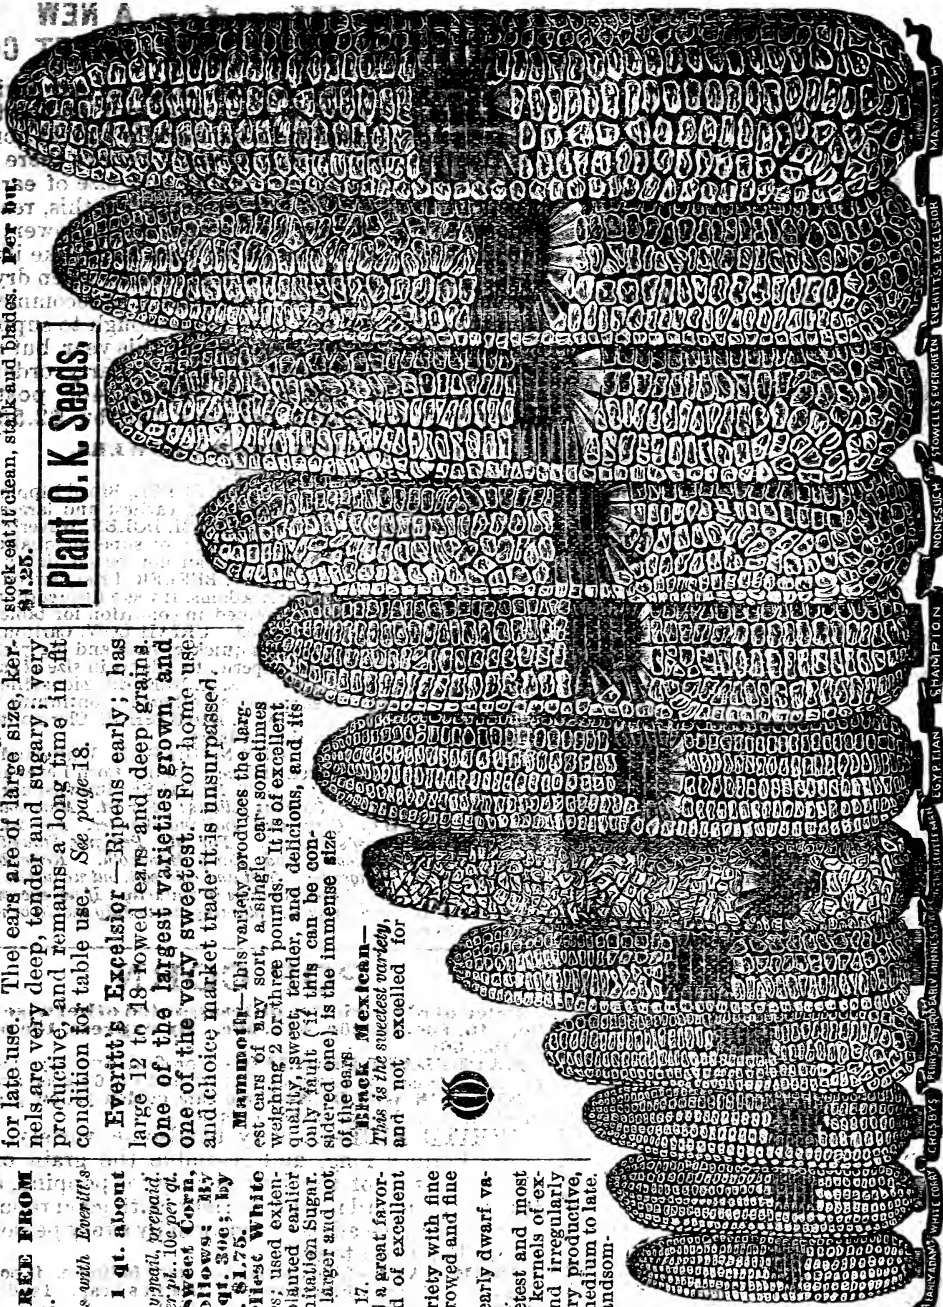

Black Mexican—This is the sweetest variety, and not excelled for

Plant O. K. Seeds.

family use. Its color prevents it from becoming a desirable market sort.

Sweet Corn for Fodder—Much sweeter than field corn, makes finer fodder; produces a stronger flow and richer milk; stock eat it clean, stalk and brigs. 1 Per bu. \$1.25.

There are 100 families or more in your neighborhood who need seeds. You can get these orders. Will you?

Indiana Wonder. A NEW SWEET CORN.

As early as Early Adams, with an ear twice as large, and as sweet as Corn ever put on the table: This Corn originated in Indiana and is a great honor to the Hoosier State. We confidently believe there is not its superior for earliness, quality and size of ear combined in existence. For evidence of this, read the reports below. A very strong and rapid grower; bears two or three ears to the stalk; ears large, like illustration; grain deep, large, much shriveled when dry. We recommend it to all, and guarantee it as recommended. Heretofore we did not have near enough to supply the demand. We have a large supply this year, but anticipate a greatly increased demand. Early orders are advised. Price, pkt. 6c, pt. 25c, qt. 40c, postpaid. By express or freight, per peck 75c, bu. \$2.50.

REPORTS FROM GROWERS.

Mighty fine, large and very sweet.

WM. SUBER, Broad Ripple, Ind.

Indiana Wonder Sweet Corn is the earliest and largest eared variety I ever grew.

CHAS. M. DOLEN, Waverly, Ind.

Earlier than any other I ever tried; of superior quality, with larger ear than Early Adams. It can not be too highly recommended.

F. V. BEELER, Friendswood, Ind.

Planted same time with Early Adams. It was a little earlier, much larger ear, well formed. Remained in condition for table longer than any other kind I ever raised.

URIAH LOW, Carlton, Ind.

Indiana Wonder Corn made a quick growth and big yield. We highly recommend it as far superior to Adams in size of ear, table quality and earliness.

S. A. BEELER, Zionsville, Ind.

Best I ever raised. It surpasses all others in continuing in good condition.

A. V. HIGHTSHOE, Clermont, Ind.

Much larger and better than Adams.

JOHN N. GRAHAM, Whiteland, Ind.

The earliest, largest eared and best quality Corn I ever grew.

W. T. MEMIFEE, Brownsburg, Ind.

IF IN DOUBT. Plant as follows: For 1st. Mammoth White Corn, and Indiana Wonder. For 2d. Early Minnesota and Perry's Hybrid. For 3d. Pedigree Stowell's Evergreen, Country Gentleman and Early Mammoth. Remember, first plantings are in danger from frost and cold soil, but we advise the risk, as if successful you gain several days in maturity. If not successful, the loss is slight. Of course, repeated plantings up to July should be made for a continuous supply.

POP CORN.

Price of all varieties unless quoted otherwise: Pkt. 5c, 1/2 lb. 10c, lb. 20c, 4 lb. 60c. By express, 10c per lb., 10 lbs. 60c.

MAPLEDALE PROLIFIC—A profitable variety; has borne as high as 18 ears on one stalk, but we find 4 to 6 a good average.

QUEEN'S GOLDEN—Large ears, golden yellow grain. A great yielder. Unexcelled as a popper.

WHITE RICE—A very handsome variety. Ears short, kernels long, and resemble the grain of rice. Color, white; of the best quality for popping, and as it is the standard market variety, with good reputation everywhere, we advise its growth by every person who grows Pop Corn to sell.

SNOW BALL—Like the flake of snow falling as it pops, and like a pile of pure white snow as it lies in a heap. Tender, rich, melting.

BOY'S FAVORITE—Quite a novel sort. Grows of many different colors, all growing on the same stalk.

The accompanying illustration states a truth about O. K. Seeds that is expressed in five words and two letters. The letters are O. and K. They occupy the first part of the sentence.

To each of our customers who will write the correct interpretation of the illustration, we will send an extra packet of choice seeds free.

J. A. EVERITT, Seedsman.

YOU CAN MAKE IT.

How to make \$50.00.

How to make \$25.00.

We want each catalogue we send out to equal five or more. We want the person who receives this catalogue to get the orders of his neighbors and send with his. We will pay you well for doing this. We can afford to. If we can double our trade or multiply our trade by five through our friends' efforts we will save

MANY THOUSANDS OF DOLLARS

that would otherwise be invested in additional catalogues to get the same number of orders.

If you send your own order only you are not entitled to any discount from the prices quoted in this catalogue, but if you will get

1 to 4 neighbors' orders and send with yours, deduct 5 per cent. from all.

5 " 9 " " " " " " 10 " "

10 " 19 " " " " " " 15 " "

20 or more " " " " " " " 20 " "

EXCEPTIONS. READ THIS CAREFULLY. The above discounts apply on all Vegetable and Flower Seeds, Seed Grain, Seed Potatoes, Plants and Bulbs; also manufactured articles, **except** the prices quoted in lots of 10 or more, 10 lbs., 10 bushels, etc., no discount will be given, as these are our lowest prices; also where our manufactured articles are quoted by the dozen, no additional discount will be given; also we will not give any discount on any kind of Grass and Clover Seed, but will always quote lowest prices on request. Also not more than 25 per cent. on Man-Weight Machines. See page 117.

X You will understand that you are not entitled to any discount unless you send orders besides your own. **You must send the name and address** of each of your customers and value of their order at **Catalogue Price** (not with discount off). These can be made in the form of a list, or we will furnish you with additional order sheets if requested. When sending for them, tell us how many are wanted.

YOU can continue sending orders all through the season, and when the spring season is past we will have summer seeds and autumn seeds (including seed wheat), bulbs, etc., so you can have steady work.

YOU need not write to us in advance, but go ahead and get your orders. The early work will be the most profitable work.

WE WILL send orders direct to your customers, prepaid, or otherwise as stated on page 2, or will send them all to you as you instruct. If you have them all sent to you by freight or express you can gain something by saving of Postage, see page 2. Make all orders out **very** plainly.

DON'T write us about unnecessary things. We are very busy and have tried to make this Catalogue complete with full and plain directions. Write us for prices on seeds that are liable to change, and about any important matters.

TERMS of payment as printed on 2d page apply to all agents; don't ask us for different terms.

READ all the foot notes.

IF YOU don't want the people to know what profit you are making, tear this page out of the catalogue and preserve it.

IF YOU undertake this business you will have success, as all people do who handle and plant O. K. Seeds.

Yours truly,

J. A. EVERITT, Seedsman.

NEW EVERBEARING CUCUMBER.

The Great Yielder.

200 TO 400 BU. PER ACRE.

PERFECTION IN QUALITY, COLOR AND CRISPNESS.

Vines continue to produce fruit till frost.

VERY EARLY.

Perfect Shape.

Fine Green Color.

NEW EVERBEARING CUCUMBER.

In calling especial attention to this new and unique variety, we wish to emphatically state that it is one of the most valuable sorts ever introduced. It is of small size, **very early**, **enormously productive** and valuable as a green Pickler. The peculiar merit of this novelty is that the vines continue to flower and produce fruit until killed by frost, **whether the ripe Cucumbers are picked off or not**—in which respect it differs from all other sorts in cultivation. Cucumbers in every stage of growth will be found on the same vine. Pkt. 10c, oz. 20c, $\frac{1}{4}$ lb. 50c, lb. \$1.00.

THE EMERALD.

A Dark Green Cucumber that will hold its color.

It is a selection from the White Spine, made after 7 years' careful, systematic work. It retains every good quality of the best White Spines, and in addition it possesses a rich dark green color, so long sought for, but never before obtained in any other variety. It is strictly evergreen, retaining its color until fully ripe. The fruit sets early and the vigorous vines abound with beautiful long, straight, handsome Cucumbers of the crispest and best quality. For forcing and long shipping unexcelled. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

Climbing Japanese Cucumber

This great novelty was introduced from Japan into Europe, where it created a great sensation and was the reigning novelty, and met with phenomenal sale. From Europe it crossed over to this country, where they are also having an enormous sale.

The vines are healthy, vigorous growth, with rich dark green foliage, and throw out *strong, grasping tendrils*, which enable it to climb trellis, wire netting, brush, or any other suitable support. It clings so tightly that it is not prostrated by heavy storms of wind or rain. It comes into bearing quickly and continues to set the fruits abundantly throughout the season, while the climbing habit of growth enables the fruit to grow perfectly straight; of large size from twelve to sixteen inches in length. The Cucumbers are thick, exceedingly tender, and of delicate flavor, of cylindrical shape, flesh pure white, skin dark green turning to brown and netted; when ripe they are of excellent quality for slicing, and when young make attractive pickles. With this variety of Cucumbers, the product of a given area of ground can be increased three fold, thus making them particularly valuable in small gardens or to grow on high-priced land. The vines continue bearing late in fall. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 85c.

GIANT PERA—A variety remarkable for its great size, often attaining a length of 18 ins. and 10 ins. in circumference. Notwithstanding this immense size, their quality is excellent. They are fit to eat at all stages of their growth, even when full grown, and are free from the green cucumber taste. Superior for slicing. Pkt. 5c, oz. 10c, 1/2 lb. 30c.

GHERKINS—Very small and prickly fruit, used expressly for pickling. Pkt. 5c, oz. 15c.

PARISIAN PROLIFIC PICKLING—A great acquisition. Very long, slender, cylindrical, densely covered with fine prickles, and deep, rich green in color. The flesh is very crisp and tender. One of the best for slicing, as well as for pickles. Enormously productive.

NICHOLS MEDIUM GREEN—Very thick through, full at both ends. Handsome in appearance and of fine quality. The vines are vigorous in growth and very productive.

WESTERFIELD'S CHICAGO PICKLING—Fruit medium length, pointed at each end, with very large and prominent spines; color deep green. Largely grown for factories. Extra early and very productive.

GREEN PROLIFIC OR BOSTON PICKLING—A very prolific variety; thriving in any locality. With good culture 200,000 can be raised on an acre.

EVERBEARING—See also preceding page.

There is \$100 more or less in your neighborhood that you may as well have and only a little effort will be required. See page 21.

IMPROVED EARLY WHITE SPINE—Vines vigorous, fruiting early and abundantly; fruit straight and handsome, light green with a few white spines.

EARLY FAME—A well known early sort. Vigorous growth, productive and fine quality.

EARLY GREEN CLUSTER—A short, prickly variety, bearing in clusters near the root. It is a great bearer and matures early.

IMPROVED LONG GREEN—Forms fruits for the table nearly as early as the shorter. Grows 12 inches long, firm and crisp, with very few seeds. The young fruit makes the best of pickles.

ARLINGTON—The young fruits are unusually crisp and tender, and are of a very dark green color, so that the variety is considered by many to be the best for small pickles.

SNAKE—This cucumber grows sometimes to the length of six feet, curled up like a snake. Pkt. 10c.

JERSEY PICKLING—Certainly one of the finest pickling cucumbers in the market. Early and a great bearer, well formed, firm and crisp.

EARLY RUSSIAN—The earliest of all; small size.

EVERGREEN CUCUMBER. This variety has been thoroughly tested and has proved itself to be an evergreen and also an everbearing sort. In cases where cucumbers had not been gathered and frost killed the vines, the ground when viewed from a short distance appeared to be entirely covered with cucumbers. Our special claim for this variety is its wonderful productiveness, while it is also one of the most handsome and valuable sorts grown.

Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c,
1 lb. 60c.

If in Doubt—For slicing, plant Imp. E. White Spine, Emerald, Nicholson's Medium and Early Frame. For pickling, Jersey Pickling, Everbearing, Early Frame, Westernfields and Green Prolific. For special purposes, Parisian Prolific, Giant Pera and Japanese Climbing.

Gourds.

The following varieties will be found very useful about every house. Start the seed early and transplant.

1 pkt. of each 20c.

NEST EGG—They exactly resemble the eggs of hens, and are very useful as nest eggs. The plant grows very rapidly and is useful in covering unsightly places, being quite ornamental. Pkt. 5c, oz. 15c.

DIPPER—This variety makes a splendid tool for dipping hot liquids. The handles do not heat through. Pkt. 5c, oz. 15c.

DISHCLOTH—Makes an admirable vegetable dishcloth. The peculiar lining is the part used, which is sponge-like, porous, very tough and elastic. The vines are very ornamental. Pkt. 10c, oz. 25c.

SUGAR TROUGH—Grows to a very large size, holding from 4 to 10 gallons each, having hard, thick shell. They are used for a great variety of purposes, such as buckets, baskets, soap and salt dishes, nest boxes, etc. Pkt. 10c, oz. 25c.

EGG PLANT.

1 oz. will Produce about 1,000 Plants. No gardener should be without a few plants of this most delicious vegetable. If all were acquainted with their excellence they would be grown as generally as tomatoes.

NEW PEARL WHITE—The best White Egg. It resembles the New York Purple in shape, but it is pure white, and oftentimes exceeds that popular variety in size. It is unequalled by any other sort in productive ness and of superior table qualities; fruits very early. Pkt. 10c, 3 for 25c.

NEW YORK IMP. LARGE PURPLE—The leading variety grown by market men everywhere; fruit large, smooth and deep purple; flesh white and of good quality. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 75c, 1 lb. \$2.75.

EARLY LONG PURPLE—Hardier and earlier than the New York Purple, succeeding further north. Fruit from 6 to 9 inches long. Good quality; one of the best. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c, 1 lb. \$1.75.

EXTRA EARLY DWARF ROUND PURPLE—Same in general appearance to New York Purple, but smaller. Its great merit is its hardness and extra earliness, hence it is valuable in northern sections. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 65c, 1 lb. \$2.50.

New York Imp. Large Purple.

ENDIVE.

GREEN CURLED—Not only most useful as a salad, but it is highly ornamental from its delicately cut and colored leaves. It is much used for garnishing. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c.

BROAD LEAVED BATAVIA—Chiefly used for flavoring. Price same as above.

GARLIC.

1 Pound will Plant 10 feet of Drill.

Garlic is used for a variety of flavoring purposes. Plant the sets six inches apart in rows one foot apart. As soon as the leaves have turned, the crop is matured, and may be harvested like onions.

GARLIC SETS—Per lb. 40c.

KOHL RABI.

EARLY WHITE VIENNA—Very early, small, handsome, white bulbs. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c.

EARLY PURPLE VIENNA—Identical with former, except in color. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c.

LEEK.

AMERICAN FLAG—Used for soups and salads, also fine when sliced and cooked with peas. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 40c, 1 lb. \$1.25.

NEST EGG DISH CLOTH DIPPER

ENGRAVED FOR
J. A. EVERTT
SEEDMAN.

Every person who has any ground sows seeds. It may be only a lawn in town or city, or it may be a \$100 order for a market gardener or farmer. We are after all such orders. They are easily obtained and the aggregate in a neighborhood will be large. Your profit will be large if you work for us.

KALE OR BORECOLE.

1 oz. will Sow 150 Feet of Drill.

Sow and Cultivate the Crop with Everitt's Man-Weight Farm and Garden Tools.

KALE GREENS.

DWARF GREEN CURLED SCOTCH—A dwarf variety, rarely exceeding 18 inches in height, but spreading out under good cultivation to 3 feet in diameter. The leaves are very beautifully curled and of a bright green. Very hardy, will stand out where the temperature does not fall below zero. It is most tender after being bitten by a sharp frost. **Pkt. 3c, oz. 8c, ¼ lb. 20c, lb. 65c.**

DWARF GREEN CURLED GERMAN—This variety is extensively grown as Winter Greens; sown in September, in rows 1 foot apart, and treated in every way as Spinnach, it is ready for use in early spring. **Pkt. 3c, oz. 8c, ¼ lb. 20c, lb. 65c.**

SIBERIAN—Sometimes called "Sprouts" and "German Greens." In this variety the very large, green leaves are comparatively plain in the center, but coarsely cut and frilled on the edge. The plant is low, but spreading and very hardy. **Pkt. 3c, oz. 8c, ¼ lb. 20c, lb. 60c.**

EVERITT'S
EVERLASTING

LETTUCE

THE QUEEN OF
SUMMER

Beautiful Color and Forms Large, Handsome, Tender Heads,
The Longest Standing of All.

Every gardener knows the importance of having a lettuce that is slow to run to seed, and they should also know that this sort excels all others in this respect. It will remain almost all summer in prime condition from one sowing. It is also early and remarkable for the size of its head, which is solid, composed of thick, smooth, very tender leaves, the inner ones finely blanched, and all of the finest quality. A very bright green and attractive variety. *Self-blanching, crisp, tender and of excellent flavor.* This is one of the finest varieties we know of, and will please everybody for family or market garden. Particularly do we urge market gardeners to grow it, and it will put money in their purses, as no variety will bring more money or produce a more permanent crop. **Pkt. 10c, oz. 20c, ¼ lb. 40c, lb. \$1.25.**

O. K. SEEDS ARE
RELIABLE.

EVERITT'S
EVERLASTING
LETTUCE.
THE QUEEN OF
SUMMER.

EVERY P. O. Is a Branch Store for O. K. SEEDS. Pay in your money (an order by grow. What could be more convenient? We guarantee safe arrival, and O. K. Seeds guarantee your crops.

If the head of the family has no time to attend to this matter send one of the boys or girls. They may never have had such a good opportunity before to earn a snug sum of money.

DELICIOUS

IF IN DOUBT: Sow the following varieties of lettuce and you will not be disappointed. **BLACK SEED Simpson, DENVER MARKET, IMPROVED HANSON, EVERITT'S EVERLASTING.** There are other good ones. We advise you to sow a plenty.

One Ounce Will Produce About 4,000 Plants.

BLACK SEED Simpson—For those who want a lettuce that does not head, we recommend this variety as superior to all others. It has thin, very tender leaves, which are formed in large loose clusters; it is valuable for forcing and sowing out of doors for early summer. The leaves are light yellowish green and a little wilting is not noticed. This variety is very popular with market gardeners. **Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.**

CALIFORNIA CREAM BUTTER—A distinct variety of cabbage Lettuce. It forms round, solid heads, of magnificent size. The leaves are of a very cream-yellow color—most refreshing in appearance, and particularly rich and Buttery to the taste. The heads are of good size, compact, very hard and solid. The heads are so solid that generally they have to be cut before any seed stock can make its appearance. **Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.**

NEW YORK—Heads almost as solid as an early summer cabbage, which in general form it somewhat resembles. It branches itself naturally, tender and of excellent flavor, and entirely free from bitterness. **Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.**

GRAND RAPIDS—This famous variety originated at Grand Rapids, Mich., where it is largely grown for shipment, and where it is considered the best loose-headed Lettuce for forcing under glass. Also desirable for early spring outdoor cultivation. Leaves medium size, of light yellowish-green color, much crimped, frilled and ornamental; very upright, compact growth; forms a fair sized but loose head; crisp, tender and a good quality. Will stand without spoiling a week to ten days after it is fit to cut. More largely used for forcing than any other variety, except perhaps Black Seed Simpson. **Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.**

DENVER MARKET—An early variety of Head Lettuce, either for forcing or open ground. It quickly forms large solid heads of a light green color, and is very slow to go to seed. The leaves are crisp and tender, beautifully curled and crimped, and of excellent flavor. By the blistered leaves it distinguishes itself from any other kind of Lettuce now grown. **Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.**

IMPROVED HANSON—The finest strain of this popular variety in the country is what we offer. Our seed will produce mammoth heads almost as solid as cabbage, oftentimes exceeding 5 lbs. in weight, deliciously sweet, crisp and tender. Stands drought and scorching heat better than many others. It is entirely free from bitter taste, even to the outer leaves.

This is the most popular variety of Lettuce in the country, and every year it increases in popularity. **Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.**

MARKET

IMPROVED HANSON

See Page 21 of this Catalogue if you want to engage in a good business; former experience is not necessary. The prices are plainly written and the descriptions are truthful, hence any person who can read and write can attend to the business.

LETTUCE—CONTINUED.

BUTTERCUP—For beauty of foliage, extreme tenderness and delicacy of flavor it is hard to beat. Plant medium size, with numerous round, smooth leaves, which are of a beautiful yellow color, sweet and tender. Always forms good solid heads. It is one of the best of the new varieties. Pkt. 4c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 75c.

EARLY TENNIS BALL—A fine early sort; very hardy. One of the best for forcing under glass. Heads are small but extremely solid. Not very valuable for outside cultivation on account that it runs to seed quickly. Pkt. 4c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 75c.

TOMHANNOCK—Entirely distinct from all other existing varieties and of fine quality. It forms a beautiful plant ten to twelve inches high, grows very quickly, is ready to cut early; remains for weeks of the finest quality. Pkt. 4c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 85c.

TILTON'S WHITE STAR

Of the Black-Seeded Simpson type, but grows larger and more rapidly; blanches perfectly and is of excellent quality. The plants remain long in con-owing to the thick wilting. For for-

TILTON'S WHITE STAR

BIG BOSTON (White Seeded)

—A very popular variety with those gardeners who want a large heading, forcing sort, and also for outdoor winter culture. The plants are large, very hardy and vigorous, with broad, comparatively smooth, thin and very hard leaves, which are bright, light green in color and when well grown are quite tender. Indoors this forms a solid head, while outside it is less distinctively a heading sort. It is grown in the south as a winter lettuce. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. \$1.00.

"ALL SUMMER LETTUCE"—One dozen varieties mixed. Will give you excellent Lettuce all summer from one sowing. Try a packet this season. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

BIG BOSTON.

MUSHROOMS.

Considering the lack of knowledge about how to grow this crop, we give culture directions herewith.

Mushrooms can be grown in any dark room or cellar, where the temperature can be maintained at 50 to 60 degrees. From old pastures procure the soil, and store it away. To one bushel of this soil add two bushels of fresh horse manure. Of this well-mixed compound prepare a bed, say four feet in width. Put down a thin layer and pound it down hard, and go on until you have a bed eight inches thick. It will soon become pretty hot, but let the heat recede until it is only 85 or 90 degrees. Then make holes, say a foot apart, and put in the spawn, two or three pieces as large as a walnut in each hole. Cover the holes and press the soil solid and smooth. Let the bed remain in this condition about twelve days; then cover the bed with two inches of fresh loam, and over this place four or five inches of hay or straw, and the work is done. If the temperature is right, in six or eight weeks you may expect Mushrooms. The bed will continue bearing from twenty to thirty days. After the first crop is gathered, spread over the bed an inch of fresh soil, moisten with warm water, and cover with hay as before. One pound of spawn is enough for a bed 3x6 feet.

Mushroom Spawn, best English, by mail, 1 lb. 25c. By express, not paid, 8 lbs. \$1.00.

MUSTARD.

The young leaves are used for spring salad.

Mustard, White—Best for salad or culinary purposes. 1 lb. 30c, $\frac{1}{2}$ lb. 20c, $\frac{1}{4}$ lb. 15c, oz. 10c, $\frac{1}{2}$ oz. 5c.

Chinese or Giant Southern Curled—1 lb. 75c, oz. 10c, $\frac{1}{2}$ oz. 5c.

OKRA.

A large, vigorous plant, requiring a good deal of room; large kind should be planted not less than three feet apart, and the dwarf about eighteen inches. In mild climates sow the seed in the open ground; have the ground clean and mellow, as for a hill of corn.

White Velvet (White Creole)—Pods round, smooth, much larger than other sorts; produced in great profusion. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 75c.

ROCKY FORD MUSK MELON

OR O. K. NETTED GEM.

This improved strain of Netted Gem Melons was produced by years of careful selection, and their superior quality is attested by numerous large growers in many important trucking sections of the country who regularly procure their seeds of us. This variety of Melons is probably more largely grown than any other, and all planters should use the O. K. strain of seed. Are very prolific, small size, weighing 1 to 2 pounds. Flesh thick, green. Flavor lusciously sweet. Shape oval, as shown in illustration, averaging from $4\frac{1}{2}$ to 5 inches in length, of the most attractive appearance, and yield with the most lavish productiveness. Extra early in ripening. They are usually marketed in baskets and crates, and it is the one variety that markets are seldom overstocked with. We sell large quantities annually. Our stock is exceptionally fine. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c.

O.K. NETTED GEM
ALSO LATELY SOLD UNDER NAME OF
ROCKY FORD MUSK MELON.

NETTED GEM. (Round Strain.) This is the same as above except the shape is round. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 50c.

HOOSIER CANTELOUPE.

MY INTRODUCTION 1898.

THE HOOSIER CANTELOUPE is the latest and best production of the noted melon grower, J. M. Nash, of the Hoosier State. He has earned an enduring reputation as the originator of such noted Melons as Hoosier King, American Queen, Indiana Sweetheart, etc., and growers who have profited by his former productions will gladly welcome this grand new Musk Melon. We introduced it in 1898, and every grower is more than pleased. We have again bought all the originator's seed, and control the variety.

The Hoosier Canteloupe is a cross between the Perfection and Hackensack; with six years' careful breeding to obtain a high grade shipping Melon. The skin has a rich color of dark gray netting, which changes to orange when ripe. Flesh is very thick and rich; orange color; flavor the best. The vines grow heavy and vigorously, and should have more space than any other variety. Fruit is a third larger than the Hackensack. **The fruit is just the right size.** The orange flesh is very thick and lusciously sweet. We urge all lovers of good melons to try this splendid sort.

I have made a business of raising Melons for five years and the Hoosier Canteloupe is the best seller and keeper I ever handled.

ANDREW COLE, Hillisburg, Ind.
The Hoosier Canteloupe has given my trade satisfaction in every respect. I think they are the best Melons on the market. They are far better than any other Melon ever grown about here before.

W. BARNARD, Merchant,
Sullivan, Ind.
I have handled the Hoosier Canteloupe in my trade and find them strictly first-class in every respect, and recommend them to any trade.

BELL & MCKINNEY, Merchants,
Sullivan, Ind.

I have sold the Hoosier Canteloupe to my trade and do recommend it highly as a most excellent variety.

W. A. JENKINS, Merchant, Sullivan, Ind.
We have handled the Hoosier Melon grown by Mr. Nash, and recommend it as being first-class in every particular, and one that will bring the top price wherever offered for sale.

MASON & Co., Merchants,
Sullivan, Ind.

I have used the Hoosier Canteloupe and prefer it to any other that can be obtained in this market.

JOS. FREEMAN, Sullivan, Ind.
We have handled some of the Hoosier Canteloupes, and can recommend them as excellent Melons, both as sellers and eaters. J. T. REID & Son, Merchants,
Sullivan, Ind.

Price, pkt. 10c, 3 for 25c, oz. 20c, $\frac{1}{4}$ lb. 50c, lb. \$1.25.

You can offer your neighbor great advantages in freight by the club and they will buy through you in preference to sending direct for their small supply.

THE MATCHLESS NEW "EXTRA EARLY MELON" "GRAND RAPIDS"

GRAND RAPIDS The Earliest of all Musk Melons. This extremely early and beautiful Melon matures in one to two weeks earlier than any other variety and can be made extra profitable on this account. The Melons are of remarkable large size, considering their earliness, 7 good specimens filling a bushel basket. The skin is finely netted. The flesh is yellow, almost to the rind. The quality is good. By pinching off the vines at 3 feet will induce productiveness and earliness. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 75c.

NEW MUSK MELON.

PAUL ROSE.

A successful cross of the Osage with the Netted Gem, and combines the sweetness of the former with fine netting of the latter. It also possesses a firmness of rind, although thin, and "Cheesy" structure of the flesh peculiarly its own, which are great advantages. It surpasses others as a crate or basket shipper and long keeper. IN TIMES OF OVER-STOCKED MARKETS THE PAUL ROSE SELLS OUT CLEAN AT FOUR OR FIVE TIMES PREVAILING PRICES. The Melons are of such uniform size that it is easy to pack them for safe carriage and attractive appearance when opened up. The originator, whose name they bear, claims that they will carry further, arrive in better condition and give better satisfaction, than any other salmon-fleshed Melon on the market. Color of netting gray, underlaid by a dark green rind; the combination making a strikingly beautiful appearance.

Price, pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

Our average sales in 1900 was \$3.83 to each customer. We believe the average farmer purchases much more than this. We want all his trade for seeds.

Kelly City

SWEET, DELICIOUS MUSK MELONS

1 oz. will plant about 60 hills; 2 lbs. per acre.

Price, unless otherwise stated:
Pkt. 3c, oz. 7c, 1/4 lb. 20c, lb. 60c.

EXTRA EARLY HACKENSACK—10 days earlier than the old Hackensack, which enables growers to put them on the market when they will bring double the price obtained for the old sort. They grow large, round-shape, flattened at both ends, skin and flesh green, of rich, sugary flavor.

ACME, or BALTIMORE—Very productive, oblong. Of large size, ribbed and heavily netted. A good shipper. Flesh thick, light green and of good quality.

JENNY LIND—Small size, but of best quality; season early.

IMPROVED MONTREAL MARKET—A magnificent musk melon. The fruit is round and flattened, as is shown in the illustration, deeply and regularly ribbed, skin and flesh green; densely netted; extremely thick flesh of exquisite flavor. Frequently grow to weigh more than 30 lbs.

IMPROVED BANANA—Frequently as many as a dozen melons will be borne on a single vine, all measuring over 25 inches in length. Flesh very thick, almost solid; salmon color, and more delicious than any other musk melon when thoroughly ripe. A great novelty and sure to interest and please. Try it.

GROWER'S PRIDE—For beauty, productiveness and delicious flavor, this melon is second to no other sort grown. In prolific bearing it is a perfect marvel, the ground being literally covered with the large, round, deep-ribbed beauties, weighing from 7 to 10 lbs. each. Flesh thick, green, melting.

CHRISTOPHER COLUMBUS—A very distinct variety. The large size and peculiar external appearance, so remarkably distinct from any other sort, in connection with its extraordinary fine eating quality, which excels all others, and its fine-grained and thick flesh, proclaim it a popular favorite wherever introduced. Flesh green. Size convenient for market. Medium early. A splendid shipper.

OSAGE—Extensively grown. Very popular. Medium size, egg-shaped. Skin is very thin, dark green color, slightly netted; flesh salmon color, lusciously sweet and spicy.

PROLIFIC GREEN NUTMEG—Large growth, fine form, skin and flesh green; very delicious.

EMERALD GEM—About the size of O.K. Netted Gem, but the skin is smooth and of a deep green color. Flesh salmon, very thick, quality superb, yields heavy crops.

CASSABA, OR GREEN PERSIAN—Very large, oblong, netted skin, excellent flavor.

DELMONICO—The flesh is of a beautiful orange pink, and for quality is among the very best. A grand melon.

BANQUET—Medium size. The flesh uniformly deep, and of that granulated character that always indicates a good melon. Color, a dark rich salmon.

ENG FOR J.A. EVERITT.

THE WONDERFUL SUGAR MELON

McIVER'S WONDERFUL SUGAR WATERMELON.

This valuable melon was brought to notice in North Carolina, the seeds having come originally from the West Indies. In outward appearance it resembles the Rattlesnake. The quality, however, is so much superior that it is an injustice to mention the Rattlesnake on the same page with it, as it even surpasses such excellent varieties as Florida Favorite and Icing. It is a very productive and hardy variety—never cracking or losing its fine flavor in the wettest season. The flesh is rich red, crisp and free from stringiness. Unsurpassed for sweetness. The vines are strong and prolific. This melon should be grown by every person who delights in choice fruit. PRICE, pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c.

Girardeau's Triumph

6 Melons Weighed 420 lbs. in 1897.

6 Melons Weighed 550 lbs. in 1898.

6 Melons Weighed 659½ lbs. in 1899.

The originator of this Melon, who has produced more good varieties than any other man in the country, describes it as follows:

"This new Melon as a market sort and for shipment is the best I have ever introduced. It is very prolific, very early and of uniformly large size. It is a cross between the Duke Jones and Kolb Gem; has the fine, handsome appearance of the former and the fine shipping qualities of the latter. The rind, like the Duke Jones, is of dark green color, the seed exactly the same color as of the Kolb Gem. As a table Melon it is of much better flavor than the Kolb Gem. The average size of the Melon is very large. I gathered from 2½ acres 2,418 Melons, weighing over 40 pounds each. Comparatively speaking, there were no small Melons on the vines at the time of harvesting.

The Triumph is very early, very large, very prolific, deliciously sweet, of finest flavor; in fact, the finest Watermelons in the United States. The farmer who values his Melon patch and looks forward to the good times in July and August, can not afford to do without the Triumph.

A commission house in Norfolk, Va., says: "We handled the past season over 300 cars of melons. The Triumphs were the best, and we will advise our growers to plant nothing else. One car of Triumphs sells for as much as 3 cars of others."

J. L. Miller, of Chester Co., S. C., says: "I pulled 4 Triumphs from one vine weighing 75, 74, 66 and 68 lbs., total 273 lbs. It is of very fine flavor."

Price, pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

INDIANA SWEET-HEART WATER MELON.

LARGE,
UNIFORM,
HANDSOME.

A
LONG
KEEPER.

SOLID,
HEAVY,
SWEET.

A GRAND
MELON
TO GROW.

INDIANA SWEET-HEART.

Our greatest specialty in Watermelons. The most valuable Melon offered in years. An all-round Melon unsurpassed. Early, large, handsome, heavy, good shipper, long keeper, brightest color, best quality. Vines vigorous, very productive; ripens early and bears long. Fruit large, oval, *very* heavy mottled or netted, like illustration; light and dark green. Rind thin, but very strong, *making it a melon unsurpassed for shipping.* Flesh red, melting and sweet. The best keeper. The INDIANA SWEET-HEART Melon brings a good price when others rot for want of purchasers. One of the most satisfactory things we every sold. Every Melon grower needs it; will not do without it if he knows how good it is. A great ball of sweetness. Read the telegrams.

A record unsurpassed. "Sweet-Hearts" bring fancy prices when others are not wanted.

Cleveland, O. Sweet-Hearts selling to-day 15c to 18c, others 12c to 13c. WILLIAMS BROS.

Columbus, O. Sweet-Hearts selling 15c to 20c. Striped Melons 10c to 15c. WM. M. FISHER & SONS.

Findlay, O. Prefer Sweet-Hearts; when can we have another car? ALTSCHUL BROS. & CO.

South Bend, Ind. Sweet-Hearts perfect daisies. MILL BROS.

We could print hundreds of reports if space permitted. Send for them if interested. Pkt. 5c, oz. 10c, 1 lb. 25c, 5 lbs. 65c, 5 lbs. or more by express at 35c per lb. This seed is worth \$5.00 per lb. to any grower.

NOTE FOR TRUCKERS—This Melon for shipping purposes is unsurpassed, and its fine quality makes it a favorite in every market. You will probably make more money from a crop of Sweet-Hearts than from any other kind you can plant.

By having a representative in each neighborhood, we expect to secure larger orders and more of them.

WATER MELONS

PHINEY'S EARLY

SEMINOLE

EVERITT'S
WHITE QUEEN

PEERLESS

Plant 1 oz. for 30 hills, 4 lbs. per acre.

PRICE, unless otherwise quoted,
Pkt. 3c., oz. 7c., $\frac{1}{4}$ lb. 20c., lb. 60c.

PHINEY'S EARLY WATER MELON—The melons are of medium size, oblong in shape and uniform. Flesh red, tender and brittle. Rind mottled. A sure cropper. This melon is hardy and a valuable sort for cultivating in the Northern States.

GREEN AND GOLD—Green without, gold within. Medium size. Very productive. Most delicious flavor.

SEMINOLE—Extra Early, enormously productive, large and of most delicious flavor.

EVERITT'S WHITE QUEEN—This is the largest and finest white melon. Quality is very fine and equal to the best melon grown. A splendid shipper. Medium size.

Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

shades of green, light and dark, seeds black, flesh brilliant red, solid, rich, sweet and luscious; skin thick and tough. They will stand very rough handling. Size, large to very large. Melon 60 lbs. weight can be easily raised. Every melon grower will find the **Hoosier King** fully equal to our recommendation. Season late.

GYPSY OR GEORGIA RATTLESNAKE—A superior early market variety; large, oblong; skin green mottled and striped.

DIXIE—This superb watermelon has taken the market by storm where introduced. The vines grow strong and rapidly, with more laterals than any other melon. Very early; thin, hard rind, keeps unusually long before showing decay. One of the best.

PEERLESS OR ICE CREAM—Medium size, pale green, thin rind, flesh scarlet and solid. Flavor of the very best.

HOOSIER KING

FLORIDA FAVORITE

COLORADO PRESERVING

HOOSIER KING WATERMELON.

This magnificent melon was produced in Indiana by a large melon grower. For years he has been growing them on his farm and shipping them to the Indianapolis market, much to his own profit and to the annoyance of other shippers, as his melons were sought after by retailers and consumers in preference to any others. Read what Mr. Reese has to say:

"The Hoosier King is the finest, largest and best quality melon that comes into this market. They arrive in better condition, are uniformly larger size, and sell for more money than any other variety; besides, the consumer who tries them will have no other. R. H. REESE.

Commission Merchant,
Indianapolis, Ind."

The skin is beautifully striped, being two

VICK'S EARLY—Highly prized for its extra earliness. Oblong in shape, smooth, size medium, flesh bright pink, solid and sweet.

COLORADO PRESERVING—The best variety for preserving.

LIGHT ICING—Medium size, round, very light green or white, mottled with slightly darker green. Flesh bright, light red, very sweet and tender. By many this is considered the best of all.

DARK ICING—Same as above except color.

FLORIDA FAVORITE—Of medium size, very prolific, and unexcelled as a table variety. For home use or near-at home markets it will give great satisfaction.

KOLB'S GEM—An excellent shipping variety. Flesh bright red, of good quality. The melons weigh from 20 to 50 lbs. each.

J.A. EVERITT

ONION SEED THAT CAN BE DEPENDED ON

As this is one of the most important crops grown by gardeners and truckers, and as there is no other crop in which the quality of the seed exerts a greater influence on the crop, too great care can not be exercised in selecting your seed. Our onion seed is all of the highest quality, grown from choice, perfect bulbs, and can not be excelled in the country. Quality is the first consideration, price second. In both we defy competition. Absolutely none better.

HOW TO GROW ONIONS.

1st. Obtain good seed. O. K. SEED, that's the kind.

2nd. A rich, sandy loam, with a slight mixture of clay, is the best soil, although any soil that will produce a good crop of corn will produce a good crop of onions, except stiff clay, light sand, swamp or raw muck land. These should be avoided. Ground for onions will be better if preceded by a hoed crop, well manured and kept free from weeds, the preceding year or two. If much manure is applied directly to the onion crop, it will not be so good, although if previous preparation is not given, the manure must be well rotted by being piled and shoveled over a couple of times. High grade commercial fertilizers are the ideal manure for onions. They should be rich in Phosphoric Acid, 12 to 16 percent, and Potash 6 to 8 percent.

3rd. The ground must be perfectly clean of all trash and worked to a fine seed bed. If home-made manure is used, it should be spread evenly over the surface at the rate of 25 to 50 loads per acre, and ploughed deep enough only to turn the manure under completely. If you use commercial manure, sow it on broadcast after the ground is ploughed, and cultivate it in thoroughly, which will be accomplished in preparing the seed bed. Much labor will be saved later if very particular attention is given to making a fine, clean surface.

SOWING ONION SEED WITH EVERITT'S MANWEIGHT DRILL—BEST IN THE WORLD.

4th. The ground may be marked off in advance of sowing, or with the drill if it has a marking attachment. Great care must be exercised to have the rows straight and of uniform distance between, to facilitate cultivation. The seed should be sown as early as the ground can be put in order. Off for large onions, about 4 or 5 lbs. per acre; if for sets, about 50 or 60 lbs. per acre. A good drill should be used to put the seed in. The plants will then come up in straight rows that will allow of machine cultivation to much better advantage. We manufacture the Man Weight Drill, our own invention, which is illustrated on this page. This line of machines has many advantages over the old style hand push machines.

5th. Cultivation must begin as soon as the rows can be distinguished, and repeated every few days. The object is to prevent weeds from getting a start. Machine cultivation must be supplemented by hand weeding as soon as it becomes necessary, and destroy all weeds as soon as started. The plants must be thinned to a stand of about 10 to the foot for large onions, in about 1 month from the time the plants appear. If the cultivating and weeding has been thoroughly done and the ground was clean at the start, they will need no further care until ready to gather. We can not too highly recommend the Man Weight Cultivator, as illustrated here, for handling a crop of onions, and for all other light cultivating on the farm, in garden or truck patch. Their great advantages lie in the manner of propelling through the push bar, and the hinged dragbe which allow the tools to be moved all around the plants just like a hoe in the hands. Very little after-hoeing is required as compared to the rigid machines that simply cut a strip between the rows. The work is done so much easier and faster, as all the effort to propel the machine is taken off of the hands, while part of the weight is taken off of the feet, and directed against the push bar, which propels the machine. See back pages of this Catalogue for further particulars of the Man Weight Cultivators and Drills.

GROWING OUR ONIONS FOR SEED.

CULTIVATING A CROP OF ONIONS WITH EVERITT'S MANWEIGHT CULTIVATOR

6th. Harvesting should begin as soon as the tops die and fall. They should be thrown in windrow, where they may remain undisturbed if the weather is fine, but if not they should be stirred occasionally. When perfectly dry, cut off the tops about one-half inch from the bulb, and store in a few days.

7th. We can furnish a standard work on Onion Growing for 50 cts., and advise all intending growers, if not experienced, to send for it.

8th. Again we urge you to get good seed. The O. K. BRAND is the kind.

WEIGHT,
2 1/2 to 4 lbs.

ROSE-COLORED DELICATESSE ONION.

The most Beautiful of all. Largest, Finest, Best, Most Productive.

This grand variety can not be praised too highly. In some respects it is different from and superior to any other Onion now in cultivation. In handsome appearance it is quite distinct, having a rosy skin quite peculiar to itself, and is a novel and striking feature. The flesh is pure white and delicately mild. As a variety to serve uncooked it has not a peer. Shaped flat, round, as shown. Bulbs often weigh from 2 1/2 to 4 lbs. the first year from seeds, and will yield enormous crops. Every one desiring the most beautiful Onion, as well as the largest and best, will be satisfied with it.

Pkt. 10c, 3 for 25c, oz. 25c, 1/4 lb. 65c.

Rose-Colored Delicatesse, Yellow Danvers and Wethersfield Onions were "death dealers" to all other brands in this section of the country.

CHAS. E. ELLIS,
Feagaville, Md.

**The
Genuine
Prize
Taker
Onion.**

Although several years have passed since this beautiful Onion was offered, it has not lost one iota in the deservedly popular esteem that it is held by growers. On the contrary, by careful selection and growth, we are enabled to offer seed that will produce better crops this year than ever before. No other Onion equals this for ease of growing from the seed and certainty to produce a crop. The amateur is likely to realize more profit from a crop of Prize-Takers than almost any other variety. The main thing to insure success is to get the genuine seed, as much spurious seed is palmed off each season, to the great disappointment and loss of the purchaser.

PRICE:

Pkt. 5c, oz. 15c, 1/4 lb. 50c, lb. \$1.75. By express, 5 lbs. or more at \$1.50 per lb.

PRIZE-TAKER ONION.

Every person who visits our large cities has doubtless noticed the large, beautiful Onions offered for sale on the fruit stands every fall. These onions were originally imported, but since the introduction of this famous variety there is getting to be less need of the imported stock, and the demand is being filled by American grown Prize-Takers. They are of a beautiful rich straw color and grow to enormous size, averaging 12 to 14 inches in circumference, and under favorable conditions attain a weight of 5 pounds the first year from the seed; although of such great size, they are very firm. Of the mildest flavor, are oftentimes eaten as an apple. They have a very small neck, perfect globe shape. On market they always attract attention, and bring two or three times the price of ordinary onions of any other color. They are wonderfully productive and can be grown by any person.

ONE OF OUR SPECIALTIES

Yellow Globe Danvers ONIONS

IF YOU WANT TO GROW THIS KIND PLANT THE O. K. SEEDS.

THIS magnificent sort can not be too highly recommended. It is more extensively grown than any other variety. 600 bus. per acre is an ordinary crop under favorable conditions, while 800 bus. per acre can be grown by a skillful cultivator from seed sown in the spring. We offer but one strain of Yellow Globe Danvers Onions and that is the best. For reliability in bottoming our strain is unsurpassed. Bulbs are very handsome, round, of good size, with thin straw-colored skin; flesh white, fine grained, firm, mild and excellent quality. It ripens early, keeps well, and sells readily at the highest price. Our Yellow Globe Danvers is all that can be desired as a market and table Onion. We sell seed in 100 lb. lots to individual growers year after year.

PRICE—Pkt, 4c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. 85c, postpaid. By freight or express, 5 lbs. or more at 75c. per lb.

We have a very large stock of all varieties of Onion Seed, and aim to give our friends the benefit of prices below all our competitors. Yet we cannot predict the demand exactly, and if we are obliged to replenish our stock prices may be higher. We advise early orders this year. We will at all times meet honorable competition in price.

Another of Our Great Specialties.

EVERITT'S SUPERIOR STRAIN Large Red Wethersfield ONION

IF YOU PLANT O. K.
SEEDS YOUR CROP
WILL BE O. K.

It is often a matter of choice of color what onion is grown. To those growers who prefer a red variety, we recommend our Large Red Wethersfield. This is also one of our greatest specialties, and next to our Yellow Globe Danvers we sell the largest quantity of seed of it. It is the most reliable red onion grown for general purposes. It yields enormous crops; from 600 to 800 bus. per acre, and is a most reliable cropper, even under unfavorable conditions. Large size, purplish-red skin, flesh purplish-white, form round, flattened, fine grained, moderately strong flavor. The best keeper. Especially adapted to poor and dry soils.

Weight Machines.

PRICE—Pkt. 4c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. 85c, postpaid. By express, 5 lbs. or more at 75c.

Those who have good success this year we will consider our agents in the future, and each one will soon have a permanent business established that will increase each year.

SOUTHPORT LARGE YELLOW GLOBE—A very handsome round or globe-shaped variety of large size, with thin, yellow skin, white flesh, fine grained, mild, very firm, and the best of keepers. It ripens early and sells readily at the highest prices in our markets. It is a most reliable variety for bottoming, and entirely free from scallions. **Pkt. 4c, oz. 15c, ¼ lb. 35c, lb. 98c.** By express, 5 lbs. at \$5c.

YELLOW FLAT DANVERS—This variety differs from the Yellow Globe Danvers in being more flat. **Pkt. 4c, oz. 15c, ¼ lb. 35c, lb. 98c.** By express, 5 lbs. at \$5c.

EXTRA EARLY RED—This variety matures very early. It yields abundantly and is of a mild flavor; of medium size, deep red in color, very close grained, solid and heavy. It will often form bulbs in cold, mucky soil, where other varieties fail. It is highly recommended, particularly for the North and Northwest. **Pkt. 4c, oz. 15c, ¼ lb. 35c, lb. \$1.00.** By express, 5 lbs. at 90c.

SOUTHPORT LARGE RED GLOBE—With the exception, perhaps, of some of the white varieties, there is no onion that realizes such high prices as this, its beautiful globe shape, and rich purplish crimson color

making it extremely desirable. It is a good keeper and of excellent quality. **Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.** By express, 5 lbs. at \$1.15.

SOUTHPORT WHITE GLOBE—Large, globe-shaped onion, firm, fine grained, mild flavor, keeps well. This is one of the handsomest onions grown, of beautiful shape, clear, white skin, and commands the highest market price. **Pkt. 5c, oz. 20c, ¼ lb. 65c, lb. \$2.15.** By express, 5 lbs. at \$2.00.

WHITE SILVERSKIN, or WHITE PORTUGAL—Very desirable for family use; flavor mild and pleasant; skin silvery white; of handsome appearance; highly esteemed for pickling when young; also for market in early winter. Extensively planted for White Onion Sets. **Pkt. 5c, oz. 20c, ¼ lb. 50c, lb. \$1.60.**

EXTRA EARLY WHITE BARLETTA—Without doubt the very earliest onion in cultivation. Pure white color, very mild and delicate flavor. For table use and pickling it is most valuable. **Pkt. 5c, oz. 20c, ¼ lb. 50c, lb. \$1.75.**

WHITE QUEEN—A small, very early variety. The quality is excellent. Pure white outside and inside. Can be sown from February to July. Largely grown for pickling. **Pkt. 4c, oz. 15c, ¼ lb. 50c, lb. \$1.75.**

Leading Foreign ONIONS

All of the varieties grow very rapidly from seed, and are sweeter and of more delicate flavor than our American onions; while the bulbs are of the most beautiful shape and color. We advise growers to devote their main crop to the American varieties, yet we recommend them to vary it by planting part of the Foreign. We recommend them highly for summer and autumn use in the family, while if marketed they command fancy prices.

Giant Rocco or Naples.

One of the best known of the Italian Onions in this country. Quite extensively grown in some sections, where they produce immense crops, single bulbs weighing 1½ to 2 pounds each. Flavor very mild and delicate; color, light brown, flesh white; very handsome, globular shape; a good keeper. **Pkt. 4c, oz. 15c, ¼ lb. 35c, lb. \$1.25.**

Mammoth Silver King.

This is unquestionably one of the largest and most beautiful onions in the world. Single specimens have weighed as much as 5½ pounds. No other onion

excels in mild and delicate flavor, or has a more handsome and beautiful silvery white appearance. So mild are they in taste that they can be eaten raw like an apple. They always command a high price in the market. **Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. \$2.00.**

Spanish King.

The outside skin is of a rich, yellow straw color, while the flesh is white, sweet, mild and tender. They bottom well, are free from stiff necks, and have produced more bushels (1,127) marketable onions to the acre than any other variety known. Very rapid growth and matures early. In market it attracts marked attention. **Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. \$2.00.**

Giant White Italian Tripoli.

Of large size and most beautiful form, with fine white skin. The first season from the black seed it will grow an onion from 1 to 1½ pounds, but to attain the full size seed should be sown in a hot-bed and transplanted. **Pkt. 5c, oz. 20c, ¼ lb. 50c, lb. \$1.75.**

EXTRA EARLY PEARL—One of the earliest of the white onions. It has a snowy, waxy skin, and is a good keeper. The flesh is snow white, and the flavor is mild and pleasant. It sometimes grows 5 to 6 inches in diameter the first year from seed. **Pkt. 10c, oz. 20c, ¼ lb. 60c, lb. \$2.25.**

The combined effort of many agents who are in sympathy with the house and with their neighbors will produce the best results.

Everitt's Man-Weight

PLOWS, CULTIVATORS,
HOES, DRILLS, ETC. ❀ ❀

J. A. EVERITT, Seedsman,

Inventor and Manufacturer,

INDIANAPOLIS, IND.

See back part of this Catalogue for further particulars.

Unequaled for handling a crop of ONIONS.

I would not take \$100.00 for my Man-Weight Machine if I could not get another for less.

F. R. WIEDENMILLER, Riversdale, Cal.

The Man-Weight Cultivator came duly to hand and works splendidly.

D. M. MCINTOSH,

Charleston, S. C.

I am 63 years old and have been a farmer all my life, and the opinion I have formed of the Man-Weight Cultivator is that it is ahead of anything that I ever saw yet. I have shown it to some of my neighbors and they all express a very favorable opinion of it, especially those interested in raising onions. I think there will be a great demand for them.

WM. F. WIRT, Hudson, Mich.

Your Man-Weight Cultivator is a great success. A grand triumph.

J. S. FLOYD, Walhalla, S. C.

This is to certify that I have purchased and am now using one of the Man-Weight Garden Outfits; that I have heretofore used what I believed to be the best garden plow in the market; that I find this a complete success, infinitely more useful than any other man plow I ever saw. I would not take twice the cost of it and do without it in tending a half acre of ground by hand.

G. W. KESTER, Albia, Iowa.

Having purchased one of your Man-Weight Garden Plows last spring and used it during the season, I am glad to recommend it to brother market gardeners and others to be all that you claim for it. One man can do more with it than a dozen with hoes, and it does away with the use of hoes in many cases. For instance, I did not use a hoe at all on my cabbage patch, but kept it clean with the plow. I can not afford to take \$100 for it and do without it.

CHAS. BICKFORD, Eddyville, Ia.

I have been using the hand-push cultivators, but the Man-Weight is far ahead of them.

H. A. SIMMONS, P. M., Clinton, Mich.

I have tested the Man-Weight Machines thoroughly, and find them to be as good machines as I could obtain. I viewed hand machines in Dayton, but none appear as good as yours or give as many changes for different kinds of work, and will say it pays for itself in one season.

E. S. ADAMS, Osborn, Ohio.

I delayed writing until I had thoroughly tested the Man-Weight Machines in different kinds of soil, and now can say it has worked very nicely for me in the various crops of a vegetable garden as a weed killer, far surpassing in effectiveness and speed any of the old-style hand-push machines I ever used; besides, it is much lighter and easier to manage. It pulverizes the soil better than any other garden tool I have ever seen in operation. It does away with horse cultivation in many cases, thereby saving plants from destruction. I think much of the movable drag-bars, allowing you to adjust the machine to wide or narrow rows. I think the principle on which the machines are constructed sound, practical and hard to beat.

ORIN BEAVER,

Shakers, Albany Co., N. Y.

We received the Man-Weight Cultivator all right, and we were well pleased with it. We have a large garden and worked it entirely with this machine. We never had a nicer garden nor one better filled with nice things than this summer. We would not do without it. Those who saw it work say it is the best cultivator they ever saw.

MRS. ROZETTA MENTZER,

Albion, Mich.

A hint to
the wise is
sufficient

❖ Parsnips ❖

1 oz. of Seed to 200 Feet of Drill
5 to 6 pounds per Acre.

A deep, rich, sandy loam is preferable. Sow in drills fifteen or eighteen inches apart and thin to six or eight inches in a row. The roots are improved by leaving in the ground during the winter. Excellent food for cattle and also for table use.

IMPROVED CROWN PARSNIPS

A selection from the hollow crown—finer more symmetrical in shape, more sugary and tender. A very heavy cropper, smooth, and the finest variety for the home or market garden. Pkt. 3c, oz. 7c, ¼ lb. 15c, lb. 50c.

LONG WHITE—A standard variety of great merit. Pkt. 3c, oz. 7c, ¼ lb. 15c, lb. 50c.

❖ Parsley ❖

1 oz. to 150 Feet of Drill.

FINE CURLED or DOUBLE—Used principally as a garnish for the table. Pkt. 3c, oz. 7c, ¼ lb. 20c, lb. 75c.

NEW FERN LEAVED—A new variety; very ornamental in form and coloring. Pkt. 5c, oz. 15c, ¼ lb. 35c, lb. \$1.00.

WHY plant store seeds of doubtful quality when you can get the good O. K. SEEDS at your Postoffice as readily as the doubtful ones at your grocery.

PEPPERS.

1 oz. will produce about 1200 Plants.

GOLDEN DAWN—A most beautiful golden yellow, making it most beautiful in appearance either in growth or for the table. In productiveness they stand at the head of the list. The flavor particularly sweet and mild, and entirely free from any fiery flavor, so much so that they can be eaten like fruit. Pkt. 5c, oz. 20c, ¼ lb. 60c.

PROCOPPS GIANT—The real giant among all Peppers, frequently growing 8 to 9 inches long by 3 inches in diameter. Besides being wonderfully large, they are also beauties; color, a glossy scarlet; flesh, nearly half an inch thick, sweet and mild. Every exhibitor should grow them to add to his collection. Pkt. 5c, oz. 20c, ¼ lb. 65c.

RUBY KING—This magnificent Pepper grows 4½ inches long by 3½ inches broad. When ripe, they are bright ruby red color, remarkably mild and pleasant in flavor, having no fiery taste whatever. Single plants ripen 8 to 15 fruits. Pkt. 5c, oz. 20c, ¼ lb. 50c.

LARGE BELL or BULL NOSE—Early, very large, square form, pleasant to taste, very suitable for filling with cabbage. Pkt. 5c, oz. 20c, ¼ lb. 50c.

LONG RED CAYENNE—Bright red color, very hot. Pkt. 5c, oz. 20c, ¼ lb. 50c.

MONSTROUS, OR MAMMOTH—Mammoth size; mild flavor. Pkt. 5c, oz. 20c, ¼ lb. 50c.

LARGE SWEET MOUNTAIN—Very large and excellent for mangoes. Pkt. 5c, oz. 20c, ¼ lb. 50c.

CHINESE CELESTIAL—It is not only a most useful Pepper, but one of the most beautiful plants in existence. Pkt. 5c.

SWEET SPANISH—The earliest. It is somewhat hot in flavor, though by no means a hot pepper. It is pleasant to the taste. It is red in color at maturity. Pkt. 5c, oz. 25c, ¼ lb. 75c.

CORAL GEM BOUQUET—A beautiful little pepper, the fruit being borne in greatest profusion. Pods an inch in length, bright red in color, very ornamental. They are hot and suited to seasoning. A fine plant for potting. Pkt. 10c, 3 pkts. 25c.

CHINESE CELESTIAL

GOLDEN DAWN

LARGE BELL

SWEET SPANISH

CORAL GEM BOUQUET

This is just what we want to accomplish and are willing to pay liberally for it.

MOST MAGNIFICENT PEA OF ALL

Magnificent.

*A second early variety of great merit. It is a green wrinkled main crop variety, growing about 2½ feet in height. The pods are very large, slightly curved, produced mostly in pairs, and all over the vine from top to bottom. The Peas are large, beautiful green, and of delicious flavor when cooked. The vines are very sturdy, and being of a branching habit this variety can be sown more thinly than most varieties. Its season is just right to succeed the Extra Early varieties as it comes into bearing when varieties are about finished. We ask Gardeners and Truckers to give this splendid variety a trial. Pkt. 10c, Pint 25c, Quart 45c, Peck \$1.75, Bushel \$6.00.

Bliss' Everbearing.

* In this choice and remarkable variety we have a pea which will everywhere be recognized as an excellent sort for a summer and autumn crop. Height of vines 18 inches to 2 feet. Its habit of growth is of a peculiar branching character, forming as many as ten stalks from a single root stalk. 100 pods single vine. If the vines reach proper size, the vines are covered with blossoms and branching habit, a pint of ground as a quart of most other kinds. Peas large, wrinkled, tender, of superior flavor. Greatly esteemed wherever known. Pkt. 6c, pt. 20c, qt. 35c, peck \$1.25, bu. \$4.00.

Heroine.

*The Heroine is a green wrinkled pea; grows about 2½ feet high, and is literally covered with its long, heavy, pointed pods, in fact, so striking and distinct is this variety that it would be picked out at once in a field of one hundred other varieties. The pods are well filled, with large peas, containing from 8 to 12 peas. The quality of this pea is simply perfection, owing to its rich, buttery, marrow-like flavor. Pkt. 6c, Pint 25c, Quart 45c, Peck \$1.75, Bu. \$6.00.

Allen's Gradus or Prosperity.

*An ideal extra early variety, and one that will occupy a foremost place, both for the amateur and Market Gardener.

The vine has heavy stems with long, dark green leaves, and grows from 2½ to 3 feet in height, producing large, tender, sweet, delicious peas early in June.

The peas remain tender and sweet for a long time. We highly recommend this splendid wrinkled pea to Market Gardeners. Its abundant bearing and large, well filled pods will make it extremely profitable. Pkt. 6c, Pint 25c, Quart 45c, Peck \$2.00, Bushel \$7.50.

Prolific Giant Podded Sugar Pea.

(Edible Pods.) Those who have not tried them can not imagine the fine table qualities of Sugar Peas. They should be universally grown. This variety is ahead of all others, not only in size of pod and prolific bearing, but also for its delicious quality. It grows to the height of five or six feet, bears a profusion of large, broad pods, which are generally found in pairs, and which are so brittle that they snap without any string. The pods when cooked are very sweet and tender. It should be used similar to wax beans. To parties who have never used the sugar peas, we will say that they are not shelled like ordinary peas, but are cooked pods and all. They are more delicious than the ordinary varieties, and you should not think of planting any other kind of sugar peas than this, because it is the most prolific, the most tender and the best flavored. Pkt. 10c, pt. 25c, qt. 45c, by mail; by freight or express, per qt. 30c, peck \$1.50.

Prolific Giant Podded Sugar Pea.

When we get a very good agent we will give him or her exclusive agency for the future.

EVERITT'S EXTRA EARLY RELIANCE Peas

THE BEST EXTRA EARLY.

A MONEY-MAKER FOR THE
TRUCKER AND GARDENER.

In all the essentials of an early market or home garden Pea this is perfection. It has made friends wherever planted, and is acknowledged by all acquainted with its merits as being unexcelled in earliness and productiveness. They are now largely grown by the best gardeners in the country. Height about 2 feet; vines loaded with well-filled pods. Pkt. 5c, pt. 20c, qt. 35c, peck 90c, bu. \$3.00, 5 bu. \$14.00.

Write for special prices when ready.

Varieties marked * are wrinkled.
Crop is short. Prices liable to change.

EARLY SORTS.

***McLEAN'S LITTLE GEM**—A dwarf, prolific, green, wrinkled marrow, having all the flavor of late wrinkled Peas. Height, 1 foot; requires no support. Largely grown for canning as well as for market. Pkt. 5c, pt. 20c, qt. 35c, peck 90c, bu. \$3.00, 5 bu. or more at \$2.90.

***AMERICAN WONDER**—So well and favorably known that it scarcely needs description. Our seed is strictly true to name, and the choicest strain. Extra early; requires no bushing; exquisite flavor. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.25, bu. \$4.00.

ALASKA—This beautiful Pea has become a standard variety, and the earliest of all blue Peas, proving to be not only several days earlier than most early sorts, but of a larger size and 10 percent more productive. Vines are dwarf, growing only about 20 inches high; maturing the crop for one picking; of excellent quality. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.75.

FIRST AND BEST—Vines dwarf, about 18 inches, bearing straight, handsome pods, each containing six to eight medium-sized, round Peas. Matures all the pods in about 45 days. Pkt. 5c, pt. 20c, qt. 35c, peck 85c, bu. \$3.00, 5 bu. or more at \$2.90.

Empire State.

A new first early Pea, 15 to 18 inches; ripens with Gems; prolific, stocky; pods dark green; peas crowd in the pod; fine flavor, pods good substance and suitable for shipping. Dry peas green, wrinkled. Quality unsurpassed. Price: Pkt. 5c, pt. 25c, qt. 40c, peck \$1.25.

*Horsford's Market Garden.

A most excellent second early Pea, particularly prized by market gardeners on account of its great productiveness as well as fine quality. It grows about 2 feet high, very stocky, and requires no sticks. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.10, bu. \$4.00.

*Nott's Excelsior.

The most valuable of all Dwarf Extra Early Wrinkled Peas. Surpassing in earliness, yield and quality. This is an extra early dwarf Pea, usually ready for the table in 40 to 45 days from planting, only a few days later than the early round sorts. It grows about 14 inches high, or about half as tall again as the American Wonder. It is of vigorous constitution, and wonderfully productive, in which respect it excels such rivals as American Wonder. The even, regular habit of the plant is also a great advantage, particularly to market growers. We believe that Nott's Excelsior has not only "come to stay," but that it will eventually supersede many more of like character. Pkt. 7c, pt. 25c, qt. 40c, peck \$1.35, bu. \$5.00.

LATE SORTS.

BLACK-EYED MARROWFAT—A favorite variety; grows about 5 feet high. Pkt. 5c, pt. 20c, qt. 35c, bu. \$2.25, 5 bu. or more at \$2.00.

LARGE WHITE MARROWFAT—A favorite sort; grows about 6 feet high. Pkt. 5c, pt. 20c, qt. 35c, bu. \$2.00, 5 bu. or more at \$1.90.

***CHAMPION OF ENGLAND**—A standard sort; popular in all markets. Productive; high flavor, seeds wrinkled; 5 feet high. Pkt. 5c, pt. 20c, qt. 35c, bu. \$3.00, 5 bu. or more at \$2.85.

***TELEPHONE**—A tall, wrinkled marrow, very productive, and of the best quality, with long pods containing 7 to 10 very fine flavored peas. Height, about 4 feet. Pkt. 5c, pt. 20c, qt. 35c, bu. \$4.00.

IMPROVED STRATAGEM—All the good qualities of the old Stratagem are highly developed, and it is vastly superior to the stocks now generally sold as Stratagem. Vine medium height, but very stocky, with very broad, light green leaves, and bearing an abundance of large handsome pods. One of the best Peas now on the market for those who want large, showy pods and Peas without any sacrifice in quality. Price: Pkt. 5c, pt. 25c, qt. 45c.

PRIDE OF THE MARKET—A remarkable, robust-growing, free-branching sort, 18 to 20 inches high. Stiff stalk and very productive. The stalks are covered with the immense pods and peas from bottom to top. Requires no sticks. Wrinkled. Season late or for main crop. This Pea is in great favor among market gardeners, and each season our stock is not sufficient to supply the demand. Price:

Pkt. 5c,
pt. 25c, qt.
45c, 5 bu.
\$1.25,
bu.
\$4.50.

Nott's Excelsior.

The Great PRIZE PUMPKIN, King of the Mammoths.

LARGEST PUMPKIN ON EARTH.

A SURE PRIZE WINNER.

Heaviest Weight in 1889, 250 lbs. Heaviest Weight in 1891, 195 lbs. Heaviest Weight in 1893, 151 lbs.
1890, 196 " 1892, 174½ " 1894, 198 "

Truly a colossal variety. No other Pumpkin ever reached such enormous weights, and any person can grow them of mammoth size by planting on rich ground. If planted on any good land they are wonderfully productive as a field crop. Grow the **King of Mammoths** and you will be sure of the prize at your fair, besides having one of the best table or pie Pumpkins ever grown and a grand keeper. Pkt. 5c, oz. 15c, ¼lb. 35c, lb. \$1.

LAKE SHORE PUMPKIN, View of a 40-Acre Field.

This variety of Pumpkins we obtain from a large canner in Ohio, who prefers them to all others. He has for years been improving the strain by careful, systematic selection, until they have reached a degree of perfection for large size, thick meat and heavy weight, unequalled by any other. More tons of pumpkins can be grown per acre of the Lake Shore, whether with corn or by themselves, than of any other variety. Price: Pkt. 5c, oz. 8c, ¼ lb. 15c, lb. 35c, 5 lbs. or more by express or freight at 25c per lb.

As this is a pleasant and profitable business, there may be several workers at each postoffice. Hence the early canvasser will get the cream of the orders.

A PAGE OF GOOD PUMPKINS.

What is a Fair without Pumpkins or a Thanksgiving Dinner without Pumpkin Pie? Figures refer to Illustrations.

1 oz. will plant 40 hills; 5 lbs. per acre. If planted with corn, 1 to 2 lbs. per acre.

We will sell one pkt. each of the 14 varieties offered for 35c.

1. **GENUINE MAMMOTH TRUE POT-IRON**—Grows to an enormous size, 3 ft. or more in diameter and 100 to 200 lbs. or more in weight. Salmon colored skin, flesh bright yellow, fine grained and of excellent quality. Pkt. 4c, oz. 8c, 1 lb. 20c, lb. 65c.

2. **MAMMOTH TOURS**—Grows to an immense size; often weighing 200 lbs., and commonly 100 to 150 lbs. Grown for cattle and for table use. We offer the genuine, true article. Seed saved from selected specimens. These seeds have frequently sold at fairs at 10c to 25c each. Pkt. 4c, oz. 8c, 1 lb. 20c, lb. 65c.

3. **MAMMOTH ETAMPES**—Skin is very bright, glossy red, and presents a most handsome appearance, whether for exhibition or on market. Thick-meated, flesh very rich in color and of excellent quality. It attains mammoth weights; in only ordinary soil grows about 2 ft. in diameter. It is very productive and a most profitable sort to grow. Pkt. 4c, oz. 8c, 1 lb. 20c, lb. 65c.

4. **CONNECTICUT FIELD**—Large, color yellow. Largely raised for feeding stock. Pkt. 3c, oz. 7c, 1 lb. 15c, lb. 40c, bu. \$2.50.

5. **TENNESSEE SWEET POTATO**—Grows to medium size, pear-shaped, a little ribbed, color creamy white, sometimes lightly striped with green; flesh thick, white, fine grained, dry and brittle, and of most excellent flavor; very productive and keeps perfectly sound until late in the spring; has no superior for making pies and custards. When cooked it has the appearance of sweet potatoes. Pkt. 3c, oz. 7c, 1 lb. 15c, lb. 50c.

6. **LARGE CHEESE**—Superior to most of the field-grown sorts. Very hardy and productive. Pkt. 3c, oz. 7c, 1 lb. 15c, lb. 50c.

7. **INDIANA, or KENTUCKY FIELD**—Best variety we ever saw for raising with corn. Grows to a large size, solid, and is relished by stock; also valuable for pies and canning. Pkt. 3c, oz. 7c, 1 lb. 15c, lb. 40c.

8. **GOLDEN OBLONG**—Grows 15 to 20 ins. in length. Shell rich, golden orange color; flesh, light yellow. Very rich and fine, making the very best of pumpkin pies. 14 good pumpkins have been raised on a single vine. Pkt. 3c, oz. 8c, 1 lb. 20c, lb. 60c.

9. **JAPANESE PIE PUMPKIN**—This excellent, odd variety comes from Japan, and is largely grown as a choice pie and cooking pumpkin. They ripen early, keep well, and are very productive. Flesh is very thick, being nearly solid, fine grained, dry and sweet, having the flavor of sweet potatoes. The seeds are peculiarly marked with Japanese characters, making them quite a novelty. Pkt. 3c, oz. 8c, 1 lb. 20c, lb. 60c.

10. **GOLDEN MARROW**—Shape, round oblong, slightly ribbed. Golden orange color, cooks soft and tender and is the best of keepers; very vigorous growth, and immensely productive. Pkt. 3c, oz. 8c, 1 lb. 20c, lb. 60c.

11. **WINTER LUXURY**—This new pumpkin, first offered two years ago, is the result of six years' careful selection and improvement by a veteran pumpkin-grower, and is pronounced by him and his neighbors the very best pumpkin for pies that they have ever known. It grows uniformly to a diameter of 9 to 10 ins. In color, a beautiful yellow or straw color, and very finely and closely netted, like a netted muskmelon. As a winter keeper and cooking variety it stands unequalled. Pkt. 5c, oz. 10c, 1 lb. 25c.

12. **QUAKER PIE PUMPKIN**—A distinct variety, grown for many years by a family of Quakers or Friends. The shape is nearly oval tapering slightly toward the ends. Color, creamy white, both inside and out; flesh sweet and rich, and an excellent keeper. Pkt. 3c, oz. 8c, 1 lb. 20c, lb. 60c.

13. **SMALL SWEET SUGAR**—Small size, very sweet and sugary. Pkt. 4c, oz. 10c, 1 lb. 25c.

CASHAW—Excellent table qualities; well adapted to Southern States; light cream shell; flesh, salmon color; very productive. Pkt. 3c, oz. 7c, 1 lb. 15c, lb. 50c.

EVERY DAY DELIGHTS.

EVERY DAY DELIGHTS...

THE person who obtains this choice collection and plants it in the spring of the year, will later enjoy the superior products every day. The packages we offer are extra large and are calculated to give a liberal family supply through the season.

MONTE CRISTO WATERMELON.

The largest early Watermelon to mature, ripening in from 65 to 80 days; measures about 20 inches long by 12 inches through, and weighing under ordinary cultivation over 60 pounds; skin dark green, flesh bright scarlet, close to the skin, the rind being only about half an inch thick. Seeds lie close to rind, leaving a large solid heart. One of the sweetest, juiciest, crisp and most solid melons ever produced. Very easy to sell from its handsome appearance. Certainly one of the finest melons ever grown for market, and for table use is unequaled. Mr. Dodge, the veteran melon grower, says: "The 'Monte Cristo' is the best melon I ever raised—not half of its good qualities have been told."—
Pkt. 10c, oz. 20c, $\frac{1}{4}$ lb. 50c, lb. \$1.50.

GIANT RED HUBBARD SQUASH.

This is a true Hubbard Squash except in color, which is bright red. The vine is a vigorous but not rampant grower and wonderfully productive, expending the energy derived from liberal fertilizing in the production of an increased number rather than of overgrown and coarse fruits, as some varieties are apt to do. It ripens its crop very early and uniformly, thus making it a certain cropper. The fruits are very uniform in size, weighing from six to eight pounds, and in shape are like the Hubbard. Though maturing early they are wonderfully long keepers, so they can be held over in good condition for spring use. The shell is warty, hard and strong, and of a very beautiful orange red color, except for a bit of olive green on the blossom end. The flesh is a deep orange, and uniformly so to the rind, never having the green tinge so objectionable in the older sort. It cooks very dry, fine grained and good flavored. We believe this is the best fall and winter sort yet introduced, and that it deserves to, and will, become a most popular variety. It certainly has no superior as a table squash.
Pkt. 10c, oz. 20c, $\frac{1}{4}$ lb. 50c, lb. \$1.50.

MAMMOTH WHITE CORY SWEET CORN.

The largest and best extra early Sweet Corn. It will be inexcusable negligence on the part of every person having charge of a garden, to neglect to get some seed of this superb variety. See Page 17 for further particulars. Price: Pkt. 10c, pt. 25c, qt. 40c, peck 75c, bu. \$2.50.

GENUINE ROCKY FORD MUSKMELON.

An extremely popular variety. Every truck patch should contain the delicious beauties. — See Page 23 for further particulars.
Price: Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c.

BIG HEAD LETTUCE.

This makes the largest head of all lettuce we have ever raised, measuring eight inches in diameter across the solid head, or as large as a good Drumhead cabbage. Moreover, the heads are as distinctly defined, and are as closely wrapped together as are found in those of the average of Drumhead cabbage. The leaves are lightish green in color. It belongs among the second early. In quality it is tender, crisp, and free from bitterness. Mr. Meggatt, the well-known seed-grower, writes: "Planted in my trial grounds, it proved a

splendid summer cabbage lettuce—very large, a hard header, good quality, and very slow to run up to seed. I think it is equal to any cabbage lettuce I ever saw, and very much better than the most of them."

Pkt. 10c, oz. 20c, $\frac{1}{4}$ lb. 50c, lb. \$1.50.

IMPROVED ARLINGTON CUCUMBER, OF THE WHITE SPINE CLASS.

This splendid Cucumber will be the pride of every gardener who fortunately plants our seed. It is unsurpassed for table and market, and also used for pickling. No other kind surpasses it for productiveness. A single hill of three vines produced 500 cucumbers during the season. The fruit is from five to seven inches long, and two to three inches in diameter. Color, a beautiful fresh light green.

Price: Pkt. 10c, oz. 15c, $\frac{1}{4}$ lb. 30c, per lb. \$1.00.

Special Offer:

—For only 35 cents we will send one packet of each of the six "Delight" Vegetables listed above. If you accept this offer you will praise the O. K. SEEDS every time you partake of your dinner next summer.

Your Neighbor may not be as fortunate as you and not receive a catalogue of O. K. Seeds. We suppose you love your neighbor, as you should; therefore, go and see him and get his order for the O. K. Seeds and send with yours.

A PAGE OF SUMMER RADISHES

Sow 1 oz. to 100 Feet of Drill.
 Price, unless otherwise quoted: Pkt. 3c, oz. 7c, $\frac{1}{4}$ lb. 18c, lb. 50c, by mail. By freight or express 2 lbs. or more of a kind at 40c per lb.
 Numbers before the names refer to illustrations.

SHEPHERD Still at the head of the list as the best and earliest long Radish in existence, and all who have grown them say they are the best long Radish in the country. Excels all others in rapid growth, attaining a size of 12 in. in length and $1\frac{1}{2}$ in. in thickness in 30 days from sowing the seed, and will grow 20 in. in length and 3 or 4 in. thick before becoming hard and woody. It is the earliest, the largest, remains tender the longest, the handsomest, best for the family, for market, and is good spring, summer and fall.

WOOD'S EARLY FRAME—A long, red Radish, small top; excellent for forcing. Pkt. 3c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c.

IMP. EARLY LONG SCARLET SHORT TOP—Of quick growth; color bright scarlet; long, straight and smooth, crisp and tender.

LONG WHITE VIENNA—The finest and most beautiful long white Radish. Tender, mild flavor, grow quickly.

1. **GIANT WHITE STUTTGART**—Very early; pure snowy white. It withstands the severest heat, and grows to an immense size. The quality is always the very finest, firm, brittle and not pithy.

2. **NEWCOM**—This is the earliest, largest, white Radish known. Owing to their beautiful half-long shape and fine appearance they readily sell at double the price of ordinary varieties. Quality very fine.

3. **NEW WHITE STRASBURG**—One of the most popular summer Radishes grown. Of handsome oblong shape, tapering beautifully to a point; pure white and almost transparent; very tender and delightful pungent taste. Pkt. 3c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c.

5. **IMP. EARLY SCARLET TURNIP**—Extra early. Brilliant color. Especially recommended to market gardeners.

6. **EARLY WHITE TURNIP**—Quick growth; crisp; tender. Very fine.

8. **EARLY SCARLET TURNIP, WHITE TIPPED**—Beautiful scarlet variety, having a white tipped tail, or root. Very fine.

9. **WHITE BOX**—Its short top and rapid growth fits it for growing under glass, in frames or boxes, as well as for early sowing in the open ground.

10. **EARLY YELLOW SUMMER TURNIP**—Russet-colored sort. Grows much larger than the white or red turnip sorts. Best kind for resisting the extreme heat and the drought of the Southern States.

11. **TWENTY DAY FORCING**—A new and very distinct type of the well known olive-shaped Radish, of perfect form, smooth skin, fine color, and very short leaves, extremely quick growth, takes only 3 weeks to mature, valuable for forcing, while it does equally well in the open ground.

12. **SCARLET, OLIVE-SHAPED**—Well adapted for forcing or for early sowing in the open ground.

13. **EARLY FRENCH BREAKFAST**—Earliest of all; very tender and beautiful; scarlet, tipped with white; great favorite.

14. **LARGE WHITE GLOBE**—A very large, round Radish. Of beautiful form, pure white, crisp and brittle.

It grows quickly to a large size, and withstands summer heat.

15. **EARLY WHITE, OLIVE-SHAPED**—Is very early.

SUMMER VARIETIES MIXED—Includes all summer varieties in list. Gives great satisfaction. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 50c.

**UP-TO-DATE
FARMING AND
GARDENING.**

Read by all Up-to-Date Farmers and Gardeners.

50 Cents a Year.

Some Specialties in RADISHES.

Market Gardeners' Ideal Long Scarlet. This is not a new Radish, strictly speaking, although many seed-men would pass it off as such. It is an improved strain of the old reliable **Long Scarlet Short Top**. It is a week earlier than the old strain, has a shorter and more compact top; remains in good condition longer. In shape it is shorter and thicker, which is an advantage if not possible to market at once when pulled. The upper portion is **deep scarlet red**, shading off to white at the tips, altogether making a radish of the most beautiful form and color. **Pkt. 10c, oz. 20c, ¼ lb. 50c, lb. \$1.50.**

Market Gardeners' Ideal.

New White Strasburg. This variety is now the **most popular summer Radish grown**. Of handsome, oblong shape, tapering beautifully to a point. Both skin and flesh are pure white, almost transparent, very tender, and of a delightful pungent taste. It can be pulled five weeks from time of sowing seed, yet it will continue to grow without losing its fine quality, and remains in a tender condition longer than any other summer sort. **There is much spurious seed on the market, which is a great annoyance and loss to gardeners. Our seed produces every root true to the type.** **Pkt. 4c, oz. 8c, ¼ lb. 20c, lb. 60c.**

Brightest Long Scarlet, White Tipped. The handsomest long radish grown. Of great merit. Resembles the Early Long Scarlet in shape and size, being **fit for use in twenty-five days after sowing**. The most remarkable quality, however, is its color, which is the **brightest scarlet**, except the tails, which are tipped white. This sort will outsell any other long red radish that is put in competition with it on the market, and it is an extra fine sort for the home garden, the quality being very good. **Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.**

Brightest Long Scarlet.

Rose Gem Forcing. It is one of the very earliest in cultivation, being a week earlier than Scarlet Turnip White Tipped, which it somewhat resembles in form and color. Their shape is perfectly globular, with rich deep scarlet top, blending into pure white at the bottom, exceedingly tender, crisp and delicious, never becoming hollow or pithy. It is fit to pull in three weeks from sowing. **Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.**

Vick's Early Scarlet Globe Forcing. A most excellent early radish for Garden culture and for Hot-bed forcing. It is the earliest; its color is the handsomest; in flavor it is the mildest, most crisp, juicy and tender. It is the Market Gardeners' Favorite as a forcing radish. It forms a small top and will stand a great amount of heat without becoming pithy. Its fine shape makes it sell for a higher price and more rapidly than any other shaped sort. **Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.**

Non Plus Ultra. An improvement on the Deep Scarlet Turnip. Remarkably fine in quality and of very thick growth and ready to pull within 3 weeks after sowing. Perfectly globular, little roots, of very bright color and excellent shape; certain to insure ready sale on the market. It is one of the best radishes for forcing. **Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.**

Winter Radishes.

Prices of All Varieties:
Pkts. 4c, oz. 8c, ¼ lb. 20c, lb. 65c.

The following varieties should be sown in August or September, for use during winter.

CALIFORNIA MAMMOTH WHITE—It grows to a large size; flesh solid and of good flavor.

LONG BLACK SPANISH—One of the largest, as well as the hardest of Radishes. Roots oblong, black, of a very large size and firm texture.

WHITE CHINESE—Root nearly cylindrical, 6 to 7 ins. long and nearly 3 ins. in diameter; piquant and very appetizing.

ROUND BLACK SPANISH—Black skin, white flesh and roots globe shaped. The flavor is piquant.

CHINESE ROSE—This variety has become very popular with market gardeners. It is of a half-long shape, pink color, and flesh as solid as an apple.

WINTER VARIETIES, MIXED—Includes all winter varieties in our list. **Large pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.**

2 EXCELLENT NEW RADISHES.

CINCINNATI MARKET.

A most excellent long Radish of beautiful, glossy, brilliant scarlet color, having unusually small top. The skin is very thin and the flesh crisp and brittle and of a delightful pungent quality. It is undoubtedly the finest long red Radish for forcing, and will outsell any other on the market, and it is also an extra fine sort for the home garden, the quality being unexcelled. Per pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. \$1.00.

NEW LEAFLESS RADISH.

This new variety of the olive type is almost leafless, for the leaves are so few and insignificant as hardly to be noticeable. The skin has that beautiful bright color which is always so attractive. Flesh crisp and tender and of excellent quality. Early, but a little later than the early forcing sorts. Rows can be planted as near as six inches. It is a very shy seeder, which will tend to keep the seed scarce. Price, pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c, lb. \$1.75.

Mammoth Red Rhubarb.

The market gardener who is within easy reach of a good market will find Rhubarb one of the most profitable crops to grow. It is one of the first crops to bring in money. The most difficult problem to decide when starting to grow this crop is the variety to cultivate—the one that will prove most profitable. A peculiarity of this crop is the fact that seed can not be depended on to produce identically the same kind as the parent stock, while eyes, roots or buds will.

We have secured from an extensive grower of rhubarb for market in Wisconsin a stock of his choicest kind, the Mammoth Red, which is the best for main crop. It is noted for its strong growth, large stalks and consequent great productiveness as well as excellent quality. We sell roots of this variety alone at \$1.25 per dozen, by mail, postpaid, $\frac{1}{2}$ dozen for 75c. By freight or express, 75c per doz. for large roots.

Victoria—Very large stalk, from 2 to 3 inches broad and from 2 to 3 feet high. Excellent for pies. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. \$1.00.

Victoria Rhubarb Roots—By mail, \$1.00 per dozen. By freight or express, 50c per dozen.

SPINACH.

Sow 1 oz. to 50 feet of Drill; 12 lbs. per acre.

We will send any variety of Spinach by freight or express at 18c per lb. in 10-lb. lots.

THICK LEAVED ROUND—Generally preferred for early sowing, and is a popular sort with market gardeners. Leaves, large, thick and fleshy. Pkt. 3c, oz. 5c, $\frac{1}{4}$ lb. 15c, lb. 35c, 4 lbs. \$1.25.

BLOOMDALE—The leaves are numerous and partially rolled. It is much liked by gardeners wherever introduced. Pkt. 3c, oz. 5c, $\frac{1}{4}$ lb. 15c, lb. 35c, 4 lbs. \$1.25.

NEW LONG STANDING—A sort of the finest quality and producing nearly twice the weight of crop as other sorts, and is also the hardiest of all Spinaches. The leaves are numerous, succulent, curled and wrinkled like a Savoy Cabbage. Pkt. 3c, oz. 5c, $\frac{1}{4}$ lb. 15c, lb. 35c, 4 lbs. \$1.25.

Salsify or Vegetable Oyster

1 oz. will sow 50 feet of Drill.

MAMMOTH SANDWICH ISLAND—Mammoth, indeed, as compared with the common kinds. It is pure white in color and has all the good qualities of the other, which, with its great size, will recommend it to all gardeners. It should be found in every garden in the land. Pkt. 4c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. \$1.00.

LONG WHITE—Pkt. 4c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. \$1.00.

THE FAXON SQUASH

A distinctive feature of this squash is that the ripe squashes vary in color, some of them being pale yellow with still paler yellow stripes in hollows, while others are green, mottled, and faintly striped with a lighter green. In this respect it is different from all other varieties, and after years of careful trial we have found that this squash follows its type absolutely true, and we can offer this squash to you as a distinct new vegetable. The originator says: **"WE HAVE SPENT YEARS IN PERFECTING THE FAXON SQUASH, AND WE NOW ASK YOU TO GIVE OUR NEW VEGETABLE A TRIAL."**

The flesh is a deep orange yellow, cavity very small, and seeds few; the special peculiarity, however, is that, while uncooked it appears to have a shell like any squash, when cooked there is practically none, the shell or inedible part being only about as thick as a sheet of writing paper. It is the best squash we ever tasted—sweet and very dry—and for squash pies it must be tried to be appreciated. We know a trial will convince all of its great value.

It matures early and can be used as a summer squash. It is the best winter variety we know of, being a very late keeper, we having repeatedly had squashes in our cellar in perfect condition in April and May. It is the only squash we ever saw that every specimen is of superior quality without regard to size or whether it is ripe or green.

This is a very desirable feature, as many squashes (the Hubbard especially) must be thoroughly ripe before frost, or the crop is lost. It is not so with "The Faxon Squash"; every specimen can be gathered and used.

Very early, enormously productive, of medium size and the best possible quality, we fully believe that this new variety is destined to become a standard amongst squashes, both for home use and market purposes.

After most carefully testing this new squash for ten years, and having had many of the very best squash experts in this country thoroughly try this vegetable for the same period—the universal verdict is that "THE FAXON SQUASH" is by far the best squash in cultivation for the kitchen garden.

Per Liberal Packet 10 cents, 3 Packets for 25 cents,

Ounce 15 cents, $\frac{1}{4}$ Pound 40 cents, Pound \$1.25.

NEW MAMMOTH Hubbard Squash

This new strain of Hubbard Squash surpasses the old in size, while not losing any of the fine table qualities that have made the original Hubbard the most popular squash ever known in the country. Our aim has been to increase the size as well as to improve the quality in this new strain. Our customers who grow the **MAMMOTH HUBBARD** will see that we have succeeded. The flesh is the most delicate, fine grained and sweetest of all. Can be had in use from Sept. until May. We look for a large demand for seed, knowing this variety fully merits extensive cultivation. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 80c.

If you could get out a catalogue like this, exclusively your own, and make the per cent of profit offered you on page 21, would you not try to do a business on it?

We furnish you all the facilities without expense. There is nothing to hinder you from embarking in this pleasant and profitable business. Will you embrace the opportunity? Or will you allow it to go by and charge another item in the column of "opportunities lost"? **J. A. EVERITT, Seedsman.**

SQUASHES—CONTINUED.

Plant about 4 lbs. per acre.

Mammoth Chili—The largest of the Squash family, being simply immense. The largest Squash on record—292 pounds—was of this variety. If you want to secure the premium at your county fair, plant some of this seed. Color orange yellow, smooth skin; flesh very thick and fine grained, good and nutritious. A profitable variety to grow for stock feeding. Keeps well through the winter. **Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.**

MAMMOTH WHITE BUSH, SCALLOPED—The Squashes are very uniform in shape and wonderfully prolific. They are fit to use very early, are a beautiful white color and grow very large size—12 to 15 inches across. **Pkt. 4c, oz. 10c, ¼ lb. 20c, lb. 50c.**

GIANT SUMMER CROOKNECK—This new strain is even earlier than the common variety; the Squashes grow to an extra large size, measuring from 18 inches to 2 feet long, of finest quality. On account of their handsome appearance they command an extra price on the market. **Pkt. 4c, oz. 10c, ¼ lb. 20c, lb. 50c.**

PROLIFIC ORANGE MARROW—The skin is a rich, deep orange, making the Squash of a very handsome appearance. As large as the Hubbard; the flesh is

very thick, fine grained and of choice quality. In prime condition from September to January. **Pkt. 4c, oz. 10c, ¼ lb. 20c, lb. 50c.**

HUBBARD—Generally considered the best winter Squash grown; flesh dark yellow, fine grained, dry and sweet; very hard shell; will keep till spring; productive; color green, when ripe. **Pkt. 4c, oz. 10c, ¼ lb. 20c, lb. 50c.**

EARLY YELLOW BUSH, SCALLOPED—A popular variety. Grows to medium size and of unsurpassed quality. **Pkt. 4c, oz. 10c, ¼ lb. 20c, lb. 50c.**

ESSEX HYBRID—A very productive Squash of finest quality and an excellent keeper, specimens having been kept until June as sound and good as when gathered. Early, quick growth, and can be raised very successfully as a second crop, following early potatoes, peas, etc. **Pkt. 4c, oz. 10c, ¼ lb. 20c, lb. 50c.**

WINTER CROOKNECK—The best keepers. Color pale green; excellent for table use. **Pkt. 4c, oz. 10c, ¼ lb. 20c, lb. 50c.**

GOLDEN CUSTARD—An improvement on the old Yellow Bush, so well and widely known. Very early, of a bright, golden yellow, often producing Squashes 12 to 15 inches across. **Pkt. 4c, oz. 10c, ¼ lb. 20c, lb. 50c.**

APPLE PIE MELON.

A novelty which will be appreciated in many sections of the country, and especially so during seasons when apples are scarce or high in price. They are easily grown on any good soil. The vine produces 4 to 8 large, oblong fruits, weighing 20 to 50 pounds each, of dark green color, and greatly resembling watermelons. The flesh is white, solid throughout, and of excellent quality for

making pies, sauce, preserves, etc., greatly resembling apples in taste. They will keep all winter and can be used at any time. One vine will produce 200 pounds, or equal to about four bushels of apples. **Pkt. 10c.**

APPLE-
PIE
MELON

CHINESE HORN NUTS.

A large and most singular appearing nut, resembling buffalo horns, which is known botanically as *Trapa Nutans*. It is a native of China, and is largely used as a food there and in some parts of southern Europe. It is a swamp plant, and will grow well in a jar of water. An ordinary glass fruit jar will answer. The nuts sprout in about ten days, and their growth is very interesting and rapid, and sometimes they produce quite pretty flowers. Can be grown in an aquarium. These nuts have been sold at the World's Fair and elsewhere at 10 cts. to 25 cts. each.

We offer them in pkts. of 4 nuts for 15 cents.

TOMATOES.

Our Tomato Seed is grown from stocks selected strictly for seed purposes and grown strictly for seed. We use no canning house Tomato Seed.

On page 51 we offer a real Giant in Tomatoes—the largest of all. While size, combined with earliness, productiveness and high quality, to a great extent fills the bill, yet if we do not attain extreme earliness it lacks in being a complete all-around Tomato. As is usual when we attain great size in a vegetable, we sacrifice to a certain extent earliness, hence we must make this up in another variety, which we have done in **EVERITT'S EARLIEST OF ALL**. Extreme earliness is where this variety excels. Outside of this we have equally as good tomatoes as regards color, form and table qualities, but none of them approach Everitt's Earliest of All, in season of ripening, by a week. This is a very important consideration, as it allows the market gardener to get the high price early in the season, which oftentimes is the only part of his crop that it pays

to market. **Everitt's Earliest of All** is bright scarlet color, very smooth, solid and fine; medium size. The plant grows thrifty and spreading, thus allowing the sun to ripen the fruit evenly and quickly. Every gardener should plant this tomato. The small investment in seed will be many fold returned in the crop if used at home or marketed. Pkt. 10c, 3 for 25c, 10 for 50c, oz. 25c, ¼ lb. 75c per lb. \$2.50.

NEW TOMATO MAGNUS.

We give the Originator's Description as follows:

"This very distinct and most promising new variety, of the color of Beauty and Acme, is the latest addition by Livingston to the Tomato family. It is thicker, heavier and more solid than either Acme or Beauty, making it easily the most handsome sort in cultivation. It is unsurpassed in quality, and in the production of fine, large fruits. While perfectly adapted to main crop planting, yet it matures so quickly that it will take first rank for early market. The form is perfect, uniform, large and attractive. Flesh is very firm. It is a robust grower, with short joints, setting its fruit clusters closer together than most varieties, and is therefore a heavy cropper. The fruits are very deep from stem to blossom end, many of them being almost globe-shaped. It ripens evenly, does not crack about the stem, and the flavor is most desirable. We have tested it for several years for staking up in the open field, as well as for forcing in greenhouses, and we believe it to be entirely unequalled for such purposes." Pkt. 15c, 2 for 25c, 5 for 50c, oz. 50c.

O. K. means "all right." It is our trade mark, and all seeds and plants going out under this name are all right.

LOGAN'S GIANT SEEDLING

UNEQUALED IN SIZE, UNSUR-
PASSED IN PRODUCTIVENESS,
SOLIDITY, QUALITY AND SWEETNESS.

A GREAT SOLID BALL OF TENDER,
DELICIOUS MEAT WITH VERY FEW
SEEDS THE BEST EVER PRODUCED.

THE LARGEST, MOST SOLID, MOST PRODUCTIVE, BEST QUALITY.

THESE few words describe this **GREAT TOMATO**. Others claim wonderful properties, offer prizes to induce big reports, but our **Logan Giant Seedling** comes out victorious every time. If you think you have tried the largest Tomato, try this one now, and you will see that you did not have the largest and best heretofore. It is not only a new variety, but we claim for it in point of productiveness, size of fruit, exquisite quality and flavor, as well as early ripening, *the best Tomato extant*. They grow to weigh over 3 pounds each and attain the enormous circumference of 2 feet. This Tomato is not, like many others, one-third seeds and water. They are a great solid ball of tender, delicious meat, *with very few seeds*. They have frequently sold at 15 cents each in competition with other kinds at 35 cents per bushel. If the vines are trained on a support they will grow 10 feet high and be loaded with the finest fruit you ever placed your eyes on.

THE GIANT OF
TOMATOES

READ THE FOLLOWING REPORTS. (All letters are on file in our office.)

We never saw their equal for prolific bearing and size. It is a marvelous sight. PENNA. FARMER.

Have eaten the Logan Giant Tomato, and am pleased to say it is the greatest improvement I ever saw in any vegetable. It is the best tomato I ever saw. D. H. CHRISTY, Pa.

The earliest; the largest; the best yielder; the most delicious tomato I ever ate. KENNEDY COLE, Pa.

Two Giants weighed 36 ounces each. They are truly wonderful. The Giant tomato grew very tall and fruited very large and prolific, hence, imagine my surprise to find them so solid, sweet and delicious. **The finest I ever ate.** MRS. J. C. HARRIS, Pa.

I picked 16 pounds of Giant Tomatoes at one picking from one vine. SAMUEL JOHNSON, Pa.

I have bought the Logan Giant Tomatoes at \$3.00 per bushel, for sale in my store before other varieties were ripe. Ripened early. H. J. LIBERMAN, Pa.

I bought ten new varieties last spring and gave them a fair comparative test. Logan Giant stands first for size and quality. **I never raised nor seen such fine tomatoes before in my life.** J. H. CURTIS, N. Y.

Mr. Wade, of Blooming Valley, brought to this office a cluster of 8 tomatoes all on a single stem, weighing

10 lbs. They are of the Logan Giant variety. The quality is equal to the quantity. PENNA. FARMER, Pa.

Logan Giant Tomato is the best I ever saw. I sold single tomatoes for 10 cents each; the product of a single stem for 10 cents. Single plants bore 30 pounds of fruit. Twelve weighed 23 3/4 pounds. They ripen with the earliest. D. L. MARSHALL, Mo.

You have given your seeds the right name. They are **O. K.** and no mistake. My wife says she never saw anything to equal your Japanese Climbing Cucumber, Prize Taker Onions, and Logan Giant Tomatoes. They beat the world. The Six-Weeks Potatoes are first-class. CHAS. M. MOHR, Struthers Station, O.

I have planted your celebrated **O. K.** Seeds for 4 years, and believe they are the only true and reliable seeds for sale anywhere. Out of 100 plants of Rough and Ready Cabbage I received 97 good, salable heads. My 3 years' experience with Logan's Giant and Everitt's Earliest Tomato show them to be the best for early gardeners. Everitt's Earliest comes three weeks ahead of other early varieties. You will receive my future orders. FRED. L. BROWN, New Petersburg, O.

We could print a great many more reports if space permitted.

Price, pkt. 10c, 3 pkts. 25c, 8 pkts. 50c, 20 pkts. \$1.00.

25 CENT BARGAIN COLLECTION

For 25 cents we will send one package each of our Great Tomatoes, namely, **THE GIANT** on this page, **THE CLIMBING** on next page, **THE EARLIEST** on preceding page, and **THE TREE** on page 53. These varieties will prove very interesting and profitable in any garden. 4 pkts. for 25c.

Giant Climbing TOMATO.

Great progress has been made in late years in the improvement of the tomato. Quite in contrast with the small, ill-shaped, sour specimens of a few years ago are the large, smooth, sweet fruits now so easily raised. Great rivalry exists in localities as to who can raise the earliest or the largest tomatoes. We offer in the **Giant Climbing Tomato** the greatest novelty in this line, and whoever raises it according to directions printed on each package will have an attraction that will draw all eyes toward their garden.

This is not a tree tomato. The term "tree," frequently applied to tomatoes, is generally intended to mislead. We do not call grapes "tree grapes" because they will climb up a trellis. The **Giant Climbing Tomato** needs a support to climb upon, when they will grow 10 to 15 ft. high, bearing fruit all along the vine from the ground up. The tomatoes grow to weigh from 2 to 4 lbs. each, and in size 10 to 16 inches in circumference. Nearly all the tomatoes are smooth and regular in shape; color, glossy red; sound to the core, with very few seeds. The flavor is all that can be desired. They are everbearing, only cut off by frost. These tomatoes can be grown on the garden fence, on the sunny side of a house or out-building, or in any position where a support is provided. The more public the situation the more will they be admired.

We print a few reports. Many more could be given if space permitted.

"Your Giant Climbing Tomatoes are immense. I have them weighing 2½ lbs., and the people see that they are wonderful. GEO. B. BOOTH, Ludlow, Mass."

"One plant of Giant Tomatoes grew over 8 feet high. The best cluster was 7 tomatoes, weighing 6 lbs., all ripe at one time. WM. YATES, Titusville, Pa."

"The Giant Climbing Tomatoes are wonderful in size and fine quality. One fruit weighed 3 lbs. 1 oz. C. H. COX, Bascobel, Pa."

"The Giant Tomatoes averaged a yield of nearly a bushel to each plant. One vine grew 14 feet high. H. D. MUSSER, Rholdestown, Pa."

"It is a pleasure to see your Giant Climbing Tomatoes grow, and any person can well be proud of them. They are mammoth in size and wonderful in tall growth. I have some specimens measuring 16 inches in circumference and over 6 inches in diameter. Fine flavor and better than I thought it could be. You can not recommend them too highly. MRS. WM. CRABBE, West Branch, Cal."

"From the Giant Tomato seed I raised the greatest crop I ever saw. One weighed 3 lbs. and many 2 lbs. each. P. J. DIGGS, Mallory, Va."

Price of Everitt's Giant Climbing Tomato Seed.

As this tomato is a very shy bearer of seed, the price will always be high, yet when you consider that each plant, with proper care, will produce a bushel of ripe tomatoes and probably a bushel of green ones for pickling when frost cuts them off, the price should not be considered.

1 liberal package 10c; 3 for 25c; 10 for 50c. Families should club together and get them at wholesale rates.

GIANT CLIMBING TOMATO.—Showing habit of growth. Besides being a great novelty and a profitable variety to grow, they are very useful and ornamental as a vine to furnish shade and cover and beautify unsightly places. They grow with remarkable rapidity.

4 VALUABLE TOMATOES 4

KUTTAWA DWARF TREE.

The great Tomato that stands up like a bush. Plant deeply and draw earth up around the stem and you will have no trouble picking dirty Tomatoes off the ground. Almost proof against cut worms, on account of the woody nature of the stems. Very productive. Fruit bright red, very solid. Best keeper and shipper. Its upright, self-supporting habit and compact growth allows it to be planted 16 inches apart in rows 2½ feet apart. The effect is a solid row or hedge of green from end to end of the rows, allowing 8,000 to 10,000 plants on an acre without crowding. The plant grows 20 to 30 inches high and supports its fruit off of the ground. Color, cardinal red.

The plant when growing resembles Irish potatoes, so much so that it is usual for people to ask, "What kind of potatoes are these?" In season is early, ripening equal with any of the other large size Tomatoes, and is superseded only by the small fruited sorts. Adapted for cultivation on a large or small scale for the cannery, for the market, for the home. Besides all its good qualities, is a great novelty. Every person who plants a garden should plant a package or more. Pkt. 10c, 3 for 25c, 10 for 50c.

MATCHLESS TOMATO.

Well worthy of its name for its beautiful color and fine form; it is indeed without a peer. The vines are of strong, vigorous growth, well set with fruit. The fruits are free from core, of a very rich cardinal red color, and are not liable to crack from wet weather, are of very large size, and the size of the fruit is maintained throughout the season until killed by frost. The skin is remarkably tough and solid, and ripe specimens picked from the vines will keep in good condition for several weeks. It is of fine quality, solid and a long keeper. Pkt. 5c, oz. 20c, ¼ lb. 50c, lb. \$1.50.

KUTTAWA DWARF TREE TOMATO.

DWARF CHAMPION TOMATO.

A very distinct variety. Its close, upright growth allows it to be planted closer together than other varieties. The fruit resembles the Acme, is of a purplish pink color and always smooth and symmetrical in form. It is of medium size and attractive in appearance; the skin is tough and the flesh solid, of fine quality. A very shy seeder. Pkt. 5c, oz. 20c, ¼ lb. 50c, lb. \$1.50.

BUCKEYE STATE TOMATO.

This Tomato is the largest of all new sorts, fully ½ larger than the cropper, the Tomatoes being borne in clusters of four to eight fruits. The color being much the same as Beauty, if anything a little darker and more brilliant red, very solid, meaty, heavy and of the finest quality. Pkt. 5c, oz. 20c, ¼ lb. 50c, lb. \$1.75.

Price of the following, unless otherwise quoted: Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50.

MIKADO—Also called Turner's Hybrid, is one of the finest, largest, most solid and most productive Tomatoes grown. The heaviest Tomato ever grown of this mommoth variety was grown from O. K. Seeds—weight 4 lbs. 2 oz. Rapid grower, thick stalk; beautiful shape and color; the weight averages from 1 to 4 lbs.

EARLY ESSEX HYBRID—This is one of the most profitable Tomatoes for the market in cultivation. Pink skin, very early and always ripening all over alike.

The flesh being very hard and solid makes it one of the best Tomatoes for shipping and marketing. We recommend it highly.

IMPROVED TROPHY—Fruit large, smooth, solid, fine color; very productive; well known and popular market sort.

SELECTED ACME—One of the earliest in cultivation. Fruit of medium size, perfect form,

round, slightly depressed at the poles; pink purplish color. Ripens evenly and has no green core. Bears continuously until frost comes.

PERFECTION—Shaped like the Acme, but somewhat larger, fully as early, perfectly smooth, blood-red in color, with more solid flesh and fewer seeds, and produces more and larger fruit at end of the season.

STONE—This new main crop Tomato is very large, bright scarlet red color, smooth shape. A distinguishing feature, and from this it takes its name, is its great solidity.

Essex Hybrid.

Stone.

The flesh is very firm. One of the best shippers. A grand variety, unsurpassed for keeping.

GOLDEN QUEEN—There are many varieties of the red Tomato, but every gardener will hail with delight this fine yellow sort. In size, solidity and productiveness equals any of the red.

LONGKEEPER—This new Tomato of recent introduction was originated by E. S. Carman, editor of "The Rural New Yorker." It is claimed by the originator to combine long-keeping qualities, uniform shape,

earliness in ripening as well as productiveness to a remarkable degree.

TOMATOES for PRE-SERVING—Red Cherry, Yellow Cherry, Red Pear-shaped and Yellow Plum.

LIVINGSTON'S BEAUTY—A fine variety, coming from originator of Acme, Paragon,

Perfection and Favorite. Very distinct from all former introductions. The color is a glossy crimson with a purple tinge. It grows in clusters of four and five, retaining its large size late in the season; very solid, with a tough skin, making it very desirable for market and shipping.

LIVINGSTON'S FAVORITE—Ripens evenly and early, holds its size to the end of the season. It is very prolific, few seeds, solid flesh, bears shipping long distance.

PEACH TOMATO—This is a very useful and beautiful oddity. For preserving, Peach Tomato is hard to beat.

Favorite

You need not write to us in advance, but go to work as soon as you get this catalogue and make up your club. Page 21.

TURNIPS. CARTER'S CARDINAL

1 oz. will plant
250 feet of Drill.
Sow about 1 lb.
broadcast per
acre.

We sell any of the
following varieties,
unless noted, at—pkt. 3c, oz. 8c, 1/4lb.
15c, lb. 50c, by mail; by freight
or express, per lb. 40c.

CARTER'S CARDINAL.

This variety is distinct from others, having a deep cardinal skin, which not only appears on the top, but also covers the whole root. Of course we do not recommend it entirely on account of its novel color, but as a good, all round variety, and one that can be depended on in hot, dry seasons, and on a great variety of soils. The Cardinal is of medium size, flat, with very short top, and a fine table quality. It is one of the best varieties to grow on hot, dry land, not running to seed like some early kinds, and being quite sweet and solid. The Cardinal has a strong tap root, this doubtless protecting it from drought, and having thick, spreading foliage, the root is shaded. A great acquisition. One of the very earliest, being ready for use a short time after sowing. Pkt. 10c, 3 for 25c, oz. 15c, 1/4lb. 50c, lb. \$1.00.

Early Six Weeks, or Snowball—This new Turnip is very early, growing and maturing rapidly. Bulbs beautiful white; medium size, solid. Flavor mild; free from side roots.

PURPLE TOP MUNICH—One of the earliest in cultivation, making an excellent spring garden turnip.

RED or PURPLE-TOP STRAP LEAVED—One of the most popular varieties, both for table and stock. Grows to a large size, solid, crisp and mild flavor. We have the best strain of this popular variety that can be found anywhere. None better.

EXTRA EARLY MILAN—The earliest flat Turnip in cultivation. Of medium size, with a bright purple top; leaves few, short, growing very compact; flesh pure white, of choicest quality, hard, solid and fine-grained; an excellent keeper. Pkt. 5c, oz. 10c, 1/4lb. 25c, lb. 75c.

EARLY WHITE FLAT DUTCH—Size, medium; flat, white, sweet, tender; rich for table; spring and fall.

WHITE EGG—A variety of very rapid growth; egg-shaped, thin white skin, solid, firm, fine-grained flesh.

RED or PURPLE-TOP GLOBE—This is the most productive variety and one of the handsomest; quality very fine for table. Owing to its great yielding propensities, can be grown with a great profit for stock.

GOLDEN BALL or ORANGE JELLY—Very beautiful and bright yellow turnip of medium size, sweet and delicious flavor.

Long White Cow Horn—Flesh white, fine-grained, sweet; keeps well.

LARGE WHITE GLOBE—Often attain the weight of 12 pounds; extra good fall and winter; skin white.

Sweet German—Must be sown much earlier than the flat turnips. In the autumn and early winter it is apt to be hard, but softens in time.

SEVEN-TOP or FORESTER—Grown exclusively in the South for its abundant leaves, which are boiled with meats. Pkt. 5c, oz. 10c, 1/4lb. 15c, lb. 50c.

SWEDES OR RUTA-BAGAS.

Price same as Turnips.

Grown for stock feed, and could be profitably cultivated on a much larger scale.

CARTER'S IMPERIAL—A hardy sort, excellent for table use or feeding stock. Does not run to long necks. This should be sown a month earlier than the other varieties.

LAING'S IMPROVED RUTA-BAGAS—One of the earliest and best for table. Handsomest variety, first-class quality.

LARGE WHITE FRENCH—Excellent for table use as well as stock. Large size, solid, mild and sweet. A desirable sort.

In July we will publish a **SPECIAL TURNIP Price List**. Send for it.

HERBS.

Indispensable to the cook, useful in the sickroom, and many kinds fine for perfuming clothing, etc. The varieties marked with an asterisk (*) are perennial, and when once started in the garden may be preserved for years with but little care.

ANISE—Used for cordial, garnishing and flavoring. Pkt. 5c, oz. 10c.

BALM—Leaves have a fragrant odor. Pkt. 5c, oz. 25c.

BASIL SWEET—Leaves used for flavoring soups, stews, and highly seasoned dishes. Pkt. 5c, oz. 20c.

BORACE—Leaves used for flavoring. Pkt. 5c, oz. 15c.

CATNIP—Leaves and young shoots are used for seasoning. Pkt. 5c, oz. 40c.

CARAWAY—Grown for the seeds, which are extensively used for flavoring of bread, pastry, candy, etc. Pkt. 5c, oz. 10c.

CORIANDER—Pkt. 5c, oz. 10c.

DILL—Seeds used for pickling cucumbers. Pkt. 5c, oz. 10c.

FENNEL, SWEET—Pkt. 5c, oz. 10c.

HYSSOP—Is a stimulant and used for asthma and chronic catarrh. Pkt. 5c, oz. 20c.

THOREHOUND—Leaves used for making cough medicine. Pkt. 5c, oz. 30c.

LAVERAND—Pkt. 5c, oz. 20c.

MARJORAM, SWEET—Pkt. 5c, oz. 20c.

PENNYROYAL—Pkt. 5c.

ROSEMARY—Ornamental herb. Pkt. 5c, oz. 40c.

RUE—Good for colds and croup. Pkt. 5c, oz. 15c.

SAFFRON—Pkt. 5c, oz. 10c.

SAGE—Extensively used for seasoning and dressing. Pkt. 5c, oz. 15c.

SAVORY, SUMMER—Pkt. 5c, oz. 15c.

SAVORY, WINTER—Pkt. 5c, oz. 20c.

TANSY—Pkt. 5c, oz. 30c.

THYME—Pkt. 5c, oz. 30c.

WORMWOOD—Is a beneficial to poultry. Pkt. 5c, oz. 25c.

Plants are generally known as Annuals, Biennials and Perennials.

Annuals are those plants that flower and mature their seeds within a year after they are sown, and then perish. Biennials are those plants that flower the second and sometimes the third year after the seed is sown,

and then perish. Perennials are those plants that generally do not bloom until the second

year, and then live and bloom for several years in succession. The following list will be found convenient to many in making their selections:

SEEDS FOR SPECIAL PURPOSES.

Plants of taller growth suited for Large Beds, Backgrounds or Centers, around which smaller kinds may be grouped. Antirrhinum, Calceola, Delphinium, Mirabilis, Salpiglossis, Scabiosa, Cinnamon Vine, Cobea, Cypress, Nasturtium Tall, Sweet Peas, Wild

Spreading or Trailing Plants adapted for Trellises, Verandahs, etc. Abronia, Alyssum, Gilia, Mophila, Nolana, Sanvitalia, Verbena, etc. *Low-growing Plants of spreading habit, adapted to Small Beds, Ribbons, Massing or Edging.* Abronia, Ageratum, Alyssum, Calliopsis, Campanula, Candytuft, Catchfly, Centranthus, Clarkia, Convolvulus, Daisy, Lobelia, Mignonette, Myosotis, Nasturtium Dwarf, Pansy, Verbena, Petunia, Phlox, Poppy, Portulaca, Pyrethum,

Plants of taller growth suited for Large Beds, Backgrounds or Centers, around which smaller kinds may be grouped. Antirrhinum, Calceola, Delphinium, Mirabilis, Salpiglossis, Scabiosa, Cinnamon Vine, Cobea, Cypress, Nasturtium Tall, Sweet Peas, Wild

Spreading or Trailing Plants adapted for Trellises, Verandahs, etc. Abronia, Alyssum, Gilia, Mophila, Nolana, Sanvitalia, Verbena, etc. *Low-growing Plants of spreading habit, adapted to Small Beds, Ribbons, Massing or Edging.* Abronia, Ageratum, Alyssum, Calliopsis, Campanula, Candytuft, Catchfly, Centranthus, Clarkia, Convolvulus, Daisy, Lobelia, Mignonette, Myosotis, Nasturtium Dwarf, Pansy, Verbena, Petunia, Phlox, Poppy, Portulaca, Pyrethum,

Plants of taller growth suited for Large Beds, Backgrounds or Centers, around which smaller kinds may be grouped. Antirrhinum, Calceola, Delphinium, Mirabilis, Salpiglossis, Scabiosa, Cinnamon Vine, Cobea, Cypress, Nasturtium Tall, Sweet Peas, Wild

Spreading or Trailing Plants adapted for Trellises, Verandahs, etc. Abronia, Alyssum, Gilia, Mophila, Nolana, Sanvitalia, Verbena, etc. *Low-growing Plants of spreading habit, adapted to Small Beds, Ribbons, Massing or Edging.* Abronia, Ageratum, Alyssum, Calliopsis, Campanula, Candytuft, Catchfly, Centranthus, Clarkia, Convolvulus, Daisy, Lobelia, Mignonette, Myosotis, Nasturtium Dwarf, Pansy, Verbena, Petunia, Phlox, Poppy, Portulaca, Pyrethum,

Plants of taller growth suited for Large Beds, Backgrounds or Centers, around which smaller kinds may be grouped. Antirrhinum, Calceola, Delphinium, Mirabilis, Salpiglossis, Scabiosa, Cinnamon Vine, Cobea, Cypress, Nasturtium Tall, Sweet Peas, Wild

Spreading or Trailing Plants adapted for Trellises, Verandahs, etc. Abronia, Alyssum, Gilia, Mophila, Nolana, Sanvitalia, Verbena, etc. *Low-growing Plants of spreading habit, adapted to Small Beds, Ribbons, Massing or Edging.* Abronia, Ageratum, Alyssum, Calliopsis, Campanula, Candytuft, Catchfly, Centranthus, Clarkia, Convolvulus, Daisy, Lobelia, Mignonette, Myosotis, Nasturtium Dwarf, Pansy, Verbena, Petunia, Phlox, Poppy, Portulaca, Pyrethum,

Plants of taller growth suited for Large Beds, Backgrounds or Centers, around which smaller kinds may be grouped. Antirrhinum, Calceola, Delphinium, Mirabilis, Salpiglossis, Scabiosa, Cinnamon Vine, Cobea, Cypress, Nasturtium Tall, Sweet Peas, Wild

Spreading or Trailing Plants adapted for Trellises, Verandahs, etc. Abronia, Alyssum, Gilia, Mophila, Nolana, Sanvitalia, Verbena, etc. *Low-growing Plants of spreading habit, adapted to Small Beds, Ribbons, Massing or Edging.* Abronia, Ageratum, Alyssum, Calliopsis, Campanula, Candytuft, Catchfly, Centranthus, Clarkia, Convolvulus, Daisy, Lobelia, Mignonette, Myosotis, Nasturtium Dwarf, Pansy, Verbena, Petunia, Phlox, Poppy, Portulaca, Pyrethum,

Plants of taller growth suited for Large Beds, Backgrounds or Centers, around which smaller kinds may be grouped. Antirrhinum, Calceola, Delphinium, Mirabilis, Salpiglossis, Scabiosa, Cinnamon Vine, Cobea, Cypress, Nasturtium Tall, Sweet Peas, Wild

Spreading or Trailing Plants adapted for Trellises, Verandahs, etc. Abronia, Alyssum, Gilia, Mophila, Nolana, Sanvitalia, Verbena, etc. *Low-growing Plants of spreading habit, adapted to Small Beds, Ribbons, Massing or Edging.* Abronia, Ageratum, Alyssum, Calliopsis, Campanula, Candytuft, Catchfly, Centranthus, Clarkia, Convolvulus, Daisy, Lobelia, Mignonette, Myosotis, Nasturtium Dwarf, Pansy, Verbena, Petunia, Phlox, Poppy, Portulaca, Pyrethum,

Plants of taller growth suited for Large Beds, Backgrounds or Centers, around which smaller kinds may be grouped. Antirrhinum, Calceola, Delphinium, Mirabilis, Salpiglossis, Scabiosa, Cinnamon Vine, Cobea, Cypress, Nasturtium Tall, Sweet Peas, Wild

Spreading or Trailing Plants adapted for Trellises, Verandahs, etc. Abronia, Alyssum, Gilia, Mophila, Nolana, Sanvitalia, Verbena, etc. *Low-growing Plants of spreading habit, adapted to Small Beds, Ribbons, Massing or Edging.* Abronia, Ageratum, Alyssum, Calliopsis, Campanula, Candytuft, Catchfly, Centranthus, Clarkia, Convolvulus, Daisy, Lobelia, Mignonette, Myosotis, Nasturtium Dwarf, Pansy, Verbena, Petunia, Phlox, Poppy, Portulaca, Pyrethum,

Plants of taller growth suited for Large Beds, Backgrounds or Centers, around which smaller kinds may be grouped. Antirrhinum, Calceola, Delphinium, Mirabilis, Salpiglossis, Scabiosa, Cinnamon Vine, Cobea, Cypress, Nasturtium Tall, Sweet Peas, Wild

WILD FLOWER GARDEN.

CHOICE MIXED SEEDS

A mixture of many varieties of beautiful, easy-growing flowers, producing a constant and varied bloom the whole season. In no other manner can so many seeds be obtained for such a **SMALL COST**. This mixture is especially prepared from Choice Seeds. They are very useful for sowing alongside the garden fence and on untidy, bare spots of ground, and can not fail to **GIVE SATISFACTION**.

Pkt., 5 cents; ounce, 20 cents.

A LOAD OF FLOWERS.

This girls parents buy flower seeds of J. A. Everitt, Seeds-man.

A small sum invested in their seeds will afford loads of flowers for the whole season.

EVERITT'S CHOICE FLOWER SEEDS

Our Flower Seeds are the best that can be procured from the best growers in America and Europe. **THE LIST** comprises nearly all the varieties that can be successfully grown by the average cultivator, omitting such as require the skill of a veteran, and special facilities. **CULTURAL DIRECTIONS** are printed on each package, together with a correct illustration in colors. **OUR PRICES SHOULD BE POPULAR.** We don't aim to charge as much for a package as a pound costs us, but we have made our prices so low that **EVERYBODY CAN HAVE AN ABUNDANCE.**

In the following list "a" stands for annual, "b" for biennial, "p" for perennial, "h.a." hardy annual, "h.h.a." half hardy annual, "t.p." tender perennial, etc.

10. **ABRONIA Umbellata.** h.h.a. Very pretty trailing plants. Sweet-scented flowers. 4c.
12. **ABUTILON.** (Flowering Maple.) t.p. Well adapted for house culture and for bedding out doors. **Finest mixed, 15c.**
15. **ACROCLINUM.** h.h.a. One of the best everlasting flowers. **Choice mixed, 3c.**
20. **ADONIS Autumnalis.** (Pheasant's Eye.) h.a. Very showy. 3c.
- AGERATUM.** h.h.a. Excellent for bouquets. 25. **Mexicanum.** 5c. 26. **Finest varieties mixed, 3c.**
- AGROSTEMMA.** (Rose of Heaven.) h.a. Abundant bloomer with deep rose flower. **Fine mixed, 4c.**
32. **ALYSSUM-Sweet white.** h.a. Delicate flowers of a honey-like fragrance; much prized for bouquets. 3c.
35. **ANMOBIUM.** (Everlasting.) Valuable for winter bouquets. 4c.
37. **AMPELOPSIS Veitchii.** (Boston Ivy.) h.p. 5c.
- AMARANTHUS.** h.a. Of remarkably handsome foliage and interesting flowers. 40. **Caudatus.** (Love lies bleeding.) 4c.
41. **Tri-color.** (Joseph's coat.) Red, yellow and green. 5c.
42. **Salicifolius.** (Fountain Plant.) 44. **Mixed.** All colors. 4c.
- ANTIRRHINUM.** (Snap Dragon.) h.p. 46. **Majus.** Mixed Tall; 2 ft. 4c. 47. **Tom Thumb.** Mixed dwarf. 3c.
- AQUILEGIA.** Columbine. h.p. Blossoms early in the spring. 65. **Single.** All colors. 2c. 66. **Double.** All colors. 4c.
68. **ASPERULA.** h.a. For button-hole bouquets nothing will be oftener in request. **Fine mixed, blue. 3c.**
- Asters** h.a. Very beautiful and popular plants. 50. **Dwarf Bouquets.** A magnificent variety. 3c. 51. **German Quilled.** Of all colors. Very popular. 10c. 52. **New Dwarf Polony Perfection.** Flowers profusely. Very large size and perfectly double. **Finest mixed 10c.** 54. **Chrysanthemum Flowered.** Flowers resemble chrysanthemums. **All Colors mixed, 10c.**
70. **BALLOON VINE.** h.h.a. A rapid, handsome climber. 4c.

Balsams h.a. Very popular plants; produce most lovely and striking flowers in rich profusion. Easy cultivated.

80. **Extra Double Rose Flowered.** Profusely covered with large double flowers of brilliant colors throughout the summer and autumn. **Mixed, 5c.** 81. **The King.** Brilliant scarlet. Very double. 5c. 82. **Camellia Flowered.** Very double and beautiful colors. **Mixed, 5c.** 83. **Double Solerino.** Beautiful white ground, with lilac and scarlet. 3c.
75. **BAERTONIA, Aurea.** h.a. Flowers, with downy, thistle-like foliage, exceedingly brilliant. 5c.

- Begonias** t.p. As bedding plants there is nothing to equal the Tuberous Rooted Begonia. They bloom equal to the geranium, but with a form and variety of colors and shading equal to the rose. 95. **Tuberous-rooted, Single, 12c.** 96. **Tuberous-rooted, Double, 15c.** 97. **Rex Begonia, mixed.** Beautiful variety, with variegated foliage. 12c.
 105. **BROWALLIA, Rozelia.** h.h.a. Valuable for blooming during winter in the house, as well as bedding out during summer. 4c.
 110. **CACALLA.** (Tassel Flower.) h.a. Small, pretty plants, with tassel-like flowers. 3c.
 - CALCEOLARIA.** t.p. Unsurpassed for pot culture in the greenhouse or conservatory. 120. **Grandiflora.** From the most beautifully marked varieties. 15c.
 123. **CALENDULA.** (Marigold.) h.a. "El Dorado," Flowers very large. 3c. 124. **French Dwarf, 4c.** 125. **African Dwarf, 3c.**

EVERITT'S CHOICE FLOWER SEEDS.

180. **CALIOPSIS—Golden Wave.** h.a. For a mass of bright color, this is probably the most effective of all annuals. 4c.

CAMPANULA. (Canterbury Bells.) h.b. Beautiful well-known plants. 136. **Single Mixed, 4c.** 137. **Double Mixed.** All the finest double varieties. 4c.

134. **CANARY BIRD FLOWER.** t.a. A beautiful climber; will run 20 ft. and blossom from July until frost comes. 5c.

CANDYTUFT. h.a. A treasure for bouquets. 145. **New Carmine.** Distinct and beautiful. 5c. 146. **White Rocket.** Fine for florists. 3c. 147. **Crimson.** Very beautiful. 3c. 149. All the above mixed. 3c.

151. **CANNA.** t.p. Fine foliage plants of a highly decorative character. **Fine mixed, 5c.**

CARNATION. h.h.p. A magnificent class of popular favorites, colors extremely rich and beautiful. 171. **Finest German Double Mixed, 5c.** 172. **Marguerite.** New. Will bloom in 4 months from sowing the seed. 5c.

173. **CASTOR BEAN.** (Ricinus.) h.h.p. Attain gigantic proportions of 8 to 15 ft. **Mixed, 3c.**

175. **CATCHFLY.** h.a. Easy growing, free flowering plant. 5c

178. **CELOSIA.** (Cockscomb.) h.h.a. One of the most satisfactory plants for garden decoration. **Mixed fine, 6c.**

180. **CENTAUREA—Candidissima.** h.h.p. Fine ornamental plant of great beauty. 10c.

190. **CHRYSANTHEMUM.** h.h.a. 196. **Eclipse.** Pure golden with a bright purplish-scarlet ring. 5c. 191. **Fine mixed, 3c.**

195. **CINERARIA.** (Cape Asters.) t.p. The flowers and the foliage are both handsome and may be had in bloom nearly all the year. 195. **Hybrida.** Finest mixed, 10c. 197. **Martima.** 10c.

200. **CLARKIA.** h.a. Flowers are very pretty and of many colors. **Double and Single Mixed, 3c.**

203. **CLEMATIS.** h.p. **Virgiana.** Greenish white, fragrant flowers. 10c. 204. **Mixed.** Possesses all the varied hues of the tall and dwarf varieties. 10c.

210. **COBEA.** h.h.p. A rapid climber, attaining the height of 30 feet in a season; of very easy culture. Large purple bell-shaped flowers. 4c.

COLEUS. t.p. Beautiful ornamental foliage plants. 220. Splendid collection. 8c. 221. **New Hybrid Strains.** Choicest new sorts. 15c.

CYPRESS VINE. (Ipomoea Quamoclit.) t.a. A most beautiful climber, with abundance of bright star-shaped blossoms. 222. **Scarlet.** 223. **Rose.** 224. **White.** Each, 3c. **Mixed, 3c.**

DAISY. (Bellis Perenis.) t.p. Everyone knows the Daisy. A charming little plant. 255. **Extra Double White.** Unusually large double flowers. 5c. 256. **Double, Mixed, 5c.**

262. **ESCHSCHOLTZIA.** (California Poppy.) h.a. A genus of the Poppy family. **Fine mixed, 5c.**

264. **EUPHORBIA VARIEGATA.** h.a. Foliage beautiful. Very showy. Known as "Snow on the Mountain." 5c.

266. **EUTOCA.** h.a. Foliage dull green; leaves hairy; blossoms intense blue striped, three-quarters of an inch across. A branch placed in water will bloom many days. **Mixed, 4c.**

268. **FORGET-ME-NOT.** *Myosotis alpestris.* h.p. Flowers large. 3c.

270. **FOUR O'CLOCK.** (Marvel of Peru.) p. Few plants combine greater beauty of flowers and foliage. **Mixed, 3c.**

272. **FOXGLOVE.** (Digitalis.) h.b. Ornamental plants, producing dense spikes of flowers on stems 3 to 5 ft. high. **Mixed, 3c.**

GAILLARDIA. h.h.a. Remarkable for the size, brilliancy and duration of their flowers. 275. **Mixed varieties, 3c.**

276. **Hybrida Grandiflora.** Large flowers of rich crimson and yellow. 5c.

GERANIUM. h.h.p. No garden seems complete without a bed of these popular plants. 282. **Fancy Pelargonium.** 20c. 280. **Finest Double, Mixed, 10c.** 281. **Apple Scented, Mixed, 20c.**

281. **GILIA.** (Tri-color.) Blooms in any situation. **Choice Mixed, 4c.**

287. **GLAUCIUM.** (Corniculatum.) Very showy plants, with attractive flowers. 10c.

ENGRAVED FOR
J. A. EVERITT
SEEDMAN.

GLOBE AMARANTH. (*Gomphrena*.) t.a. A desirable everlasting. Globular heads of flowers, which, if cut when well matured, will retain their beauty for years. 290. **Purple, 3c.** 291. **White, 3c.** 292. **Flesh Colored, 3c.** 293. **Orange, 3c.** 294. **Striped, 3c.** 295. **Mixed, 5c.**

300. **GLOXINA.** (*Hybrida Grandiflora*.) t.p. Bulbous rooted plant, producing large bell-shaped flowers. **Mixed, 15c.**
GODETIA. h.a. Beautiful plants of easy cultivation. 305. **Rubicunda Splendens.** Rosy lilac flowers. 5c. 306. **Whitneyi.** Large rosy flowers. A beautiful hot-house plant. 5c.

GOURDS. (*Cucurbita*.) t.a. A tribe of climbers with curiously shaped fruit. Being of rapid growth, they are fine to cover old fences, trellises, etc. 310. **Mock Orange.** 311. **Nest Egg.** 312. **Apple Shaped.** 313. **Pear Shaped.** 314. **Bottle.** 315. **Siphon or Dipper.** 317. **Heracles Club.** Each pkt. 4c. 1 pkt. each of 7 varieties, 20c. 318. **All varieties mixed, 10c.**

335. **GYPHOPHILA-Elegans.** h.p. Delicate free flowering little plants, well adapted for hanging-baskets and edging, and valuable for bouquets. 3c.

HELIOTROPE. h.h.a. Its exquisite fragrance attracts all, and its freeness to grow and bloom places it foremost with our choicest flowers. 340. **Fine mixed, sweet scented, 3c.**

346. **HIBISCUS.** h.a. A branching plant of the easiest culture; pretty foliage and showy blossoms. **Mixed, 5c.**

HOLLYHOCK. h.p. The Hollyhock in its present state of perfection is very unlike its parent of olden time; it now ranks with the Dahlia, Aster, Camellia, etc. The flowers are double as a rose, of many shades of color, from deep yellow, red, purple to pure white. 351. **Double White.** Pure white and perfectly double. 5c. 352. **Double Yellow.** Comprising the finest shades of yellow. 5c. 353. **Double Crimson.** 5c. 354. **Double Salmon.** 5c. 355. **Double Mixed, extra choice, 5c.**

356. **ICE PLANT.** t.a. The leaves and stems are succulent and fleshy, and appear as though covered with ice crystals. 5c. h.h.a. The brilliant and varied hues are marvelously beautiful, and their fine foliage and graceful forms render them indispensable adornments. 370.

Bona Nox. (*Evening Glory, or Good Night*.) Very large, white fragrant flower. 10 ft. 5c. 371. **Cocinea.** (*Saripomea*.) Handsome little scarlet flowers. 10 ft. 5c. 373. **Noctiflora.** (*White Seeded, Moon Flower*.) 5c. **Quamoclit.** (*See Cypress Vine*.)

380. **KAULFUSSIA.** h.a. A neat, free flowering plant of dwarf habits and compact growth. Succeeds well in good garden soil. **Mixed, 4c.**

385. **LANTANA.** h.p. Splendid bedding plant; also beautiful in pots. **Finest mixed, 3c.**

LARKSPUR. (*Delphinium*.) h.a. 390. **Giant Larkspur.** Beautiful long spikes of brilliant dark blue and red double flowers. Very lovely. 10c. 391. **Finest varieties mixed, 5c.**

395. **LINUM.** (*Scarlet Flax*.) Beautiful, effective genius of plants, of slender and delicate growth, having a profusion of bright flowers. 3c.

Lobelia h.h.a. Exceedingly pretty, profuse blooming plants of great value to the flower garden.

400. **Erinus Compacta.** Beautiful golden. 10c. 401. **Erinus Speciosa Alba.** Snowy white flowers of drooping and spreading habit. 10c. 402. **Erinus Crystal Palace.** Dark blue; splendid. 10c.

430. **LOVE-IN-A-MIST.** (*Nigella*.) h.a. Finely cut leaves and curious, showy, blue flowers. 3c.

432. **LUPIN.** (*Lipinus*.) h.a. Very conspicuous plants with spikes of pea-shaped blossoms of various colors. 3c.

MAURANDIA. h.h.p. These charming climbers can not be too highly praised for their beautiful flowers and foliage. 422. **Mixed colors.** Something fine. 5c.

MIGNONETTE. h.a. A well known fragrant favorite. 425. **Golden Queen.** Spikes of golden yellow blossoms. 3c. oz. 50c. 426. **Parson's Giant.** White, very beautiful. 4c. oz. 50c. 430. **Giant Red.** Far superior to all others in size of flower spikes and brilliancy. 5c. oz. 50c. 431. **Mixed Sweet Mignonette,** 2c. oz. 10c.

436. **MIMULUS, Moschatus.** (Musk Plant.) h.h.p. Cultivated on account of its musky odor. 5c.

437. **MINA LOBATA.** t.a. Very useful, rapid growing summer climber. Flowers in long racemes, rosy-crimson, changing to orange and pale yellow. 15 feet high. 15c.

438. **MOMORDICA.** (Balsam Apple.) a. A curious climber with yellow blossoms. The fruit is the chief curiosity, which also has medicinal properties for the cure of cuts, bruises, rheumatism, etc. Fine for trellises, fences, stumps, etc. 5c.

MORNING GLORY. (Dwarf.) h.a. One of the most popular annuals. Very pretty for bedding, hanging baskets and vases. 439. **Tricolor Roseum.** Beautiful rose color, pure white center, fringed with purple. 2c. 231. **Crimson,** 2c. 440. **Best Mixture,** 3c.

MORNING GLORY. (Tall.) h.a. Handsome, showy climber of easy culture, and suitable for covering arbors, windows, trellises, old stumps, etc. 439. **Striped,** 3c. 441. **Crimson,** 3c. 443. **Purple,** 3c. 445. **Blue,** 3c. 442. **White,** 3c. 444. **Mixed,** 3c.

446. **MOURNING BRIDE.** (Scabiosa.) h.a. An ornamental border plant, producing flowers in great variety of colors; excellent for bouquets. **Mixed,** 4c.

Nasturtiums. One of the best and most reliable flowers. They thrive in almost any soil, even the poorest. Withstands the severest drought. They make a better display for three months than almost any other flower. h.a. 482. **Tall mixed,** 3c.

NASTURTIUMS. (Dwarf.) h.a. 450. **Scarlet,** 451. **Yellow,** 453. **Rose.** Pkt, 3c each, oz. 15c each. 454. **King Theodore.** Very dark, deep crimson. Pkt, 5c, oz. 20c. 455. **Empress of India.** Its profusion of bloom and dazzling richness of color are remarkable. Pkt, 5c, oz. 20c. 452. **Crystal Palace Gem.** Spotted Maroon, 4c. 456. **Mixed.** Pkt. 3c, oz. 15c, 1/4 lb. 50c, lb. \$1.25.

458. **NEMOPHILA.** (Love Grove.) h.a. Of dwarf spreading habit; well adapted for border or pot culture. **Mixed,** 5c.

ORNAMENTAL GRASSES.

Very beautiful, and extensively used in the arrangement of winter bouquets and various other home decorations. Our list comprises all the beautiful varieties. All annuals, unless noted.

	PER PKT.
320. Agrostus nebulosa , fine and feathery	5c
321. Avena sterilis (Animated Oat); 2 1/2	5c
322. Briza maxima (Quaking Grass), large racemes of beautiful rattles	5c
323. Coix Lachryma (Job's Tears)	5c
324. Eulalia Japonica Zebrina (Zebra Grass); grows 5 to 6 feet high, with stripings across the leaves	10c
325. Gynierium argenteum (Pampas Grass); flowers the second season; requires protection. h. h. p.	5c
326. Hordeum jubatum (Squirrel-tail Grass); fine	5c
327. Stippa penatta (Feather Grass); perennial	5c
328. Zea Japonica variegata. Variegated Japanese Maize 9 varieties in separate packages	30c
329. MIXED ANNUAL VARIETIES of Ornamental Grasses. All our customers should have a supply of this mixture. It contains seed of all the annual varieties named above, thus furnishing ample material for home decoration in winter. Oz. 25c, large pkt. 10c.	

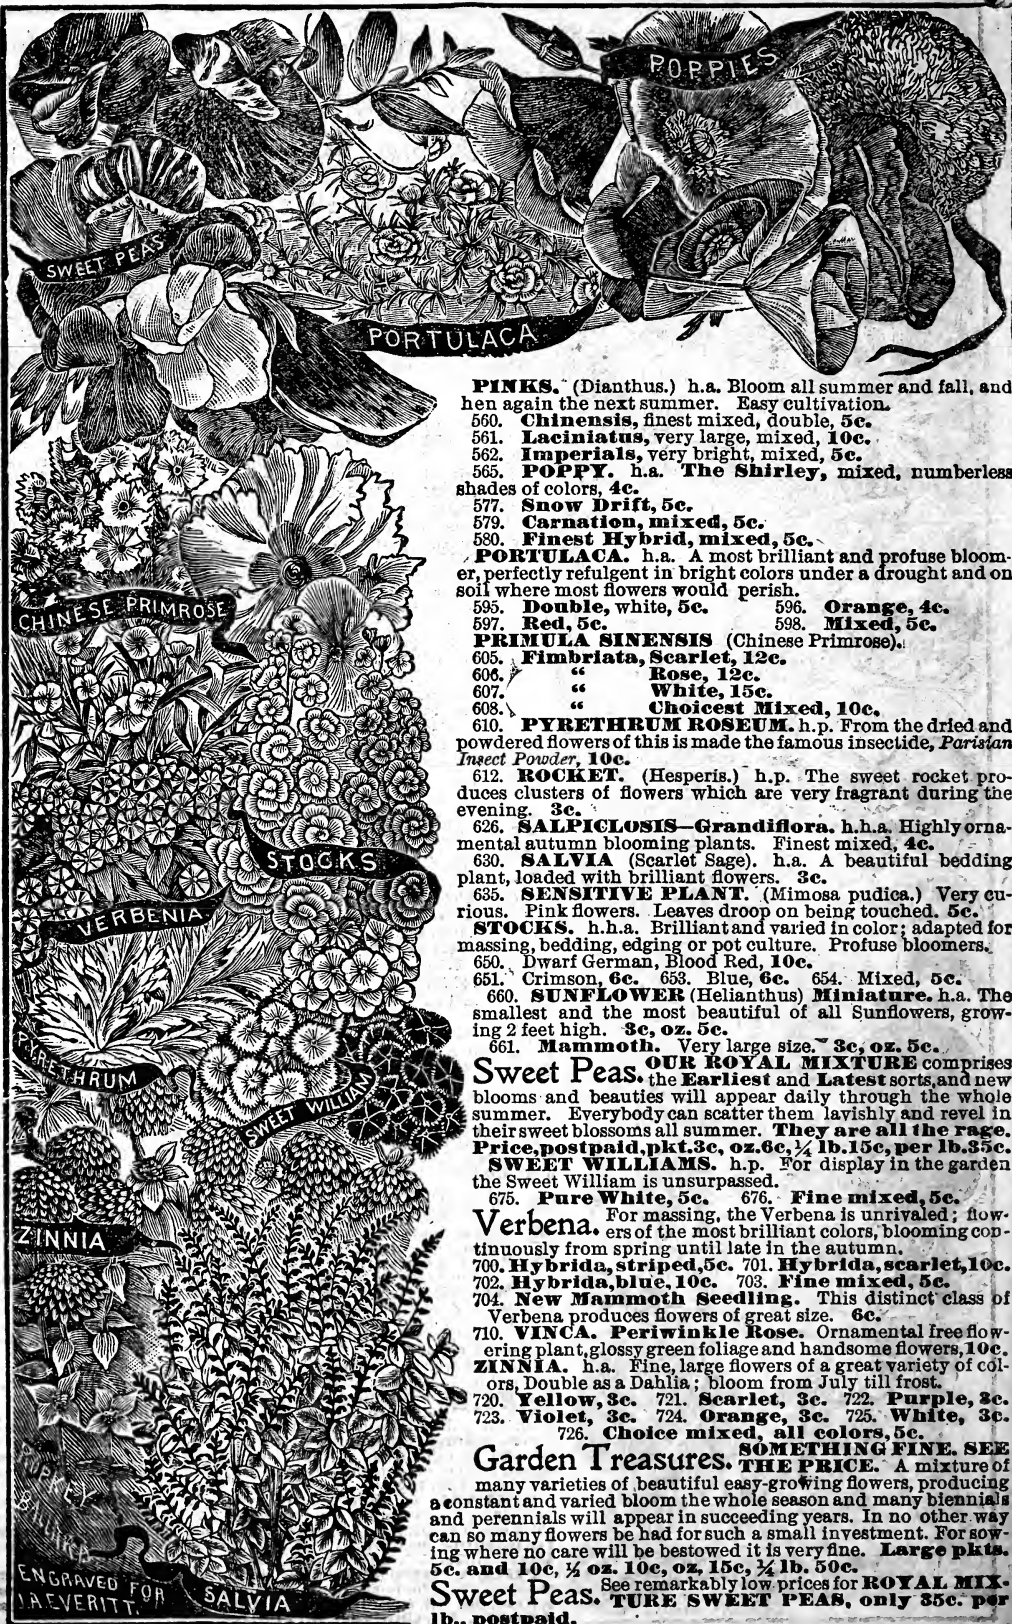

487. **OXALIS. Rosea.** h.h.p. Charming little plants. Very useful for covering rock-work, also for baskets and edgings. 5c.

PANSIES h.p. These lovely flowers are everybody's favorite, and are so well known as to need no lengthy description. Our collection embraces best imported varieties. 490. **Giant Trimardean.** All colors, 10c. 491. **Yellow,** 8c. 493. **Faust,** black, 9c. 495. **Blotched,** 8c. 498. **Pure white,** 8c. 499. **Imperial German,** mixed, very grand, large strain, 10c, 3 for 25c. 509. All varieties, mixed, 10c.

PETUNIA. t.p. Succeed well everywhere; particularly showy in beds or masses, and are universal favorites on account of their richness of color, fragrance and continuous blooming. 515. **Dwarf Inimitable,** beautifully striped flowers, 12c. 516. **Striped and Blotched,** 5c. 517. **Alba White,** 10c. 521. **Choicest mixed,** 10c.

PHLOX DRUMMONDI. h.a. Few annuals are better; ranging from the purest white to the deepest crimson. 540. **Alba,** white, 6c. 541. **Scarlet,** 5c. 542. **Flora Rosea,** 6c. 544. **Splendens,** 6c. 545. **Choicest mixed,** 5c.

ENGRAVED FOR
J. A. EVERITT SEEDMAN.

PINKS. (Dianthus.) h.a. Bloom all summer and fall, and then again the next summer. Easy cultivation.

560. **Chinensis**, finest mixed, double, 5c.

561. **Laciniatus**, very large, mixed, 10c.

562. **Imperialis**, very bright, mixed, 5c.

565. **POPPY**. h.a. **The Shirley**, mixed, numberless shades of colors, 4c.

577. **Snow Drift**, 5c.

579. **Carnation**, mixed, 5c.

580. **Finest Hybrid**, mixed, 5c.

PORTULACA. h.a. A most brilliant and profuse bloomer, perfectly refulgent in bright colors under a drought and on soil where most flowers would perish.

585. **Double**, white, 5c. 596. **Orange**, 4c.

597. **Red**, 5c. 598. **Mixed**, 5c.

PRIMULA SINENSIS (Chinese Primrose).

Garden Treasures. THE PRICE. A mixture of many varieties of beautiful easy-growing flowers, producing a constant and varied bloom the whole season and many biennials and perennials will appear in succeeding years. In no other way can so many flowers be had for such a small investment. For sowing where no care will be bestowed it is very fine. **Large pkts.** 5c. and 10c. ¼ oz. 10c. oz. 15c. ¼ lb. 35c.

Sweet Peas. See remarkably low prices for **ROYAL MIXTURE SWEET PEAS**, only 35c. per lb., postpaid.

—80—

If you have ever been disappointed in your seeds in the past plant the O. K. BRAND this year and you will have no cause for dissatisfaction.

O. K. Seeds did extremely well and I will plant them again.
E. F. TUCKER, Wier, Tenn.

O. K. Seeds were splendid. Giant Climbing Tomato was all that you recommended. Everitt's Earliest of All was 3 weeks ahead of any other sort in the neighborhood. I will call for more seeds.
JANE PAIHT, Dillon Vale, O.

O. K. Seeds I bought of you last spring gave entire satisfaction. The largest cabbage heads I ever raised were from your O. K. Seeds.
B. L. HINKLE, Elkins, W. Va.

The Bismarck apples and strawberry raspberries were **O. K.**, and I think next summer I will have lots of fruit off of them.
J. E. THOMAS, Cantwell, W. Va.

The **O. K. Seeds** surpass any other kind we have ever grown. O. K. Netted Gem Musk Melons are superior to all others that I ever ate; Hoosier King Watermelons the largest we ever raised; Prize Taker Onions weighed 4 lbs. last year, from seed; Forsyth Favorite Corn, 20 percent better than any other corn I ever raised. Yours is the most courteous, reliable and prompt seed house I ever dealt with.
W. B. PRADUE, Fountain Head, Sumner Co., Tenn.

First Premium White Dent Corn is the finest I ever raised. Some ears shelled almost a quart of corn. Mammoth Silver King and Prize Taker are the Onions for this section. I sold them for \$1.50 per bu. I also raised your Six-Weeks and Green Mountain Potatoes. They made a fine yield of very large tubers.
N. STEVENS, Worthington, W. Va.

Your **O. K. Seeds** produced the finest Tomatoes and Cabbage that I ever saw.
MRS. MARY E. RODENBURG, Cleveland, Tenn.

Your **Seeds** are all **O. K.** Cabbage weighed 8 to 12 lbs., Giant Climbing Tomato averaged 1 lb., Sweet Corn was immense, Carter's Cardinal Turnip splendid, Six-Weeks Potato can't be beat.
W. W. JAMES, Brunswick, Ill.

O. K. Seeds gave perfect satisfaction. Indiana Sweetheart Melons from you were the only nice ones we grew, though we planted other varieties from other seedsmen. We have always been pleased with seeds from your house.
JOHN L. WALKER, Browningsville, Md.

No seeds could have done better than **O. K. Seeds** from you. Mikado Tomatoes done well. I raised a fine crop, some weighing 2 lbs. Wishing much success for **O. K. Seeds**,
C. H. REID, Inez, Tex.

All the **O. K. Seeds** ordered of you did well, notwithstanding the long drought from April 5th to October 20th.
E. P. ROSENSTEIN, Hitchcock, Texas.

I was very successful with the **O. K. Seeds**. They turned out above all others.
F. J. PAULUS, Strausstown, Pa.

I used your **O. K. Seeds** in 1896 and I certify that they have no superior. We like Carter's Cardinal Turnip and None-Such Cabbages so well that we will never use any other. I advise all my neighbors to use Everitt's **O. K. Seeds**.
A. C. CURTIS, Statesboro, Ga.

Your **O. K. Seeds** proved good. I never raised better cabbage. Your melon seed made the best melons I have had for years. I will buy more next spring, and wish you success.
J. WESLEY COOK, Concord, N. C.

The seeds from your house all did splendidly. Watermelons, Indiana Sweetheart and Hoosier King, Musk Melon Countess, and Tomatoes are all you recommend them to be. I will want more **O. K. Seeds** next spring.
W. G. GRIFFITHS, Unita, Tenn.

I am highly pleased with **O. K. Seeds** and return many thanks for kindness and prompt attention in filling orders. Brill's None-Such Cabbage, Giant Climbing Tomatoes and the Onions were the finest I ever grew.
JOS. M. HIMMERRIGHT, Star Tannery, Va.

We had great success with Giant Climbing Tomato. Would not have any other kind.
SADIE CASEY, Camden, W. Va.

Giant Wax and Kentucky Wonder Beans are in fact **O. K.** Cabbage was good as could be expected this dry season, Cucumbers were dandy, Montreal and Hackensack Melons were all right. **O. K. Seeds** are rightly named.
C. E. ELLIS, Feagaville, Md.

Rose Colored Delicatesse, Yellow Danvers and Wethersfield Onions, Logan's Giant, and Everitt's Earliest Tomatoes, Six-Weeks Potato, Crosby's Early Sweet Corn, Snowball Pop Corn and Evergreen Broom Corn were "death dealers" to all other brands in this section of country. I want an agency to sell your seeds. We will use no other seeds as long as we can get the O. K. brand.
CHAS. E. ELLIS, Feagaville, Md.

I am glad to say the product of **O. K. Seeds** far exceeded my expectations. From 1 pound of oats I threshed 3 bushels. The Giant Climbing Tomato proved me to perfection. I am well pleased with all your seeds.
WRIGHT HOLLAND, Noah, Ky.

Rose Colored and Prize Taker Onions are both good. I have 42 kinds of potatoes, including all of the newest varieties and the Six-Weeks holds its own with any of them. The Man-Weight Machine is better than a gold standard.
D. U. MCFARLAND, Coshocton, O.

O. K. Seeds have given entire satisfaction ever since I have been using them. Japanese Climbing Cucumber is a wonderful bearer. I am delighted with it. Logan's Giant Tomato is a perfect beauty, and I can recommend it to others for market and house use. With best wishes for your future prosperity, I am, yours truly,
S. J. BOWMAN, Rio, W. Va.

O. K. Seeds gave entire satisfaction. The tomatoes were just as recommended. If they have any fault it is their very large size. I was well pleased with the radishes, beets and peas, also.
KATE BEEM, Kirklint, Ind.

All the **O. K. Seeds** I received from you did exceedingly well, and the Six-Weeks Potatoes were just splendid. They were just what you represented them to be. I am well pleased with all your seeds and will recommend them.
W. BILLITTER, Williamstown, Ky.

25 CENT BARGAIN COLLECTION

15 Varieties of the Best and Most Popular

This is a **BONA FIDE** offer, made to introduce my flower seeds to new customers, and which I guarantee to please you, or the amount paid refunded and the seeds given as a present.

WILD CUCUMBER.

Wild Cucumber.

(*Echinocystis Lobata.*)

This is the *quickest growing climber* in our list. Grows wild, self-sown, in many parts of the West. It will grow 30 feet in one season. It is thickly dotted over with pretty, white, fragrant flowers, followed by an abundance of ornamental and prickly seed pods. For a trellis or pillar no annual vine is more chaste, and it will quickly cover an old tree or an unsightly building:

Pkt. 10c, oz. 20c.

THE BOSTON FERN.

(*Nephrolepis Bostoniensis.*)

This is a wonderfully healthy, rapid growing and graceful house plant. It has been in great demand everywhere. Many people have sought it in preference to the finest Palms or Rubber Plants. Its long, broad fronds are more graceful than the old Sword Fern and seem to grow faster. Thrives in all rooms; gas or furnace heat do not seem to injure it. Fronds are often six or seven feet long. We have three large greenhouses devoted to it in various sizes. Best of all for hanging baskets. Our plants are all well established in pots, not weak runners torn loose from soil.

Each 20c, 3 for 50c. Extra large size, each 50c, 2 for 75c.

BOSTON FERN.

O. K. Seeds, Plants and Fruits are the Best and the Cheapest.

3 Beautiful Climbers.

Apios Tuberosa.

THE BEAUTIFUL FRAGRANT CINNAMON VINE.

A beautiful and rapid climber, possessing the rare quality of emitting from its flowers the delightful odor of cinnamon, and very appropriately called the "Cinnamon Vine." The plants are grown from bulbs or roots, and are very nice for window ornaments or out-door culture. They are perfectly hardy, the stem dying down every autumn, but growing again in the spring so rapidly as to completely cover any trellis or arbor very early in the season. The vines often run 25 feet or more, and when trained over and about a door or window make an ornament much admired, while its many clusters of delicate white flowers send out an amount of fragrance that is truly wonderful. It is easy to cultivate; has no insect enemies, and is not affected by drought, because it roots so deeply. The tubers increase in size from year to year; are often two feet long at two or three years of age, and run straight down in deep soil. Flesh whiter than superfine flour and equally as good for table use as the very best potatoes. We have sold these bulbs for several years, and the plant has ever increased in popularity.

Look at any other Catalogue you have and you will see the usual price for these bulbs is \$1.00 per dozen. WE SELL THEM AT ½ DOZ. 20c, 1 DOZ. 30c, 2 DOZ. 50c, 5 DOZ. \$1.00, post paid.

APIOS TUBEROSA. Tuberous Rooted Wistaria.

A native climber and one of the most beautiful in cultivation. A profuse bloomer, bearing lovely clusters of rich, deep purple flowers with a delicious violet fragrance. It is a wonderfully robust grower, attaining a great height, its vine and dense foliage resembling the common Wistaria.

The bulbs are perfectly hardy, needing no protection whatever, and last forever when once started; they are excellent for food when cooked, being equal to a potato. 10c each, 6 for 25c, 50c per dozen.

YELLOW DOLICHOS.

This luxuriantly flowering vine is a most welcome addition to the list of annual climbers, and as a late, beautiful and prolific bloomer, should have a place in every flower garden, or wherever bare walls or unsightly objects are to be hidden from the eye.

It blooms later in the season than other varieties, being at its best when earlier climbers are brown and dead.

Erect racemes of bright yellow blooms, similar in shape to half-opened pea blossoms, form at every joint, and the leaves and stems are covered with downy, grayish hairs, producing a most novel effect. The outer surface of the petals is rich brown, interior space of standards soft glowing canary yellow. The blossoms are succeeded by slender, rounded pods, which lend additional beauty to the vines, and are far more effective than the broad, coarse pods found in other varieties.

The denser foliage of this new Dolichos stands out in striking contrast to others, covering the poles with a heavy mass of vines when most other varieties were half way up the poles. Pkt. 10c, 3 for 25c, oz. 40c.

SPECIAL. These three choice climbers should be started around every home. As a special inducement to take them all, we offer 1 doz. Cinnamon Vines, 6 Apios Tuberosa and 1 pkt. Dolichos for 50c, post paid, or three such collections for \$1.00.

New Yellow Dolichos.

SUMMER FLOWERING BULBS.

The Gladiolus. Some Choice Varieties.

The gladiolus is the most attractive and fashionable of all summer flowering bulbs or plants. There are few plants that can be used in so many ways, and few that display such a variety and brilliancy of colors. It rivals the rose and carnation and is of much easier culture. It has no insect enemies. The planting is as simple as sticking a potato in the ground, while the results are as certain as getting a crop of potatoes. They may be planted year after year.

Mixed Gladiolus. (Of Separate Colors.)

Dozens Post Paid. Hundreds Not Post Paid.	Dozen Per	Hundred. Per

Variegated, choice	50c	3 00

12 CHOICE GLADIOLI FOR 50c.

This Collection can not be excelled for easy cultivation and certainty of blooms.

AUORE—Bright salmon rose, striped with orange and lilac; a distinct color.

BRENCHLEYENSIS—Intense brilliant scarlet; one of the most showy and brilliant in cultivation.

CERES—Pure white, with purple rose spots and marks. A very fine white.

FATIMA—A rich ivory white, splashed and striped heavily with rosy salmon.

FEU FOLLETTE—Ivory white, suffused and striped with salmon.

HESPERIDE—Grand white, richly suffused and striped bright, rosy salmon; beautiful.

JOHN BULL—White, slightly tinged deep creamy color; delicately suffused rose.

LA MARCK—Cherry red, with pure white throat.

MAD. MONERET—A very popular sort; a very pretty delicate rose color; flowers large and showy.

MR. BAINS—A beautiful clear orange red; a pleasing, showy color.

MAY—A grand new variety of a rich, tender, rosy pink, splashed and striped carmine; should be in every collection.

NAPOLEON III—Rich, bright, dark red, pure white throat.

5c EACH, THE SET FOR 50c POST PAID.

GIANT FLOWERING FRENCH CANNAS.

Grandest Bedding Plants—Grow as readily as Field Corn.

If you wish a bed that will be something really magnificent, prepare the ground well; make the soil light, deep and very rich. In dry weather soak thoroughly to the depth of a foot or more, once or twice a week. If possible, give it a full exposure to the hot sun. Cannas will do well and make a great display without much attention, but you will be astonished at the wealth of bloom produced by a bed prepared and watered as above.

7 of the Very Best Sorts in Cultivation. Every one of Exceptional Merit.

The following 7 sorts we consider the very best sorts, entirely satisfactory, that will yield gorgeous results:

EGANDALE—An excellent variety with bronzy green foliage, large spikes of rich, cherry red flowers, freely produced. One of the best of its type.

FLORENCE VAUGHAN—Undoubtedly the best yellow spotted variety. Bright golden yellow, spotted red large heads, profusely produced.

M. CROZY—No doubt the most popular canna; color a bright scarlet, bordered golden yellow.

M. BERAT—A distinct shade of pink. It is the nearest approach to a pure pink. A rosy carmine, which is pleasing and effective.

QUEEN CHARLOTTE—A grand, gilt-edged sort of a dwarf habit, color a rich, scarlet crimson, broadly bordered with bright canary yellow. Grand for massing or in beds.

SECY CHABANNE—A superior salmon of a rich pleasing cast; a decided advance in this color of exceptional merit, producing immense heads of large flowers, especially fine for masses or with brilliant shades.

SOUVENIR DE ANTONIE CROZY—Absolutely the best of the gilt edge type; a rich, dazzling crimson, with bright golden yellow band. With us the showiest canna, early and free.

15c EACH, \$1.25 PER DOZ. POST PAID.

FIVE SUPERB ORCHID FLOWERED.

ALLEMANIA—Giant flowers fully 6 to 7 inches across the upper petals, salmon-red with broad border of golden yellow. Lower petal is dark salmon with yellow in center. 15c.

AUSTRIA—Rich canary yellow, slightly tinted with reddish dots; a massive tall grower. When well grown it is grand, 10c.

BURBANK—Canary yellow, grand form and attractive green foliage, quite free flowering. 15c.

ITALIA—Grand as a specimen plant or in beds; its musa-like foliage complemented with bright orange-scarlet; with broad golden-yellow bordered blooms of immense size. 15c.

WILHELM BECK—Broad, green leaves, immense trusses of sulphur yellow flowers with red pencillings. A remarkable variety. 20c.

THE SET OF ORCHID CANNAS FOR 60c,
ALL POST PAID.

Five Latest Novelties in American Cannas. Exceptionally Promising.

ABRAHAM LINCOLN—Tall growing, very promising; exceptionally large flowers and large trusses of a solid fiery crimson; early and profuse. 35c.

BLACK PRINCE—A grand canna in every way. The darkest crimson every sent out. Grand large flowers freely produced in large bold trusses. 35c.

GEO. WASHINGTON—The richest shade of bright

velvety crimson, large size; unusually fine in every way. 75c.

LURAY—Large beautiful trusses of bright shining rose, deepening to clear cherry red. 35c.

MT. AETNA—Foliage dark purple, flowers of beautiful brilliant crimson; promises to be the best of its class. 35c.

THE SET OF FIVE SORTS FOR \$1.50 POST PAID.

CALADIUMS.

Esculentum. (Elephant's Ears.) The leaves of this giant plant often attain a length of 3 feet. Very suitable for single plant on lawn, beds or margins of water. Attains greatest size in a moist situation. Keep bulbs in dry sand over winter. Each 15c, doz. \$1.50, ½ doz. same rate, postpaid. By express, \$1.00 per doz.

Fancy Leaved. Beautiful ornamental foliage plants, especially valuable for window boxes, vases or out-of-doors decorative work. Easily grown, thriving in pots or boxes, or in shady situations on the lawn or in garden. Plant in fairly rich sandy loam. There is a wide range of colors and markings, being most beautiful and interesting. We offer the choicest strains. Single bulbs 20c, 3 for 50c, 6 for \$1.00, 12 for \$2.00, postpaid. By express, \$1.50 per doz. No two of same colorings and markings.

Caladium Esculentum.
Single bulbs 20c, 3 for 50c, 6 for \$1.00, 12 for \$2.00, postpaid. By express, \$1.50 per doz. No two of same colorings and markings.

TUBEROSE.

New Excelsior Pearl.

Caladium, Fancy Leaved.

This is the best variety, and is a general favorite and the most popular of all flowers for button-hole bouquets. Can be grown in pots or plant in open ground in May. The flowers of this variety are double the size of the common Tuberose, and are borne in great profusion. Of dwarf habit, perfectly double and of most delicious fragrance. No flower garden is complete without a few stalks. If planted in pots in early winter will bloom before spring flowers come.

Extra sized flowering bulbs, 5c each, 3 for 10c, 30c per doz., 25 for 65c, 100 for \$2.40, postpaid. By express at expense of purchaser, 100 for \$1.50, 500 for \$5.00.

BEGONIAS.

Tuberous-rooted Varieties.

This charming class of Begonias is one of the handsomest of all summer-flowering tuberous-rooted plants. Their culture is the simplest, and, with the least regard for their requirements, will repay with an abundance and brilliancy of bloom. They delight in a rich, mellow, well-drained soil, where they can be liberally supplied with water, preferably in a position where they will be shaded from the direct rays of the sun during the hottest hours of the day, and will succeed equally well grown as pot plants for the conservatory or window garden.

SINGLE—Scarlet, Orange, Crimson, Pink, White, Yellow; 10c each, set of 6 colors 50c, \$5.00 per 100. Prices are Post Paid.

SINGLE—All colors mixed, 8c each, 75c per doz., \$4.00 per 100.

DOUBLE—Scarlet, Pink, White, Yellow, 20c each, set of 4 colors 75c, \$2.00 per doz.

DOUBLE—All colors mixed, 15c each, \$1.50 per doz.

DAHLIAS.

Within the past two years interest has been revived in these beautiful flowers. We offer the following selection, being the best out of a collection of 600 sorts. We have selected such sorts especially that are early and profuse bloomers.

Showy and Fancy—Nine Best Varieties.

15c each, \$1.50 per doz., postpaid.

A. D. LIVONI—Rich clear pink. Very fine.

FRANK SMITH—Intense maroon, tipped rosy white.

GRAND DUKE ALEXIS—Ivory white, tinged delicate rose

JAMES VICK—Rich deep purple maroon.

JOHN KEYNES—Clear yellow-tipped orange scarlet.

JOHN WALKER—Pure white, perfect form.

MRS. STANCOMBE—Straw suffused amber, striped red, mottled and tipped white.

MARGUERITE—Lilac pink. One of the best.

MAY LOMAS—White, delicately suffused rosy lavender.

TUBEROSES.

MADEIRA VINE.

Mignonette Vine. Mexican Vine.

A beautiful tuberous-rooted climber, with glossy green leaves and handsome racemes of fragrant white flowers. The vine makes a very rapid growth, and a few plants will cover a trellis or cottage wall in a single season. It is a very pretty thing to use for shading a porch or veranda. The tubers must not be allowed to become dry, and should be either kept in damp moss or put at once into the ground. 5c. each, 6 for 25c, 45c per doz., postpaid.

SPOTTED CALLA.

This Calla is much like the White Calla, but of rather smaller growth. The rich, glossy, green leaves are covered with pure white spots. The dry roots are planted out like gladioli, and dug and wintered in the same manner. Splendid for borders or beds. First size, dry roots, 15c each, 3 for 40c. Extra large selected bulbs, 25c each, 3 for 60c.

Jubi-lee.

Color intense scarlet; very large flower, on long, slender, but stiff stems; strong, non-bursting calyx. Seems to do best when grown inside all summer, and also does best on a strong, stiff soil.

Triumph—A pure, rich pink; flowers often measure three and a half inches across; early and very free; strong, robust grower; very long, stiff stems; never takes rust.

Wm. Scott—Bright pink; one of the most productive large flowered pink Carnations; flower medium to large size, two to three inches, on long stems, of good substance and stiffness. More generally grown than any other Carnation.

Four Color Collection of Carnations for 25c delivered. One Plant each of Pink, Scarlet, White and Yellow, our selection of varieties.

Gold Nugget—Clear, deep yellow, slightly marked with red. In point of productiveness and constant blooming, a remarkable variety, strong grower, free, early and continual bloomer; stem long and stiff. The best yellow we have ever grown, and a prize-winner wherever shown.

Please continue at top, to the left.

CARNATIONS.

The popularity of the Carnation is on the increase very rapidly. Next to roses the Carnation is most sought after. The flower lovers have learned to appreciate the many charms which the Carnation possesses. We offer a choice selection of the very best varieties.

Price, each 10c, 6 for 45c delivered.

Bon Ton—Bright, warm scarlet, large, deeply fringed, fragrant flower on a stem as stiff as a reed. Perfect calyx. Habit of the plant exceptionally strong. The growth is so strong that it does not need staking.

Daybreak—Delicate salmon pink, vigorous grower. Color, when at its best, very soft, clear and pleasing. Flower will not stand in full sun, as the color bleaches and should be shaded when sun is strong. A very popular variety in all localities. Does well on nearly all soils.

Eldorado—Light clear yellow, petals edged with a narrow band of light pink. A strong, vigorous grower with fine healthy foliage; stems of good length, supporting large, finely formed flowers.

Evelina—A very fine white. Its strong points are its earliness, great freedom and continuity of bloom. It has so many good qualities, united to its freedom, that we feel sure that it will rank very high with Carnation growers.

Firefly—Deep scarlet, early, continuous bloomer; large, well formed flower, 2 1/2 inches in diameter; strong, vigorous foliage covered with heavy bloom.

Flora Hill—The largest white variety to date, wonderfully free in bloom, clean and healthy. Planted in enormous quantities all over the country; easily suited as to soil; water sparingly.

Flora Hill—The largest white variety to date, wonderfully free in bloom, clean and healthy. Planted in enormous quantities all over the country; easily suited as to soil; water sparingly.

CHRYSANTHEMUMS.

The rapidly increasing number of Chrysanthemum exhibitions held throughout the country each successive season shows the hold this popular Autumn flower has upon the affections of the flower-loving public. Of the easiest growth, they quickly make large bushes, either in open ground or in pots, and the magnificent flowers which they give up until severe frost make them ideal plants for yard, garden or pot culture. We offer the best kinds known. At the low prices for which we offer them, every one should have an abundance. They are the people's flower. Price, each 10c, 6 for 45c delivered.

Fisher's Torch—Bright fiery red, the richest shade in Chrysanthemums; large, fine flower.

Ivory—Unexcelled for pot culture or cutting; pure white flower of exquisite form and finish.

J. A. Lager—Reflexed, of great depth. Petals long and twisted, open at the end, of beautiful pure yellow.

Maude Dean—An immense pink variety, finely incurved; petals broad, shell shaped. One of the largest flowers exhibited in the fall shows.

Major Bonnaillon—Soft, clear yellow; full in the center, eight inches in diameter and nearly as deep. In perfect form and finish; habit dark.

Mme. F. Bergmann—The finest of all the early whites, very large and full, and of the purest white, with

Four Color Collection of Chrysanthemums for 25c delivered. One plant each of Pink, Red, White and Yellow, our selection of varieties.

creamy center; a strong, sturdy habit; fine foliage. The most popular white variety with florists for early forcing.

Mrs. E. G. Hill—One of the earliest of all large flowering sorts. Flowers very large; color delicate pearl pink.

Mrs. Henry Robinson—In the entire Chrysanthemum family there is no grander white variety.

Niveus—A grand, snow white variety; center irregularly incurving with outer petals reflexing nearly to the stem. Constitution robust; foliage large and abundant, while the keeping qualities of the flowers are unsurpassed.

The Queen—One of the grandest of all whites, especially for exhibition.

ROSES For the Millions.

You can have loads of Roses.
Once Planted, for a Lifetime,

—POPULAR, CHEAP, GOOD—
COLLECTIONS

Of Everblooming Bedding Roses, Sure to Grow and Bloom. The most profuse bloomers you ever saw. Impossible to describe their beauty when grown in massed beds.

Will be delivered to you at Prices given. Give Express Office as well as Post Office.

In Ordering Give Simply the Name of Collection Wanted.

THE LA FRANCE COLLECTION OF FOUR ROSES for 35c delivered. One each of *Ausguine Guinoisseau* (White La France), *Duchess of Albany* (Red La France), *La France* (The old favorite), pink and *Mme. Angeliue Vlyset* (Striped La France). Everyone knows the beauty and fragrance of La France Roses. Get this collection. It should be in every garden.

THE SOUPERT COLLECTION. Three charming Soupert Roses for 28c delivered. One each of *Clothilde Soupert*, bluish white; *Pink Soupert*, deep pink; *Yellow Soupert* (Moseila), pale yellow. Three of the finest Roses for outdoor or indoor culture. Will produce hundreds of flowers the first year.

THE EVERBLOOMING YELLOW COLLECTION. Four *Hardiest Yellow everblooming Roses* for 35c delivered. *Etoile de Lyon*, *Madame Hoste*, *Mosella* and *Safrano*. These varieties are all hardy as far north as Indianapolis, and with a slight covering of leaves or straw will succeed perfectly even much farther north.

THE EVERBLOOMING RED COLLECTION. The four best dark red everblooming Roses for 35c delivered. *Marion Dingen*, *Meteor*, *Papa Goutier*, *Princess Bonnie*. These are the cream of the dark varieties and should be in every garden.

THE EVERBLOOMING PINK COLLECTION. The Four best pink everblooming Roses for 35c delivered. *Champion of the World*, *Hermosa*, *Mrs. DeGraw* and *Souvenir de la Malmaison*. All remarkably free-flowering and of exceptional hardiness, requiring protection only in the extreme north.

THE EVERBLOOMING WHITE COLLECTION. The four best white everblooming Roses for 35c delivered. *Caroline Marniesse*, *Kaiserin Augusta Victoria*, *Marie Guillot*, *Souvenir de President Carnot*. Four gems among white Roses. Especially adapted for cemetery planting.

THE ALL-COLORS EVERBLOOMING COLLECTION consists of the four preceding Collections—16 Roses for \$1.40 delivered.

HYBRID PERPETUAL ROSES.

Roses of this class produce the largest and most beautiful flowers, and all the below varieties are entirely hardy. Always plant in the open ground.

Will be delivered to you at prices quoted. When ordering, give Express Office as well as Post Office.

(In ordering, give simply the name of the collection wanted.)

NOVELTY COLLECTION OF H. P. ROSES. Five magnificent new varieties for 60c delivered. *Clio*, *Helen Keller*, *Marchioness of Lorne*, *Margaret Dickson* and *Mrs. Sherman Crawford*. Here is a collection of varieties, all of the most sterling value, and comprising a most happily graduated range of color from pure white, through flesh-color, rosy-pink and deep pink to bright crimson. All fine varieties, all very hardy and very free-flowering.

COLLECTION OF THREE NEAREST BLACK H. P. ROSES for 30c delivered. *Baron de Bonstettin*, *John Keynes* and *Prince Camille de Rohan*. The beauty of these three dark roses can only fully be appreciated when seen; it can not be adequately portrayed by words or pictures. The most beautiful velvet or satin is far outvalued by the glossy texture of their petals.

COLLECTION OF FOUR BEST RED H. P. ROSES for 40c delivered. *Alfred Colomb*, *Gen. Jacqueminot*, *Gen. Washington*, *Ulrich Brunner*. The cream of a large assortment of red varieties. All of vigorous growing and free-blooming habit and very hardy.

COLLECTION OF FOUR BEST PINK H. P. ROSES for 40c delivered. *Anne de Diesbach*, *Madame Gabriel Luizet*, *Magna Charta*, *Mrs. John Laing*. There are so many fine pink sorts that it is difficult to select the really best four, but we think these come pretty close to it. It is a collection of jewels of the first water.

COLLECTION OF THREE FINEST WHITE ROSES for 35c delivered. *Coquette des Alps*, *Coquette des Blanches* and *Madame Plantier*. All very hardy, very vigorous and free-flowering. A splendid collection for cemetery planting.

THE ALL-COLORS COLLECTION OF H. P. ROSES consists of the four preceding collections—14 roses for \$1.15 delivered.

O. K.

SEEDS

and Double our Trade for

1901.

O. K. SEEDS have friends in almost every neighborhood, but we want them planted on every farm and in every garden in the land.

THE GRAND, BEAUTIFUL ALL RAMBLER ROSES 54c.

Rose Growers who have reveled in the incomparable beauty of the **Crimson Rambler**, will hail with delight our announcement of its four equally beautiful companions. They are all hardy, and the five comprising the colors **Crimson, Rose, Pink, White and Yellow**, make a collection that will be the pride of every possessor.

CRIMSON RAMBLER.

An exceedingly vigorous, rapid grower, making shoots 10 to 20 feet in height in one season. When pegged down or grown as a bush it is equally desirable, producing in marvelous profusion large trusses of flowers pyramidal in form, and in color a rich glowing crimson. When in full bloom it is a *vivid crimson mass of beauty*. In Japan, its native home, it is known as the "Cherry Rose," so bright are its flowers. Superb as a pot plant, has become the fashionable holiday plant in all the large cities, where it is sold at \$5 and \$10 each. Last Easter plants sold in 'Philadelphia' at \$50 each. Perfectly hardy. No yard or garden should be without **CRIMSON RAMBLER**. Each 12c, 3 for 30c, 6 for 50c, delivered.

NEW WHITE RAMBLER.

Thalia. This charming new Rose of the Rambler variety is a wonder. It climbs rapidly, is entirely hardy, produces immense clusters of pure white roses, perfectly double, of delightful fragrance, and of an immaculate white. It is without question the best white climbing rose extant. 12c each; 3 for 30c, 6 for 50c, delivered.

NEW YELLOW RAMBLER.

Aglala. The Yellow Rambler has been found to successfully withstand, without protection, a continued temperature of from zero to two degrees below, which proves it to be far harder than any other yellow climbing rose yet introduced, and we believe that by laying the plants down in the winter it can be successfully grown in nearly all the northern parts of the U. S.; in fact anywhere that other roses succeed at all well. Did we say nothing more about the Rose, we think that this will be sufficient to establish its value, for what lover of roses in the north has not bewailed the severity of climate which nearly deprives his garden of the most attractive color of all—yellow. The flowers are borne in immense clusters, after the same manner as the **Crimson Rambler**. 12c each; 3 for 30c, 6 for 50c, delivered.

NEW PINK RAMBLER.

Euphrosyne. The Pink Rambler completes the entire range of cardinal colors that can be embraced in these beautiful climbing Roses. We now have the **Crimson Rambler**, the **Yellow Rambler**, the **White Rambler**, and the **Pink Rambler**. This rose is as charming as any of its rivals, embracing all their good qualities of hardiness, vigorous growth, profuse blooming, of delightful fragrance. Be sure and have a set of the **Rambler Roses**. Each 12c, 3 for 30c, 6 for 50c delivered.

NEW "HELENE" RAMBLER.

New Helene. Originated in Germany and introduced for the first time last year. In many respects it is an improvement over **Crimson Rambler**, of which it is a seedling, being of more robust growth but not as rigid as its parent; elegant and graceful in habit. Makes a growth of 10 to 15 feet in a season. Foliage similar to **Crimson Rambler**, but less subject to mildew and insect attacks. For open-ground culture it has no superior, being perfectly hardy and a strong, healthy grower. Its flowers are borne in large clusters and are produced in amazing profusion. The flower is larger than **Crimson Rambler**, almost double, and of excellent substance, remaining in perfection on the bush for weeks. Color soft violet rose; almost bluish, base of petals yellowish white, while the anthers and pistils are pure yellow, rising boldly from the flower. The buds are carmine, finely mossed, and are borne 20 to 50 in a cluster. This magnificent rose is bound to become popular when it becomes better known. 16c each; 3 for 40c, delivered.

RAMBLER ROSES.

ALL The Above Exquisite, Everlasting **RAMBLER ROSES** 54c.

Delivered to any Post Office or Express Office. One investment of this small sum gives you these grand adornments for a life time. Remember only 54 cents for the 5.

QUALITY.—We realize that **QUALITY OF SEEDS** is everything to the gardener, and we know there are no seeds in the world purer and of higher quality than **O. K. SEEDS**, while Price is actually lowest, as comparisons will show.

We can not accomplish this result at long range.

AMPELOPSIS VEITCHII.

HONEYSUCKLE HEDGES—Some of our friends have conceived the idea of planting Honeysuckles along the division fences, and it is wonderful what pretty hedges they make. Iron or wire fences are the best, but almost any kind are soon covered with a mantle of living green, making a very pretty and cheap border for lawns, drives, parks, walks, cemeteries, etc. Other climbing vines will answer the same purpose, but the sweet-scented Honeysuckles are both fragrant and beautiful. They should be planted two feet apart.

Orders should reach us by April 15, at the latest.

AMPELOPSIS VEITCHII (Boston Ivy)—A beautiful climbing plant. This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface, covering it smoothly with overlapping foliage, giving it the appearance of being shingled with green leaves. The color is a fresh deep green in summer, changing to the brightest shade of crimson and yellow in autumn. It is quite hardy, and becomes more popular every year.

Each, 12c; 3 for 30c; doz. for 90c, post-paid.

HONEYSUCKLES.

Trailing Varieties.

Price of each variety of Honeysuckles 12c each; 3 for 30c; doz. 90c. All delivered to purchaser.

For real home vines, to be near you, climbing over your windows and doorways, there is nothing prettier than sweet-scented Honeysuckles; the foliage is pretty, neat and clean, the flowers are almost continuous, and their fragrance delicious. The varieties described below are the very best.

HALL'S JAPAN—A strong growing, almost evergreen sort with pure white flowers changing to yellow. Very fragrant and covered with flowers from July to November.

MONTHLY FRAGRANT—Red and yellow; very fragrant. Blooms all summer; leaves tinged with reddish color.

SCARLET TRUMPET—Bright red trumpet-shaped flowers; bloom very freely the entire season, vigorous and rapid growing.

MADAME VEILLARD.

JACKMANNI.

HENRYI.

MADAME EDOUARD ANDRE.

CLEMATIS.

Orders should all be in by April 15.

There is no more ornamental class of plants than Clematis, and the rich show of bloom produced by the best varieties is far too magnificent to be fairly portrayed by mere words. The flowers are of large size, measuring four to six and sometimes eight inches in diameter. The colors run from intense velvety purple through blue, lavender and white, and a new crimson variety (Madame Edouard Andre) has lately been added to the list. Each, 15c; 3 for 36c; the 4 (1 of each) for 45c, postpaid.

HENRYI—A vigorous grower and free bloomer, producing its large pure white flowers constantly during summer and early autumn. The best large flowered variety producing pure white flowers.

JACKMANNI—The flowers are large, intense rich velvety violet-purple, and are produced in such masses as to form a cloud of bloom. Well known and very popular.

MADAME BARON-VEILLARD—Of recent introduction and quite like its parent, the popular Jackmanni, in habit and make-up, except that its flowers are a *lively, satiny lavender pink*; entirely distinct from any other variety and charming in effect.

MADAME EDOUARD ANDRE—Also of the Jackmanni type and is the nearest approach to a *bright red* that has yet appeared. The flowers are very large, usually six-petaled, of a distinct, pleasing shade of carmine, and are produced in bewildering confusion.

The Four Best Large-Flowered Clematis.

The kind illustrated and described above for 45c, delivered to you.

But by having a representative in each neighborhood who will look after the trade each season, O. K. Seeds can be sold to every planter.

SOME REMARKABLE NEW FRUITS.

The Bismarck Apple

Is perhaps the most wonderful of all apples. It originated in Victoria, Australia, and was named by three eminent pomologists, "Bismarck." It bears abundantly the first year after grafting. The fruit is remarkably large, very showy (a bright yellow) and a fine keeper. Wonderful tales of its superior character are told of it in Germany. It is not only extremely hardy, but also the only apple that *will do well in hot countries*. Why wait ten years for an orchard? With the Bismarck Apple you can get an orchard in one year. The fruit always brings highest prices in market. In England old orchards are being extensively engrafted with this showy apple. Owing to its bearing when only a couple of feet high, it is frequently grown in pots as a useful ornament. **Price, postpaid, 20c each, 3 for 50c, 6 for \$1.00, by express or freight delivered. Not delivered, larger trees \$15.00 per 100.**

The Logan or Hybrid Berry

A thornless Raspberry-Blackberry originated in California. The fruit is as large as the largest blackberry, and produced in immense clusters. Color clear, dark rich red; flavor of the blackberry and raspberry combined, mild, pleasant, vinous, peculiar to this berry alone. Excellent for all purposes. Seeds small, soft and few. Berries firm and carry well. Growth strong, 10 feet and more in a season; enormous bearer. Fruit ripens early, just after strawberries and before raspberries become plentiful. Always sells at highest prices. Vine is rust-proof and without objectionable thorns. Never attacked by insects or disease. Undoubtedly the most valuable fruit known and the year from planting.

Price for plants,
15c each,
3 for 35c,
6 for 60c,
delivered.

Bismarck Apple Tree, 2 years old, in fruit.

NEW WHITE BLACKBERRY.

Iceberg.

Something entirely new in fruit, and all who plant the new White Blackberry will be more than pleased. The following description is that of the originator. He says: Owing to the somewhat unsatisfactory qualities of white blackberries so far known, the impression may have been entertained by some that no white blackberry could be as productive and hardy, with berries as early, abundant, large and handsome, as the best black ones. The well-known Lawton is, when ripened, unsurpassed and very generally known as the most productive market berry.

The Logan Hybrid Berry.

One of the great grandparents of Iceberg was Lawton. The first generation of seedlings, when crossed with Crystal white, was all black; second, also, though varying much in other respects; but the third produced this wonderful plant bearing the snowiest white berries ever seen. Very little attention was paid to the long rows of crossbred descendants, until one day this berry was discovered among its black relatives, with the canes bending in various directions with their load of delicious snowy berries, which are not only white, but so transparent that the seeds, which are unusually small, may be seen in the berries when ripe. Clusters are larger than those of Lawton berries, as near as can be judged. They were at least as large, earlier, sweeter and more tender."

15c each, 6 for 75c, 12 for \$1.25, delivered.

SPECIAL OFFER: We will send one plant of each of these three remarkable new fruits, all delivered to one address, for 45c, 3 sets for \$1.25.

There are no better seeds and plants than the O. K. (all right) brand and no others are so cheap.

Iceberg Blackberry.

CURRENTS.

(Orders must reach us by April 15.)

Price, delivered to purchaser of each variety, 12c each, 3 for 30c, 6 for 50c. By express, not prepaid, 60c per doz., \$3.00 per 100.

Fay's Prolific. The leading market variety. Extra large stems and berries; uniform in size, easily picked; exceedingly productive. No variety ever made as quick a jump into popular favor, the demand most seasons being in excess of the supply.

Black Champion. Very productive, large bunch and berry; excellent quality; strong grower. The leading, well-tested black sort.

Cherry. Berries sometimes more than half an inch in diameter; bunches short; plant very vigorous and productive when grown on good soils and well cultivated.

La Versailles. Very large, red; bunch long, of great beauty and excellent quality; one of the finest and best. Should be in every collection.

North Star. The strongest grower among the red varieties; should be given plenty of room and ground kept well enriched; bunches average 4 inches in length and are freely produced. Combines extra hardiness, vigorous growth, extra quality and great productiveness.

Victoria. Large, bright red; bunches extremely long; berries medium size, of excellent quality. Good, erect grower; very productive. Ripens late, making it one of the most valuable sorts.

White Grape. Very large; yellowish white; sweet or very mild acid; excellent quality and valuable for the table. Productive.

GRAPES.

(Orders should be received by April 1st.)

Any of the following varieties, delivered: Each 12c, 3 for 35c, 6 for 70c. By express, not prepaid, 90c per dozen, \$5.00 per 100.

The following varieties are the very best. You could not make a better selection if you had a large catalogue before you.

BLACK VARIETIES.

Concord. The old, well-known and deservedly popular variety. Succeeds wherever grapes can be grown.

Moore's Early. Bunch and berry large. Vine very hardy and productive. Ripens early. Like the Concord, succeeds in nearly all sections.

Worden. An exceptionally fine variety of the Concord type, but earlier bunch and berry larger, of better quality. In our opinion the best of all the black grapes.

RED VARIETIES.

Agawam. (Rogers No. 15.) Berries very large, skin thick, sweet and sprightly; ripens early. Vine very vigorous.

Lindley. (Rogers No. 9.) Fruit medium to large, tender and sweet; ripens early.

Brighton. Berries above medium to large, of excellent flavor and quality.

ity. Bunch large and well formed. One of the earliest to ripen.

WHITE VARIETIES.

Niagara. This variety has come to occupy about the same position among the white varieties as the Concord among the black; a leading market sort; bunch and berries large; greenish white, when fully ripe pale yellow; of good quality.

Moore's Diamond. Berries above medium size; of excellent quality; has few seeds. Vine is similar to Concord in growth and foliage. Hardy and productive; ripens before Moore's Early. An excellent variety either for home use or market.

Pocklington. Also a general favorite. Bunch and berries large, juicy, tender and sweet; when ripe light golden yellow. Vines very hardy and vigorous, free from mildew; productive.

NEW RATHBUN BLACKBERRY.

The Rathbun has already established a high reputation in the locality where it originated, and has only to become generally known to supersede other varieties. It is decidedly superior in size, hardiness and quality. A quart box of Snyder and a quart box of Rathbun were each counted, and while it took 164 berries to fill the former, 45 berries of the Rathbun completely filled the quart. The Rathbun underwent a temperature of 20 degrees below zero, and produced a very good crop, while similarly situated plants of Erie and Minnewaski were badly frozen and unable to produce any fruit. The berries have very small seeds and no hard core; in fact, no core is perceived in eating them—all is sweet, luscious and of a high flavor. The plant is a strong, erect grower, makes plenty of fruiting wood, and although a true blackberry in all other respects, it propagates very freely from the tips of the shoots like a dewberry or a black raspberry. We can not too strongly recommend this valuable new variety. Each 15c, 6 for 75c, 12 for \$1.30, delivered. Doz. 75c, 100 for \$4.50, by express, not delivered.

If interested and determined to put in a little time for good pay, go to work as soon as possible after receiving this catalogue. See page 21.

New RASPBERRY The CUMBERLAND.

Largest Black Raspberry Known.

The Berry for Profit.

THE CUMBERLAND.

Another year's trial permits the introducer to say that "not a single instance has come to our knowledge where the Cumberland has failed to give the most thorough satisfaction." We offer it with the belief that it is the **most profitable variety for market yet known.** It well deserves the name of "Business Black Cap." It is **perfectly** hardy, having undergone a temperature of 20 degrees below zero, unprotected, without injury, weather which badly crippled other varieties. For productiveness nothing exceeds it; few, if any, equal it. During the dry and unfavorable season just past it produced 6,000 quarts per acre. The Ohio, under same conditions, yielding but a little more than one-third that amount. In size it is simply enormous; in quality unsurpassed. Ripening after the Palmer and Tyler, and preceding the Gregg, it may be termed a mid-season variety. It is a vigorous grower, throwing up stocky canes well adapted to support its loads of fruit. A dealer in Harrisburg, Pa., writes that he handled some of the fruit and easily sold it for 10 cents per quart, when fruits of other varieties were selling at 5 to 7

cents. Each 10c; 6 for 50c, 12 for 90c, delivered. Dozen 70c. 100 for \$4.25 by express not delivered.

GOOSEBERRIES.

Orders should be received by April 15th.

Downing. An old well-known variety. Fruit large and handsome, pale green of fine quality. A strong, vigorous grower, seldom affected by mildew. One of the best both for market and home use. 15c each, 6 for 50c, 12 for 75c delivered. 60c per dozen, \$3.50 per 100 by express not delivered.

Houghton. Fruit small to medium, pale red, of fine flavor. Plants of slender, spreading growth and enormously productive. 15c each, 6 for 50c, 12 for 75c delivered. 60c per dozen, \$3.50 per 100 by express not delivered.

Smith's Improved. Fruit large; pale greenish yellow. Unsurpassed in quality both for table use and cooking. Bush of moderate growth and exceedingly productive. 15c each, 6 for 50c, 12 for 75c delivered. 60c per dozen, \$3.50 per 100 by express not delivered.

Columbus. Fruit of the largest size; oval, handsome greenish yellow; finest quality. Plant a strong, robust grower, so far free from mildew; foliage large and glossy. One of the best for general cultivation. 20c each, 6 for 60c, 12 for \$1.00 delivered. \$1.50 per dozen by express not delivered.

Industry. A new variety of foreign origin, which has created a sensation everywhere; productive of exceedingly large fruit of dark red color and delicious quality. Highly recommended, both in this country and Europe. We have fruited the Industry for years. It is certainly one of the largest Gooseberries on the market, and one of the best. 20c each, 6 for 60c, 12 for \$1.00 delivered. \$1.50 per doz. by express not delivered.

Red Jackets. An American seedling of large size; smooth, prolific and hardy, of best quality. Has been well tested over a wide extent of territory by the side of all the leading varieties, and so far the freest from mildew, both in leaf and fruit, of them all. A wonderful cropper, with bright, clean, healthy foliage. 20c each, delivered. \$1.50 per dozen by express not delivered.

DOWNING.

— COST AND RESULTS. —

Cost—If you get **EVERITT'S O. K. SEEDS** at your Post office, the cost will be less than if you buy seeds at your grocery.

Results—The result will be in the first case, the seeds will grow and produce the choicest crops. In the second place they may not grow, and will produce unsatisfactory crops.

As we mail several hundred thousand of these catalogues, and as a large number go to the same post offices, we advise any person who intends to make up a club to begin without delay.

OUR "FUTURE PROSPERITY" OFFERING.

IF YOU WANT to be sure of Prosperity
on your farm in the future, obtain what
we offer on this page.

- 1 Bushel Prosperity **POTATOES.**
- 1 " " **OATS.**
- 1 Peck " **CORN.**
- 1 " " **PEAS.**
- 1 Bushel of Success or White Husless **BARLEY.**
- 1 Year's Sub. to Up-to-Date Farming and Gardening.

DESCRIPTIONS.

Prosperity Potato—A new, large, white, main crop potato, of oblong shape. It is a magnificent Potato in size and appearance, a vigorous grower, and wonderful yielder of uniformly large, shapely tubers. Its fine appearance is backed by superior keeping and table qualities, making the "Prosperity" a variety of sterling excellence and one that will bring Prosperity to every farm wherever grown. It can be had only in this collection. IT IS THE MOST VALUABLE INTRODUCTION OF THE YEAR.

Prosperity Oats—The most remarkable Oats offered in many years. The earliest, mature in 60 to 70 days. Can be threshed before other oats are ready for the harvester. Will not lodge on rich land. Pure white grain always bringing the highest price. Resists drought wonderfully. Hardy and succeeds wherever the oat crop is grown. Rust proof. Healthiest and heaviest. Three measured acres yielded 100 bu., 110 bu., 145 bu. Every farmer obtaining these oats takes a long step toward prosperity.

Prosperity Corn—A prolific variety of White Dent corn that originated in Jackson County, Indiana. It grows two or three long ears of medium thickness on each stalk, 12 to 14 rowed, and has always yielded 15 to 25 bu., more per acre than any other White Dent corn on the farm of the originator. We have carefully investigated into the merits of this corn and know it is worthy a place in our Prosperity collection. The originator will plant his entire crop, 55 acres, of it in 1901. It is very leafy and highly recommended for fodder and ensilage.

Prosperity Peas—A variety of cow or stock peas noted for its wonderful prolificacy of both vine and grain. It may be appropriately called the poor man's or the poor farm's pea, as if it is used in either case, this pea is bound to improve the condition of both. The peas are excellent for table use and supply an enormous amount of food for man and beast. Many farmers who are at present unacquainted with cow peas will get their first lesson from this "Future Prosperity" offer, and they will find in them grand possibilities.

White Husless or Success Barley—Whether for grain or grass (for pasture or hay), barley does not occupy the position on many farms that it deserves. Therefore we are doing all we can to encourage its growth. The two varieties mentioned are described on page 100 of this catalogue. Our customers can take their choice of one bushel of either kind named.

Up-to-Date Farming and Gardening—One year's subscription to this peerless Farm and Garden Paper we add to our "Future Prosperity" offering, and assure one and all that we will fill its monthly numbers so full of timely news and advice as to insure several times the investment to every farmer who embraces this offer. See third cover page of catalogue. No other premium allowed. Present subscribers will have their time extended one year on this offer.

OUR OFFER. Every article mentioned above has extraordinary merit. Each article represents the newest and the best we know of in their respective lines, and that have come to our notice during the past year. Each one, if offered separately at usual prices asked by seedsmen is worth nearly or quite the **\$5.00** price we ask for all, namely

Each farmer who is looking for future Prosperity is invited to introduce this New Blood on his farm, and we request each purchaser to report after harvest his success.

All Complete for \$5.00.

ENGRAVED FOR
J. A. EVERITT, SEEDSMAN

O. K. Seeds are the best and cheapest. Every person receiving this Catalogue should plant them.

EVERITT'S MORTGAGE-LIFTING

SUFFICIENT attention is not given to farm seeds by the majority of farmers, and by most seedsmen this department is made of secondary importance. This is not as it should be. These are the crops in which the farmer is most interested. **They are money crops.** Success or failure depends on them, hence how important that those varieties be selected that are the most reliable and give the greatest results.

As an observing man passes through a farming community, those farmers can be pointed out who are enterprising, wide-awake and progressive. The surroundings are a fair index of the farmer. **The experimenting farmer is the most prosperous of all.** He recognizes that varieties of grain are running out (*dying*) and that new ones must take their place. He procures seed of all the promising kinds, tests them and selects the best to grow. Thus he always has the best, and all farmers who understand their business know that there is a great difference between the best and the poorest varieties of farm crops.

We can help the farmers along the road to prosperity if they procure their farm seeds of us. They will LIFT THE MORTGAGE AND SWELL THE BANK ACCOUNT.

INDIANAPOLIS IS SITUATED IN THE CENTRE OF THE RICHEST AND MOST EXTENSIVE AGRICULTURAL REGION ON THE FACE OF THE GLOBE AND BESIDES IT HAS SHIPPING FACILITIES UNSURPASSED BY ANY OTHER CITY IN THE COUNTRY. WE CAN SAVE YOU TIME AND MONEY IF YOU GIVE US YOUR ORDER FOR FARM SEED.

"SUPERIOR PRODUCTIONS." This is a good motto for American Farmers. . .

Superior Productions are brought about by Superior Seed, Superior Fertilization and Superior Cultivation, but chief and most important of these is Superior Seed.

"Good Seeds Bring a Glad Harvest" is a statement we used in the first advertising we did when embarking in the seed business twenty-one years ago. Later we adopted the trade mark "**O. K. Seeds**," and have always striven to sell good seeds, the foundation for good crops.

We have always made a Great Specialty of FARM SEEDS

Including Grass and Clover Seed, Seed Corn, Seed Oats, Seed Potatoes, etc. These are the **Money Crops** on nearly all farms, and are liable to degenerate very rapidly without proper care, or judicious and frequent change of seeds. The difference between the poor or ordinary varieties of corn, oats, and potatoes, as grown on the majority of farms, and the best varieties that could be grown with no extra expense is really surprising. We will again quote from that great paper, the Rural New Yorker, as follows:

"Side by side in experimental plots we have raised as many as 75 different kinds of wheat. The best yield was at the rate of 37 bushels to the acre—the lowest 25. Side by side we have raised 100 different varieties of potatoes. The highest yield in our rich garden soil has been at the rate of 1,200 bushels to the acre, the lowest about 350. In field culture, in poor soil, well fertilized with potato fertilizers, we have raised from one variety 150 bushels to the acre, from another, 300 to the acre. Now, WHAT corn on your soil, good farmer, will give you the maximum yield? WHAT wheat? WHAT potato? WHAT KIND of oats? Isn't it worth your while to find out, or don't you believe in such differences?"

The above remarks should start you to thinking, and if you will invest a few dollars each year in New Farm Seeds, you will come out a great Winner in the long run.

In attempting to improve your crops, buy from an established house with a reputation to sustain and not from canvassers or sensational advertisers, who may be one place this year and in another country next year.

This business in a good farming and gardening district will pay as well as the best county offices and be as pleasant and honorable work.

GRASS IS KING CLOVER IS QUEEN

Our Cleaning Department is on the fifth floor of our building, and is equipped with the most perfect cleaning apparatus. We can clean 4,000 bushels of Wheat, Oats and other coarse seed, or 1,000 bushels of Clover or Grass Seed daily. There is not another general seed house in the country possessing the facilities we have in this direction, and but few enjoy such a trade as we are favored with.

We buy, clean and sell large quantities of Grass and Clover Seed. If you buy, you can not do better, quality and price considered, than to send us your order. If you have a crop to sell, send us samples and get our prices.

FACTS.

THE most successful farmers are those who possess large meadows of a high quality of grasses. Oftentimes the low price of grain fails to net satisfactory returns. Stock growing is far more profitable, and by the opening up of extensive foreign markets is not likely soon to be overdone. Hence, seed more ground to meadows. Raise more stock.

The Attention

Of careful farmers is directed to our Grass and Clover Seed, which has been carefully selected and cleaned with the best machinery in existence. In buying our Grass and Clover Seed, you don't pay for something you don't want—in fact, are much better off without.

Weed Seeds

Cost money when you buy them in your grass and clover seed, but the greatest cost is what they discount the value of your hay crop and in getting rid of them when once introduced on your farm. Each year our farms are getting more foul with weeds, and the seeds we sow are mainly instrumental in introducing the pests. It is a fact admitted by all that weeds propagate more rapidly than do the cultivated crops, hence great care should be exercised that no foul seeds are sown. To make seed clean occasions some waste. The cost, however, is slight as compared with the results you obtain. To illustrate: In seeds commonly sold, you pay for the weed seed at the same rate as the pure seed. The resulting crop is discounted on account of the presence of weeds, while to get rid of the pests on your farm will require much labor and expenditure of money. The best seeds produce the best hay, for which the highest market price is realized. Weeds reduce the value of hay, besides, exhaust your land.

All prices of Grass and Clover Seed are subject to changes of the market. The prices quoted herewith are ruling on day of closing this catalogue.

CLOVER SEED.

Bags, extra for each 2½ bushels or less, 15c each.

1 to 4 pounds are prepaid by mail. Larger quantities by freight or express.

COMMON OR MEDIUM RED CLOVER—This is the variety in general cultivation, and is so well known that description is not necessary. By mail, pkt. 10c, lb. 30c, 4 lbs. \$1.10. By freight or express, bu. \$6.00.

MAMMOTH CLOVER. (*Sapling or English*)—Like common or medium clover, but of larger growth. Largely grown. Of great value to sow on exhausted land. For hay, we recommend sowing a mixture of this and common clover. Much used for green manuring. By mail, pkt. 10c, lb. 30c, 4 lbs. \$1.10. By freight or express, bu. \$6.25.

ALSIKE. (*Trifolium hybridum*)—This clover is deservedly in repute as one of the best perennial clovers, and is well adapted to this country. From the results of experiments, it is found to thrive on soils which are termed by farmers "clover sick." For this quality, especially, it has proved a valuable acquisition, and is now generally approved of in all mixtures of grasses and clovers. Should be more generally grown. Sow in spring same as common clover. It will stand for years. Seed weighs 60 lbs. per bushel and is very small. On this account a bushel will sow from 12 to 15 acres, making it one of the cheapest varieties to seed with. By mail, pkt. 10c, lb. 35c, 4 lbs. \$1.25. By freight or express, bu. \$7.50.

LUCERNE OR ALFALFA CLOVER—See the next page.

SCARLET CLOVER. (*Trifolium Incarnatum*)—An annual, and should be sown in July, August or September for best results. In sections where it succeeds it makes abundant pasture in the fall, winter and spring. It can be cut for hay in this latitude about May 1st, or will mature seed May 15th. It is the most rapid grower of all the varieties of clover, and unequalled as a soil enricher. If sown in the spring it will afford good pasture, but will not produce seed. It is most successful in States bordering on the Atlantic Ocean. By mail, pkt. 10c, lb. 30c, 4 lbs. \$1.10. By freight or express, per bu. \$4.50. Weight, 60 lbs. per bu.; sow 10 lbs. per acre.

WHITE DUTCH CLOVER—The best to sow with lawn grass and valuable in permanent pastures; very permanent. Pkt. 10c, lb. 40c, 4 lbs. \$1.25, bu., 60 lbs. \$12.00.

Males or females can engage in this business. If owning a horse and rig, so much the better. See page 21.

ALFALFA CLOVER,

THE AGRICULTURAL WONDER.

THE failure of this crop with many farmers in the past is largely attributable to lack of understanding how to sow and treat it. It is adapted to nearly all parts of our country, but not to all soil. The main secret is to avoid heavy, compact, clayey soils.

The most valuable forage and fertilizing plant. It requires a deep, mellow soil. It thrives best on a sandy loam, the richer the better. In the dryest and most sultry weather, when every blade of grass withers, Alfalfa is as fresh and green as in the spring, as its roots go down from ten to twenty feet to find moisture. Although a prodigious yielder, it improves the ground by the decay of its long roots, and converts it into rich ground, full of vegetable matter. The seed may be sown early in the spring, as soon as the frost is out of the ground, in order to catch the spring rains, as it needs moisture to germinate. The ground should be prepared as carefully as for a grain crop. To sow like common clover is only to invite failure. In localities where irrigation is used it can be sown successfully at any time during the summer months. Most of our successful Alfalfa growers prefer sowing the seed broadcast, others are more in favor of drilling it in. If the latter plan is pursued, we advise drilling the seed both length and cross ways, say half quantity each way, in order to secure a more

even stand. There is a great discussion as to whether the seed should be sown by itself or with other grains, both methods being strongly advocated. Owing to the fact that Alfalfa needs light and sun, the majority of growers suggest sowing the seed by itself, provided it can be put in the ground early in the season, but when the sowing is delayed we advise to sow oats or barley with it to afford some protection to the young plants against the scorching rays of the sun in midsummer. Another circumstance has to be taken into consideration. If the ground proves to be very weedy, sow in connection with a crop of barley or oats; they can be raised as well as a crop of weeds. It is difficult to establish the first year, but will, when once started, produce a profitable crop; three, and even four, crops are cut yearly, aggregating five to seven tons to the acre. Never sow less than twenty-five pounds of good clean seed to the acre, for thin sowing produces thick and coarse stalks, not relished by stock. How long it will live is a question not settled yet. The reports speak of Alfalfa fields in Chili that are several hundred years old, and still bearing good crops. The proper

time to cut it is when the plant is in full bloom. The seeds ripen to perfection and are a source of considerable wealth to farmers. The seed has to be saved from the first crop, as the second or third cutting does not mature evenly, does not fill out plump and heavy, and does not possess the proper germinating power. Price by mail, 1 lb. 40c. 3 lbs. \$1.00. By freight or express— $\frac{1}{4}$ bu. \$2.00, $\frac{1}{2}$ bu. \$3.75, per bu. \$7.50. Price liable to change. Will always fill orders at lowest market rates.

Alfalfa is so valuable that it is worthy of a good and well directed effort on the part of every farmer to succeed with it.

That Peerless Paper, Up-To-Date Farming and Gardening, will devote much space to Alfalfa Clover and other forage and fertilizing crops this year. Every farmer should subscribe for it, as the valuable information they will get from its monthly visits, will be much greater than we can give in this catalogue. (See 3d page of cover of this catalogue.)

Field of Alfalfa Clover, Cutting Four Tons of Hay per Acre.

GRASS SEED.

Bags, extra for each 2½ bu. or less, 15c each.

1 to 4 lbs. are prepaid by mail. Larger quantities by freight or express.

TIMOTHY. (*Phleum Pratense.*) This is decidedly the best grass for hay, making a large return of strong, rich hay. Though somewhat coarse and hard, especially if allowed to ripen its seed, yet if cut in the blossom, or directly after, is greatly relished by all kinds of stock, and especially so by horses, while it possesses a large percentage of nutritive matter in comparison with other agricultural grasses. It grows very rapidly, and yields very large crops on favorable soils. 45 lbs. to bushel. Sow 6 to 8 quarts, spring or fall, to acre. By mail, pkt. 10c, lb. 30c, 4 lbs. 75c. By freight or express, bu. \$2.25.

KENTUCKY BLUE GRASS. (*Poa Pratensis.*) This is known in some sections as "June Grass." It is the best pasture for our climate and soil, succeeding finely on hill lands and producing the most nourishing food for cattle; retains its qualities to a late period in winter, and further South affording abundant food throughout the winter. Sow early in the spring or fall, 1 to 2 bus. per acre. Weight, 14 lbs. per bu. Fancy cleaned, pkt. 10c, lb. 30c, 4 lbs. \$1.00, bu. \$1.25. Extra cleaned, 60c per bu.

ORCHARD GRASS. (*Dactylis Glomerata.*) This is one of the most valuable and widely known of all pasture grasses, coming earlier in the spring and remaining later in autumn than any other. It grows about 2½ feet high, producing an immense quantity of leaves and foliage. Blooms with red clover, and making with it an admirable hay. It is well adapted for sowing under trees in orchards, and very valuable either for grazing or for hay. 14 lbs. per bushel. Sow 1½ to 2 bus. to acre, either fall or spring. By mail, pkt. 10c, lb. 30c, 4 lbs. \$1.00, bu. \$1.50.

RED TOP. (*Agrostis Vulgaris.*) A valuable grass for moist soils and low lands. It is a good, permanent grass, standing our climate as well as any other, and consequently well suited to our pastures, in which it should be fed close, for if allowed to grow up to seed the cattle refuse it. On moist, rich soil it will grow 2 feet, and on poor, gravelly soil, about half that height. 14 lbs. to bushel. Sow 2 bus. to acre, fall or spring. By mail, pkt. 10c, lb. 30c, 4 lbs. \$1.00. Fancy Seed, bu. \$1.50.

German or Golden Millet.

MILLET German or Golden. The true large headed variety. The best variety and largely grown wherever its value is known. It helps out wonderfully when a short crop of hay is threatened, and produces two to three times as much per acre as timothy or clover. Three to five feet high. Sow broadcast, 1 bushel to the acre for hay; ½ bushel if for seed, from May 1st to August 1st. 50 lbs. per bu. Pkt. 5c, lb. 25c, 4 lbs. 75c. By freight or express, ¼ bu. 30c, bu. \$1.00.

Common Millet—Smaller growth than German. Makes fine hay. Price 10c per bu. less than German.

Hungarian Millet—Early; height two to three feet; abundant foliage and slender head; withstands drought; yields well. Price same as German Millet.

Quick Growing Lawn Grass—Fine lawns, grass patches grass borders, add to the or beauty of a place almost as much as flowers. In fact, a certain amount of good grass is essential to the proper display of flower beds and borders. The next important thing to good grass sward is to get it quick. We have prepared a grass mixture which will give a good sward the first year. It is the finest and quickest growing lawn grass ever sent out, and will give the greatest satisfaction. Sown early in the fall or spring. Lb. 30c, peck \$1.30, post paid. By express, peck 75c, bu. \$2.50.

Rye—For pasture. It grows very quickly, and is of great value to help out when the regular pastures are short. May be sown any month in the year. Per bu. 85c.

Barley—Like rye above, it can be made of great value as a pasture grass; also makes good hay if cut green. For pasture, may be sown any month up to and including August. See page 100 for further particulars and prices.

JAPANESE BUCKWHEAT.

This variety of Buckwheat is a great improvement over the old kind in the following respects: 1st. The new Japanese grows with **astonishing vigor**, and begins to mature its grains in **about fifty days**, its **extreme earliness insuring safety from frosts**, where the other kinds often get caught. 2d. A most valuable quality is its ability to withstand wind storms and **not lodge**. 3d. **It holds its grain in harvesting.** It has been known to stand uncut a month after its proper time for ripening, and without apparent loss from lodging or of grain separating. 4th. **Its prodigious yield is generally incredible, except to those acquainted with it.** Out of three pecks of seed sown separately, one yielded 36 bushels, the second 40 bushels, and the third 52 bushels of clean seed. The same mail brings report of **100½ bushels from 19 quarts.** These reports are from reliable sources, and like many others prove the great profit to be derived from growing this grain. Its flour is the **whitest and finest of**

all buckwheat. 5th. It will do well on soil too rich or too poor to support the old varieties. 6th. **It will withstand sun blight almost perfectly.** Fields of the old buckwheat averaged less than four bushels per acre, while the sun had no effect on the Japanese. **Seed sent to Central Georgia to be planted at time of corn and cotton planting, which was about the 7th of March, by the middle of May produced as fine buckwheat as you ever grew.** It is a great boon to the apiarist for its wealth of honey nectar.

PRICES—Pkt. 10c, 1 lb. 25c, 4 lbs. 75c, by mail, post-paid. ¼ bu. 35c, bu. \$1.00, 2 bu. or more at 90c.

SILVER HULL—Earlier than the common buckwheat, thinner husks and more prolific. Remaining in bloom a long time, it is valuable for bee-keepers. Per lb. 25c, 4 lbs. 75c, peck 35c, bu. \$1.00, 2 bu. at 90c per bu.

You may have been working hard all your life and not secured a steady income. See page 21 for better times.

BROOM CORN.

For several years this has been a very profitable crop, worth \$80 to \$160 a ton. An acre gives about 500 weight of broom and nearly forty bushels of seed, worth nearly as much as oats for feed. It requires similar soil and culture to corn, but should be planted later, and it pays best to have the ground in prime condition. It is usually planted in drills three and one-half feet apart, leaving the plants six inches apart.

IMPROVED OR TENNESSEE EVERGREEN BROOM CORN. This Improved Evergreen Broom Corn grows about eight to ten feet high, stands up well, and entirely free from crooked brush. The fibre is long and fine. Its greater value to growers is in the fact that it will not get red in the field before it is cut, but is strictly a green variety of brush, commanding highest price. Pkt. 5c, lb. 25c, by mail. Peck 50c, bu. \$1.50.

EXTRA EARLY JAPANESE BROOM CORN. This is the earliest broom corn in existence, matures in about seventy-five days when planted late. Have seen some that was planted on July 17th and ready to cut October 1st. Can be planted after wheat with good success, so making two crops on the same ground. It is just the kind for an early market. It has withstood dry weather better than any other variety. Brush is fine and long. Pkt. 10c, lb. 30c, by mail. Peck 75c, bu. \$2.25.

CALIFORNIA GOLDEN BROOM CORN. An excellent standard variety, grows a very fine brush of good length, and is free from the large center stem. Bleaches very evenly, even in the sun. Pkt. 5c, lb. 25c, by mail. $\frac{1}{4}$ bu. 50c, bu. \$1.50.

GENUINE DWARF BROOM CORN. Grows from three to four feet high, with straight smooth brush; principally used for making whisks and brushes. Pkt. 10c, lb. 30c, by mail. $\frac{1}{4}$ bu. 50c, bu. \$1.50.

FLAX SEED—Sow $\frac{1}{4}$ to $\frac{1}{2}$ bu. per acre. Pkt. 10c, lb. 30c, by mail. $\frac{1}{4}$ bu. 50c, per bu. \$1.75.

Sugar Cane or Sorghum. **EARLY AMBER**—Most valuable variety for general cultivation.

tion, ripening as far north as Minnesota. Yields heavy crop of seed and fodder, which are excellent for feeding poultry, swine or cattle. Pkt. 10c, lb. 25c, 4 lbs. 65c, by mail. By freight or express, peck 40c, bu. \$1.25. Bags free.

EARLY ORANGE—A later variety, suitable for the South or lower Middle and Western States. Requires a longer season to ripen, much larger and ranker in growth. Price the same as the Early Amber.

KAFFIR CORN.

These are non-Saccharine Sorghums. They bear dry weather remarkably well. When regular corn will entirely fail they will wait for rain without injury. They make as much grain as the same land will of corn. For fodder they make an enormous yield, and are not as difficult to handle as corn fodder. To thresh, run the entire stalk through a threshing machine with one concave. The grain will come out clean and the fodder shredded.

WHITE KAFFIR CORN—It grows from four to five feet high, making a straight, upright growth. It has a stalky stem, with enormous wide leaves. The stalks keep green and are brittle and juicy, not hardening like other varieties of sorghum, making excellent fodder, either green or dried, which is highly relished by cattle, horses and mules. The seed heads form at the top of each stalk, and as soon as these show the grain well, the joints next below the top send up shoots which yield the second seed heads. For the grain sow in rows three feet apart, three to five pounds of seed to the acre. For fodder sow one-half to one bushel either broadcast or in drills.

RED KAFFIR CORN—This grows taller than the white; the stalks are slender, but more juicy and very leafy. The heads are long, slender, compact and grow erect; they measure from one to two feet. The seed is red, smaller than that of the white, and rather hard and brittle. It does well on poor land and yields well. It ripens a little earlier than the white variety. It is highly recommended by the Kansas Agricultural College at Manhattan.

Price of each pkt. 10c, lb. 30c, postpaid. $\frac{1}{4}$ bu. 40c, bu. \$1.25.

PEDIGREE TOBACCO.

Improved by continuous selection and grown on the crown shoots only.

PRICE OF ANY VARIETY—Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.00.

YELLOW PRYOR—Preferred by many for bright, and succeeds where other yellow sorts fail. Makes a fine wrapper, filler or smoker.

SWEET ORINOCO—Used for first-class plug fillers, and makes, when sun cured, the best natural chewing leaf.

HAVANA—Grown from imported seed. Better than direct imported seed for American planters. Unsurpassed for cigars.

CONNECTICUT SEED LEAF—The largest, finest and best of this indispensable kind. Suitable for cigar fillers.

BLUE PRYOR—The genuine James River favorite. Large, long, broad leaf.

SUMATRA—The cream of cigar wrappers.

WHITE BURLEY—The standard Kentucky variety and the best filler tobacco known. Particularly adapted to limestone regions.

RAGLAND'S CONQUEROR—One of the best grown for wrappers and cutters.

If you are successful in selling our goods now you can, in the future, have a steady, reliable income and probably not work so hard.

SPANISH PEANUTS.

An early variety, growing perfectly erect, can be cultivated with the plow exclusively. The pea is small, but remarkably solid, no blanks, and the yield per acre very large. Because of their early habit and easy cultivation, the most profitable variety to grow for fattening hogs. The foliage growing erect is easily harvested, and makes a very rich hay. Plant any time from April to July 10. They succeed well after oats. Plant in rows two feet apart, and seed eight inches in the drill. Price, large packet, 10c., 1b. 30c., 4 lbs. 75c., by mail, postpaid. By freight or express, $\frac{1}{4}$ bu. 75c., $\frac{1}{2}$ bu. \$1.25, bu. \$2.00.

SUNFLOWER

MAMMOTH RUSSIAN.

Mammoth Russian Sunflower is grown for its seeds, which are valuable food for stock, particularly poultry. It is considered the best egg-producing food known. They eat it greedily, fatten on it, obtain a bright, lustrous plumage, and strong, healthy condition, that fully illustrates the wonderful benefits from its use. It can be raised as cheaply as corn, having yielded at the rate of 120 bushels per acre. Single heads measure 12 to 22 inches across, and contain an immense quantity of seed. It can be sown at any time up to the middle of July. Pkt. 5c., $\frac{1}{4}$ lb. 10c., 1b. 30c., 4 lbs. 75c. By freight

Spanish Peanuts.

or express, 5 lbs. 40c., 10 lbs. 60c.

YELLOW MILLO MAIZE.

A tall plant, growing 9 to 12 feet, stooling from the ground. It sends out shoots also from the joints. It has all the vigor and vitality of other Sorghums. It is non-saccharine; useful for the large amount of forage, green feed or cured fodder that it furnishes, and for its grain. Earlier than the White Branching variety. Sow 10 lbs. per acre. By mail, pkt. 5c., 1b. 30c., 4 lbs. 75c. By freight or express, 5c. per lb.

A single plant of Teosinte.

TEOSINTE.

Recommended as the most prolific forage plant yet introduced. The stalk, containing much saccharine matter, is very nutritious. It can be cut several times during the season, yielding enormously. One seed will sometimes produce twenty to sixty stalks or shoots, and the warmer the climate the better it yields. Should not be planted until the soil is perfectly warm in the spring. Requires about four pounds seed per acre. Plant in drills three feet apart, and two or three seeds every twelve inches in drill. Will only produce seed in Southern latitudes.

Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c., 1b. \$1.50.

Yellow Millo Maize.

...A PLAIN TALK TO THE PEOPLE...

For years we have been selling our good O. K. Seeds direct to the planter, and number our customers by many thousands, representing probably every county in the country. Our ambition is to have our O. K. Seeds planted on every farm and in every garden in the country. We hope to accomplish this because

No Other Seeds are so Cheap, No Other Seeds are so Good.

Our idea finds favor with the consumer, who is thankful for relief from the layer after layer of greedy profits with which his seeds have been weighted down heretofore.

Why should not the producer and the consumer come close together? What good reason has any careful farmer or gardener to buy seeds at his home store? It is all right to buy sugar, tea, nails, etc., there, but all wrong to expect living, vital seeds that will produce the crop you desire. Your post-office is no doubt as convenient as your grocery. A visit to it will bring you the best seeds under the sun at much less than you can get doubtful seed at the grocery.

How handy will be an increase of a few hundred dollars in your income without neglecting your regular business! See page 21.

SOY BEAN—(*Glycine hispida*.)

Also called Soy, Soya, and Soja Bean. And by those who deceive the farmer into paying fancy prices, called Coffee Bean, Coffee Berry, German Coffee Berry, Japanese Jaavaa Coffee, American Coffee Berry, etc., etc.

We have the following from the U. S. Department of Agriculture:

"Annual, stem stout, erect, branching but little; 2 to 4 feet; leaflets, 3; flowers in auxiliary clusters pods short, 2 to 4 seeded; whole plant rough-hairy. One of the staple crops of Japan, which attracted little attention in this country until about ten years ago, but is now becoming quite common. The crop is cultivated like corn, the seed being planted in drills at the rate of half a bushel per acre. The stems alone are too coarse to make good hay, but are covered with such a dense growth of leaves and are so prolific in fruit that the hay is prized highly, especially for milch cows and for fattening animals. The yield of green forage is very heavy when grown on good soil, and the yield of beans is from 20 to 30 bushels per acre. Those who have had most experience with this crop find that the best way to handle it is to cut or pull the plants when the first pods begin to open, and thrash as soon as dry enough. In this way the coarse stalks are so broken in pieces and mixed with the leaves and immature fruit that nearly all will be eaten. It is doubtless the best of the legumes for the silo, as it can be more easily handled for the cutter than can plants like clover or cowpeas."

"The Soy bean is an annual, belongs to the leguminous family, and is grown for the same purposes as cowpeas and clover. As a soil renovator, as a hay and as ensilage, it is nearly the equal in every respect of red clover."

We have the following from the Indiana Agricultural Experiment Station:

"A comparatively new and promising leguminous crop for Indiana farmers is the Soy Bean. This plant has been successfully grown in different parts of the state and at several points farther north in the United States. It thrives in good corn soil, and will grow wherever corn can be successfully produced."

"Being a quick-maturing annual, it will prove especially helpful to those who can not grow clover. A crop of Soy beans can be produced between the spring and autumn frosts anywhere in the state. The Soy bean may be grown for pasture, green forage (siling), for hay or silage, or for seed. It will yield 9 to 12 tons of green fodder, 11-2 to 21-2 tons of hay, and 10 to 40 bushels of seed according to variety, condition of soil, etc."

"Soy beans grow well and mature on Indiana experiment station farm. Others in the state have grown them successfully. Farmers who do not succeed with clover, will do well to try Soy beans or cowpeas. The latter will be a good soil renovating crop and the former may prove equally advantageous as a leguminous grain, and forage crop in a rotation composed chiefly of cereals."

A crop of Soja beans grown on land that will make 40 bushels of corn per acre will, if plowed under, put \$16 worth of fertilizing matter per acre into the soil.

Land that will make 11-2 tons of timothy or clover, will make three tons of Soja bean hay, worth more per ton than the timothy."

James Belwood, of Virginia, writes: "I have threshed over 100 bushels of Soja beans grown on one acre of rich river bottom land."

L. D. Whittaker, of Richland County, Ill., threshed seven bushels of seed from 16 square rods of Soja beans, at the rate of 70 bushels per acre."

Land that would yield 50 bushels of corn would be good for two tons of a feed that is more than the equivalent of cotton seed or flax seed, and cost nothing but labor, and that your own. Take your pencil and figure out the comparative value of an acre of each of these crops."

At the North Carolina station an experiment was made with the Soy bean and cowpea upon the same character of soils, both grown under similar conditions. While the Soy bean yielded 21-4 tons of cured hay per acre, the cowpea yielded less than a ton."

The Soy bean may also be regarded as a valuable acquisition as an aid in the restoration of soils. It, like all other leguminous plants, adds nitrogen to the soil. For this purpose it is highly valued in Japan, and is one of the crops planted in rotation with the cereal crops. It is now generally believed that if planted in a corn field at the last plowing, it will do much to enrich the field."

People on the farm are not very busy in the winter, and the offer we make on page 21 should appeal to them as an opportunity to employ some of their spare time in a pleasant and agreeable business, and add considerable to their yearly profits.

THE SOY BEAN

as a substitute for

COFFEE.

While we do not claim that this will satisfy coffee drinkers as well as the good grades imported; yet it is the best substitute ever discovered, and by many is claimed much healthier.

It is a fact that much of the commercial coffee sold is adulterated with this bean or chicory. If you want a cheap coffee why not grow your own adulterant? And we can say from our personal experience that when mixed with an equal quantity of good coffee the mixture is very fine. The cost of growing is only a small fraction of the cost of real coffee. It is recommended by doctors as a healthy beverage. Read the following:

This is to certify that your new Domestic Coffee Seed, upon being tested in the laboratory, evinces a highly nutritious character, a rich flavor, and a remarkably pleasant taste, when roasted and pulverized, and treated for a beverage. It comes to the palate as a satisfying drink, fitted to sustain life. When carefully infused and drank hot, it produces an exhilarant effect, but it does not fatigue the nerves or cause an unnatural influx of blood to the brain. The new Domestic Coffee Seed should command large favor.

PROF. WILLARD H. MORSE, Consulting Chemist, The Iammatological Bureau, Westfield, N. J., March 9, 1899.

The new coffee is good, comes nearer store coffee than anything I ever saw.

MRS. BETTIE ASHBY, Sebra, Ky.

I have given the new coffee a fair trial and I am pleased with it. It makes good coffee. My boarders all praise it.

MRS. ALICE WEST,

Buckner, Mo.

I can certainly give the new coffee a good recommendation.

MRS. MARY B. CLARK,

Herick, N. B.

I believe I like the new coffee better than Arbuckle's package coffee.

MRS. E. R. BROSIUS, Wiegand, Neb.

I have used the new coffee and consider it equal to imported coffee, if not better.

JOHN MELLON, Walkers' Bridge, Miss.

My coffee berry is fine and full of pods. I am delighted with it. The whole country has been to see it.

J. H. CAMPBELL, Prairie Grove, Tex.

We have tried the new coffee berry, and when prepared the same way as Rio Coffee it can scarcely be distinguished. At least it makes an excellent substitute.

MRS. MARY M. LOWRIE, Fayette, Miss.

The new coffee berry is good. I am well-pleased with it.

J. B. KIRK, Chillicothe, Mo.

I have tried the new coffee and am pleased with it, as it makes good coffee—scarcely distinguishable from imported coffee when prepared in the same way. A gentleman who dined with me said it was as good coffee as he ever tasted.

M. J. KRY, Fayette, Miss.

Everybody likes the new coffee and wants it. If sown broadcast will make 40 or 70 bushels per acre. I had a big church gathering at my house and used it for dinner; no one knew the difference until I told them. It is better than corn for fattening hogs. A. M. HOBBS, Isabella Co., Mich.

Notwithstanding the dry season, the coffee did fine. We are much in love with it.

O. W. SEARS, Atlanta, Mo.

I have tested your coffee and find it just as recommended. Several of my neighbors have tested it and all are highly pleased. I don't want any better coffee.

T. B. WILLIAMS,

Armour, Tex.

We have tried the new coffee and like it very well. It is very strong and doesn't take much to make it strong as store coffee.

JAMES W. TISON, Granville, Mo.

My crop of coffee is just gathered. It is as represented. Will plant largely of it next year.

J. B. WARNER, Broadway, O.

PRICE OF SOY BEANS: By mail, postpaid, Pkt. 10c, lb. 30c, 4 lbs. 75c. By freight or express, ¼ bu. 85c, bu. \$3.00.

We give no exclusive agency this year. The enterprising agent will get orders wherever possible. See page 21.

The coffee I planted is looking well, notwithstanding corn and pastures are burning up for want of rain. H. Beyer, the seedsman, of New London, and myself drank some of the coffee, without mixing with other coffee, and pronounced it good. He said he could not tell it from other coffee.

JAMES ELRICK, P. M., Elrick, Ia.

The new coffee is a great success here; does well on thin land; have tested it to my heart's content, and can truthfully say it is better than the best grade of coffee sold here at 3½ pounds for \$1.00. What I raised was fine beyond description, though we had very little rain, other crops burned up, but the coffee crop kept green. Farmers far and near flocked to see it, and are clamoring for seed. I can sell a quart of seed to each farmer in five counties, if it can be had.

DR. JAMES M. ASHBY, Ky.

I made coffee from the Coffeeberry, and like it better than the genuine. It is not so bitter. I will use it altogether.

R. B. BLACKWELL,

Bruceville, Tex.

The coffee is splendid and all you claim for it. I expect to raise it as long as I live. I would rather have it than the best Java coffee.

R. ISHAM, Childres, Tex.

The parties who tried the coffee say it is as good or better than imported coffee.

A. P. POPE, Popeville, La.

The new coffee is better than the coffee generally sold here. I think it will prove a great blessing to all who drink coffee.

ELIZA L. WOLFE,

Bastrop, Tex.

I ground, steeped and drank the new coffee, and find it equal to any genuine coffee I ever drank.

J. A. FLETCHER, Braidentown, Fla.

I consider the new coffee certainly a marvel. I hope it will take the place of imported coffee.

G. W. REYNOLDS, Houston, Tex.

CULTURE. The soil may be prepared as for corn. If impoverished by previous cropping the soil should be well supplied with lime, potash and phosphoric acid. Nitrogenous manures have also proved beneficial.

The seed may be sown broadcast with the wheat drill, in rows 16 to 24 inches apart, or with the corn drill to be cultivated as corn.

Soy Beans may follow a crop of rye or barley or be sown in the standing corn at the time of the last cultivation, if the weather is seasonable. If sown in corn put in two rows of Soy Beans between each two rows of corn. Sow about two pecks to the acre in rows, like corn, and cultivate, if seed is desired. For pasture, soiling or hay, sow four or five pecks to the acre.

Cow or Field Peas

**The Great Soil Improvers.
The Great Economy Crop for Farmers.**

Makes Good Land More Productive. Makes Poor Land Rich. Dispenses with Clover and Commercial Fertilizers.

**For Pasture and Hay of Inestimable Value.
More Nutritious than Clover
More Fattening than Corn.**

Roots Penetrate Deep in the Soil. Grow on Poor Soil and Rapidly Enrich It. Positively the More of these Peas you grow the Richer your Ground becomes, even when you remove the crops.

COW PEAS are not a new crop. They have been grown in the Southern states of our country for many years; but even there their worth was not generally recognized until very recently, and now they are almost universally grown, and the most remarkable benefits have resulted in improvements of the soil and increased capacity of farms to turn off stock and grain crops.

FERTILIZER. Where Cow Peas are generally grown, the use of commercial fertilizers almost ceases. This is of the most vital importance to tens of thousands of farmers who

Now find the fertilizer bill a burdensome one. All the varieties of Cow Peas are, like clover, air plants, but they differ from clover in having much larger leaf development, and extract much more fertilizing element from the air, while the roots extend deep into the soil and bring up the potash, which, combined with nitrogen, makes nearly the complete fertilizer.

For fertilizer they may be sown any time, after the frost is past, till July first, and turn the entire crop under when in bloom or any time after. Of course benefits as a fertilizer result in every way the crop is used.

FOR HAY. Sow early in Spring on ground as prepared for oats or corn, 1 to 1½ bushels per acre broadcast and harrow in, or drill with grain drill. Cut when Peas are forming and cure as clover. If the ground is not wanted for a different crop don't disturb it. Then the roots will throw up another crop which may be pastured or turned under in the Fall for fertilizer. Follow with wheat and notice the grand results. The yield of hay is 2 to 5 tons per acre, and the ground is benefited.

COW PEAS AND MILLET may be mixed. Sow ½ bushel of Peas broadcast, then follow with ½ bushel of Millet per acre. They will grow together. Cut for hay when the Millet seed is as in the dough. Cure thoroughly as other hay.

COW PEAS AND SORGUM. Treat same as above, except use six quarts of Sorghum (Cane seed) instead of Millet.

PEAS AND KAFFIR CORN. Sow one bushel of Cow Peas and follow with ¼ bushel of Kaffir Corn to the acre; follow same instructions as above. One advantage of sowing Cow Peas with the other crops is in the fact that they are supported off the ground, make a larger growth and can be harvested better and cleaner.

FOR PASTURE. Sow any time from early Spring until July. Turn stock on after they are well developed, but preferably after the Peas are nearly matured, when the stock, particularly hogs, will derive full benefit from the crop, and fatten quicker and yield a better quality of pork than if fed on corn.

COW PEAS AND CORN. A popular, economical and profitable way to use Cow Peas is to sow them in your corn field. First plant your corn about four feet apart, in rows (the plants may stand closer in the row and have the usual number of plants per acre), when the time comes to lay the corn by, drill the Peas between the rows of corn (Whip-Poor-Will and Black we recommend). Drill them in the center of the space, ½ bushel per acre. The Peas will mature early in the Fall. When nearly matured turn any or all your stock in the field, particularly the hogs; cattle may damage the corn by breaking it down. They will not touch the corn until the Peas are consumed, vines and all. The hogs will come out of the field rolling in fat, and will not need a bushel of corn. Any corn farmer can in this way fatten his hogs and save all his corn. Or double his capacity for fattening hogs by turning off one crop early from the Peas, the second lot from the corn. Surely this makes one acre equal to two.

FOR ENSILAGE Cow Peas surpass green corn and other crops used for this purpose. Mixed with Sorghum or Kaffir Corn, to hold them up, I believe they will make the perfect ensilage crop. All the Cow or Stock Peas are good for table use.

VARIETIES.

Prices per bushel will be quoted on application, as they are liable to change.

WHIP-POOR-WILL. A favorite early bunch-growing variety, has brown-speckled seed, which are more easily gathered than from the vine-growing sorts. This variety is a prime favorite in the north and west on account of its early maturity and habit of growth. Will mature seed in Indiana and equal latitudes. Price, pkt. 10 cts. Qt. 40 cts., postpaid. Peck, 50 cents.

BLACK. This variety is recommended in northern latitudes. It matures early and is suited for late planting. One of the best for improving land and most valuable as a forage crop, making an enormous yield of rich, nutritious feed. It yields more largely of shelled peas per acre than most others. Price, per pkt. 10 cts. Qt. 40 cts., postpaid. Peck, 50 cts.

CLAY. A favorite variety in some sections of the South. Makes a growth of vine similar to the Black Pea, but is later in maturing. Suitable for hay, pasture and fertilizer in the North, but will not mature seed. Pkt. 10 cts., Qt. 40 cts., postpaid. Peck, 50 cts.

LARGE BLACK-EYE. They make a profitable crop to grow for picking the dry peas for sale in markets during the winter, at the same time make an excellent soil improver, being similar in growth of vine and action of roots upon the soil to the Black and Wonderful. Pkt. 10 cts., Qt. 40 cts., postpaid. Peck 50 cts.

WONDERFUL or UNKNOWN. This makes an enormous and remarkable growth of vines, but requires the full season to make its crop. In yield and growth of vines, it surpasses any of the varieties of Cow Peas, and it yields very largely of the shelled peas. This variety should be planted early to get full benefit. Pkt. 10 cts., qt. 40 cts., postpaid. Peck 50 cts.

MIXED. When sown for pasture or fertilizer, we recommend a mixture of varieties. They are usually cheaper, besides if the season does not suit some varieties, others will do well, thus insuring a good growth. Pkt. 10 cts., Qt. 40 cts., postpaid. Peck 50 cts.

CANADA FIELD. Quite distinct from the Cow Peas, yet similar in all valuable properties as fertilizer, food, etc. Valuable for northern latitudes, where full benefit can not be obtained from the later-maturing Southern sorts. They can be grown anywhere and succeed on very thin soils, which they quickly improve. Sown with oats, 1 bushel of Peas to 1½ bushels of oats per acre, they are unequalled as an early pasture, and hogs may be fattened on them in advance of the maturing corn crop, thus getting the high prices for hogs that usually prevails early in the season. Highly recommended. Pkt. 10 cts. Qt. 40 cts., postpaid. Peck, 50 cts.

Prices in quantities will be quoted on application.

TRUE RAPE DWARF ESSEX

There are millions of acres of good land that lie idle part or all of the year to run to weeds that can be sown to this Rape at slight expense, and produce the finest feed imaginable and at the same time improve the fertility.

To illustrate how rapidly this crop increases in popularity, we will relate that 10 pounds were sown in Knox County, Indiana, in 1899. In 1900, 800 pounds were ordered through one merchant and much more bought through other sources.

We print the following from Circular No. 12, issued by the Department of Agriculture:

"Under ordinary field conditions Rape reaches to a height of from 1½ to 4 feet, and the strong-growing roots penetrate the soil to a considerable depth.

For its best development Rape requires a rich, moist, loamy soil, and will usually do well on any but light sandy soils and stiff clays. In general, a soil that will produce good crops of turnip, cabbage, wheat, and corn will be suitable for Rape.

Throughout the Northern States generally, seeding may take place from the first of June or possibly earlier, to the middle or last of July, according to the season and locality. In the South the seed may be sown in September or early in October. Under favorable conditions 2 to 3 pounds of seed per acre will be sufficient and it will never be necessary to use more than five pounds per acre. The seed should be planted in drills far enough apart to allow cultivation.

Often fine Rape may be grown on land that has already produced a crop of some of the early maturing cereals, such as rye, oats, or barley. As soon as the crop of grain is removed, the land is plowed or "disked" and at once seeded to Rape. Field peas and other early maturing forage crops, or rye or winter oats that have been pastured off in spring may also be followed by Rape with profitable results.

Another practice which is coming into favor in some sections of the country is to sow Rape in the spring with some grain crop, such as wheat, allowing the former to take possession of the field when the latter has been removed. This method is especially satisfactory when succulent forage is desired for fall feeding. Rape may also be sown in the cornfield just before the last plowing, as is often done with turnips, rye, and winter wheat.

The Rape is usually ready for use in about 8 or 10 weeks from the date of seeding. Sheep and swine may be turned into the field and allowed to remain until the Rape is pastured off. Cattle may also be allowed to run in the field, but as they waste much of the forage by pulling up the plants and tramping them down it is a better plan to cut the Rape with a scythe or mower and feed it to the animals.

With sheep and cattle care should be taken at first not to allow the animals to eat too much, as there is danger of injury from bloating. Animals should have free access to salt at all times when being pastured on this crop.

Rape has a high feeding value. It makes an excellent feed for fattening sheep and swine and for producing an abundant flow of milk in milch cows. On account of danger of tainting the milk many people do not feed it to cows until after milking. Rape can be used to good advantage as a part of the rations for animals that are being fed in pens for market or for the show ring. It is also a valuable food for young lambs at weaning time. By beginning as early as practicable in the spring and seeding at intervals of two or three weeks, a continuous succession of Rape can be produced throughout the period when the permanent pastures are most likely to be short. Rape will endure quite severe cold weather and thus will last a long time after the ordinary pasture grasses succumb to the frost.

PRICE: by mail, pkt. 5c, 1 lb. 30c, 4 lbs. 75c. By freight or express, per lb. 12c, 5 lbs. 50c, 10 lbs. 75c, 100 lbs. \$6.50.

**WE ARE
HEADQUARTERS
FOR THE BEST**

SEED CORN

IN THE WORLD.

We candidly believe that **INDIANA SEED CORN** is the best produced in the country and suited to farmers over the widest range of country. We do not recommend our largest varieties for northern latitudes, nor our smallest varieties for southern latitudes, but we have kinds suited for the North, South, East and West. Indiana has the highest percentage in its 1900 corn crop of any State in the country.

**THAT WERE AWARDED THE SILVER MEDAL
AT THE PARIS WORLDS FAIR 1900.**

**Was
Awarded
a
Silver
Medal
at
the
Paris
World's
Fair,
1900.**

Our Corn Exhibit attracted attention at Paris. Read the following:

Carignan-Ardenne, France, Nov. 28, 1900.

Mr. J. A. EVERITT, Indianapolis, Ind., U. S. A.

Dear Sir: "We have seen your beautiful show of corn at the Paris Exhibition, and we suppose you are a corn grower. If so, as we are great sellers of it and want yearly large quantities, could you make us offers, with cheapest prices, and big samples in grain and ears of corn which you grow?"

Yours very truly,

DENAIFFE & FILS, Seedsmen.

FIGURES AND FACTS..

Prove that the expense of planting our improved varieties of Corn is about 20 cents per acre, including freight, and your own seed is saved.

See your neighbors and have them join you in your seed corn order. By buying in quantities of 5 bushels or more you get it at reduced rates. Also, you can make money by taking orders for our seeds. See page 21.

FARMERS' INTEREST

WHITE DENT

CORN

GREATEST CORN
ON EARTH.

See next
Page.

The
Largest
Eared, Best
Grained and
Most Produc-
tive White Dent Corn.

We except none and
Challenge Compari-
sons.

We have sold this grand Corn four years, the customers residing in all parts of the country from Michigan to Georgia, from New Jersey to Colorado, and no variety of Corn could more completely fill the requirements for a profitable variety. It is early enough to mature in the latitude of Southern Michigan, and large enough to be profitable to grow in the South, where it comes weeks ahead of their late sorts, and out-yields them, making it an ideal Corn for Kentucky, Tennessee, Georgia, Virginia, Missouri, etc. Tens of thousands of Corn-growers would plant largely of this Corn this year if they just realized the true merit, and would increase their crop from 10 to 50 bushels per acre.

FARMERS

EVERY FARMER knows it pays to plant good seed. Every farmer should know that there is a great difference in seed. If by changing seed to a better variety you can increase the yield 10 bushels per acre, it means the payment of the rental of the land over and above your regular crop. An increase of 15 to 25 bushels per acre is not at all impossible. The cost to get the maximum crops in corn is very trifling indeed. A bushel of seed will plant about 8 acres, and cost about a dollar in fair quantities. The plowing, pulverizing, fertilizing, planting and cultivating are exactly the same, whether you raise 40 bushels or over 100 bushels per acre. The only extra labor is in harvesting, a task that should be willingly performed.

FARMERS' INTEREST WHITE DENT is the grandest, most valuable variety of corn in the country. A strong growing variety, sending its roots out in all directions in search of food. Withstands drought well on this account; stalks are strong, close jointed and leafy. A fine grower. Produces mammoth ears, of which the illustration on this and opposite page is a correct representation. The ear is 11 ins. long, and frequently they grow even longer. Grains are very deep; ranging $\frac{1}{2}$ to $\frac{3}{4}$ of an inch in length in middle of the ear. Color pure white; firm and good texture; cob medium size. The ears frequently shell 1 pound of Corn to the ear, and cobs from 1 bushel of ears weigh from 8 to 10 lbs. Ears 18 to 24 rows. Rows straight, and ears of this variety are well filled out at the ends. Matures in about 100 days. Yields very heavy. As the introducers of this fine Corn, we desire to

make a demand for it by reasonably extolling its merits. We will, however, appeal more directly to the good, sound sense of Corn-growers, than to attempt to fill the pages with claims for the Corn. The Corn will speak for itself, from the time you receive the seed we will ship you until it is finally stored in the bursting cribs. We want the better class of intelligent, up-to-date farmers, and those who are seeking for improvements in their crops, as our customers, and count upon an order from every pushing son of the soil, who wants to plant wisely and reap abundantly.

The effect of growing a large-eared variety of Corn like Farmers' Interest can be illustrated as follows: The average weight of Corn ears is not more than 8 ounces. If an increase of 2 ounces to the ear can be secured, there would be added to the yield per acre $\frac{1}{4}$ more. And if there be four ounces added to the weight of ears, then the yield will be increased $\frac{1}{2}$. And, as earliness is as readily developed as the size of the ear, then we can as well have a large increase in yield, and at the same time an increase in earliness in ripening. These were points kept in mind by the originator of this Corn, and earliness and size are combined to a remarkable degree.

When the Farmers' Interest Corn is grown in the South, new seed should be obtained of us after two or three years, as it gets later and loses some of its good qualities.

CAREFULLY.

FARMERS, JUST THINK! OUR FAR- MERS' INTEREST Corn was

PARIS

awarded the Silver Medal at the World's Fair at

against the World's Competition. Don't you think this Corn is good enough for you to grow? It is pronounced the best in the World by the World's Judges.

FROM ALL OVER THE COUNTRY.

We do not give full address, as thus we would direct trade to our customers of former years.

KENTUCKY.

I planted a field of your Farmers' Interest Corn last spring and the result was a revelation to me and my neighbors, when we found we could send to Indiana and get seed corn that excelled our native varieties. We thought we grew good Corn, but your Farmers' Interest is yielding 110 to 120 bus. per acre, and surpasses the best of other Corn by 25 to 30 bus. per acre.

C. W. W., Breckenridge Co., Ky.

INDIANA.

Farmers' Interest Corn is yielding 95 to 100 bus. per acre. Four of my neighbors, who are also growing it, all are getting over 100 bus. per acre. These are not exaggerated reports, but actual facts. C. A. B., Indiana.

I started this morning for your place with two of the finest loads of Corn that ever were put on wagons, but it began raining and we turned back. Will wait for finer weather. The Farmers' Interest Corn is yielding 100 to 120 bus. per acre all over my fields. Nothing like it ever seen in this section before. L. B. CLORE, Ind.

I grew 50 acres of Farmers' Interest Corn, and the yield over the whole field was 90 to 105 bus. per acre, a total of 4,948 bus. on the field. It matured very early; ears mammoth size. It surpassed any other variety in this vicinity. C. A. HELM, Ind.

OHIO.

A heavy cropper on medium soil. Best I ever raised. WM. LANCEY, Preble Co., O.

ILLINOIS.

I planted a field of your Farmers' Interest Corn last spring and it has astonished us farmers all through the season in rapid strong growth. I topped it when ripe and such a field of mammoth corn ears I never saw before. It is good for over 100 bus. per acre. I don't think there can be a better. W. P. R., St. Clair Co., Ill.

KANSAS.

In a visit to my brother in Kansas, he showed me a field of your Farmers' Interest Corn. I must say I never saw its equal in Indiana, nor on the way to Kansas and return. The ears were arms of giants. He wrote me the yield was 114 bushels per acre. I would have guessed it at more, if it was possible for more corn to grow on an acre. A. M. T., Knox Co., Ind.

TENNESSEE.

Farmers' Interest Corn is the largest, heaviest and best White Corn I ever grew. On a test 80 ears made a bushel. The cobs weighed 12 lbs. J. W., Maury Co., Tenn.

MISSOURI.

Having seen a crop of F. I. Corn grown from one ear, I write you early to save me 4 bushels of it for seed, and quote your price. It is the greatest corn I ever saw. A. R., Miller Co., Mo.

IOWA.

28 Acres of F. I. Corn yielded 2,430 bus. of the finest White Corn grown in this section. C. F. P., — Co., Iowa.

MARYLAND.

Farmers' Interest Corn has taken our section by storm. It is the greatest ever seen here. S. B. O., Prince George Co., Md.

When it is considered that 1 bu. of this pure thoroughbred corn will plant about 8 acres and these 8 acres yield 150 to 400 bushels more than corn that we know is usually raised, the price we ask should not be considered.

Try it and be convinced that it is O. K.

PRICE.

Remember the cost is only 15 to 20c. per acre to plant our Corn and your own seed is saved. We guarantee germination under proper conditions.

By mail, Pkt. 10c, large sample ear 30c, 1 lb. shelled 30c, 4 lbs. 75c. By freight or express, 1 bu. 50c, 1 bu. \$1.25, 2 1/2 bu. in 1 bag \$3.50. 5 bu. or more, \$1.25 per bu.

 SEEDSMAN.

LOOK TO YOUR CORN CROP.

YOU CAN INCREASE THE YIELD

AT A VERY TRIFLING EXPENSE.

IF YOU GROW YELLOW CORN DON'T FAIL TO GET OUR

Central States Dispatch.

We send a dispatch and greetings to every corn grower and invite them to enjoy the benefits of this grand new sort. The benefits will be increased yield and superior quality.

The corn crop is the farmer's stand-by, therefore he should give even more attention to selecting seed for it than any other crop. Also there is not another crop that represents such a small outlay for the best seed to plant a crop. 15c to 25c an acre is all that is represented, and your own seed is saved.

GET NEW SEED. NEW BLOOD. BETTER CROPS.

The Central States Dispatch Corn is the largest yielding Yellow Dent Corn we ever discovered, and closely follows our Great Farmers' Interest White Dent in this respect. We have introduced several varieties of Yellow Corn that have been of immense value to the farmers of the country, but according to our well-known policy we are always seeking for better, more valuable varieties. If corn growers will trust us to supply them with the best varieties they will always be **Up-To-Date** in their crops.

The Central States Dispatch Corn is a strong grower and delights in rich soil where it can feed to its heart's content. Under these conditions it may stand three stalks in a hill, each stalk bearing one or two large ears. On soil of moderate fertility, if planted two stalks to the hill the fodder is not so large, but the ears are just as good. The stalk is well supported by brace roots, a sign of great vigor and ability to withstand drought and not blow down easily by storms.

This corn is recommended for strong ground, and suited to grow in latitudes south of the Michigan line, as far east and west as corn grows, except in high altitudes, where the seasons are shortened.

Ears 8 to 12 inches long, very shapely, with extremely deep grain and moderate cob. In season early, maturing in 100 to 110 days, grain yellow, shading to beautiful light yellow on the top of grain. A splendid feeding corn. Rows straight, 20 rows to the ear.

Every corn grower should obtain enough seed of this corn to plant a field or more. All who plant it will find it the most valuable Yellow Dent Corn of strongest growth, largest ear, greatest yielder they ever raised. This corn is so fine that if its merits were known our seed would last only a short time. If any person wants to see a sample before buying more, they may send us 10c and the sample will be sent at once.

Last spring we offered five Prizes for largest yields on one acre of ground. We give the names of the successful competitors below, with extracts from their reports:

FIRST PRIZE—\$25.00—179½ bu. per acre—Last spring I bought two new kinds of corn of you at your O. K. seed store, viz., the Central States Dispatch and the Farmers' Interest. I have just completed harvesting both kinds to-day with following results:

I planted the Central States Dispatch May 10th, on a plot of low, rich bottom ground of sandy loam nature, and gave it three good cultivations. I cut the corn about the first of September. As soon as it would, do I husked it and weighed the corn, which amounted to **one hundred seventy-nine and one-half (179½) bushels per acre.** If any man can beat this I would like to know his method. The Farmers' Interest Corn was planted the same day, and it yielded 156 bu. per acre of as nice corn as I ever saw. Every farmer will do well to plant largely of these two kinds.

W. E. JEFFERS, M. D., Chase, O.

SECOND PRIZE—\$10.00—110 bu. per acre.

I will give my report of the one acre of Central States Dispatch Corn. It yielded 110 bushels on one acre. It was the finest corn I ever raised. Some of the ears were 10 to 13 inches long.

CHAS. FEIG, Utan, Harrison Co., O.

THIRD PRIZE—\$5.00—103½ bu. per acre.

I purchased a bag of your Central States Dispatch Corn last spring and am a competitor for a prize, yet if I succeed in winning one it is a small thing compared to the increased yield of corn I got by planting your seed. I raised from one measured acre, planted in check rows 3 feet 8 inches apart, 103½ bushels of as fine corn as I ever saw.

LEWIS FINDLING, Alfred, Meigs Co., O.

The other two successful competitors were:

FOURTH PRIZE—\$5.00—A. C. BOTTS, R. R. No. 1, Frankfort, Ind.

FIFTH PRIZE—\$5.00—W. W. MAYNARD, Bonner Springs, Kas.

PRICE When the time and labor of selecting seed Corn and the expense of advertising are considered, our price for this corn is very reasonable. Many seedsmen would ask \$5.00 a bushel for this new corn, and we say it would be worth the price to plant. But we will not lay any obstacle in the way of corn growers obtaining this valuable variety. Please note our prices.

By mail, pkt. 10c, 1 large sample ear 30c, 1 lb. shelled 30c, 4 lbs. 75c. By freight or express, ¼ bu. 50c, 1 bu. \$1.50, 2½ bu. (1 bag) \$3.50, 5 bu. or more at \$1.25 per bu.

FIRST PREMIUM WHITE DENT CORN.

.....ALWAYS A PREMIUM.....

In White Corn our customers need only test two kinds, this First Premium and Farmers' Interest, and the one that proves the best on their farm is the one to tie to. They are each grand varieties, but for a fine distinction a farm test must be made.

OUR artist has tried to faithfully portray the beauty of this grand variety. The large ear is a fair representation of an ear 11 inches long reduced in size. The inches as marked are $\frac{1}{2}$ of actual length, hence the ear is only $\frac{1}{2}$ of actual length. The hill of corn will show style of growth, and with the picture of Mr. Trout, the originator, who is a good sized man, to serve as a basis for comparison, a very clear idea can be had of this corn as it grows in the field. Mr. Trout is the champion corn-grower of his county, and regularly excelled all his wide-awake neighbors in his corn product. We name it **First Premium** because of the fact that it has been awarded highest honors wherever exhibited. It is a pure ivory white corn on a white cob. Ears grow long and medium thick, are very shapely, with very deep grains. The grains are of fine texture, smooth, compact, sound and heavy. Its purity in color adapts it for making White Meal and other corn products. Matures in 100 to 110 days, is finely adapted to all sections south of a line 75 miles north of Indianapolis, and will give all growers great satisfaction in quality and productiveness. Below are only a few reports, samples of hundreds received.

"I recommend F. P. W. D. Corn to all farmers as one of the best varieties of white corn in this state.

S. N. CLEMENS, Grant Co., Ind."

"In the lead of all white corn in my county.
MOUNT BRANIGAN, Vigo Co., Ind."

"I cheerfully recommend F.P.W.D. Corn to any farmer in Indiana or any other state as one of the most productive varieties that can be grown in this country.

SCOTT CURRY, Logan Co., O."

"F.P.W.D. Corn has taken our section by storm. My crop is the talk of the neighborhood.

S. B. OTT, Prince George Co., Md."

"Having seen a crop of F. P. W. D. Corn grown from one ear, I write you early to save me 4 bu. for seed and quote your price. I never saw such corn before.

ALFRED RIDGLY, Miller Co., Mo."

"My F.P.W.D. Corn yielded at the rate of 208 bu. per acre. Don't suppose I could have grown a whole acre at that rate, but it is enormous—the greatest on earth, I am sure. E. T. OSGOOD,

Piatt Co., Ill."

"I have seen your F. P. W. D. Corn at the State Fair for 3 years past and at a number of County Fairs, and it always was my choice of all. Last spring I obtained some seed and am wonderfully pleased with my success.

C. M. BAGLEY, Union Co., Ohio."

Early Yellow Rose,

THE GREAT CORN FOR THE WEST.

But not highly recommended for the East.

Seed Corn, more than any other grain, should be selected with reference to climate, latitude and locality. We aim in our descriptions to explain the sections where each variety is best adapted. Thus no grower will make the serious mistake of planting a variety that is not suited for his place. The **Early Yellow Rose** corn is particularly suited for States west of the Mississippi and south of the Ohio rivers. No corn has ever been grown that has made friends as rapidly as this where known. From Minnesota, Dakota, Missouri, Kansas, Kentucky, and other States the reports are most encouraging. The **Early Yellow Rose** shows more vitality and stronger growth than other sorts with which it has been tested, and particularly adapts it for standing the extremes of wet and drought that so frequently prevail during the growing season. The stalks grow 8 to 10 feet high; full, dark foliage, setting its ears low, 4 to 5 feet from the ground; starting from 1 to 5 shoots; usually maturing 2 good, sound ears, 8 to 12 inches long. In a test, 270 lbs. of ears shelled 64 lbs. of corn. It will mature in 90 to 100 days.

IOWA.

I prepared and planted on June 1, a field of **Early Yellow Rose Corn**, with the view of raising a large crop. I tended it well, and at harvest time I measured off a plot that contained 1 1-5 acres, and the yield was 181 bus. of sound corn, being at the rate of 150 bus. per acre. It is a strong grower, large, and early.

JOHN HEAD, Page Co., Iowa.

MISSOURI.

I have been raising the **Yellow Rose Corn** for two seasons, and I think it is the best variety of early Corn in cultivation. I was told the other day that I raised more Corn this season than any one man in the township, and simply because the most of my crop was of the **Early Yellow Rose** variety. It is a bonanza for bottom land, as it will come up when other corn will fail.

GEO. B. SHIELDS, Livingston Co., Mo.

KENTUCKY.

I am much encouraged with my success with **Early Yellow Rose Corn**. It is just suited to this State as an early main crop superior **Yellow Dent Corn**, yielding 100 to 125 bus. on our rich soil. It is sure to come into general and extensive cultivation.

FRANK P. BROSIUS, Henderson Co., Ky.

MINNESOTA.

The **Yellow Rose Corn** is good this year, being such a dry season. I believe it will be the best ever raised in this State if the season had not been so dry. I shall plant it next year and more of it, and I believe after it gets used to this climate it will be the best Corn ever grown. A good lot of it brought 2 ears to the stalk and stayed green, while the other corn was all dried up. Please send me your catalogue, and oblige.

FRED. J. MARIAH, Rice Co., Minn.

KANSAS.

I planted **Early Rose Corn** on April 18, but the weather was so dry it did not come up till after May 1. We had four hot days during its growth, but it stayed perfectly green and did not hurt the Corn at all. It fully matured in 90 days from coming up. In picking ears I have found several 22 grains around and 60 long, and any number 18 around and 65 long. When it comes to a big crop and fine, large ears, **Early Yellow Rose** has the front seat. Most of our farmers want early Corn, so it will be out of the way when the hot winds come, and this Corn fills the bill to perfection. Wm. Whittay, Sedgwick Co., Kas.

Many more testimonials could be given if space permitted. We assure one and all that the **Early Yellow Rose** is a good corn to grow for profit.

Price of Early Yellow Rose, pkt. 10c, sample ear 30c, 1 lb. 30c, 4 lbs. 75c, 1/4 bu. 50c, bu. \$1.50, 2 1/4 bu. (1 Bag) \$3.50, 5 bu. or more at \$1.25 per bu.

✻ THE DEEPEST GRAINED WHITE DENT CORN. ✻

FORSYTH'S FAVORITE.

THIS corn originated in Johnson County, Ind., in that section known as the Garden Spot of this great Corn State, and in the few years since its distinct characteristics have been brought out it has made both a local and national reputation. It is conceded to be the largest eared and deepest grained early white corn ever seen in this market. All who see it proclaim it a king in the great corn family.

In describing this corn we must speak of the size of the ears as mammoth, being 8 to 15 inches long, with grains averaging about half-inch long, and sometimes contain grains $\frac{3}{4}$ inch in length. The number of rows on a cob range from 16 to 24; ears containing 1,500 to 2,000 grains are quite common. Grains pure white, cob white and usually hollow at butt end, which allows the ear to dry out quickly, and enables the grower to crib his corn before smaller varieties are fit. We recommend it for this latitude and all points south, and it needs rich, strong ground, when it will prove a real wonder of the grain kingdom. The following well known farmers of Johnson County attest to the grand properties of this corn, and say it can be cribbed ahead of any of their common field corn, and also that it yields enormously: M. V. Kindle, D. M. Forsyth, W. S. Core, J. S. Mountz, J. T. Walker, A. V. Pendleton, Geo. H. Pendleton, Edward Alexander, etc., etc.

As we are writing this page of our catalogue, our grower, Dr. Forsyth, came in with 12 ears of this famous corn weighing 20 pounds. This corn was shown to many people, including the members of the Marion County Horticultural Society, which was in session, and they are unanimous in saying they never saw such great corn before.

We have space for only a few reports; could fill half this catalogue, if space permitted:

I am very much pleased with Forsyth Favorite Corn. It is the largest corn I ever grew, and withal, is as early as my smaller eared varieties. It is a great money-making corn.

ABRAHAM DOWNLEY, Lancaster Co., Pa.

As is usual with your seeds, I found the Forsyth Favorite Corn sustained the high recommendation you gave it. I am sure my trial plot yielded 150 bushels per acre of the finest corn I ever saw.

DAVID ELDRIDGE, Cuyahoga Co., O.

For the Forsyth Favorite White Dent Corn, I must say, without boasting, that it is by far the finest I ever raised in my farming experience of 12 years, and I have planted nearly every kind. I will plant no other in the future.

J. R. BYERS, Ohio Co., Ky.

Forsyth Favorite White Dent is the largest and best corn I ever saw. On a test 52 ears weighed 70 $\frac{1}{4}$ lbs.; the cob weighed 11 $\frac{3}{4}$ lbs.

JOHN WAGGONER, Lincoln Co., Ky.
20 acres of Forsyth Favorite Corn yielded 2,730 bushels of as fine corn as ever grew. The like was never seen before in all this section.

C. F. PENDERTON, Hardin Co., Iowa.

PRICE

By mail, post paid: 1 Pkt. 10c., 1 ear weighing 1 to 1 $\frac{1}{4}$ lb. and containing 1,000 to 2,000 grains, which will raise about 20 bushels of corn, 30c.; 4 such ears for \$1.00. Those who order first will get the largest ears. 1 lb. shelled, 30c., 4 lbs. 75c. By freight or express, $\frac{1}{4}$ bu. 50c., bu. \$1.50, 1 bag 2 $\frac{1}{2}$ bu. \$3.50, 5 bu. or more, @ \$1.25 per bu.

The price of this seed should not deter any farmer who wants to be abreast of the times, from getting a start at once of

The FORSYTH
Favorite
Corn.

ILLINOIS' . AND . IOWA'S . BRAG . CORN.

Iowa Silver Mine

Our customers are invited to prove for themselves whether Illinois and Iowa excel Indiana in producing the best White Corn, by planting this variety in comparison with our Farmer's Interest, Forsyth's Favorite and First Premium. We give the introducer's description as follows:

"Ten years ago in selecting over some unnamed white corn, I found one ear that was of ideal shape, size and color. This was planted carefully in an isolated spot, and from the crop selected only the best for planting the next season, continuing this careful selection of only the best ears out of crops for years until the type was fully fixed."

"The stalk grows to a height of about seven or eight feet and sets the ears about three and one-half to four feet from the ground, just the right height for easy picking. One peculiarity noticed in going over the field is that there are no barren stalks; every one has an ear, many stalks have two good ears, and this has been characteristic every year it has been grown. It has not a large growth of fodder, having been bred essentially for grain, though it has plenty of blades to support the growth and it is as well rooted as any corn grown. The type is very even, so unusually so that in selecting exhibition ears for the fair in the field one can take the ears as he comes to them, with very few exceptions. Ears measuring from ten to twelve inches in length and weighing one and one-half pounds are not uncommon. The ears are very uniform in size and shape, with sixteen to twenty straight rows (usually eighteen rows) of deep pure white kernels set on a small white cob, and the ears are well filled out over the tip. It is early; matured last year in less than ninety-five days, and has never been caught by the frost. The cob dries out rapidly, so that it is ready for market earlier than any other large white field corn in existence. In its yield it will surpass all other varieties of any color. Seventy pounds of corn in the ear will make sixty-two pounds shelled. It is adapted to a wider range of soil and climate than any other corn ever offered. From Minnesota to Florida, from Massachusetts to California, it will yield a paying crop where other varieties are grown at a loss. It is in every way a distinct type of corn."

J. H. POWERS was awarded First Premium at the Illinois State Fair in 1899 for a yield of 196 bushels of Iowa Silver Mine corn grown on one acre.

L. D. YOUNG was awarded Second Premium at the Illinois State Fair in 1899 for a yield of 176 bushels and 39 pounds of Iowa Silver Mine corn.

Price, by mail, 1 large ear, 30c, 1 lb. 30c, 4 lbs. 75c. By Freight or Express, 1/4 bu. 50c, 1 bu. \$1.50, 2 1/2 bu. (1 bag) \$3.00, 5 bu. or more at \$1.00 per bu.

I am much pleased with your O. K. Seeds, and will give you my order next year. Your Giant Climbing Tomato did very well; also the Cabbage was fine. A. E. McCULLOH, Sylvan, Pa.

196 Bush. on
One Acre.

176 Bush. on
One Acre.

Notwithstanding the very wet summer, O. K. Seeds gave the best of satisfaction. The Six-Weeks Potatoes, Golden Pop Corn and Yellow Summer Radishes were the finest I ever saw. ALEX. CASEBEER, Somerset, Pa.

The Alpha Pole Bean is the earliest I ever saw and of good quality. It bears till frost. Astro Cucumber is out of sight. I believe they grew 2 inches in 24 hours in the open ground. We were well pleased with O. K. Seeds from you, and expect to buy again.

THOS. CRITCHFIELD, Cayuga, Ind.

The O. K. Seeds from your house proved to be the finest we ever had. The beets were the largest in all the country. Cucumbers were very prolific. We are well pleased, and will call on you for our next seeds.

Elder T. C. WILLIS, Peiham, Tenn.

Everitt's Earliest Cabbage was early in market, and heads weighed 7 to 10 pounds. Brill's None Such done well. It sold for 10 cents a head while others brought 3 to 5 cents. They weighed 12 to 16 pounds.

ROBERT SAMUEL AND FRED RUHL, Clinton, Ill.

Your Logan's Giant Seedling Tomatoes are very fine. I raised them to weigh 2 pounds each, while four of them in a basket sold for 10 cents per basket, while other varieties sold for 25 cents per bushel. Everitt's Earliest are the first tomatoes to ripen, coming in ahead of 60 other varieties and good bearers. ROBERT SAMUEL, Clinton, Ill.

I tried O. K. Seeds this year, and they excel all others. Logan's Giant Tomato, Rough and Ready, Brill's None Such and Short Stem Drumhead Cabbage, Prize Taker Onions and others have done well this dry season. I am well pleased and will send to you again.

W. H. A. RICHARDSON, Athens, Tex.

The O. K. Seeds were all that could be expected. The peas, beans, tomatoes, Logan's Giant and Everitt's Earliest gave perfect satisfaction.

EVAN BOLING, Parksville, Ky.

Our best agents of this year can have exclusive agency in the future, and if desirable we will send our Catalogues to them to distribute.

Mammoth 8-Rowed Early Yellow Flint.

243 Bushels Grown from 1 Peck of Seed by O. B. Blanchard, of New Hampshire.

The best variety of Corn for northern latitudes, and the longest eared flint corn in the country, we believe. Ears measure 10 to 15 inches long, 8 broad rows making a most attractive appearance. The stalk grows medium size, and many of them bear two ears. Very leafy, and is a valuable variety for ensilage. We expect all our northern customers to order this corn, while we also recommend it very highly to plant on thin ground in any latitude and for late planting. Price by mail, pkt. 10c; sample ear, 10 to 15 in. long, 35c; 1b., 30c; 4 lbs., 75c. By freight or express, $\frac{1}{4}$ bu., 50c; per bu., \$1.50; bag of 2 $\frac{1}{2}$ bu., \$3.50.

Iowa "Gold Mine" Yellow Dent.

Everyone who has tried it is enthusiastic in the praise of this splendid variety, and it has received everywhere the most cordial endorsement. It is early, ripening only a few days later than the Pride of the North; ears are of good size and symmetrical; color, a bright golden yellow, "as handsome as a twenty-dollar gold coin just from the mint," so says one of our customers; grain is very deep, cob small, and therefore dries out very quickly as soon as ripe. Seventy pounds of ear corn make sixty to sixty-two pounds of shelled corn, and in hauling to market it weighs out five bushels more to the wagon load than common varieties in the same size wagon. Price, pkt., 10c; sample ear, 30c; 1b., 30c; 4 lbs., 75c; post-paid; by freight or express, $\frac{1}{4}$ bu., 50c; bu., \$1.50; 2 $\frac{1}{2}$ bu., \$3.00.

We can also supply the following varieties:
Riley's Favorite, Leaming and Pride of the North at the same price as Mortgage-Lifter.

Everitt's Mortgage-Lifter.

Reliability is stamped upon every feature of this corn. It is a corn that has not failed to produce a paying crop in the worst corn year we have seen in Indiana in the past ten years, and in favorable seasons yields 80 to 120 bushels per acre of the finest yellow corn that ever grew inside of husks. We know this corn will please. We will guarantee a rich harvest of the most superior corn that grows if Mortgage-Lifter is planted. It is early, and will mature in Northern Ohio, Indiana, Illinois, Southern Michigan, etc., and has given farmers in Kentucky, Virginia and other states similarly located great satisfaction on account of early maturity, fine quality and large yield, enabling them to have early feed. The grain is very deep, compact and heavy; ears medium to large size; small cob. 70 lbs. of dry corn on the ear, as our seed averaged, shelled 62 lbs. of corn, leaving only 8 lbs. of cob. We want every corn-grower to plant some of the Mortgage-Lifter Corn. If you plant a field of it, your profit will be big. If you don't plant much, plant a small lot, a peck, or pound, or ear. We are anxious to have every person who raises corn made acquainted with its merits without delay. We know it will do them good, and thus secure to us a friend and customer for O. K. Seeds. Read some reports:

Mortgage-Lifter Corn I planted May 2d. The season was very dry, but my corn did not mind it, and turned out 140 bushels per acre of as nice corn as I ever saw.
H. E. STONE, Oakland Co., Mich.

Notwithstanding the extremely dry season in 1894, my Mortgage-Lifter Corn made 80 bu. per acre. It is truly a mortgage-lifter, and can be depended upon in seasons when money is lacking for such purposes.
J. E. ISENHOWER, Marion Co., Ind.

Have grown your Mortgage-Lifter Corn 3 years. Yield the poorest season, 93 bu. per acre; this year, 95; the best yield, 124 bu. per acre. Mortgages can't stay on farms where it grows.
C. M. OLAF, Jersey Co., Ill.

I like the Mortgage-Lifter Corn because it is reliable and pays to grow it.

GEO. WESTLAKE, Carroll Co., Iowa.

Price, by mail, pkt., 10c; sample ear, 30c; 1b., 30c; 4 lbs., 75c. By freight or express, pk., 50c; bu., \$1.50; 2 $\frac{1}{2}$ bu., \$3.00; 5 bu. or more at \$1.00 per bu.

Mammoth 8-Rowed Early Yellow Flint.

ENG'G. FOR EVERITT

Yard-Long Yellow Dent Corn.

THE LONGEST EARED CORN WE EVER SAW.

This corn does not grow ears quite a yard long, but the ears are very remarkable for their very great length, frequently growing 18 inches long, with 12 to 14 rows each. Don't think this corn is only a curiosity or freak, as this is not the case. The large ears are filled with moderately deep, large yellow grains of splendid quality, and, as must be the case, a great many grains are required to fill such mammoth ears.

The Yard-Long Corn originated in Morgan County, Indiana, and

is becoming a very popular variety among those good farmers. It is a variety highly prized by farmers who feed whole corn to cattle, as the cob is not thick and it is more easily broken than the short eared varieties.

We recommend the Yard-Long Corn as a profitable variety to grow for feed, for market and as a great and interesting novelty.

Price by mail, 1 extra long ear 35c, 1 lb. shelled 30c, 4 lbs. 75c. By freight or express, ¼ bu. 50c, bu. \$1.50, bag of 2½ bu. \$3.00.

Prehistoric Corn.

Discovered near Marked Tree P. O., Ark., in a sealed vessel taken from a prehistoric burial mound, estimated to have been placed there at least 3,000 years ago.

We introduced this novelty in 1897, having purchased the entire stock from the discoverer. At that time it gave great promise in various ways, but after a couple years of growth it decreased in number of ears to the stalk, and consequently productiveness, also our hope that it could be bred into our regular corn proved at fault, as it will not mix with nor cross on it. In one important respect, however, it has retained all its early promise, viz., as a fodder or ensilage corn. For volume of fodder the Prehistoric easily surpasses all other kinds. The plant is short jointed and very leafy, while the leaves are of wonderful size, 3 to 5 feet long and 4 to 6 inches wide. (See illustration.)

our customers for best results, as it is a very strong grower, and we advise every grower to have only one stalk in a hill, where the regular corn would allow two or three.

The ears of the Prehistoric are the most remarkable of all, and stamp it as a stranger to our present conditions, and it even refuses to obey the present laws of nature and will not cross with common corn. The ears are of many colors and shades of colors. Yet remarkable to relate, no two colors of grains ever occur on the same ear. The prevailing color of the grain is bronze, varying from light to dark, and the ears are very beautiful, fine enough to place in the parlor as an ornament, while as a novelty, and from its association with prehistoric ages, it is among the greatest curiosities in the world. And to think that you can grow this wonderful corn on your own farm!

Price, pkt. 10c, lb. 35c, 4 lbs. \$1.00, by mail.

5 FT.

PREHISTORIC CORN—Illustrating Ear and Leaf Features

NEW "PROSPERITY" OATS,

NOW OFFERED FOR THE FIRST TIME.

THE
EARLIEST,
THE
HARDIEST,
MOST
PROLIFIC,
STRONGEST
STRAW,
HEAVIEST
GRAIN,
BEST
COLOR.

The **Prosperity Oats** are offered to farmers this year only in limited quantities. The present outlook for this variety indicates that they will be a startling sensation among oat growers on account of their very remarkable earliness, combined with prolificacy, healthiness, fine quality and heavy weight.

As far as tested they have proven that they are not a pampered variety, but adjust themselves to varying conditions, and in fact, appear to be just what farmers want—a Rough and Ready Variety. They are so early that they can be threshed and in the granary before the usual kinds are ready to harvest. They have a very stiff straw, and stand up well on strong land. Color, pure bright white if not discolored by rain. They grow vigorously and come so early that they are not liable to be injured by drought as much as later kinds.

The **Prosperity Oats** have made some of the largest yields on record. Read the following:

"144 bushels and 21 pounds on one acre."

Last Spring I sowed the 96 lbs. of **Prosperity Oats** received from you, and I harvested same early in August. The actual yield was 4,149 pounds. I left it to stand in the field five weeks before hauling; during that time the thousands of blackbirds stripped the outside bundles, causing a loss to me of 15 bushels at least. It is the best oats I have ever raised.

JOHN MATTHEWS,
—Co., Utah.

"110 bushels per acre."

The **Prosperity Oats** did well, having threshed 110 bushels from 96 lbs., on one acre.

JOHN MORGAN,
—Co., Ill.

"Two weeks EARLIER than other varieties."

I sowed the **Prosperity Oats** on a little more than an acre of land. They came up good; are a strong grower; about two weeks earlier than our native oats. I threshed 80 bushels, machine measure. They would weigh about 100 bushels.

A. J. TROYER,
—Co., Ohio.

"Ripe 60 days after sowing."

"The **Prosperity Oats** could have been cut 60 days after sowing. Stood up well. Straw nearly as stiff as wheat straw. Are well satisfied with **Prosperity Oats**."

Barton S. Gordon,
—Co., Ohio.

Plant an acre of Prosperity Oats this year, and you will have done one of the wise acts of your life.

PRICE: These Oats are in small supply, and we recommend every purchaser to make as large crops from the seed as possible. All that are grown will command fancy prices next year. 1 lb. 50c, 3 lbs. \$1.00, by mail. By freight or express, peck 75c, ½ bu. \$1.25, bu. \$2.00, 3 bu. in a bag \$5.00.

EVERITT'S RELIABLE

MOST RELIABLE OATS TO GROW

NEW BLACK OAT. THE RELIABLE.

We have much satisfaction in offering this superior variety of Black Oats.

Many farmers are convinced that black oats are more reliable croppers than white, which is to a certain extent true, as they will endure more hardship and exposures and still make a crop. The next consideration is to get them pure, which usually is difficult to do. In our Reliable we offer oat growers a pure black variety of fine qualities.

Everitt's Reliable Black Oats are the result of an importation of seed from England several years ago, where black oats are much preferred and about three times as many are grown as of white oats. They are fully as good as white oats for feeding, are very early, and surpass white oats in stiffness of straw. The straw is very stiff. The heads are very long and yield heavy crops of grain weighing 35 to 45 lbs. to measured bushel, owing to season and cleanness.

Our seeds have been grown with great care, and we are positive every grower will be pleased with them. They have always been free from rust, mainly on account of vigorous growth and early maturity.

The Reliable Black Oats are full of vigor, and will respond to the care of any good farmer, and make him a crop almost regardless of adverse conditions if they come.

We will be greatly disappointed if our customers do not report some heavy yield of these oats this season. 100 bushels or more per acre can surely be

raised if the season is good, and the soil and cultivation are satisfactory. This hardy, vigorous variety

will make a good crop, when a weak variety will be disappointing. The Reliable will be so productive as to make a profit when the price is low. It is the top bushel that makes the profit. Each bushel added beyond cost of production is clean profit.

We have often said: *It is not so much the soil, cultivation, fertilizer or season, as the variety, that insures success.* Good seed is also fertilizer.

No difference what the price is, after you raise a certain number of bushels to pay cost of production, then you get your profit. Strive for the top bushel. Each one added is clear gain. Each one you fall below cost of production, is clear loss. This refers to all crops.

There are many instances where 75 to 100 bushels of oats can be grown per acre as well as 25 to 40 bushels, if only the proper variety is used for seed.

PRICE—We will make it possible for every farmer to get some of these oats by putting the price very low. Pkt. 10c, 1b. 25c, 4 lbs. 65c, by mail. $\frac{1}{2}$ bu. 35c, 1 bu. \$1.00, 3 bu. (1 bag) \$2.50, 10 bu. or more at 75c per bushel. Bags free.

**72 PER CENT. OF MEAT.
100 BUSHEL PER ACRE.**

GREAT AMERICAN OATS

**TRY ALL PROMISING THINGS.
HOLD ON TO THE BEST.**

The Great American Oats

heavy, plump grains with large per cent. of meat and small per cent. of hull; stiff straw that will save the crop until harvested. Head long, heavy and full. They are noted for vigorous growth and droughts do not affect them as much as less vigorous varieties. The grain is large, white, plump, with thin hull, weighing 40 pounds per bushel with ordinary threshing cleaning. On account of large per cent. of meat in the kernel they are well suited for oat meal and other oat products.

We unreservedly recommend the GREAT AMERICAN OATS. They will yield from 65 to over 100 bushels per acre in ordinary farm cultivation. We don't ask you to build your hopes on 200 or more bushels per acre. We believe we are dealing with intelligent people, and they realize such yields are impossible. We aim to *gain* and *hold* the confidence of farmers everywhere; then will we realize the height of our ambition; when our celebrated **O. K. Seeds** are planted on every farm in the country. Have you decided to devote part of the farm to the **GREAT AMERICAN OATS**? It is one of the ways to make farming pay.

Price by mail, 1 lb. 25c, 4 lbs. 65c. By freight or express, ¼ bu. 35c, 1 bu. \$1.00. Per bag of 3 bus. for 2 acres \$2.50, 10 bus. or more at 75c per bu.

White Superior Scotch Oats.

Choice Cleaned Crops Weigh 50 lbs. to the Measured Bushel. Compare this Weight with common oats at 32 pounds, and oftentimes less. Why grow chaff and straw, mainly, when with this variety you can get plump, heavy grain that makes muscle, bone and fat, when fed to your stock? Here's a chance to make farming pay.

EVERITT'S WHITE SUPERIOR SCOTCH OATS—Surpasses all others in heavy weight, thin hull, shortness and plumpness of grain, strength of straw, and productiveness. In short, they are the most profitable for farmers to grow and merchants to handle. Their productiveness, weight, and fine qualities place them at the head of the list. They ripen evenly and very early, and notwithstanding they bear a very large head, filled completely with the plump grains almost as heavy as wheat, they stand up stiff and straight until fully matured. Their strong straw adapts them to rich bottom ground, where common oats will fall down and waste. One of our growers reports a yield of **151½ bus. per acre**, actual weight. These are the oats we offer you, and when you see them you will not be surprised that such enormous yields are possible.

The following truthful, responsible farmers, who live in the neighborhood where our crops are grown, endorse them as being *very early, with stiff straw, extremely heavy and productive, and altogether a profitable variety to grow*: Demas Bricker, Louis Fitzenberg, Chas. H. Coe, Col. I. P. Larimore, J. R. Headington, Ephraim Daily, Samuel Morey, Wm. Matton, Chas. Twining, L. S. Hall, J. G. Case, and E. W. Hawkins. These farmers all live in Knox county, Ohio, and would not misrepresent an article, but add their names and testimony to these fine oats as evidence of their worth, and with the hope that their brother farmers will profit by their observations. They were exhibited at the Hartford (O.) Fair under the name of "Everitt Oats," and received the first premium, and a special recommendation for their fine quality and great weight by the Committee on Farm Grains. Committeemen—Wm. H. Perkins, Geo. N. Jackson, A. K. Sutton.

Who would not grow these oats in preference to the light, chaffy kinds, which make up the main crops of the country? **BE PROGRESSIVE.** Get a variety of oats, the like of which you never saw before, which contain so much vigor that they will produce a crop regardless of the season. The price is low enough that you can sow a field or your entire crop. Sow largely of these oats for profit.

GEO. W. MEYERS, who has threshed grain for thirty years, says: "The White Superior Scotch Oats have a good straw, ripen even and very early. For yield, weight and quality they are superior to any other variety I have found in an experience of thirty years threshing farm grain."

Price by mail, 1 lb. 25c, 4 lbs. 65c. By freight or express, ¼ bu. 35c, 1 bu. \$1.00, 3 bus. \$2.50, 10 bu. or more at 75c.

BROME GRASS BROMUS

THE GREAT DROUGHT RESISTING GRASS.

In order to learn the opinion of the Department of Agriculture on this grass after the year's experience we wrote them Dec. 2d, 1900, and give their reply below:

Washington, D. C.
Dec. 3th, 1900.

Mr. J. A. Everitt, Seedsman,
Indianapolis, Ind.

Dear Sir—"Replying to your card of recent date, I would say that **Bromus Inermis** grass continues to grow in favor, especially in the Northern and Northwestern States. We shall continue to recommend this grass in accordance with our expressions in the circular, a copy of which I enclose."

Yours truly,
F. Lawson-Scribner,
Agrostologist.

The following description and instructions are taken from Circular No. 18 issued by the Department of Agriculture, Washington, D. C.:

"Smooth brome-grass has been known in Europe for over one hundred and thirty years. The early agriculturists did not consider it of any value because of its creeping rootstocks, thus resembling the dreaded couch grass. In 1854, however, Stebler and Schroeter demonstrated by experiments conducted for thirty years at Magocs, Hungary, that it had the power to withstand long periods of drought when all other grasses succumbed.

These experiments resulted in introducing the grass into cultivation in Hungary, where it still retains the name of Hungarian brome-grass. Its introduction to the United States must have taken place about the same time, for we find the seed is offered for distribution in Bulletin 22 of the California Experiment Station, issued November 3, 1884, and the statement made that 'our experience indicates that it will do well here either with or without irrigation.' Since then the experiment stations of Colorado, Minnesota, Manitoba, North Dakota, South Dakota, and the different grass stations of the Agricultural Department, Washington, D. C., have conducted extensive experiments, and all speak of it in the highest terms.

Smooth brome-grass is a native of Europe and Asia, ranging from France eastward into Siberia, growing along roadsides, river banks, borders of fields and woods, and upon sterile hillsides and pastures. It is a vigorous, hardy perennial with strong, creeping rootstocks, smooth, upright, leafy stems, one to four feet high, and loose, open panicles, or 'seed heads,' four to eight inches long. In a few years it forms a very tough sod, soon crowding out other grasses, clovers and weeds. Its remarkable drought resisting qualities have proved it to be the most valuable grass for dry regions where other grasses could hardly exist.

As it is thoroughly permanent and grows with wonderful rapidity, producing heavy crops and luxuriant pasture, its value to the farmers of dry regions can not be over-estimated. All kinds of stock eat it with relish, and the chemical analyses made show that it is rich in flesh-forming ingredients, much more so than timothy. It is very hardy and not injured by severe spring and fall frosts when once established. As it starts to grow very early in the spring, before any of the grasses upon the native prairies show any signs of life, and remains green and succulent far into November, it will supply the long-felt want of early spring and late fall pastures.

METHOD OF SEEDING.

Smooth brome-grass will grow on almost any soil, but its productiveness depends upon the degree of fertility. It seems to germinate well on rich, moist land, but is also able to produce a crop where the soil is poor and the conditions unfavorable for the growth of other grasses. The land should be fall plowed and put in good condition by disking and spring-tooth or peg-tooth harrowing, as the land may require. The seed may be sown as early as oats is seeded, or it may be sown as late as the first of August or September if the land is kept from drying out and from growing weeds, by an occasional surface cultivation. In some parts of California, Washington and Oregon it has been found better to sow in the fall during the months of October and November. The most common plan is to sow broadcast by hand at the rate of from eighteen to twenty pounds per acre and harrow it in thoroughly with a peg-tooth harrow.

PRICE—We offer tested seed that will grow under proper conditions. There is much inferior seed on the market. Pkt. 10c, lb. 35c, 4-lbs. \$1.25, by mail. By freight or express, 4 bu. 75c, 1 bu. \$2.40, 5 bu. or more at \$2.20 per bu. Weight 14 lbs. per bu. Price liable to change. Don't be misled into paying much higher prices for this grass under some fancy misleading name.

When one is desirous of sowing a pasture or meadow and is limited in means, the following method is recommended by the South Dakota Experiment Station:

"Purchase enough seed to sow a small parcel of land, say an acre. Use good, clean land and keep out all weeds. Save the seed grown on this piece of land and sow it the next spring. In a few years a field of the desired size can be obtained at a comparatively small expense. By mixing red clover, alsike, alfalfa, millet or other short-lived or more tender forage plants with the smooth brome a larger piece of land can be sown, and as these die out the brome grass will spread and finally fill the field."

VALUE FOR HAY.

The yield of hay from smooth brome-grass varies from one to four and a half tons per acre according to climatic conditions, method of seeding and fertility of soil. The quality of the hay is excellent, fully equaling that of timothy in palatability and nutritive qualities. In order to obtain the best product, the hay should be cut at time of full bloom. One important feature which distinguishes smooth brome-grass from other hay grasses is that it does not deteriorate rapidly after the flowering period, and even if cut when the seeds are ripe the hay will have lost but little of its nutritive qualities, owing to the fact that after the seed-bearing stem has grown up a large number of leafy shoots spring up from the base. After furnishing three or four crops of hay the sod thickens up too much for a good growth of stems. This thickening occurs sooner if the grass is allowed to ripen seed than it does when it is cut for hay, or if it has been seeded heavily at first.

VALUE FOR PASTURE.

Smooth brome-grass is essentially an early spring and late fall pasture grass. After the hay crop has been taken off a heavy growth of aftermath or second growth springs up. It seems to be especially adapted for permanent pastures. After it has produced several crops of hay it thickens up, forming a very compact sod and a heavy growth of leaves. If one desires to use it for pasture at once it will be better to seed it thickly at the rate of about twenty-five pounds per acre.

As shown by the numerous testimonials received from all parts of the United States, it is relished by all kinds of stock. Cows are very fond of it, and are said to prefer it to timothy, and even clover.

Mr. Gluyas, of Hofflund, Williams County, North Dakota, has tested the palatability of this grass for horses. Some seed was accidentally scattered over the native prairie sod. As a result, about two square rods of smooth brome-grass appeared in bunches. Horses which had access to the pasture cropped the smooth brome-grass close and left the prairie grass around it, although the latter was still green and in good condition.

TO DESTROY.

It was found at the experiment stations of Minnesota and Manitoba that a crop of hay can be harvested and taken from the land, and if the sod was plowed over immediately afterwards and backset in September, that at the latter date the grass would be all dead. When the grass was allowed to ripen seed, however, it was found that the new shoots at the base had gained such a foothold that when the sod was plowed under at this stage it was not killed at the time of back-setting in the fall. (It is reasonable to conclude also that plowing previous to the usual hay season and the same subsequent treatment would accomplish the same result.—EVERITT.)

HARDINESS.

Smooth brome-grass will withstand extreme changes in the temperature without injury. Its ability to produce good pasture during long periods of drought far exceeds that of any other cultivated variety. In Canada, where it had been exposed to a temperature of several degrees below zero and not covered by snow, it was entirely uninjured. Out of seven or eight hundred varieties tried at the Kansas Experiment Station this proved to be the best. Without doubt it is the grass for the semi-arid regions of the West. From the reports received it is evident that it is very little influenced by the changes of climate. It does well in California, Kansas, Montana, North and South Dakota, Tennessee, Utah, Wyoming and all parts of Canada."

BARLEY.

The varieties of barley we offer below must not be compared with the old short-strawed, scant yielding varieties that many farmers may have in mind. These varieties grow tall, and yield large crops. Two are beardless and are as pleasant to handle as oats or smooth wheat. Farmers will be wiser to sow part of their ground to these barleys than all to corn and oats. Barley makes excellent pasture and hay.

New Beardless Barley, SUCCESS.

This is a new 6-rowed Barley, and, as the name indicates, without beards, which is the most valuable improvement on any grain for years. On account of the long, harsh and objectionable beards, a great many farmers did not grow Barley at all, because it was so disagreeable to handle. It is 6-rowed, like the old Manshury Barley, and the berry is of the same appearance as this. It is a vigorous grower, producing strong straw, heavy and well filled heads. It has hulls like other malting Barleys and it is of the same appearance in the grain. It should not be mistaken for the Beardless Hulless Barley, the description of which we give below, and which is grown for feeding purposes only. This New Beardless Barley is a first-class Barley for malting, and will not get easily discolored, and is also a heavy cropper, yielding from 50 to 75 bushels per acre. Ever since this grand new Barley was introduced there has been a great demand for it, and we anticipate another great rush for it this year. Heavy yielding Barley is always a profitable crop to grow even at moderate prices, as it makes a valuable ground food for hogs and all kinds of stock. The Beardless Barley can not be recommended too highly for either a good Barley for feeding as well as for malting. **Price, pkt, 10c, lb. 30c, 4 lbs. 75c, by mail. By freight or express, 1/4 bu. 50c, 1 bu. \$1.25, 2 1/2 bu. \$2.50.**

New Beardless Barley, WHITE HULLESS.

White Hulless-Beardless Barley, also known as "Ideal Barley" and "Giant White Hulless Barley." It grows very large and has heavy, well-filled heads without beards, and in the field it looks about the same as the "Beardless Barley" but the kernels shell out without the hulls, like the Black Barley, and are the prettiest and hand-somest white berry, plump and oval in shape, that has ever been grown. Weighs 60 pounds to measured bushel. Sow 1 1/2 bushels per acre if for grain; 2 bushels for hay. It is not a malting Barley, but can be used for feeding only, and as a fattening feed for hogs it has no equal; it makes sweeter meat and nicer lard than corn. It is a vigorous grower and can be sowed after all the other grain is sown, and it will mature before wheat or oats will. It can also be sown for hay, and if sown early enough can be cut twice and it will make two good crops of hay in one year.

Price, pkt, 10c, lb. 30c, 4 lbs. 75c, by mail. By freight or express, 1/4 bu. 50c, 1 bu. \$1.50, 2 1/2 bu. \$3.00.

No other Seeds
so Cheap,
No other Seeds
so Good.

O. K. SEEDS.

Bearded Barley, MANSHURY.

This is an old well known six-rowed variety introduced by Professor Henry, of the Wisconsin Agricultural Experiment Station eleven or twelve years ago. Since then it has been the standard and most popular Barley ever introduced. It has been worth millions of dollars to farmers in the Barley growing States. It is a Barley of wonderful productiveness and is not surpassed as a heavy yielder. Its malting qualities are unsurpassed, and on this account always commands the highest market price. It ripens early and has strong, stiff straw, with long and heavy heads, filled with plump, nice kernels which are of a pretty bright color, and will not discolor from wet weather. Barley is in better demand than it used to be, and even at a moderate price it is a good and profitable crop to grow. The Manshury Barley yields in ordinary seasons 60 to 65 bushels per acre, and in favorable seasons has yielded as high as 80 bushels; figuring only 45 to 50 cents per bushel, it is one of the best paying crops.

Price, pkt. 10c; lb. 30c, 4 lbs. 75c, by mail. By freight or express, 1/4 bu. 50c, 1 bu. \$1.00, 2 1/2 bu. \$2.25.

VICIA VILLOSA.

(Sand Vetch.)

A forage plant that is becoming very popular where introduced, owing to its adaptability to withstand severe drought, heat or cold. Although it succeeds and produces good crops on poor, sandy soil, it grows much stronger on good land, attaining a height of 3 to 4 feet. It is perfectly hardy throughout the United States, remaining green all winter. As a crop for soil-

ing or plowing under, we predict that this plant will take the same prominence in our Northern States as Scarlet or Crimson Clover has done in Delaware and Maryland. It is also equally valuable in the South. Nothing can excel this Vetch for early cutting. **Sown in August or September**, at the rate of 40 to 50 lbs. per acre, mixed with a bushel of rye or wheat to furnish support for the vines of the Vetch, or in drills three feet apart, using about 30 lbs. per acre, it will furnish a **magnificent crop of green fodder by May**. If cut before coming into bloom, it immediately starts into growth, furnishing a second crop, which can be eaten off by sheep or hogs, or plowed under as green manure.

The **Washington Department of Agriculture** estimates the value of a plowed under crop of this Vetch as **equivalent to putting into the ground \$15 to \$25 worth of commercial fertilizers**. One important feature is that a sowing made in

August or September covers the ground before winter sets in and prevents washing of the soil during the winter and early spring, thus effecting a great saving of soluble mineral fertilizers contained in soil, which otherwise would wash or leach out. It can also be sown early in the spring, and will be ready to cut in the middle of July, the second growth affording excellent hog pasture during the summer. The yield of green forage varies from 10 to 15 tons per acre, equal to 3 or 4 tons when cured as dried hay. It is very nutritious, even more so than clover; is eaten with relish, and may be fed with safety to all kinds of stock. **By mail, pkt. 10c, lb. 30c, 4 lbs. 75c. By freight or express, per lb. 12c, 10 lbs. \$1.00, 20 lbs. \$1.50, per bu. 60 lbs. \$4.00.**

POTATO

Department.

Including Novelties, Specialties and Standard Varieties, comprising absolutely the best sorts in the country. No potato grower need look outside of our list for the best early, medium and late varieties.

EVERITT'S CHOICE.. Seed Potatoes

Are Famous Wherever Known.
They are the Leaders.

If there is one department of our business in which we excel more particularly than another, it is the Seed Potato Department. We have always made great specialties of Seed Potatoes. Although we do not introduce one-fourth as many varieties as do some other seedsmen, yet when we send out a new variety it goes out to find a welcome and a home with every grower. Our conservative course has gained for our house the confidence of potato raisers, and as a consequence our trade is not excelled in this line by any house

in the country. And in our success we have been instrumental in wonderfully increasing the value of the Potato crop for thousands of farmers all over the country.

Whatever careful selection and good cultivation have done in the way of improving the Potato, they have never been able to overcome the inclination to revert to its natural condition or "run out," and we find those old varieties, that a few years ago were our best potatoes, placed at the foot of the list, and in a few more years will be entirely out of cultivation. There is no exception to this rule. All varieties obey the law. If it were not in our power to create new varieties the Potato would soon be an extinct vegetable, and any farmer who continues cultivating a variety after it has begun to deteriorate does so at his loss.

There are new varieties being introduced every few years, which keeps the standard to its present high position, and occasionally a variety is brought out that is decidedly in advance of its predecessors. Every potato grower should test all the promising new kinds, and thus keep always in the front rank. The variety itself has more to do with the success of the crop than the manner of cutting the seed, planting or cultivation. This is a reliable statement that should be kept in mind by all cultivators.

WHY send to the far North for your SEED POTATOES? We pay the freight to Indianapolis, the center of the country, and can cheaply deliver to you from this point. See map on 2d cover page.

We save our customers freight on Northern Seed Potatoes.

Mixed Packages.

We are often asked if we will ship more than one variety of Potatoes in a barrel. We will do this with pleasure for our customers, and offer **Three Kinds, one bushel of each, at the 3 bu. rates of the respective varieties.**

Or, we will put up Peck lots, where 4 or more pecks are taken, at the bushel rates for the respective varieties.

Or, we will put up 1 lb. each of 4 or more varieties and send them at the 4-lb. rates.

We make these offers to our customers to encourage them

to order several varieties, so they can select the best for their particular farm. There is a great difference in varieties of potatoes, and no other crop responds so liberally to good seeds as potatoes, the seed oftentimes doubling the crop. Our varieties are unexcelled.

SILVER HILL POTATO.

OUR GREAT PREMIUM

This superb Medium Early Potato we introduced first in 1900, by sending $\frac{1}{2}$ lb. to each subscriber to our Monthly Magazine, Up-To-Date Farming and Gardening, and we are fortunate in having many very excellent reports to publish, received from our subscribers, while our subscribers are fortunate in having secured a start of one of the most valuable potatoes introduced in years, and which will result in materially increased prosperity on farms where grown.

The Silver Hill Potato is one of those good sensible varieties that adapt itself to general farming and will produce good results even under some neglect. Its great natural vigor is responsible for this. With good ground, good care and a good season, it will do wonders.

In season it is Medium Early; a variety that will mature in time to follow with a crop of wheat where this plan is practiced. The tubers grow of medium to large size and a great number in a hill; handsome to look upon. The shape is oblong to round; color white; eyes nearly even with the surface; a splendid keeper and of superior table qualities. We are highly gratified with the performance of this potato last year and congratulate each past and future customer on their great acquisition. Read a few reports taken at random from a very large number received:

My $\frac{1}{2}$ pound of Silver Hill Potatoes produced in all 32 potatoes weighing 14 pounds. There was only one or two small ones. Up-To-Date is or ought to be the farmer's guide as well as friend.

W. C. WARREN, Clipper, Ky.

I received two Silver Hill Potatoes from you. Their weight was 5 oz. Planted them on 25th of April and 16 came up in ten days from planting. Did not cultivate; kept grass and weeds pulled out with the hand. Dug them on the 10th of August, after vines had died and got 66 potatoes which weighed 25 pounds.

R. H. QUERRY, Oran, Mo.

I consider the Silver Hill Potato did remarkably well. From $\frac{1}{2}$ pound I raised 30 pounds, all marketable. I think it is the best potato I have ever raised.

W. T. STINNETT, Madisonville, Ky.

The corn did fine but was injured by a wind and hail storm. The melons were very nice, and we have about one-third of a bushel of fine potatoes from the one you sent.

DORA V. GALBRATH, Patterson, Ia.

Silver Hill Potatoes yielded 103 potatoes weighing 16 $\frac{1}{2}$ pounds; Yard Long Corn yielded 4 bushels, some of the ears measuring 13 inches. Eureka Watermelon and Garden Treasures all right.

A. LUKE ROOLS, Box 73, Marion, Ill.

I dug $\frac{1}{2}$ bushel of potatoes from the half pound you sent. The Yard Long Corn did well and the Eureka Watermelon was the sweetest we raised on our place. Everyone that ate them said they were the best melon they ever ate.

Mrs. Wm. DEFEW, Boone, Okla. Ter.

From two Silver Hill Potatoes you sent me raised $\frac{1}{2}$ bushel of fine potatoes. They are as good as I want. My Yard Long Corn is good; raised nearly 2 bushels.

HIRAM JONES, Soldier, Ky.

From the $\frac{1}{2}$ pound of Silver Hill Potatoes you sent I had 15 pounds. They are fine; will save them for seed. T. M. HICKS, New Carlisle, Ind.

We are very much pleased with Up-To-Date F. & G. The hints are so valuable and practicable. We have adopted several. I must say we were astonished at the quantity and quality

of seeds sent out in the Spring collection. We have had good success with them. The red peppers are immense. I believe they are the first ever grown here.

HENRY WOOD, Flesherton, Ont., Can.

I received one Silver Hill Potato and got 102 potatoes weighing 34 $\frac{3}{4}$ pounds. The Yard Long Corn did well.

E. L. GRUSTR, Fishertown, Pa.

I had eight hills of Silver Hill Potatoes and got 48 potatoes weighing 19 pounds. Only six that would not do for market. How is that for O. K. seeds? They are just fine; am going to save all for seed.

Mrs. VOHS, Nevada, Mo.

The bushel of Early Six-Weeks Potatoes yielded 38 bushels all told. The Yard Long Corn, 400 ears. The Silver Hill Potatoes, $\frac{1}{2}$ pound made 11 $\frac{1}{4}$ pounds. The watermelons were excellent and did well. I have no complaint to make on any of the seed that I received from you and would advise all that want good, reliable seed to send to J. A. Everitt.

JASPER WRIGHT, Van Wert, O.

I received 7 oz. of Silver Hill Potatoes from you, which I planted with my other truck and when dug in September measured a full peck, which I consider a wonderful yield.

C. WILBER, Dayton, Tenn.

In my neighborhood I am known as a potato crank; at least so my wife says, and she knows. When I saw the mention of the "Silver Hill" included in a premium offer with Up-To-Date, I wanted it. The paper was a surprise to me, as I soon found my first number of more value than the entire cost, and its visits afford me many hours of pleasure and profit. Of the potatoes I was as proud as a boy with his first pants. I planted them; they grow nicely; but lo! part of them blighted; yet I dug 11 $\frac{1}{2}$ pounds, or at the rate of 230 bushels per acre. I believe it will be valuable; the cooking qualities are O. K. All your seeds gave great satisfaction.

G. W. KNUCKLE, Adair, Ohio.

PRICE: By mail, 1 lb. 30c, 4 lbs. 75c. By freight or express, $\frac{1}{4}$ bu. 50c, $\frac{3}{4}$ bu. 75c, 1 bu. \$1.25, 2 $\frac{1}{2}$ bu. \$3.50, 5 bu. \$6.00.

BLIGHT PROOF EARLY OHIO.

Every Potato Grower knows the good old Early Ohio, which, next to the Early Rose, has been the most important variety of Potato cultivated in recent years. Nearly every grower also has suffered by blight of his potatoes, hence the grand triumph of producing a Blight Proof Early Ohio Potato by a Michigan grower, through the means of his wonderful discovery in Hybridization apparently contrary to all known laws, will be good news to the entire country.

This is the only one of the Ohio seedlings that is Blight Proof, and will grow and mature a profitable crop of early potatoes in defiance of ordinary laws and the most severe droughts. We offer the seed with this guarantee. This wonderful new potato retains all the strong points of the Early Ohio, shape, quality, etc., skin a deeper color, and the heaviest yielder of any early potato whatever during droughts. Last season the Blight Proof Ohio matured the same date of the Early Michigan, Early Harvest and Early Ohio, producing more than double the marketable tubers of the above, the Bliss Triumph, Howes Premium and Extra Early Pink Eye producing only one-third the marketable tubers of Blight Proof Ohio.

This Blight Proof Ohio can be cut to one eye and hills crowded in drills to secure heavy yields, and will grow on any soil where potatoes are grown, ready to eat as soon as the Early Ohio, although a few days later in maturing. Note affidavits below, than any of whom no more honorable citizens can be found.

"We enjoyed an hour Thursday in a field of Blight Proof Early Ohio Potatoes in getting a little insight into the work of a specialist in this line. The object of our visit was to inspect this potato. We find it to possess all the fine qualities of the Early Ohio, but it is much harder, and flourishes a luxurious growth of vines in spite of the drought, while side by side with it under same conditions the ordinary Early Ohio is entirely dead. The new potato is smooth, and will prove a favorite with the farmer and gardener as a table and market variety." *Pub.* Mich.

To whom it may concern: This is to certify that I worked in the above seed fields during the growth of the crops, doing a good share of the cultivation, and know the conditions to have been the same, and the superiority of the growth of the Blight Proof Ohio is not exaggerated by the photographs of same, the difference being readily seen at a distance of 40 rods. J. E. PENDILL, Mich.

To whom it may concern: This is to certify that I helped plant the potatoes in above views, and I know the conditions of seed and soil to have been the same, and that the superiority of the Blight Proof Ohio is fully as great as the photographs indicate. W. D. LACKEY, Mich.

I hereby certify that the above illustrations were copied from the original photographs as faithfully as it was possible for the artist to follow them; that the original photographs are in my possession, also the full addresses of the parties whose names are attached to the above reports. J. A. EVERITT, Seedsman.

The stock of this remarkable potato is so short that we seriously considered the advisability of offering it this year. We concluded, however, that there are many growers of early potatoes who would rather have a small start this year at a high price than to wait until next year and get them at a lower price. Also, the individual growers will make more from the small lots of seed in intensive cultivation than we would in field cultivation, thus more quickly getting this valuable variety into general cultivation. In March number of *Up-To-Date Farming and Gardening* we will print a valuable article on intensive potato cultivation that every potato grower should read. Published monthly at 50 cents a year.

REMEMBER, we guarantee the Blight Proof Ohio Potato to be proof against blight, and to produce a good, profitable

In considering how much you can afford to pay for a start of the seed of this Potato, please consider what you are liable to lose by blight and drought if you continue growing the old kinds.

crop of early Potatoes, even if the most severe drought prevails.

Price, ½ lb. 50c, 1 lb. 75c, 4 lbs. \$2.00, by mail. By freight or express, ¼ bu. \$2.50, ½ bu. \$5.00, 1 bu. \$10.00, 1 bbl. \$20.00.

Everitt's Early
Six-Weeks
Market

POTATO

Is Famous
Wherever
Known.

IT IS THE LEADER.

Still Unequaled. The Wonderful Six-Weeks Market Potato. Without exception the Earliest Potato in Existence and the Most Valuable for Market Gardeners, Truckers and all Early Market Purposes. A perfect Table Potato and a Wonderful Yields.

INTRODUCED BY US IN 1890.

Ready for Market in SIX WEEKS. Matures in 72 Days, two weeks ahead of any other variety, and has yielded at the rate of over 600 bushels per acre.

Others may equal it in size, quality or productiveness, but in earliness
EVERITT'S EARLY SIX-WEEKS MARKET IS UNAPPROACHED.

1ST. WEEK

2ND WEEK

3RD WEEK

4TH WEEK

Market Gardeners, Truckers and Others

Who grow potatoes for home or market will prize this potato ahead of all others on account of its *extreme earliness, good table qualities, fine size and shape, great productiveness and splendid keeping properties.* Just think of one variety of Potatoes combining all of these qualities in high degrees. We positively assert and have abundant and undoubted proofs that **Everitt's Early 6-Weeks Market Potatoes** do make good size merchantable tubers in 6 six weeks from planting.

We don't refer to a solitary instance. This potato can be depended upon for such results every time if planted when the growing season has arrived, and the weather is favorable. With unfavorable weather they will, of course, require longer. (Read the reports on following pages.) The potatoes cook fine and dry from the time they are large enough until late spring. Size is medium, skin light flesh color, shape like in illustration. They are perfect beauties, heavy yielders, and sure yielders.

We have had much experience with this potato and are prepared to state that

SUMMARY.

Size for use in 6 Weeks.

Ripen in 10 Weeks.

Yield 420 Bus. Per Acre.

Next Year 380 Bus. Per Acre.

2 Years Later 600 Bus. Per Acre.

A Record Unparalleled.

strange to relate, keeps sound, solid, and fresh late into the spring, equal to any late potato that we ever saw.

Taking all the good qualities of this potato into consideration, is it not a money variety for the market and a variety that will be prized by all lovers of early vegetables at home? There is not a more valuable variety in existence in our estimation. **It is worth its weight in gold for a start of seed.**

The Potatoes begin to form when the stalk is only 4 or 5 inches high. The tops and tubers grow rapidly. They grow so rapidly and mature so early that the potato bugs have little chance with them, making the crop, if planted early, before the young bugs become numerous. They yielded on the farm of the originator in Ohio 420 bus. per acre. Next year 380 bus. per acre, two years later over 600 bus. per acre. He raises them for early, medium and late crop, claiming they "fill the bill" better than any others. The originator says:

"Potatoes have been my favorite crop since I was a boy, and I always took great pleasure in seeing what good crops and large yields I could get, but never did I see a nicer Potato than this. I have raised a great

many to state that owing to their quick growth, escaping the drought, bugs, blight, etc., and extra yielding propensities they make larger average yields for the ordinary Potato grower than late varieties that oftentimes are left to take their chances against unfavorable influences. This potato,

5TH WEEK

**A CROP SIX WEEKS FROM PLANTING.
THIS IS NOT A FANCY PICTURE BUT AN ACTUAL REALITY.**

many kinds sent for the *earliest* in the catalogues, and have raised them from seed, and got some very good ones. But none that came up to my ideal of a perfect Potato until I originated this. I have now discarded all others, and raise this for *early and main crop, for market and home use*. I am fully convinced that I have at last produced the *best early potato in cultivation*. I think it combines more good qualities than any other variety in the world. I have given it a thorough trial, and it has proved itself superior to all other varieties."

In a careful comparative test with three other varieties, each of which have been claimed to be the earliest, the following results were obtained: *All were planted May 2*. Everitt's Six-Weeks Market matured in 72 days; yield, 420 bushels per acre. Stray Beauty or Bliss Triumph matured in 87 days; yield, 189 bushels per acre; Chas. Downing matured in 92 days; yield, 350 bushels per acre. Early Sunrise matured in 100 days; yield, 378 bushels per acre. This test shows our Early Six-Weeks Market potato to be fifteen days earlier than any of the above and far more productive.

READ HOW THIS POTATO IS LIKED BY ALL WHO GROW IT

"The Like was Never Seen Before."

We received a letter from our customer, John L. Saum, of Paulding County, Ohio, to the effect that he dug some Six-Weeks Market Potatoes forty days from planting. It occurred to us that it would be a good idea to have a disinterested party dig and send us some potatoes from which to make a photo-engraving for our catalogue. We wrote to him at once, and on August 25th we received the following letter:

Mr. J. A. EVERITT, Dear Sir: I send you to-day by freight the product of forty hills of Six-Weeks Potatoes. They were dug last night and this morning and grew in forty-three days. They were grown from one-eye seed. I have just begun farming on my own land, and am not fixed yet for pushing a crop of early potatoes. These were covered with a breaking plow and given very ordinary treatment. Think I can beat it next season. Several people who saw them were astonished. I expect to exhibit at our county fair. (See engraving on page 104.) JOHN L. SAUM.

We, the undersigned, do personally know the originator of EVERITT'S EARLY SIX-WEEKS MARKET POTATO, and of our own knowledge know that this variety will produce potatoes fit for the table in six weeks from planting, and that they are solid and mealy when boiled, and that they will mature in 72 days from planting. We consider them the earliest potato in the world, and if justice is done them they will be placed at the head of the list as the *earliest, finest table variety*, and the *largest cropper* of any early variety.

J. W. SHANKS, E. B. SMITH, R. BLAIR, V. WASHBURN, ELIZABETH WASHBURN, all of Athens Co., O.

I planted a few of the Six-Weeks Market Potato last season on black, sandy loam, without manure, and raised at the rate of 395 bushels per acre of the nicest potatoes I ever saw. They will produce potatoes for market in six weeks, and mature in 72 days. The potato bugs have no chance whatever with them. They are the largest cropper of all early kinds.

ELIZABETH WASHBURN, Athens Co., O.

The Everitt's Early Six-Weeks Market Potato is the most wonderful variety in the world, and combines more good qualities than any other variety in cultivation. This will surely be the gardeners' favorite on account of its earliness and other valuable qualities. The potatoes begin to set on almost as soon as the plants appear, and by the time the plants are as large as other early potatoes when tubers begin to set, these are ready for market. At six weeks from planting I have had them fit for table, and as fine, solid and mealy as ripe tubers. They are not troubled with the potato beetle.

JOHN WISE, Athens Co., O.

I know the originator of Everitt's Early Six-Weeks Market Potato, and helped to dig his crop this season, and I think they are the earliest potato in cultivation today. When the vines were about six inches high, I examined them and found potatoes as large as partridge eggs, and at six weeks from planting were as large as hen eggs. Will mature in 72 days and never rot. The yield was 380 bushels per acre, without manure.

J. E. SHANKS, Athens County, O.

One pound Early Six Weeks Market Potato yielded 147 pounds of fine, sound, smooth tubers.

Ripened in 75 days, and produced marketable potatoes in six weeks, as you claimed. This is the most valuable variety of potatoes ever introduced. R. TAYLOR, Ashland Co., Wis.

The Six-Weeks Market Potatoes take the cake. All the seeds I buy from J. A. Everitt beat the world. MRS. W. H. POWERS, Bradford Co., Pa.

I like the Six-Weeks Potatoes very much. I divided with my neighbors. One of them says they are the best he ever saw. They are excellent keepers. They are first-class in every respect. E. HARTMAN, Sutton Co., W. Va.

The Early Six-Weeks Potatoes did well with me. I could sell a carload for seed here, if I had them. JOHN B. COCHRAN, Jefferson Co., O.

You have got it this time—I mean the *best early* and the *earliest* potato in existence. We had the Early Six-Weeks Market Potato large enough for the table in six weeks from planting. They outyielded all our other varieties. AUGUST BROENKNER (Gardener), Allegan Co., Mich.

\$10 per bushel would not buy my Early Six-Weeks Market Potatoes if I could not replace them for less. They are the earliest of all, and a heavy yielder. I predict they will be universally grown by market gardeners for early, and those gardeners who get them first will reap handsome profits. JACOB B. STILLSON, Onondaga Co., N. Y.

My Early Six-Weeks Potatoes have proved to be as early as you represented them, and a fine yielder, sound, smooth and best quality. They are very valuable. C. E. WARD, Sullivan Co., Ind.

The Early Six-Weeks Market Potato was the best for yield and the earliest I had this season. They are one to two weeks earlier than the Early Ohio. N. NYEDAN, Marion Co., Ind.

Planted the Early Six-Weeks Market Potato May 3. They grow fine, and we had new potatoes cooked June 20. They are the earliest we ever saw. DANIEL DONOVAN, Carroll Co., Tenn.

Our Early Six-Weeks Market Potato produced over one hundred fine potatoes that made a bushel, measured. They are the earliest to make market potatoes, and the earliest to mature of any I ever saw. My crop is not for sale at any price. JOHN GILBERT, Meek Co., Va.

Twenty hills of Early Six-Weeks Market Potatoes yielded a heaped bushel. They bear out your claims for earliness, quality and productiveness. Thanks for calling my attention to them. EMIL LAURANCE, Worcester Co., Mass.

I would give hundreds of dollars to control the growing of the Early Six-Weeks Market Potato for this market, as they can be put on the market two weeks ahead of any other sort, which means hundreds of dollars' profit to a large grower. W. HENRY MORRIS, Cuyahoga Co., O.

'Tis now six weeks and five days since I planted the Six-Weeks Market Potatoes. They did not sprout very quick, but they have nice, large tubers on them. Are the earliest potato for this climate I ever saw. I thank you a thousand times. C. L. RICEL, Armstrong Co., Pa.

Out of seventeen kinds of potatoes planted, your Early Six-Weeks Market were superior to all, both in quality, size and earliness. I really think they are the best potato on earth. C. CARROLL, Pipestone Co., Minn.

The Six-Weeks Potatoes have done well for me. Last season, when nearly all kinds dried up, they gave me a good crop of fine, large potatoes, nearly a full yield, and tubers large, with very few small ones; quality excellent, very early; also they were awarded first prize at our fair, where many kinds competed.

J. W. BAKER, Bureau Co., Ill.

The Early Six-Weeks have done well for us. The only trouble is they come on first to eat, and we generally use them all up before others come.

C. C. SHAW, Licking Co., O.

The Early Six-Weeks are grand. We had fine potatoes in 6 weeks from planting; dry and mealy as old potatoes. Early Ohio came 3 weeks later.

L. S. JOHNSON, Clearfield Co., Pa.

You can not praise the Early Six-Weeks Market Potato too much. Gardeners should not think of doing without them. I dug 50 bushels of $\frac{1}{4}$ acre, beginning six weeks from planting, which averaged me 50c a peck. They are wonderful.

G. R. HIXON, Madison Co., Ill.

The Early Six-Weeks Market Potato is splendid. I find them the best table potato I have had since the Peachblow run out.

GEO. G. COLTON, Sac Co., Ia.

I consider the Early Six-Weeks Market Potato the earliest and the best potato I have ever raised.

G. SAMUEL MCKAY, Tipton Co., Ind.

The Early Six-Weeks Market Potato did exceedingly well; raised at the rate of 400 bushels per acre; some weighed $1\frac{1}{2}$ pounds. We think the cooking quality better than the Early Ohio, and they are earlier and better yielders.

S. HOFFMAN, Pictou Co., O.

Am well pleased with the Early Six-Weeks Market Potato. It is the very finest quality for table, a good cropper, free from rot and bugs.

A. E. STCALEY, Knox Co., Me.

The Early Six-Weeks Potatoes are all you claim for them. They are very early and good yielders. Planted them the 19th of April and the last of June (6 weeks) they were ready to dig, and good size, too; no marbles.

A. FEXTON, Monroe Co., N. Y.

The Early Six-Weeks Market is the best table potato in flavor I ever handled, and yield in abundance.

BENJ. GEMMERLING,

Licking Co., O.

The Early Six-Weeks Market Potato excels all. The tubers are larger, mature earlier, and in all respects are superior to others that I have tried.

B. P. JANNEY, D. C.

The Early Six-Weeks Market Potato did well in every respect. They are extra early, cook mealy, good yielders, of nice size, average $\frac{1}{2}$ pound. The 8 pounds bought of you yielded over five heaping bushel baskets.

GEO. W. RICHARDSON, Morrison Co., Minn.

Those Six-Weeks Market Potatoes are true to your statement. In just 6 weeks from planting dug good-sized potatoes.

E. W. ANTHONY, Houghton Co., Mich.

They are the best early potatoes, taking yield, size and quality into account, of any potato I have ever tested, and have tried nearly every kind I could hear of.

W. H. MILLER, Winnebago Co., Ill.

The Six-Weeks Market Potato made 50 bushels more per acre than the Ohio, our standard potato; am well pleased with them.

J. M. G. WATT, Douglas Co., Kas.

The Early Six-Weeks did fine and were fit to use two weeks before the Early Ohio.

W. A. TROP, Highland Co., O.

I am well pleased with the Six-Weeks Potato. If I was gardening I would surely buy seeds of you.

P. E. GENOWRY, Mo.

CAUTION Since we introduced our renowned Early Six-Weeks Market Potatoes some other parties have offered Potatoes under various names, "Early Market," "Five-Weeks Potato," "45-Day Potato," etc., or attached their name to it. Some of them use our description of Early Six-Weeks, others claim their potato is as good as our Six-Weeks. We wish it distinctly understood that we named and introduced this unequalled variety, and are headquarters for the genuine seed.

PRICE **WE ARE ABLE TO PUT THE PRICE THIS YEAR SO LOW THAT ALL WHO HAVE NOT GROWN THEM BEFORE CAN AFFORD TO PLANT LARGELY OF**

It is the best potato I ever saw, yields well, of good size, cooks up like balls of flour, and is delicious. I thank you for introducing so good a potato.

THOS. SINCOCK, Adams Co., Ill.

One peck of Six-Weeks Potatoes yielded $16\frac{1}{4}$ bushels of as fine potatoes as I ever saw. There is nothing in this section to come up to them, and they are ready sale at \$3.00 per bushel. I dug them 16th of June.

JOHN F. GREENVILLE, Niagara Co., N. Y.

From 19 pounds Six-Weeks Potatoes I raised 12 bushels of fine potatoes, at the rate of 165 bushels per acre; planted 3x3 feet, 2 eyes in a hill. We like them much as an early market sort.

J. C. ZIMMERMAN, Col. Co., O.

Six-Weeks Potatoes done very well. All the seed from you did well.

C. L. FOSTER, Knox Co., Me.

Six-Weeks Market Potatoes are very early and good yielders. I took them to Portage County Fair and received first premium for best early potatoes.

CHRIS. HECKER, Columbia Co., Wis.

I think the Early Six-Weeks Market Potato is the finest early potato I ever saw.

C. C. WEBER, Franklin Co., O.

The first year we planted the Six-Weeks Potatoes we had them large enough to use in 6 weeks from the planting. I planted these again the same year in July, and raised a second crop. A friend to whom I gave some says they are 10 days earlier than any other potato he ever tried. They are easily dug and have few small ones. They also can be kept longer without their vitality being weakened by sprouting. I kept some till July 9th, and the sprouts were only about 1 inch long. We thank you for introducing this new variety.

JOHN D. SAUM, Paulding Co., O.

The Early Six-Weeks Potatoes are all you claim for them. We had them in just seven weeks from planting. They were larger than a hen's egg at that time.

GEO. HAMILTON, Bureau Co., Ill.

Early Six-Weeks Potatoes have done very well considering our heavy clay soil. Much better than the early Ohio, which before was our best early potato.

JOHN LAWSON, Richland Co., O.

I sold Six-Weeks Market in June, planted in April, at 66 per pound. I am well pleased with them.

H. S. BROWN,

Pennington County, S. Dak.

Early Six-Weeks Potatoes are early, good yielders and the quality is first-class.

ENOCH BALD, Grant Co., Ind.

Early Six-Weeks Potatoes are very early and of excellent quality. I have none for sale at any price, as I will plant all. I consider them the best and earliest potato in our locality.

JAS. HUGHLY, Alle. Co., Pa.

Early Six-Weeks are all you claim for them. They are very early and good yielders. Planted 3d of May, the 20th of June were ready to dig. They are the best potato on earth.

CHAS. T. WALTZ, Lyncoming Co., Pa.

Our County Fair has just closed, and I must tell you what they done with the Six-Weeks Potato. I took all the premiums (two) in competition with many of the leading new kinds, and all fine at that. They were popular at our fair.

J. W. BAKER, Bureau Co., Ill.

If space would allow we could print 500 testimonials like the above, all endorsing our claims for the Great Everitt's Early Six-Weeks Market Potato.

EVERITT'S EARLY SIX-WEEKS MARKET POTATO, WHILE THOSE WHO HAVE GROWN THEM FOR SEVERAL YEARS CAN SEND FOR A CHANGE OF SEED. BY MAIL, POSTPAID, 1 LB. 25c, 4 LBS. 75c. BY FREIGHT OR EXPRESS, $\frac{1}{4}$ BU. 40c, $\frac{1}{2}$ BU. 75c, 1 BU. \$1.50, 3 BU. \$3.50, 6 BU. \$6.00. LARGER QUANTITIES AT \$1.00 A BU.

Don't conclude that the price is too high. You can not well pay too much for this potato. The price of the EARLY SIX-WEEKS MARKET is not likely to be very low in future years, as they come so early and command such a high price in market that very few are saved for seed.

DON'T RISK your crops on doubtful store seeds that may have been in Texas last year and Maine the year before—that may have been scorched in one store and stored in a damp cellar in another. They may be veritable tramp seeds, not able to find a resting-place heretofore, and which will cause you trouble and loss if you take them into your garden. **Plant the O. K. SEEDS, and your crops will be O. K.** Every Postoffice a branch store, where you can obtain the O. K. SEEDS.

You never put a finer potato on your table - Simply delicious.

EVERITT'S
GREAT NEW
WHITE MOUNTAIN
POTATO

ENGRAVED FOR J. A. EVERITT, SEEDSMAN
A FIT SUCCESSOR
TO OUR GREAT AND
WORLD-FAMOUS
GREEN MOUNTAIN

Third Year of Our Famous New White Mountain A FIT SUCCESSOR TO OUR GREAT GREEN MOUNTAIN POTATO

INTRODUCED 1899.

FOURTEEN years ago we introduced the great **GREEN MOUNTAIN POTATO**, which has been famous ever since. Famous for beauty, great productiveness and the superb cooking qualities loved by all users of this popular food. Probably no other potato is more generally grown at the present time than the Green Mountain, and although it has served the public these many years it still retains its original vigor to a great degree, and will be a good cropper for many years to come.

You can raise 300 bags of White Mountain Potatoes per acre.

tubers through to a perfect and bountiful harvest. (For preventing blight and bugs, the great enemies of the potato crop, read May issue of *Up-To-Date Farming and Gardening*, Monthly, 50c a year of us.) The tubers set close about the base of the plant and turn out clean at first effort.

This potato will astonish old potato growers in its yields and fine qualities and every person who is ambitious to make the most money out of his crop can not afford to let this year pass without obtaining seed of the New White Mountain.

I find after testing the **White Mountain Potato**, both for yield and quality, that it has great merit. They are the talk of this country around who have seen them. *It's a distinct new variety. It's the strongest grower I ever seen; growing away from blight and bugs and makes a crop when others fail.*

C. S. C.,
Huron Co., O.

I send you the following result of tests of 4 varieties of potatoes, all planted May 28, all harvested September 27. The yield is given at rate per acre. All had exactly the same treatment: Carman No. 3, 132½ bus.; Mayflower, 127½ bus.; Seneca Beauty, 167 bus.; **White Mountain, 243 bus.**

W. B. H.,
Huron Co., O.

We are not able to give a very favorable report of our test of potatoes for this year, owing to the very unfavorable weather. The **White Mountain** you will find in the list below. We will say, that so far as our test goes, your variety is promising. The tubers are uniform in size regular in shape, and do not show a tendency to become prongy. On the whole, I think that it is a promising variety. The 1898 tests follow. The yields are per acre:

Sir Walter Raleigh	126 Bus.
Sir William	145 "
Early Michigan	79 "
Rural New Yorker	96 "
Enormous	124 "
Early Rose	115 "
Maule's Early Thoroughbred	105 "
Carman No. 3	149 "
Bovee	122 "
White Mountain	158 "

W. J. GREEN,

Horticulturist of Ohio Agr. Experiment Station.

We want to call the attention of all the friends of the Green Mountain and others who are seeking for the best results in their potato crop, to our latest, newest and best variety, **THE WHITE MOUNTAIN**. A variety that is not excelled for handsome form, color and good cooking qualities and absolutely unapproached in yield, not excepting such well known favorites as Green Mountain, Rural New Yorker, Carmans, etc. In proof of our assertion we offer testimonials, below, from some well known people, which should carry deep conviction.

The **WHITE MOUNTAIN** is in season medium late and suited for main crop. The tubers are of medium to large size. We say, practically no small ones or sortings. Eyes even with surface, or slightly bulged above, which of itself is a good indication of a strong grower. Skin white with rich yellowish creamy cast, and considerably ruffled or netted. Experienced growers know that a potato with skin like this possesses superior cooking qualities. The flesh is as white as snow and cooks dry and mealy. The plant is a vigorous grower, and

W. B. Hall's yield was 243 bus. per acre. Next best was 167 bus. Almost 50 percent gained by planting White Mountain.

The **White Mountain Potato** was planted May 3, and dug September 10. It made a very large, vigorous growth, with thick stalk and stocky vines. The tubers were very compact in the hills and all large—no small ones at all. There was no record kept of the yields, I am very much pleased with the potato. There were 31 other varieties, mostly new, planted in the field, and none made a better showing or pleased me better than the **White Mountain**. This was one of the 52 varieties I showed at Wisconsin and Illinois State Fairs and it attracted much attention. L. L. O., Rock Co., Wis.

My trial of the **White Mountain Potato** was very satisfactory. The 6 tubers yielded me 4 bushels, with very common care and planted in the ordinary way. The quality is very fine. They have great merit and a great acquisition for potato growers.

S. J. A., Lorain Co., O.

The **White Mountain Potato** proved to be a very vigorous grower, produced smooth tubers of uniform size, while in yield and appearance compare very favorably with Rurals and Carmans.

DENNIS D. R., Huron Co., O.

Mr. B., who had in charge the test of **White Mountain Potato**, is in New York. The writer, however, saw the crop harvested. It was fine and of good quality. This variety was one of the largest yielders out of several varieties tested.

G. B. & Co.,

(Per Lawson), Rochester, N. Y.

Our 1900 crop was exceptionally fine and every person who orders **White Mountains** will receive beautiful stock to start with, and reap rich reward in the resulting crops.

Price, 1 lb. 25c, 4 lbs. 75c, by mail. By freighter express, ¼ bu. 35c, ½ bu. 65c, 1 bu. \$1.25, 2½ bu. \$2.75, 5 bu. \$5.00, 10 bu. \$9.00. Packages furnished free. See March issue of *Up-To-Date Farming and Gardening* for article on "Intensive Potato Farming."

EARLY EVERITT POTATO. THE GREAT EARLY CROPPER. — A GREAT MONEY MAKER.

The Early Everitt Potato is one of our great specialties, but on account of getting out a smaller Catalogue for a couple of years we did not have space to list it prominently. Yet notwithstanding this lack of publicity the demand has kept up, and all our customers still get the old time great, profitable results.

The Early Everitt is of the Early Rose type, and from our acquaintance with all the varieties now in cultivation, and for the guidance of our customers, we do not hesitate to state that our **EARLY EVERITT** is one of the **finest early potatoes now in cultivation**, coming 3 weeks after our **Early Six-Weeks Market**, and is so productive that it is planted by some large growers for both early and late crops. Its fine form is shown by the accompanying engraving; eyes even with the surface; color of skin, light pink. A most beautiful potato in shape and white, and of surpassing quality for the table. Growth strong and rapid, setting tubers very early, which attain a large size in a very short time, and ripen with the Early Rose. Tubers grow very large, frequently weighing over 2 pounds apiece. Yield astonishes old potato growers, who acknowledge they never had so productive an early potato. No grower who is ambitious to make the most money out of potatoes should fail to grow the **EARLY EVERITT POTATO**.

Below we print a few testimonials, which are only a few taken from hundreds that we have received praising this fine potato, but which lack of room prevents us from publishing:

From 1 lb. of Early Everitt Potatoes I raised 63 lbs. of fine tubers, many weighing over 1 lb. each, notwithstanding the unfavorable season (no rain from July 1st to 10th). I am very much pleased with them and will plant all next season as they appear to be exactly suited to our soil. — Mich. C. C. C.

The seed of Early Everitt Potatoes yielded 15 bus. My Green Mountains took first premium at our county fair over 10 varieties.

R. E. CHAMBERS, Owen Co., Ind.

The Early Everitt has proved to be a very fine potato, yielding with me as high as 1 bu. from 15 eyes of seed, or a bu. to the rod of row, or 800 bus. to the acre. I dug specimens to-day that weighed 2 lbs. each. — S. R. MURR, Juneau Co., Wis.

One lb. Early Everitt Potatoes yielded 2 bus. of as nice potatoes as I ever saw. Mrs. Raines thinks the quality better than the Early Rose. — Hendricks Co., Ind.

One tuber of Early Everitt Potatoes made 8 hills and raised 100 potatoes. Some weighed 3/4 lbs. each. — Albany Pross, Perry Co., Mo.

I planted the 1-4 lb. Early Everitt Potato on the 6th of July and dug them on the 1st of October. The weather was very dry through June, July and part of August. The ground had no manure for 6 years. I had 43 lbs.; one measured 20 inches around lengthwise and weighed 3 1/2 lbs. I shall keep them all to plant next year.

From 1-4 lb. of Early Everitt Potatoes I raised 20 lbs. of the nicest potatoes I ever saw. The Shepard Radish is the largest I ever saw. — A. F. HANN, Clinton Co., Ia.

From 2 hills of Everitt Potatoes, 3 eyes in a hill, I dug 30 lbs. of the highest quality. The lot. Early Rose would not have grown at all in this ground. — W. C. HIGGINS, near Wash. D. C. — MRS. A. B. BANNISTER, Lewis Co., Wash.

Price, by mail, postpaid, 1 lb. 25c, 4 lbs. 75c. By freight or express, 1/2 bu. 35c, 1 bu. \$1.25, 2 1/2 bu. \$2.75, 5 bu. \$5.00, 10 bu. \$9.00. Packages free.

In the following table is found the results of a test I made with 13 early varieties. All were planted on April 22.

Variety.	Time of Ripening.	Bu. per A.
1. Vick's Early Pride,	July 7,	231
2. Irish Cobbler,	July 8,	228
3. Early Harvest,	July 8,	237
4. Early Co. I Early,	July 10,	331
5. Early Thompson's Blue,	July 10,	131
6. Statesman,	July 10,	214
7. Early Ohio,	July 10,	214
8. Early Everitt,	July 10,	263
9. Early Rose,	July 10,	215
10. Old Dutch Rose,	July 13,	210
11. Vick's Early Excelsior,	July 13,	297
12. Michigan Early Rose,	July 29,	211
13. Early Wisconsin,	July 30,	297

A
WONDERFUL, LATE POTATO.
MAIN-CROP, GROWER IN THE U.S.
EVERY GROWER
MUST HAVE IT
AT ONCE.

A Very Popular Potato

CARMAN

No. 3.

CARMAN

No. 3

A Seedling from Seedlings and a distinct variety and New Type of Potatoes.

One of the latest of Mr. Carman's productions, and of its class (a late potato) he says *it is the greatest of all*. They are remarkable for thrifty growth and enormous yields of handsome, perfect tubers. The skin is white, flesh white and fine grained. They cook to perfection. They never grow prongy, but produce beautiful, shapely, bulky potatoes, the pride of every grower, dealer, shipper, or cook who handles them. They produce scarcely any small unmarketable tubers at all. The vines grow to a wonderful size, the stalks being as large around as a man's finger, with long spreading branches. The vines form a dense mat over the ground, and serve as a much as well as a thick covering of straw. If planted early, and the spring showery, they will soon produce so many vines as to defy later summer droughts. Some of the originator's claims for this Potato are as follows:

1. It is the handsomest large potato produced.
 2. It will outyield any other potato.
 3. Practically every potato of marketable size.
 4. Its table qualities are fully up to the highest standard. It has no hollow heart nor hard or dark spots. An investment in seed of this Potato will pay a bountiful dividend.
- Price, by mail, postpaid, 1 lb. 25c. 4 lbs. 75c. By freight or express, 1/2 bu. 40c. bu. \$1.25, 2 1/2 bu. \$2.75, 5 bu. \$5.00, 10 bu. \$9.00. Packages furnished free.**

THIS
POTATO
RECOMMENDS
ITSELF TO ALL.

ENGRAVED FOR J. A. EVERITT SEEDSMAN.

Miscellaneous Varieties —OF— SEED POTATOES.

Green Mountain.

The Greatest Yield ever made by any Potato—at the rate of 1,391½ bushels per acre—was grown of our Green Mountain Potato by the Editor of the Rural New Yorker.

The Greatest Price ever paid for any Potato we paid for this—viz., \$200.00 per barrel.

Introduced by us in 1885. It is still in the front ranks and held in high esteem by farmers in America and Europe.

Its handsome form, white skin and large size recommend it everywhere. The flesh is white and fine grained, cooks dry and mealy, and is of superior flavor. This is the case when first dug, and they retain their good cooking qualities and keep sound and perfect until the new crop comes again. **As a variety to keep for late spring use it has no equal.** Vines grow vigorously, foliage deep green, the tubers grow compactly in the hill, which is **completely crowded with fine, large potatoes.** They ripen in August if planted in April, and in the **important matter of productiveness they are perfectly marvelous.** This quality combined, as it is, with fine appearance and good table qualities, makes the **Green Mountain** one of the most valuable late varieties in the country.

The Green Mountain Potato surprised everybody in this section of country. They yield about double our other kinds, and are just right for fancy city trade. Bankers and merchants are having me fill their cellars at 10c to 20c per bu. above the market. I will grow no other for main crop until the Green Mountain runs out, then I hope you will have another to take its place.
S. E. GABLER, Hamilton Co., O.

The Green Mountain Potato is the best for the farmer, for market, and for table I ever saw. My neighbor, W. Gladwell, had a patch about 40x100 feet, and hills were alive with potatoes; the yield was at least 100 bushels from this small piece of ground. The people here never before saw such potatoes, and bought them for seed as fast as dug.
CHAS. MONTGOMERY, Marion Co., Ind.

The Green Mountain Potato is the best I ever tried, and they are the most profitable for the farmer to grow. Allen Avery dug my potatoes and he says they are the best he ever dug.
SABASKI BUTTER,
Marion Co., Ind.

The Green Mountain are the best and most profitable potatoes I ever raised. I harvested 250 bushels from one acre, and sold them all for seed to my neighbors at an extra price.
PARKER BROWN,
Marion Co., Ind.

I never before saw a potato that pleased me as well in all particulars as the Green Mountain. I will plant 50 bushels of them next year.
J. E. LERNOWER, Marion Co., Ind.

From the ¼ lb. Green Mountain Potatoes I raised 62 pounds. They are fine, large potatoes. The **YOUR LARGEST** weighed 9 lbs. I am exceedingly well pleased with them.
A. HUBER, Union Co., Pa.

The Green Mountains are the finest potatoes I ever saw. Some of them weigh 2 lbs. apiece. My neighbors thought I was foolish to buy the potatoes. Now I tell them they can have some at \$2 a pound. I think I can raise 50 or 60 bushels next year from 25 pounds of seed.
S. P. WHITMAN, Fulton Co., Ind.

From the ¼ lb. of Green Mountain Potatoes I raised 51 lbs. They are fine, large potatoes. **FOR YIELD THEY BEAT ANYTHING I EVER SAW.** They are solid, fine quality and mealy.
A. BYERS, Whitesides Co., Ill.

From ¾ ozs. Green Mountain Potatoes I raised 39 lbs. of fine potatoes. I think I could have raised 59 pounds, but I let one of my boys have five eyes, which he planted where it was too much shaded.
J. H. MEYER, Clarion Co., Pa.

From **TWO SMALL** Green Mountain Potatoes I raised 49 POUNDS of nice, large potatoes, the finest I ever saw. They were beauties.
E. SMITH, Herkimer Co., N. Y.

I consider the Green Mountain Potato did remarkably well considering our poor season. I cut the seed in ten pieces, and they grew nicely and produced 35 pounds of potatoes, all marketable. They are a more vigorous grower than the Burbank and hold their foliage better than the Blush, which is the most so of any kind I tried heretofore. **THEY ARE A VARIETY OF GREAT PROMISE.**
W. H. MORRIS, Adams Co., Ill.

Your Green Mountain Potato did splendidly. I planted one pound on new breaking and dug 68 pounds of good potatoes. I am well pleased with all your seeds.
M. PENTICO, Norton Co., Kan.

Price, 1 lb. 25c, 4 lbs. 65c, ¼ bu. 35c, bu. \$1.25, 2½ bu. \$2.75, 5 bu. \$5.00, 10 bu. \$9.00. Packages free.

Prices of Seed Potatoes are liable to change. Parties desiring to purchase large lots may write us for prices at the time.

ENGRAVED FOR J. A. EVERITT, SEEDSMAN

A Good Crop of Potatoes depends more on the VARIETY used for Seed than on any and all other conditions.

EARLY OHIO.

One of the most popular extra early sorts. Very valuable for market gardeners on account of its extreme earliness, also for fall and early winter use. It does not keep well late in the spring. Growth good size, quality excellent. Very productive for so early a potato. We sell large quantities of this variety.

Price, 1 lb. 25c, 4 lbs. 75c, ¼ bu. 35c, bu. \$1.25, 2½ bu. \$2.75, 5 bu. \$5.00, 10 bu. \$9.00. Packages free.

EARLY ROSE.

This was originally the grandest potato ever introduced, but it has lost much of its original vigor and vitality, until now it is grown to a very limited extent.

Price, 1 lb. 25c, 4 lbs. 65c, ¼ bu. 35c, bu. \$1.25, 2½ bu. \$2.75, 5 bu. \$5.00, 10 bu. \$9.00. Packages free.

Beauty of Hebron.

A popular early variety, largely grown and found on all markets, excellent table qualities, slightly earlier than Early Rose. The Beauty of Hebron Potato has been cultivated for many years, and has lost some of its original vigor. We advise a change to some of our new sorts.

Price, 1 lb. 25c, 4 lbs. 65c, ¼ bu. 35c, bu. \$1.25, 2½ bu. \$2.75, 5 bu. \$5.00, 10 bu. \$9.00. Packages free.

Hybridized Potato Seed.

I have the pleasure of offering a very choice strain of Potato Seed—the product of numerous hybridizations between many of the best new and old varieties in cultivation. Growing new sorts from the seed-ball seed is a very interesting employment for old or young. There is the widest range of difference in color, shape and general characteristics between the different seedlings; every one is more or less unlike every other. Great success has already attended the attempt to improve this valuable esculent, and the end is not yet—many varieties will yet be found which will bring a golden harvest to the fortunate growers, and prove of inestimable value to the world. We are always in the market to purchase Valuable New Varieties.

SEED BALLS.

Directions for planting, cultivating, etc., on each pkt.
Price, pkt. 15c, 2 for 25c, 5 for 50c.

WHITE VINELESS BUSH SWEET POTATO

The Greatest Sweet Potato. As easily grown as Irish Potatoes. Attaining size for market in 65 days, mature in 100 days, and yield 400 to 600 bushels per acre.

This white variety of **Vineless Sweet Potatoes** is even much superior to the yellow variety that has been largely sold the few past years in earliness, productiveness, size, shape and table quality. It is a perfect bush variety, with no inclination to run, the top resembling a bean bush very closely, allowing them to be cultivated with much less trouble than the old varieties of running vine Sweet Potatoes. The potatoes grow directly under the stalk and are easily lifted. They are most abundant bearers. The **White Vineless Sweet Potato** is not as particular as the Yellow Jersey regarding soil, hence adapted to grow on a greater variety of soils. As it is very early, it can be grown farther north. The skin is white, flesh sweet, dry and nutty when cooked.

FIELD OF VINELESS BUSH SWEET POTATOS.

They are also remarkable for keeping, requiring but little more care than Irish Potatoes if stored in a dry place away from frost.

The **White Vineless Sweet Potato** is the best dry weather potato. The vines stand up over the hill in a thick mass affording shade, and later a mulch over the hill where the potatoes grow. They grow right along in the hottest weather. This variety will reduce the labor of the large grower to produce a crop, thus adding to his profits, and afford a luxury to thousands of families for whom the old varieties are not available. In the south two crops a year can be grown.

PRICE—By mail, 1 lb. 35c, 4 lbs. \$1.00. By freight or express, $\frac{1}{2}$ bu. 75c, $\frac{1}{4}$ bu. \$1.50, 1 bu. \$2.50, 2 $\frac{1}{2}$ bu. \$5.50. We will exercise especial care in packing for shipment. Plants of the **White Vineless Sweet Potato**, ready about May 1st, 25 for 35c, 50 for 50c, by mail. By express, 100 plants 75c, 500 \$3.00, 1,000 \$5.00.

ONE HILL OF VINELESS BUSH SWEET POTATOS, SHOWING BEAUTIFUL SHAPE AND GREAT PRODUCTIVENESS.

We want this catalogue to equal five or more. That is, we want each thousand catalogues sent out to equal five thousand or more catalogues as usually sent out. If we can accomplish this, multiply

the results from each catalogue by five or more, don't you see that we make enormous saving in our expenses for catalogues, postage, mailing, etc., to do an equal business? This saving and more too we want to divide with you, and we want you to do a little work for us. We want you to see five or more of your neighbors and get their orders for seeds. Oh yes, you can - you have

several weeks to see them before planting time comes; but we want you to see them as soon as possible, and as there is money in it for you, your own interest demands that you do not delay. We will supply extra order sheets if requested.

"There are treats of many kinds,
But in all the world you'll find
Naught so good as what you've grown
In a garden of your own."

It means
comfort

in the Winter to
Plant O. K. Seeds
in the Spring.

See full Particulars on Page 21.

An earnest desire to better the condition of the many cultivators of the soil and make slow, laborious, disagreeable labor rapid, easy and pleasant; coupled with many hours of thought, labor and experiments, has resulted in the production of the **Man-Weight Machines**. We ask the careful consideration of every person who cultivates the ground to the contents of the next four pages. J. A. EVERITT, Seedsman, Inventor.

Some New Machines....

WHICH ABOLISH MUCH OF THE DRUDGERY OF CULTIVATING THE SOIL, MAKING SLOW, LABORIOUS, DISAGREEABLE LABOR RAPID, EASY AND PLEASANT.

MAN POWER WORK IS DONE ALMOST WITHOUT WORK.

EVERITT'S MAN-WEIGHT

Plow, Hoe, Cultivator, Drill, Etc., Single and Double Wheel,

ARE REVOLUTIONIZING HAND POWER CULTIVATION. MAKES KEEPING A HORSE AN UNNECESSARY EXPENSE IN MANY CASES.

Patented in United States, Canada, Great Britain, France, Germany, Austria and Belgium.

1 MAN-WEIGHT DOES THE WORK OF 10 MEN WITH HOES.

Slow and very laborious work with hoes. What gardener can afford to raise crops and sell them at prevailing low prices without a **Man-Weight** machine? Not one can afford to be without a complete outfit another year. It will soon pay for itself in saving of hand hire.

Good Points of Everitt's Man-Weight Cultivator not Possessed by any other Machine.

1. Man power is applied from the breast or other parts of the body.
2. The power is applied by a natural inclination of the body as for rest against any object.
3. Hand-cultivating work is done almost without work.
4. Big work is done with ease and comfort to the operator.
5. At the same time he can do more work in a garden or nursery, etc., without a horse than with one.
6. It does better work than a horse cultivator or any other hand cultivator.
7. Both hands are free to guide the tools around the plants.
8. Compared with others, man-power is multiplied many times.
9. Double the amount can be raised on a given piece of ground with this machine than with a horse machine.
10. The expense of keeping a horse can often be saved.
11. Plants can be cultivated oftener, and hence matured earlier, with a greater yield, with this machine than with any other. In this way the machine can be made to pay for itself several times every year.
12. A **Man-Weight** combined machine affords more separate tools and will do a greater variety of work than any other machine on the market.
13. You can better afford to pay \$25.00 for an **Up-to-Date Man-Weight Combination** than use any of the old style machines if you could get them for nothing.

Everitt's Man-Weight Farm and Garden Tools.

These great machines were invented by J. A. Everitt in 1891, and greatly improved since. The great advantage of this invention can be partly understood by studying the accompanying illustrations, but no person can

Everitt's Man-Weight marking out furrows. There are many jobs like this on every farm every year.

order for the first one we could make. Other gardeners at once acknowledged that it is just what they want, and many remarked that "if all gardeners knew of these machines they could not be made fast enough to supply the demand." A trial by any person will demonstrate the wonderful utility of these machines, and the person possessing them will make it impossible for his neighbors to compete with him in raising crops.

There are several features on the **Man-Weight Tools** which are novel, and make a tool vastly superior to any other hand power or horse machines:

We mention the push bar. In operation, the body is inclined forward, thus taking part of the weight of the body off the ground and directing it against the machine. In this way the machine is propelled by the weight of the body without any muscular exertion whatever, until you pass a certain point, when muscular effort begins. To push this machine across the

fully realize their grand advantages until he uses the machines. They are a great boon to all cultivators of the soil, and must be classed with the great inventions of the age, yet they are so simple that the natural question with every one is, "Why did I not think of that?" And so nicely do they fill a want existing with thousands of gardeners, nurserymen, seedsmen, florists and farmers that, after the first trial, they invariably conclude to "never do without them." The **Man-Weight Cultivators** are worth their weight in silver, if not in gold, to any one who cultivates the soil. All who have used the machines unanimously indorse them in the strongest language they know how to use. We have heard sensible, shrewd gardeners remark, "I would not sell mine for \$25.00;" "\$100.00 would not tempt me to do without it one season," etc. They are the only machines we know of that suggest sufficient merit and practical utility at first sight to sell without a trial. The first gardener who saw the machine at Indianapolis, gave his

Everitt's Man-Weight harrowing the ground.

The illustration above is of an old style rigid machine. Notice the strip of uncultivated ground left. The work is only one-quarter done; three-quarters must be done with the hoe. See the view on next page. The work is complete, no hoeing after the **Man-Weight** machines.

field, in ordinary work, is no harder than to walk across empty handed. Your weight does the work. Without this machine all your weight is wasted on the ground.

By means of the push bar we propel and guide the machine, hence the drag bars can be hinged and are adjustable in all directions; thus the tools attached to the drag bars perform the work just as a weeder would in your hands, working all around the plants. It is the only cultivator made that does complete work at one operation. No after-hoeing is required.

As is evident, the power obtained, the amount of work that can be done and the quality of the work, are far in excess of any other hand tool, nearly equaling horse power in quantity, while the quality of the work is far superior to horse power work.

In an orchard where a horse can not be taken, and where the work is too heavy for other hand machines, these fill the bill to perfection. By one man pulling ahead, sod or other ground can be broken up:

EVERITT'S MAN - WEIGHT Single Wheel Hoe, Cultivator, Rake, Plow, Etc.

(See First Illustration, Page 115.)

This tool is intended to mark out, cover and pulverize, and to cultivate, hoe or plow on one side of a row at a time. It is capable of doing a great variety of work that will suggest itself to every one who possesses it. It is strong, durable and well made throughout; all iron and steel, except the tips of the handles and propelling bar, from the rear of wheel back. The wheel and all the parts are the same as enter into the make-up of our other machines, and if it is desired to obtain the Double Wheel Combined Machine, we will send the necessary parts to add to the Single Wheel Machine for \$2.50 and a seed drill for \$4.00 more. The seed drill always is used with the Double Wheel Machine. We always advise the purchase of the Combined Single and Double Wheel Machine described below. The expense is but a trifle more and it covers a much wider range of work. The wheels on all Man-Weight Machines are 18 inches high.

A Single Wheel Machine weighs but 35 pounds, and can be sent by express anywhere at very small cost, or three of them can be sent by freight for the same cost as one machine. An advantage is gained if several club together and make one shipment. Each Single Wheel Machine is furnished with one plow, No. E 18; one broad hoe, No. 16; one 2-inch cultivating tooth, No. A 20; one No. 23 L, one No. 24 and wrench. (See page 117.)

PRICE, - - \$6.00.

EVERITT'S MAN-WEIGHT Combined Single and Double Wheel Hoe, Cultivator, Rake, Plow, Etc.

This machine is intended to straddle the row and cultivate, hoe or plow both sides at once. For this purpose it is a wonderful improvement over all other machines constructed for this purpose.

All other man-power tools heretofore constructed did not admit of adjustability as required as the work progressed, but if the rows were crooked or plants scattering, it would destroy them; also with them you could do only partial work, requiring after-hoeing to cut out the weeds between the hills in the row. Our machines admit of perfect adjustability; every inch of surface

Everitt's Man-Weight Drill, and showing the five sets of tools sent with a Combined Machine.

can be stirred between the rows and between the plants in the row. Every cultivator of the soil will appreciate this. It can also be used with one wheel and two drag bars, or two wheels and one drag bar at pleasure. It is capable of doing almost every variety of work imaginable, and will save more time and hard work on the farm than almost any other tool. It is well made and weighs about 50 pounds. Two machines can be shipped by freight for the same cost as one. With each machine we send a pair of plows, a pair of broad shovels, a pair of 2-inch shovels, a pair of 2 wing shovels, and a pair of rakes or harrows. All other parts can be attached, but come extra, and are sent only when ordered.

PRICE, - - \$8.00.

Everitt's Man-Weight Hoeing Hill Plants.

EVERITT'S MAN-WEIGHT DRILL.

A Drill that will plant seeds just as desired is a most important machine for every farmer, gardener and trucker. Our Drill is capable of the greatest variety of work, from sowing in a continuous row to planting in hills 3, 6, 12, 24 and 48 inches apart.

Our Drill has been greatly improved over the first patterns, in fact, entirely reconstructed. It is much simpler, and all the weak parts strengthened. As now constructed, with reasonable care it will last many years and be a constant source of profit and satisfaction to the user. With the Man-Weight Drill a great saving of seed is effected over hand planting, besides putting the seed in straight rows so the plants may be the most economically cultivated. Where the plants are wanted to stand at regular intervals apart the Man-Weight Drill puts the seed at the exact spot. Small farmers can plant their corn with this machine, thus saving the expense of buying a corn drill.

To change from drilling to hilling any distance apart requires but a moment. The machine is thrown out of gear and the flow of seed stopped by simply pulling one cord. The seed is covered, the soil firmed over it and the next row marked all at one operation. The wheels on all our Drills and Cultivators are eighteen inches high, placed twelve inches apart, insuring a steady movement even over ground moderately smooth. The weight of the machine resting on the wheels is only a few pounds and it can be moved easily over very sandy ground. The Man-Weight Drill is the best, and when the propelling features are considered, it is easily far ahead of all competing machines.

Price of Drill, no Cultivating Attachments, \$8.00.

Combined Cultivator and Drill, \$12.00. (A Grand Combination.)

A combined Man-Weight Drill, Hoe, Cultivator, Harrow, Plow, etc., single and double wheel, with all combinations, is the most valuable machine any farmer or gardener can own and will be almost his constant companion from spring until fall. It combines many machines in one.

All machines, Cultivators and Drills are now provided with the improved bent push bar. This push bar can be dropped one-fourth way around, thus allowing the operator to walk beside the row instead of astride, and is a great advantage in tall plants or when plants are wet.

We furnish two each Nos. A 20 and 24, 1 each Nos. 16, 17, E16, E18, 23 L and 23 R with a Combined Machine. 1 each Nos. A 20, 17, E18, 23 L and 24 with a Single Machine. Besides the attachments regularly furnished with the machines, we can furnish a number of extra attachments, as illustrated. The value of some of these attachments every farmer or gardener who has used them on large horse cultivators will understand.

PRICE LIST OF ATTACHMENTS.

In the list R stands for right, L for left.	If by freight or express.	If by mail, add for postage.
Nos. 22 or 23.....		Not made—now

" 32, Onion Set Harvester.....	75c "	"
No. 30 Gang Bar fitted with three 1 inch Shovels or three 2 inch Shovels, each.....		\$0.75
Same, with both sets of Shovels, each.....		1.12
No. 31, SHIELDS. These protect the plants and regulate the amount of earth thrown to them, each.....		.25
No. 33, LEAF GUARD, each 20c; by mail, 40c.		

All extra attachments sent by freight or express at expense of purchaser for transportation, unless postage is added as above. It will be well to decide what you want and have them sent with your machine.

In ordering any of the above, please state plainly what you want and give shipping instructions. Send sufficient postage if wanted by mail.

25 PER CENT. DISCOUNT will be allowed from all prices on **Man-Weight Machines** and extras (except no discount is allowed on postage for delivering). This offer means that you may take off 1-4 from the prices quoted. Surely you will not now think seriously of buying any other style of Man Power Cultivator or Drill.

Parties desiring further particulars before purchasing may send for our Catalogue of Man-Weight Machines.

LITTLE DEMONS THAT DESTROY OUR CROPS

Good bye! ye bugs, ye crawling devils,
Who oft have brought us many evils;
Your absence now may give some room
For better things, in years to come.

A high authority estimates that \$300,-
000,000 worth of crops are destroyed
in the United States each year by
bugs, worms and fungi. Only a
small part of this loss would
result, if some safe, cheap,
simple and effective ma-
chine was available to ap-
ply the remedies.

We have the Ma-
chine in our
**ELECTRIC
SPRAYER**

THE ONLY ONE THAT SPRAYS UPWARD.

Your crops cost you much to plant and cultivate. Will you now
leave them for myriads of insects to destroy?

Off the Earth.

All other machines have their objections. **This is Perfection. Perfection in Quantity and Quality of Work**, as well as the **Ease and Economy** of doing it. Read this Catalogue carefully, yet all that we say for this remarkable little machine will not convince you so completely as the machine itself.

Do You like an Easy Way to do a Disagreeable Job?

There are similar machines on the market, but none other that will do all your work. Read on and you will see. Killing the bugs by the old ways is about the most disagreeable job on the farm and is often-
times neglected. With the **Electric Bug Exterminator**, however, all this is changed. It now becomes one of the preferred jobs, an easy and pleasant task. Boys will think it fun to go out and kill the bugs with this machine. All the hard work is removed, as the machine weighs only a pound and about a pound more when filled ready for use. Contrast this with the old sprinkling can, bucket or even Knapsack sprayer. Truly a revolution has been worked.

Any liquid poison can be used in the **Electric Bug Exterminator**. The popular poison is Paris Green. The operation is so exceedingly simple as to recommend itself to every person. One pound of poison is sufficient for two acres of potatoes a season. The mixing is done in the machine. No extra vessels are required. There is no danger if the machine is left lying around. Stock cannot get at the poison and it will not spill out if left in any position.

Plants are never burned nor damaged if sprayed with this machine. The spray is so fine and it covers so evenly that no damage can result, but every bug is killed with the great-
est dispatch.

Single and Double Tube Sprayer.

Our Electric Sprayer is made in both tin and brass; single and double tube styles. Both are effective for all purposes, and we don't consider the double tube any more desirable than the single tube, while the chances for accidents to the machine are doubled. Many inexperienced people, at first, labor under a false idea, thinking that the fine spray and amount of material used cannot do the work. A trial, however, convinces them to the contrary, as it is not the great amount of poison that is used, but the thorough, even distribution, forced to every part of the plant, that makes the work so effective.

See here, Good Friend! If you grow crops that are troubled by insects; if you raise stock, such as cattle, hogs and poultry that are bothered by flies, lice, etc., you need this machine and we guarantee if you have it you will use it and save many times its cost. Remember, if you buy any one of the many other styles you can do only partial work with them, hence realize only a part of the benefits of this little Machine.

AGENTS WANTED.

An agency for our goods is worth as much as the salary of your county officials. We can keep you employed the year around. We are willing to pay agents who are honest, faithful, industrious and obtain satisfactory business for our house a salary after they have proven their worth.

DOUBLE
TUBE
ELECTRIC
SPRAYER.

Used on potatoes where the bugs were very bad; results were very good. T. P. Clark, Seneca, Ill.

Used on potatoes and cabbage with as good results as I could wish. W. R. McLean, Kully Chaha, I. T.

The demand for this Sprayer is enormous. It is an absolute necessity for every family in the country or town after once its merits are known. See elsewhere for uses.

Used on chrysanthemums, roses, etc., with results "finer than silk." J. C. Smith, Huntsville, Ala.

Results extra good. W. A. Lee, Owenstown, Ky.

Results killed the bugs outright. The machine: all right. Would not part with her for ten times the price.

E. M. Houser, Murphysboro, Ill.

Results very satisfactory. It is the best thing of the kind I have ever seen; it is so light and handy. Richard C. Blake, Bayliss, Ill.

Don't put off getting a machine until your crop is half ruined. Begin early. With the Electric Bug Exterminator you can kill the hard shell potato bugs as readily as the soft ones. By beginning early you save the trouble of killing millions later, and all the vitality of your crop is saved. You should not let another hour pass without this machine on the place.

This Farmer is not Up-To-Date.

ONE OF THE OLD WAYS.

ble in using expensive poisons on their flowers and plants.

HOW DOES THIS STRIKE YOU? OUR ELECTRIC SPRAYER

is the only one that sprays upward successfully. It is patented and others can not accomplish this feat, unless they infringe our patents. Suppose you buy one of the other styles and you want to spray some bushes, plum, or other small trees, or your chicken roost, you will find you can not do it.

Would it not be wise to buy the perfect all-round machine at the start?

THE Electric Bug Exterminator

IS THE BEST MACHINE For expelling and destroying Potato Bugs, Cabbage, Currant, Tomato, Tobacco and Cotton Worms, Plum

Curculies, Codling Moth and Canker Worms; Raspberry, Strawberry, Pear and Rose Slugs; Striped Flea Beetle, Cucumber and Melon Beetle, Cattle, Horse, Hog and Hen Lice, Clothes Moth, Dog Fleas. It will also prevent Mildew on Grapes, Plums, Apples, Peaches, Cherries, Berries, Cotton and all kinds of fruit and vegetables when the proper remedies are applied with this machine.

The saving of material with this machine over any other will quickly pay for it many times. Florists will find it invaluable on their flowers and plants.

THE NEW WAY.

Showing Faulty Styles of Sprayers. Don't Buy any of These.

Here we show other styles of sprayers that will only spray downward. They are shown at a less angle than our ELECTRIC on the preceding page, but you will notice the liquid departs from the lower end of the tube long before the supply is exhausted, and no spray can be produced as the tube must be in the liquid. In contrast with these, see our machine on the preceding page. It is constructed so it will spray until not more than a spoonful is left. This feature is well worth your consideration when selecting a machine, and you will be wise not to buy any but an ELECTRIC MACHINE. See also next page, Spraying in trees.

CAUTION. Any Sprayer with an air chamber with tapering sides like shown in our ELECTRIC, attached to any kind of a reservoir, infringes our patents. Or a reservoir, like shown in our ELECTRIC, attached by any of its sides to any kind of an air chamber, infringes our patents.

We warn all agents, dealers and consumers to be careful in buying any machine similar to ours. There are many infringements on the market. We can look to the manufacturer, seller or user of an infringing machine for royalty and damages. We mention the following that have come to our notice as infringements: Aspinwall, Klondyke, or Little Klondyke, Tornado, Allred, Eureka, Faultless and Little Giant. There is only one safe plan. Buy the machine that has a recognized standing—one that the United States Government recognizes as entitled to its protection and encouragement. This is our ELECTRIC. By doing this you get the only perfect machine on the market.

Does Spraying Pay?

SPRAYED POTATOES, 291 BUSHELS PER ACRE.

UNSPRAYED POTATOES, 99½ BUS. PER ACRE.

also true of other crops, especially fruits. Sprayed fruit yields more and sells better.

COST ONLY A TRIFLE, BUT IS WORTH:

For killing bugs, worms, fungi, etc., on your currants, gooseberries and other small fruit.....	\$ 80.00
For saving your cucumber, melon, squash and other vine crops.....	100.00
For insuring a bountiful crop and the choicest quality of plums, apples, cherries, peaches, etc.	200.00
For the beautiful roses, flowers, shrubs, etc., growing on the lawn with perfect blooms and foliage.....	15.00
Saved the potato crop and doubled the yield over what it would have been if old methods had been followed.....	300.00
Increased the return from your cows by keeping the flies off.....	100.00
Increased the egg production of your hens by killing the lice, to the amount of.....	45.00
Benefited your hogs by spraying them when needed, and which would otherwise have been neglected.....	50.00
By spraying disinfectants around the premises you escaped diseases and doctor bills to the amount of.....	25.00
General comfort to yourself, your family and your stock, and peace of mind you enjoy when you know your work is well done—too much to calculate.....	

Total..... \$915 00

All resulting from the trifling investment for one tin machine or slightly more for a brass one.

JUST THINK OF IT!

Why wear your life out dragging a load of poison over your fields through the hot sun, when you can take a pound of poison in your pocket, a bucket of water in your hand, and go out and kill the bugs on a whole field of potatoes or other crops? Put the poison up in little packages, like doctors' powders, and empty in can as needed.

Will these reports convince you?

The sprayer did the business to perfection. When I received the machine the potatoes were large and in full blossom. Once going over killed every one and I have not sprayed them since.

J. W. BAKER, Tiskilwa, Ill.
I sprayed my potatoes with the Electric Bug Exterminator at 9 o'clock and by 3 o'clock in the afternoon there was not a living bug in the patch.

FRANK DOHERTY, JR.,

So. Boardman, Mich.

I sold about 150 of your Bug Exterminators this season. I sold them under a guarantee and have not had one complaint. I think I can sell 1,000 of them next season. If you need any testimonials I can send you a hundred from my customers.

I. T. ALLEN, Bluffton, Ind.

I sold 30 of your Electric Bug Exterminators last season and the people like them fine. I expect to sell more this season.

D. C. THOMPSON, Peak's Mills, Ky.

Electric Bug Exterminators gave good satisfaction last year and are the best thing of the kind in the market. I will need more this year.

H. C. SHEPHERD, Worthington, Minn.

The sample Electric Bug Exterminator received and sold. I herewith order some more and want exclusive agency here.

THOMAS FIREBAUGH, Ogden, Ill.

I sent a friend over into Schuykill Co. and he sold 22 Exterminators in two days. The machines speak for themselves.

CHAS. J. CHRISTMAN,

Strausstown, Berks Co., Pa.

Sample you sent of your Electric Bug Exterminator arrived O. K. Please ship me 1 dozen at once. It is just the thing I want. They will sell.

C. A. SMITH, Oakley, Kansas.

The only one
that sprays
upward.

LOOK
ON THIS
Picture

This man bought an Electric Sprayer and our Extension handle. He can now spray his tall trees as well as low bushes, plants, etc. Surely there is no more valuable machine on the farm and it cost the least.

Electric Sprayer with Extension Handle.

This handle can be used on all our Sprayers, but can not be used on any other style because they will not spray upward.

I have tried the Exterminator and find it O. K. You may send me 1/2 dozen more by first express.

E. VICTOR, Fort Branch, Ind.

The Electric Bug Exterminator works like a charm. A number of my neighbors have seen it and they say they must have one.

M. BRIGHAM, Alldine, Ind.

Results, death to the bugs.

JOHN Q. SELBY, Glenelg, Md.

Your Electric Bug Exterminator received, and it is one of the greatest inventions of the age. It works so easy and with such rapidity. I sold three this afternoon and know I can sell many more. They are wanted right away, and with a few to test it I will have no trouble to sell a good many. Send me 1/2 dozen right away.

MRS. ROBERT SAMUEL, Poplar Plains, Ky.

I received the Bug Exterminator and am well pleased with it. I am sixty years old and treated 12 acres of potatoes in 2 1/2 days, taking my time to it. It beats the best \$50.00 cart sprayer I ever saw.

JOHN H. REYNOLDS, Wagners Landing, Ill.

Used on potatoes and cabbage; results, a success. The machine is all O. K.

CHAS. WILSON, New Florence, Mo.

Some of the uses for the ELECTRIC BUG EXTERMINATOR.

ON SMALL TREES

W. B. Atwood, horticulturist, entomologist, and mycologist of Virginia Agricultural Experiment Station, says: "We have used it in the greenhouse and also on outdoor work to some considerable extent and find it a most useful small machine for atomizing decoctions of tobacco, spraying poisonous mixtures or pure kerosene oil. In fact in using the latter, I think it is the best device I have ever seen."

The machine is capable of doing all work on plants, bushes or trees under ten feet high, but is not intended to spray large trees, except when supplied with our extension handle. (See another page.)

Perhaps there is no other crop on which injurious insects work so great havoc as on the potato crop. To grow a crop of potatoes the farmer must make up his mind to wage a continuous war against the bugs from the time the potatoes appear at the surface of the ground

until the crop is matured. Many plans have been followed and many machines invented, all of them very laborious and extravagant in the material used. It was not till the invention of the Electric Bug Exterminating machine that the labor feature could be eliminated to such an extent that now killing bugs on the potato patch is one of the preferred jobs, consequently it

will not be neglected, while the matter of expense for material is reduced to a mere trifle. A pound of paris green will poison the bugs on ten acres of potatoes. You will say "impossible," but we assure you a trial will convince. To illustrate: last year one of our skeptical customers insisted on giving each hill two or three sprays, but the super bell rang when he had a couple of rows to do. These he hurried over and gave only one spray, according to directions, and as he related, the bugs were killed the same as on the others.

For green house work it is invaluable. The spray is expelled with such force as to reach all parts of the plants, and the mist even rises up under the leaves and floats almost like smoke depositing on every part of the plant. On account of its great economy of materials used, it recommends itself for applying expensive insecticides.

Hens can not produce eggs and lice at the same time. How many farmers who keep a flock of hens make an effort to keep them free from lice? What untold miseries our poor dumb brutes suffer from fleas, lice and flies, mainly because their masters are thoughtless of their comfort. Hundreds of people pity an animal that may be injured, but it does not occur to them other animals over which they have dominion are suffering torments. It is an easy and

quite inexpensive matter to eradicate the lice from the

PRICE for the Electric Bug Exterminator or sprayer, the only perfect, all around machine of this class made: **TIN**, each 50 cts., 1/2 doz. \$2.00, per doz. \$4.00, either single or double Tube.

BRASS, each \$1.00, 1/2 doz. \$3.50, per doz. \$7.00, either single or double Tube.

We have a special Express rate that allows us to prepay single machines to any Express Office for 25 cts. each. We advise customers to remit this extra, unless going with other goods.

chicken house by applying Leake's Lice Exterminator with one of these machines. We sell both articles. Another matter that the humane person will think about is to protect his cows, horses, dogs, etc., from flies, fleas and mosquitoes. It can be done with our Fly-Fuma applied with the Electric Bug Exterminator. (See other pages of this catalogue.)

Besides the uses every day, or nearly every hour, this machine will be the housewife's friend for sprinkling her clothes, flowers, floors, etc. A separate machine should be kept for these purposes. In fact it is indispensable in every home, whether in town or country.

SPRINKLES THE CLOTHES

and economically. A weak solution of paris green is used, about 1/2 teaspoonful of green to a quart of water. The Electric Bug Exterminator forces the fine spray to every part of the plants and quickly rids them of all pests. Whenever introduced in tobacco-growing sections the demand is very large.

It will be the means of giving comfort to people and animals as well as protecting the animals and crops and thus increase the profits in all directions.

THE ELECTRIC BUG EXTERMINATORS OR SPRAYERS are made in Tin and Brass. We also make them in Single and Double Tube styles. It is the only machine that will do all your work. If you buy another style you can do only partial work.

Every person possessing this machine will pick it up every day and use it. It will be the constant companion of every farmer, gardener, trucker, poultryman and fruit grower. A grand machine for spraying rose bushes, flowers and shrubbery on every lawn.

The tube from can is exposed so that it can be instantly cleaned if it clogs.

Our machines are patented May 17, 1898, and March 7, 1899. You need have no fear to buy and use them.

We guarantee every machine to be all we claim. Full directions sent with each machine.

I saw my neighbor, Mr. Rose, have one of your Bug Exterminators and like it so well I have purchased one for myself. Am greatly pleased with it, as it does good work.

CARL ANDREW, Norwood, Ind.

Bug Exterminator received. I have tried it on my mules for flies and think it will pay me to use it for that purpose alone. It is larger than I expected it to be and makes the finest spray of anything of the kind I have ever used.

S. LOCKBAUM, Alvin, Texas.

Result: killed every bug.

W. W. OVERMAN, Afton, Ohio.

Results satisfactory. I got the machine a little too late for this season's crops, especially small fruits—will be all right for next season.

A. W. PREDMORE, Marathon, Ohio.

Results good. I am pleased with the Sprayer. It does not waste the poison. We will not do without one.

W. L. NIPPER, Sanborn, Ill.

CHASING THE FLIES

Outside of the potato crop, this grand little machine's next field of greatest usefulness is in killing the tobacco worms. It is of immense value to tobacco growers, allowing them to spray their crops rapidly, thoroughly

KILLING TOBACCO WORMS.

ON SMALL FRUITS

NEW NATIONAL BROADCAST SEEDER.

Combines every good feature of every other Broadcast Seed Sower and is distinct and superior in many respects. The cheapest, simplest, strongest, most durable and most accurate and handsome Seeder made.

We have manufactured Broadcast Seed Sowers for many years, but only recently it occurred to us that we could improve these ma-

It will sow Wheat, Rye, Oats, Rice, Flax, Millet, Turnip Seed, Clover Seed, Grass Seed, including Light Grasses—in fact, all kinds of Seed—broadcast. Also plaster, Fertilizer, Salt, Ashes, Etc.

chines very materially over the styles in general use and afford to sell them at a greatly reduced price. After numerous attempts and the expenditure of much money, we believe we have produced a machine as nearly perfect as it is possible to make, with the fewest wearing parts, insuring long life, and so accurately made that it runs almost without an effort. Ball bearings are used wherever possible.

In the NEW NATIONAL we have one cog wheel 7 inches in diameter and a small pinion. In the old style machines four cog wheels were employed, and they frequently wore out or broke. The frame is so constructed that it allows the minimum of weight with greatest strength and rigidity. The feed is from the center of the bottom and the bottom is beveled to run the seed out very clean.

The NEW NATIONAL is the handsomest as well as the best machine on the market. *It will sow at a row Wheat or Rye, 50 feet; Buckwheat, 45 feet; Flax Seed, Clover or Millet, 36 feet; Grass Seed, 20 to 36 feet; other seeds, etc., according to their nature and condition. Will also sow Plaster Fertilizers, Salt, Ashes, Lime, etc. Full directions with each machine.*

This is an age of improvement, progress and keen competition. Farmers must have the best machines or they will be hopelessly lost in the race. They need this NATIONAL machine on account of the seed it will save, the superior work it will do, as well as the ease of doing it, and cheaper price. Many up-to-date farmers will lay aside their old machines and buy this up-to-date machine on sight.

WARRANTED TO GIVE ENTIRE SATISFACTION.

Price, each \$1.50, 1 dozen \$5.40, per dozen \$10.80. For 50c extra we will deliver single machines by mail or express.

DO YOU WANT TO MAKE SOME MONEY? Just think of 1 dozen of the best and handsomest seeders ever made for \$10.80 (less than \$1.00 each). One person in each neighborhood can do a good business selling these machines. This is our lowest wholesale price.

INVENTED AND MANUFACTURED ONLY BY

J. A. EVERITT, Seedsman,
Indianapolis, Ind., U. S. A.

Up-To-Date Adjustable Weeder.

Farmers, Truckers and Planters, have you given the subject of frequent and shallow cultivation due consideration? Are you aware that this method is recommended by leading agriculturists who have tested it thoroughly, and when once begun will be always practiced? Garden crops, farm crops, and in fact all crops that require summer cultivation by horse power can be most economically handled with an **Up-To-Date Adjustable Weeder**.

This machine has been thoroughly tested and we offer it as the best weeder on the market without any exception, and at a price that is very moderate. The **Up-To-Date Weeder** is the only one that is adjustable to depth and width. It can be used as a shallow cultivator working close to the plants, until the crops mature, long after other weeders are laid aside. This frequent cultivation provides a mulch of fine earth that holds and absorbs moisture. The depth of cut is regulated by the wheel in front. It has no shaft that will prevent working close to the fence. **It will**

not clog. The long teeth are so curved and placed that clogging is impossible. For deep work it can be weighted down to 150 pounds. It is stronger than any other weeder and it adapts itself better to uneven surfaces.

Weeds need not be the great pest any more. The **Up-to-Date Weeder** will kill them off as rapidly and effectually as careful hoeing. Begin using this machine as soon as the weeds start after planting and repeat as often as necessary until the crop is matured, depending on the season. Success attends those cultivators who are quick to adopt such valuable Up-to-

Date machines. Every farmer will have one in a few years. Will you get yours now and reap the few years and suffer the loss? The machine costs for itself more than once in a season's work. 12 to 15 acres in a day with one horse. A boy can handle

Narrowed to
2½ Feet.

Price
\$8.00.

Expanded to
7½ Feet.

benefits or put it off a but little and will pay 15 acres can be cultivated. It is very valuable in preparing soil for cow peas, rape, turnips, etc., in corn.

Dear Sirs:—The Adjustable Weeder is far superior to a Straight Frame Weeder and will do better work over hollow furrows, ridges, uneven surface and stony ground.

J. J. COMSTOCK, East Lynne, Conn.

Gentlemen:—When I read the testimonials of others regarding your Adjustable Weeder, I feel as though I should like to send you mine, but can not write one strong enough, so just fix one to suit yourselves. I think your Weeder the best on the market, and it has given me the best of satisfaction. WM. M. CARTER, Meshoppen.

Gentlemen:—I have used the Weeder this spring in my cotton, before and after my cotton came up, and I find it to be the finest implement I ever saw in a cotton field. I can harrow twenty acres a day with all ease. I am running it now in my corn middles, and it is doing fine work. The Weeder being adjustable can be used all through the year. I think it is just the implement for the last cultivation of corn. From what I know of mine I would not take \$25.00 and be without one. S. P. CHRISTOPHER, Bishop, Ga.

We have just seen a customer of ours, who bought one of your Adjustable Weeders, who said there is no comparison between your Adjustable Weeder and a Straight Frame. He has cultivated his cotton and corn crops with it, even to laying by, and by using it has the best crop of corn in the section. _____, County, Ala.

I am more than pleased with the Adjustable Weeder I bought of you last spring. Have used it on corn, peas and potatoes with the best results. I went over my corn twice a week until it was a foot high, using no other implement (not even a hand hoe), and the ground is comparatively free from weeds. Would not be without it for twice the cost.

GEO. A. NEWELL, Windham, Me.

The Adjustable Weeder purchased of you last season has proven to be all that you claimed for it, and I find it a good substitute for the Brush Harrow for seeding down land to grass. It will certainly save its cost in one season as a Weeder, as it does its work quickly, thoroughly, and with less damage to plant life than any tool I have ever used. G. L. LIBBEY, Pleasantdale, Me.

Since writing you on the 1st I have given the Weeder further trial, and will say that you can not have it back. Can't keep house without it. A neighbor borrowed it yesterday and returned it this morning with orders to get him one. Therefore please send another at once.

E. A. SMITH, Heart Lake, Pa.

The Adjustable Weeder which we bought of your agent, A. F. Young, last April, is the best tool of the kind we have ever used.

DRAKE BROS., Vegetable and Fruit Growers, Volant, Pa.

Price only \$8.00 Each.

YOU'VE WANTED IT A THOUSAND TIMES **THE EUREKA KITCHEN GARDEN AND HOT BED SEED DRILL.**

It will sow and cover Beets, Cabbage, Carrots, Celery, Lettuce, Onions, Radishes, Spinach, Turnips and all such seeds with the greatest regularity. The quality of work equals that done with the costly machines and is infinitely better and faster than hand work.

Have You a Kitchen Garden?

Don't try to do without this little planter another season. Your garden will smile approbation all through the season if you use the **EUREKA**.

Have You a Hot Bed?

This drill you must have. It is the **only** machine suited to sow in a hot bed. Sows up close to the sides in straight rows. Sows the smallest packet of seeds as well as a large bulk. This Drill is not a toy, but a strong, practicable machine that will last many years. Don't buy a similar machine, that has the opening plow in front of the machine. You can not get near the sides of a hot bed nor close up to the fence. Neither does it cover the seed. It will be an aggravation rather than a labor-saving machine, as we offer.

By using this Drill you save seed, you save time, you stand in an upright position, the work is easy, you get a better stand, you get better plants

Price is only \$1.00.

Delivered by express, 50 cents extra.

Wholesale price \$6.00 per dozen.

FORCE FEED.

UNIVERSAL POWDER DISTRIBUTOR.

The machine can be readily understood by the illustration, with the following explanations: It consists of a receptacle for the powder with perforated bottom, attached to a handle and hinged as shown. In operation an upward swing of the machine has the effect of tipping the can up at the bottom and down at the top until its movement is arrested by the block on the handle. (See white line around can.) The stoppage is very sudden and the effect is, all the powder is thrown away from the perforated bottom toward the top of the can. Immediately following this movement, and of its own accord, the can reverses and drops back into its natural position, stopping very suddenly as it strikes the lower end of the handle. The result is, the powder is discharged in the most effective manner, spreading well over the plants. The agitation of the powder in the can prevents it from packing on the bottom, and if any coarse particles are contained they do not materially interfere with the discharge of the fine particles until all is used. With the **UNIVERSAL POWDER DISTRIBUTOR** the work on potatoes and similar crops is done as rapidly as the operator walks. To illustrate, if you can make the movements with your hand as rapidly as you step, which is easy enough, it is evident how rapidly the work can be done. **Price, each 50c, \$3.00 per dozen. For 25c extra we will deliver to any express office.**

NONE SUCH SIFTER.

For applying Powdered Insecticide, Lime, Plaster, Etc.

The best Sifter made. Made on the only correct principle that insures a uniform distribution of any dry, fine powder, with very little work and will not clog. Fig. 1 shows the inside bottom with a few fairly large perforations. Fig. 2 shows the bottom with very fine perforations, except a large one in the center to allow any coarse particles to pass out. The perforations in each of these bottoms are so evenly balanced that the upper one never allows so much material to go on the bottom as to clog it, making the work easy and reliable. The bottom is so shaped as to spread the powder, thus covering large plants with one movement. This machine and the one above are not intended to do away with my Electric (Liquid) Bug Exterminator, or Sprayer, as I always recommend that machine where liquids can be used. Some people, however, prefer to use dry material, and on every farm are some crops that must be treated dry, like cabbage for cabbage worms, vine crops for the striped bugs which can not be poisoned with Paris Green. Vine crops can be saved by applying the article listed on next page, "Ferto Insectono;" this will either kill the bugs or drive them away.

Price, 35c each, \$2.50 per dozen.
Agents wanted to sell our Manufactured Articles. They are strictly Up-To-Date, and can be sold on every farm. Address,

J. A. EVERITT, Seedsman,
Inventor and Manufacturer, INDIANAPOLIS, IND.

Fig. 2.

Ferto-Insectono.

The Great Fertilizer and Insecticide.

Its Uses and How to Use It.

WHAT IS FERTO-INSECTONO?

It is an inexpensive dark powder, as fine as flour, and extremely diffusible and completely covers with a fine dust all plants over which it is sprinkled. While powerful in its effects, it will not injure the plant or the leaves in the slightest degree, and is perfectly harmless to the person handling it.

AS AN INSECTICIDE.

It is an absolute annihilator of all insects, bugs or beetles that prey on vegetation. Positively kills Potato Bugs, Squash Bugs, Pumpkin Bugs, Melon Bugs, Currant Worms, Cabbage Worms, etc. It will kill all kinds of creeping things that eat the leaves of vegetables or plants. It is the cheapest insecticide on the market.

HOW TO APPLY.

Any way to insure an even and thorough distribution on all the plants and leaves. We manufacture two machines (see page 124), which are very fine for applying "Ferto-Insectono" and other dry insecticides. It may be applied with a bellows, or even with a small bag made of coarse muslin. Put the powder in the bag and shake over the plants.

A GOOD CROP OF CABBAGE

Or any other vegetables can not be obtained, no matter how good your soil and seed may be, or how favorable the weather, or how much care and labor you spend on them, unless the vines and leaves are kept vigorous and healthy. Such a condition can not be kept up unless all insects and bugs are destroyed as fast as they appear. The reason is obvious: Plants and fruit trees breathe through their leaves, and the leaves are as essential to the development of the plant or trees as are the roots. Any cause that injures the leaves hurts the plant, and that which destroys the foliage destroys the root also. Therefore, it is necessary that the vines and trees be kept growing, and free from the ravages of insects and bugs.

THE POTATO BUG

Is the greatest enemy the potato grower has. He has a good mouth, with upper and under jaws, and eats the leaves with a relish. "Ferto-Insectono" sprin-

kled on the leaves kills him with expedition and dispatch. Three crops of eggs are laid each year. Prompt action is therefore necessary. Just as soon as the potato bug makes his appearance, dust the vines thoroughly and carefully with "Ferto-Insectono." Kill off the first arrivals, and you may not have any further trouble. The same course should be pursued in the cases of other pests.

THE MELON, CUCUMBER OR VINE BUG

Can surely be exterminated and your crops completely saved by using "Ferto-Insectono." Every person who has had experience with these dreaded pests, knows that prompt action is the only salvation for the crops. If "Ferto-Insectono" is 200 miles away your crops are doomed; hence, prepare in advance. Be watchful, and the moment they appear take the remedy to the field and you can treat your crops so quickly that no damage will result. Perfectly harmless to persons handling it, and harmless when used on cabbages and other edible crops.

FERTO-INSECTONO AS A FERTILIZER.

This chemical compound possesses the quality of extracting the ammonia from the atmosphere as the wind passes over the plants to which it has been applied. This ammonia combines with the powder and forms a sulphate of ammonia which is a powerful stimulant to vegetable growth. When we speak of stimulant don't think the plant or ground will be left in a worse condition when the effect has passed away. This is not the case. The properties are all taken from the air and the young growing plants are actually fed, nourished, assisted to send their roots deeper into the soil, and the tops higher in the air. The benefit is permanent, hastening maturity and increasing production.

"Ferto-Insectono" is peculiarly valuable in dry seasons, as it attracts and holds moisture.

"Ferto-Insectono" can be used as a fertilizer (outside of its value as an insecticide) and five times its cost realized in improvements of the crops. Farmers and gardeners, keep this in mind, and it may induce you to use it **early and liberally**, and thus give you double benefits in saving your crops from the insects, and increasing productiveness.

The Cheapest Insecticide on the Market, and Doubly Valuable as a Fertilizer. Price

In 5 lb. Packages, 20c Each.

In 10 lb. Packages, 35c Each.

A MERCIFUL MAN IS MERCIFUL TO HIS BEAST.

FLY FUMA

Is a liquid preparation which, when applied to any animal in the form of a spray, or rubbed on with a brush or cloth, will protect the animal from the attacks of Flies of all kinds, Mosquitoes, Gnats, Fleas, etc. It is

A POSITIVE PROTECTION.

It has been thoroughly tested and gives satisfaction. The time it affords protection varies under different conditions of weather. If cows are treated in the morning before milking, it affords an absolute protection during milking and the greater part of the day. Toward evening its effect will have diminished, so as to require

another application before milking. We guarantee where Fly Fuma has been applied, a fly or other insect will not stay a moment, whether on a Cow, Horse, Dog or on inanimate objects. Sprayed on the stable walls and ceiling, the flies will all leave as fast as they can find a hole to get out. One-fifth cent a day protects an animal, and in the case of cows they will return the investment many fold by the increased flow of milk in fly-time.

Your Horse will serve you far better and not try your patience. Fly Fuma will save you repairs on harness and vehicles; save shoeing, as horses will not stamp their shoes off chasing the flies. Fly Fuma may save a runaway and your life, if used on your horse.

Fly Fuma is a great disinfectant. It keeps your animals healthy. Prevents spread of disease. Cures mange on dogs, cats, etc. A few drops rubbed on a few times is sufficient. Cures skin diseases. Heals sores. Cures scratches and other leg and foot troubles in horses by rubbing in well. Applied to the walls and ceilings of stables where there are myriads of flies, they leave instantly. Use on fattening hogs in fly-time.

The best way to apply is with our Electric Bug Exterminator or Sprayer. See pages 118 to 121.

TWO RIVER STOCK FARM,
P. O. BOX 345.

NASHVILLE, TENN., May 27, 1898.

J. A. Everitt, Esq.:

DEAR SIR—I used Fly Fuma last year on 50 cows in dairy. I am now using it with perfect success. The cows like it, will stand quietly and await their turns. One man with Bug Exterminator will go over the entire herd in 10 minutes. The cows, after it is used, look as if they had been well groomed. By using night and morning the cows are not troubled with flies at all. I also use it on horses with fine results and found it one of the best things for sore shoulders and all harness galls I ever saw. If you can get a prescription that will keep flies out of the dairy, and will not taint milk and butter, you will deserve the acknowledged thanks of every dairyman. My cows are shouting your praises on all sides now. I neglected to say I used Fly Fuma on dogs for fleas and on chickens for lice with perfect success. Hoping to hear from you soon, I remain,

Yours truly,

FRANK MCGAVOCK.

Mr. McGavock buys a supply of Fly Fuma every year since sending this report.

Agents wanted. Fly Fuma is one of the best articles for agents to handle. See terms on page 21 of this catalogue.

LACEY, MISS., May 26, 1898.

Fly Fuma and the Electric Bug Exterminator knock the horn and horse flies sky high. Before I used Fly Fuma my cows came in off the range just covered with both horn and horse flies. Since using it they come in as clean as they go out, while other stock is in misery all the time. I would not part with the Exterminator for twice its cost, as I consider it one of the most essential implements about the barn.

JAMES A. FAIBORE.

The demand for FLY FUMA increases each year. As the people learn that there is a remedy and protection from the torments of flies, mosquitoes, etc., they quickly resort to its use. Before rendering an opinion on Fly Fuma, try it a week or two. Don't expect perfect results immediately. Your animals may not appear to appreciate it at first, as they will switch and stamp from force of habit.

Price, by express or freight, 1 quart 40c, 1 gal. \$1.00, 5 gals. \$4.00.

EVAPORATING NEST EGGS

\$1.00 a dozen by express. Big thing for agents.

That kill lice. Keep your fowls healthy. Do not freeze or rot. This is our Evaporating Nest Egg. One under the setting hen will absolutely insure the hen, nest, and chicks free from lice, and bring a better hatch. Placed in the hen house will clear it of lice in short order. No trouble to use. Looks exactly like a real egg. Always at work for an entire year.

J. A. EVERITT, Seedsman, Indianapolis, Ind.

LEAKE'S LICE EXTERMINATOR

Will surely destroy Lice, Mites and Fleas in houses, on chickens and all other animals. No poultry or stock raiser can afford to be without it another day.

WHAT CUSTOMERS SAY.

I could not believe without a trial that lice and mites can be so easily killed.
An absolute exterminator of the tormentors of chickens.

The immediate increase in egg production made the investment very profitable.

My feathered friends all go to bed happy to-night, after using Leake's Lice Exterminator.

My hen house was so foul with lice and mites that every time I went in to gather the eggs my body would be almost covered with them. I tried many remedies, but none successfully, until I used Leake's Lice Exterminator. It works like magic.

By treating the nest with Leake's Lice Exterminator, our setting hens no longer leave their nests before bringing out the chickens.

There is nothing else that pays so well on the farm as chickens, and they paid only half until we used Leake's Lice Exterminator.

I would not do without it if it cost \$5.00 per gallon.

It is a grand good thing.

Next morning there was not a living louse in the house.

It salivates the lice.

We could not keep house without it.

We can not express our satisfaction. Lice and mites can not live after it is applied.

After using Leake's Lice Exterminator poultry-raising was doubly profitable.

Lice and mites are greater enemies to poultry-raisers than cholera, roup, etc. In fact, other diseases are often the result of lice previously existing to torment the fowl and get it out of condition, when it is an easy prey for disease. Leake's Lice Exterminator is an infallible remedy, and every poultry and stock-raiser should always keep it on the place.

Full directions on each package. No trouble to apply. Perfectly safe.

We manufacture a machine called the **ELECTRIC BUG EXTERMINATOR**, which affords the simplest and most economical means of applying Leake's Lice Exterminator. It also is the greatest machine on earth for exterminating bugs, worms, etc.

The machine mentioned above is not absolutely necessary to apply Leake's Lice Exterminator, but we recommend it highly. It can be used almost daily on any farm for all kinds of insect killing, putting Fly Fume on Cows, horses, etc.

Price, 1 qt. 40c, 1 gal. \$1.00, 5 gals. \$4.00.

2 or 3 Dozen

Eggs will pay for a quart of LEAKE'S LICE EXTERMINATOR, which if used will cause your hens to lay many extra dozens for you.

Will throw any kind of spray from the finest dew deposit to a continuous stream 30 feet high.

\$5.00.

"OUR BEST"

COMPRESSED AIR SPRAYER.

This New Sprayer is made of heavy galvanized iron, nicely finished, with air pump attached, also safety valve to prevent over-pressure, and is furnished with hose extension pipe and nozzles. The nozzle on the hose can be screwed on extension pipe when desired to spray trees or at a distance. The can is filled one-half or two-thirds full of water or liquids, and the air is pumped in, which only takes about a half minute and it will force out the entire contents. After the air is pumped in no more labor is required, except opening the valve and directing the spray.

"OUR BEST" COMPRESSED AIR SPRAYER

Is adapted to the greatest variety of work. We mention some of its uses as follows:

TREES—It will spray tall trees, and all that is necessary is to hold the hose with extension pipe to carry the stream in any direction.

No Work Required

except to pump the air in, when the machine does the work to the greatest perfection.

PRICE, \$5.00 each, \$37.50 a dozen. 1/3 dozen or more at same rate. We give no further discount on the dozen price.

SPECIAL OFFER—To introduce "Our Best" Compressed Air Sprayer quickly in many localities, we will send the first one to any neighborhood, all charges paid, for the price, \$5.00, and will give the purchaser agency, which will be very profitable. After your neighbors see one of these machines in use, they will buy through you until all are supplied.

WHITEWASHING—Fences, Buildings, Walls, Poultry-houses, etc. It will put on any thickness desired, and with amazing rapidity.

FIRES—Can be quickly put out, and for this purpose it can always be kept ready, when not otherwise in use, with air pumped up and filled with the following mixture, 1/2 lb. baking soda to 2 gallons of water. Throw this mixture directly on the fire, and it creates a gas that will smother the fire.

GREENHOUSES—This Sprayer is better than any other in the Greenhouse. It sprays under the leaves and forces to all parts of the plant, doing the work very quickly.

BUGS, WORMS, Etc., on Potatoes, Tobacco, Trees, Flowers, Grapevines, and on other crops, can be quickly, cheaply and effectively destroyed. Different nozzles are used for making fine or coarse sprays.

Extension Pipe extra, 35c each.

Are a _____ of equal merit from a Practical
farmer's and Gardener's standpoint?

Answer. **NO.**

Is there one Farmers' and Gardeners' Paper better, more abundant
in instructions and helps than any other?

Answer. **YES.**

That paper is

Up-To-Date Farming and Gardening,

J. A. EVERITT, Publisher, Indianapolis, Ind.

Seeds are absolutely necessary for successful farming and gardening, but people can learn things about how to make the most from seeds. There are things being discovered every year and month, and new better ways of doing things. This is just the reason why we are publishing this month-gazette. There is a variety of vegetables, flowers, grass, clover, grain listed in this gazette, that you can learn how to better add, or dispose of for more profit and protection, if you read **Up-To-Date Farming and Gardening** next year.

mean exactly what. The paper is right here in our office, where we are filling hundreds every day, and in communication with farmers and gardeners in nearly every part of the country. We know of their successes, failures, and why they succeed, or why they do not succeed, and from our experience we know the best and up-to-date farm methods for the country. You don't need to take time for the value of the paper entirely. Obtain a sample for the asking,

but we don't want you to put the important matter of your subscription off until you neglect it entirely, for we want to send you *many* good things through **Up-To-Date** in 1901.

We want every customer of our house to be a reader of this paper. But if you are not a customer of our house you ought to be a subscriber to this paper.

SUBSCRIPTION

PRICE

**With Premium
50 Cents a Year,**

and as a premium you may select any five (5) packets of seeds that you desire from this catalogue. They may be of vegetables or flowers or farm seeds, but our offer refers to packets only, not to ounces or larger quantities.

SEEDS FREE: If you will make up a club of four subscribers on above offer (\$2.00,) we will send an extra subscription and lot of seeds free, or five subscriptions and seeds for the price of four.

Subscription price without premiums,

10/2) Years for 50 Cents, Five (5) Years for \$1.00,

**190/1) as a club of two subscribers one (1) year each for 50 cents, or a club of
10/1) rs one (1) year each for \$1.00.**

**Options in space provided for them on order sheet. List packets of seeds at regular place
don't carry out the value.**
